Institutions should assess whether male and female athletes in sports at comparable levels of competition are afforded approximately the same opportunities to obtain scholarships. Where the sports offered or the levels of competition differ for male and female students, the institution should assess its athletic scholarship program to determine whether overall opportunities to receive athletic scholarships are roughly proportionate to the number of students of each sex participating in intercollegiate athletics.

If an educational institution decides not to make an overall proportionate allocation of athletic scholarships on the basis of sex, and thus, decides to award such scholarships by other means such as applying general standards to applicants of both sexes, institutions should determine whether the standards used to award scholarships are neutral, *i.e.* based on criteria which do not inherently disadvantage members of either sex. There are a number of "neutral" standards which might be used including financial need, athletic proficiency or a combination of both. For example, an institution may wish to award its athletic scholarships to all applicants on the basis of need after a determination of a certain level of athletic proficiency. This would be permissible even if its results in a pattern of award which differs from the relative levels of interests or participation of men and women students so long as the initial determination of athletic proficiency is based on neutral standards. However, if such standards are not neutral in substance or in application then different standards would have to be developed and the use of the discriminatory standard discontinued. For example, when "ability" is used as a basis for scholarship award and the

range of ability in a particular sport, at the time, differs widely between the sexes, separate norms must be developed for each sex.

AVAILABILITY OF ASSISTANCE

We in the Office for Civil Rights will be pleased to do everything possible to assist school officials to meet their Title IX responsibilities. The names, addresses and telephone numbers of Regional Offices for Civil Rights are attached.

PETER E. HOLMES.

NATIONAL ADVISORY COUNCIL ON EDUCATION PROFESSIONS DEVELOPMENT

Meeting

Notice is hereby given, pursuant to Section 10(a)(2), Public Law 92–463, that the next meeting of the National Advisory Council on Education Professions Development will be held on Wednesday, December 3, 1975, 9 a.m. to 5 p.m., Thursday, December 4, 1975, 9 a.m. to 5 p.m., and Friday, December 5, 1975, 9 a.m. to 12 noon, local time, at the Huntington-Sheraton Hotel, Pasadena, California.

The National Advisory Council on Education Professions Development is established under Section 502 of the Education Professions Development Act (Public Law 90–35). The Council is charged with the review of the Education Professions Development Act and of all other Federal programs for the training and development of educational personnel.

The meeting of the Council is open to the public. The proposed agenda includes discussion of the Federal role and legislative proposals concerning education professions development, progress reports on Competency-Based Teacher Education, Mainstreaming, and Educational Technology, as well as a tour of alternative schools in the Pasadena area.

Since the meeting on Thursday, December 4, 1975 involves site visits to alternative schools, members of the public planning to attend must provide their own transportation and should give advance notice of their intention to attend the meeting by calling the Council (202–382–8712) or by mail no later than Monday, December 1, 1975.

Records are kept of all Council proceedings and are available for public inspection at the Council offices, located at 1111 20th Street, NW., Suite 306, Washington, D.C. 20036.

Signed at Washington, D.C. on November 4, 1975.

GEORGE E. ARNSTEIN,
Executive Director.

Office of Education

OFFICE OF PLANNING, BUDGETING, AND EVALUATION

Statement of Organization, Functions, and Delegations of Authority

Part 2 (Office of Education), Section 2–B, Organization and Functions, of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare is hereby amended as follows:

The statement published in the FEDERAL REGISTER on November 21, 1973, at 38 FR 32154 under the heading "Office of Planning, Office of Planning, Budgeting, and Evaluation" is deleted in its entirety, and a new statement is added to read as follows:

OFFICE OF PLANNING, BUDGETING, AND EVALUATION

The Office of Planning, Budgeting, and Evaluation plans and evaluates overall Office programs and provides guidance and coordination for bureau and staff office program planning, budgeting and evaluation. Prepares special studies necessary for the planning of educational policies, and provides advice on formulation of office policies, legislative proposals, and types of information to be collected to evaluate effect of Federal Educational programs.

Division of Elementary and Secondary Programs. Is responsible for evaluating the effectiveness of Office of Education programs in the area of elementary and secondary education. Designs and directs major national evaluation studies and develops program policy recommendations on the basis of the studies. Develops evaluation standards and models for use by the States and local educational agencies in evaluating programs supported by Title I of the Elementary and Secondary Education Act. Identifies and packages exemplary educational practices and products, tests them, and recommends them for dissemination. Analyzes proposed Office of Education operational planning system objectives and monitors their implementation. Reviews materials submitted for five-year program and financial plan to assure incorporation of the latest evaluation information. Prepares analysis papers supporting the planning-programming-budgeting system.

Division of Postsecondary Programs. Is responsible for evaluating the effectiveness of Office of Education programs in the area of postsecondary and international education. Designs and directs major national evaluation studies and develops program policy recommendations on the basis of the studies. Analyzes proposed Office of Education operational planning system objectives and monitors their implementation. Reviews materials submitted for five-year program and financial plan to assure incorporation of the latest evaluation information. Prepares analysis papers supporting the planning-programming-budgeting system.

Division of Occupational, Handicapped, and Development Programs. Is responsible for evaluating the effectiveness of Office of Education programs in the areas of occupational and adult education, education for the handicapped, Indian education, libraries, educational technology, dissemination, statistics, education professions development, and other developmental fields. Designs and directs major national evaluation studies and develops program policy recommendations on the basis of the studies. Develops and maintains a system of reports from the States on their receipt and use of Federal funds under assistance programs. Analyzes proposed Office of Education operational planning system objectives and monitors their implementation. Reviews materials submitted for five-year program and financial plan to assure incorporation of the latest evaluation information. Prepares analysis papers supporting the planning-programming-budgeting system.

Division of Planning and Budgeting. Is responsible for preparing and defending the Forward Plan and annual budget estimates of the Office of Education, including necessary liaison with the Office of the Secretary, DHEW, the Office of Management and Budgeting, and the Appropriations and Budget Committees of the Congress. Implements major planning and budgetary decisions including the assurance that program budgets are congruent with overall agency goals, objectives, and priorities. Develops analysis of program issues and integrates policy analyses with budget proposals. Receives all funds appropriated or transferred to the Office of Education and issues allotments and limitations to the subdivisions of the Office. Administers the anti-deficiency regulations.

Dated: November 3, 1975.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

Office of the Secretary

SUPPORT FOR IMPROVEMENT OF POSTSECONDARY EDUCATION

Closing Date for Receipt of Preapplications

Notice is hereby given that pursuant to the authority contained in section 104

V 40 I 218 NOV 11 75 XUM

of the General Education Provisions Act (20 U.S.C. 1221d), "Support for improvement of postsecondary education," preapplications are being accepted from institutions of postsecondary education and other public and private educational institutions and agencies for grants and contracts directed toward the improvement of postsecondary education.

Preapplications must be received by the U.S. Office of Education Application Control Center on or before January 5, 1976.

A. *Preapplications sent by mail.* A preapplication sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Grant and Procurement Management Division, 400 Maryland Avenue SW., Washington, D.C. 20202, Attention. 13:538. A preapplication sent by mail will be considered to be received on time by the Application Control Center if:

(1) The preapplication was sent by registered or certified mail not later than December 31, 1975, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The preapplication is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail room in Washington, D.C. In establishing the date of receipt, the Director of the Fund for the Improvement of Postsecondary Education will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered preapplications.* A preapplication to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered preapplications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Preapplications will not be accepted after 4:00 p.m. on the closing date.

C. *Program information and forms.* Information and preapplication forms may be obtained from the Fund for the Improvement of Postsecondary Education, 400 Maryland Avenue SW., Room 3141, FOB–6, Washington, D.C. 20202.

D. *Applicable regulations.* Awards under this program will be subject to the regulations published as 45 CFR Part 1501 at 40 FR 12266–9 (March 18, 1975), except to the extent that those regulations are revised by the notice of proposed rulemaking published in today's issue at 40 FR ____. That notice, subject to its being published in final form, will also govern the providing of assistance under the program.

(Federal Domestic Assistance Catalogue No. 13.538: Fund for the Improvement of Postsecondary Education)

VIRGINIA B. SMITH,
Director of the Fund for the Improvement of Postsecondary Education.

Federal Aviation Administration

TERMINAL INSTRUMENT PROCEDURES (TERPS) ADVISORY COMMITTEE, WORKING GROUP FOR NAVIGATION SYSTEM ACCURACY

Notice of Meeting

Notice is hereby given, pursuant to the Federal Advisory Committee Act of 1972 (86 Stat. 770), that the Navigation System Accuracy Working Group of the U.S. Terminal Instrument Procedure (TERPs) Advisory Committee will hold a meeting on December 8, 1975, convening at 9 a.m., c.s.t., in Star Manor Rooms I, II, and III of the Sheraton Inn—Oklahoma City Airport, Oklahoma City, Oklahoma. This meeting of the Navigation System Accuracy Working Group is conducted with the approval and under the auspices of the TERPs Advisory Committee.

The agenda item for this meeting is a discussion and review of navigation system accuracies as related to fix accuracies and obstacle clearance requirements presently specified in the TERPs Handbook.

All those interested in attending the meeting should contact Earnest E. Callaway, Chairman, Working Group for Navigation System Accuracy, Federal Aviation Administration, Flight Inspection National Field Office, P.O. Box 25082, Oklahoma City, Oklahoma 73125, telephone: (405) 668–4164. The meeting will be open to the public.

Issued in Washington, D.C. on October 30, 1975.

JAMES A. FORGAS,
Chairman, U.S. Terminal Instrument Procedures (TERPs) Advisory Committee.

CIVIL SERVICE COMMISSION

FEDERAL EMPLOYEES PAY COUNCIL

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the Federal Employees Pay Council will meet at 2:00 p.m. on Wednesday, November 26, 1975. This meeting will be held in room 5323 of the U.S. Civil Service Commission building, 1900 E Street, N.W., and will consist of continued discussions on future comparability adjustments for the statutory pay systems, defined in section 5301 of title 5, United States Code, of the Federal Government.

The Chairman of the U.S. Civil Service Commission is responsible for the making of determinations under section 10(d) of the Federal Advisory Committee Act as to whether or not meetings of the Federal Employees Pay Council shall be open to the public. He has determined that this meeting will consist of exchanges of opinions and information which, if written, would fall within exemptions (2) or (5) of 5 U.S.C. 552(b). Therefore, this meeting will not be open to the public.

For the President's Agent:

Entry or Withdrawal From Warehouse for Consumption

NOVEMBER 6, 1975.

On June 19, 1975, there was published in the FEDERAL REGISTER (40 FR 25848) a letter dated June 13, 1975 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, implementing those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, between the Governments of the United States and the Republic of China which establish specific export limitations on certain cotton and man-made fiber textile products produced or manufactured in the Republic of China and exported to the United States (1) during the twelve-month period beginning on January 1, 1975 for cotton textiles and cotton textile products; and (2) during the fifteen month period beginning on October 1, 1974 and extending through December 31, 1975 for man-made fiber textile products. As set forth in that letter, the levels of restraint are subject to adjustment pursuant to paragraph 8(a)(ii) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, which provides that specific levels of restraint may exceed current-year limits by up to 6 percent with that same amount being deducted from the applicable levels of the succeeding agreement year.

Accordingly, at the request of the Government of the Republic of China and pursuant to the provision of the bilateral agreement referred to above, there is published below a letter of November 6, 1975, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the level of restraint applicable to man-made fiber textile products in Category 221 for the fifteenmonth period which began on October 1, 1974.

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

NOVEMBER 6, 1975.

COMMISSIONER OF CUSTOMS
Department of the Treasury
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: On June 13, 1975, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry of cotton and man-made fiber textile products in certain specified categories, produced or manufactured in the Republic of China and exported to the United States during the agreement periods, beginning, respectively, on January 1, 1975 and October 1, 1974, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to paragraph 8(a)(II) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, between the Governments of the United States and the Republic of China, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to amend, effective on November 10, 1975, the level of restraint established in the aforesaid directive of June 13, 1975, for man-made fiber textile products in Category 221 to the following amount:

Category:	*Amended level of restraint*[2] *(dozen)*
221	4,923,395

[2] The level of restraint has not been adjusted to reflect any entries made after September 30, 1974.

The actions taken with respect to the Government of the Republic of China and with respect to imports of man-made fiber textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foregn affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

ALAN POLANSKY,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

[FR Doc.75-30326 Filed 11-10-75;8:45 am]

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 21, 1975, between the Governments of the United States and the Republic of China which provide, in part, that: 1) within the aggregate and applicable group limits, specific levels of restraint within Categories 1–38, 64, 200–213, and 241–243 may be exceeded by 10 percent, and within Categories 39–63 and 214–240, by 7 percent; 2) these levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and 3) administrative arrangements or adjustments may be made to resolve minor problems.

ENVIRONMENTAL PROTECTION AGENCY

STATE-FEDERAL FIFRA IMPLEMENTATION ADVISORY COMMITTEE; WORKING GROUP ON ENFORCEMENT

Notice of Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a two-day meeting of the State-Federal FIFRA Implementation Advisory Committee's Working Group on Enforcement will be held on December 10 and 11, 1975, in San Francisco, California.

This is the second meeting of the Working Group on Enforcement under SFFIAC auspices. The meeting will be concerned with the following issues: recycling and reconditioning of pesticide containers, storage and disposal of pesticides and pesticide containers; use of registered pesticides for the control of agricultural pests not named on the label; aerial application of registered pesticides in the absence of label instructions; the use of service containers in structural pest control; assessment of civil penalties against various classes of applicators; and other enforcement matters which may arise.

This meeting is open to the public. For details as to the time and place, please contact P. H. Gray, Jr., Acting Chief, Program Support and Special Projects Branch, Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, (202) 755-8053.

Dated November 3, 1975.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

LATIN AMERICA/PACIFIC COAST STEAMSHIP CONFERENCE

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before December 1, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Mr. H. P. Blok, Chairman.
Latin American/Pacific Coast Steamship Conference,
417 Montgomery Street,
San Francisco, California 94104

Agreement No. 8660-7, between the member lines to the Latin American/Pacific Coast Steamship Conference, modifies the Conference Agreement by raising the membership admission fee from $1,000.00 to $5,000.00.

By order of the Federal Maritime Commission.

Dated: November 6, 1975.

FRANCIS C. HURNEY,
Secretary.

[Docket No. CP76-139]

COLUMBIA GAS TRANSMISSION CORP.

Notice of Application

NOVEMBER 4, 1975.

Take notice that on October 23, 1975, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP76-139 an abbreviated application pursuant to Section 7 of the Natural Gas Act, as amended, for a certificate of public convenience and necessity authorizing the

V 40 218 NOV 11 75 XUM

transportation of natural gas for Wheeling-Pittsburgh Steel Corporation (WPSC), as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Columbia requests authorization to transport up to 9,000 Mcf per day for WPSC, which volumes will be received from Panhandle Eastern Pipe Line Company (Panhandle) at an existing point of delivery in Cecil, Ohio and redelivered to existing points of delivery to Columbia Gas of Ohio, Inc. and Columbia Gas of West Virginia, Inc., both of which are wholesale customers of Columbia. WPSC will purchase the gas so transported from Lear Petroleum Corporation for the period November 1, 1975 through March 31, 1976. The transportation by Columbia will be subject to the limits of its pipeline capacity and to its service obligations to its CD, WS, SGES, G and SGS customers and will be further limited to only those amounts required to offset curtailments of the high priority requirements of WPSC. Columbia's transportation charge for this service will be its average system-wide unit storage and transmission costs exclusive of company-use and unaccounted-for gas, as reflected in its FPC rate filings. Columbia will retain for company-use and unaccounted-for gas 3.6% of the volumes received from Panhandle for the account of WPSC.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 12, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act, as amended, (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act, as amended, and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Columbia to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-196]

COMMONWEALTH EDISON CO.

Notice of Cancellation

NOVEMBER 4, 1975.

Take notice that on October 28, 1975, Commonwealth Edison Company (The Company) tendered for filing a notice of cancellation of Riders 5 and 12 to Rate 78 of The Company's FPC Electric Tariff.

The Company states that Rider 5 (Sheet No. 5 of the FPC Electric Tariff) was intended to apply to customers who use the Company's service on a standby basis, but now, however, the Company has special provisions in Rate 78 (see Sheets Nos. 1A and 1B of the FPC Electric Tariff) for customers which generate part of their own electricity requirements and rely on the Company for the balance. Furthermore, according to the company, no customer served under the Company's FPC Electric Tariff has ever used standby service under Rider 5.

The Company states that Rider 12 (Sheet No. 11 of the FPC Electric Tariff), specifying conditions of resale or redistribution of electricity to third parties, amounts to a general prohibition of resale and redistribution, except with respect to Rate 78 for which provides that it is a rate applicable for service to municipalities for resale. Thus, The Company concludes Rider 12 serves no purpose in the FPC Electric Tariff.

The Company alleges that the proposed changes will not affect the billings of the customers served on Rate 78 or the revenue of the Company.

The Company requests Commission acceptance of this filing to become effective on November 27, 1975. Notice of the proposed cancellation has been served upon the Mayor, City of Batavia; Mayor, City of Geneva; Mayor, City of Naperville; Mayor, City of Rochelle; Mayor, City of Rock Falls; Mayor, City of St. Charles; and the President, Village of Winnetka.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 14, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-83]

OHIO POWER CO.

Notice of Supplemental Filing

NOVEMBER 3, 1975.

Take notice that Ohio Power Company (Ohio) on October 17, 1975, tendered for filing pursuant to a deficiency letter from the Commission's Secretary of September 16, 1975, a revised Period I cost of service study for the period ended June 30, 1975. Ohio states that this submittal should complete its filing and requests that a filing date be assigned to this case.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 11, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP76-140]

PANHANDLE EASTERN PIPE LINE CO.

Notice of Application

NOVEMBER 4, 1975.

Take notice that on October 23, 1975, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP76-140, an application pursuant to Section 7(c) of the Natural Gas Act and the regulations thereunder for a Certificate of Public Convenience and Necessity authorizing the transportation of natural gas on behalf of Wheeling-Pittsburg Steel Corporation (Wheeling), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Wheeling, which is a customer of Columbia Gas Transmission Corporation (Columbia) has been notified of prospective curtailments by Columbia for the coming winter heating season. Wheeling has made arrangements to purchase gas unavailable to the interstate market and have it delivered via Panhandle to Columbia for redelivery to Wheeling during the anticipated curtailment period as contemplated by Section 2.79 of the Commission's Rules of Practice and Procedure promulgated by Order No. 533.

Panhandle states that this application is for authority to transport up to 4,300 Mcf of gas per day on a firm basis and up to 3,225 Mcf of gas per day on a best efforts basis from two points of delivery in Ellis and Dewey Counties, Oklahoma and deliver such volumes, less compressor fuel to Columbia at an existing point of delivery from Panhandle in Paulding County, Ohio. Columbia will transport such gas and redeliver it to Wheeling as detailed in a separate application of Columbia filed and noticed concurrently. No facilities are proposed to be constructed by Panhandle to effectuate the transportation service.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 12, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Panhandle to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30228 Filed 11-10-75;8:45 am]

[Docket Nos. CP70-185; CP75-376]

TENNESSEE GAS PIPELINE CO.

Notice of Petition To Amend

NOVEMBER 4, 1975.

Take notice that on October 14, 1975, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket Nos. CP70-185 and CP75-376 a petition to amend the orders of the Commission of June 22, 1970 (43 FPC 937), and July 24, 1975 (54 FPC ——), respectively, pursuant to Section 7(c) of the Natural Gas Act to include in the certificates of public convenience and necessity authorization to increase the daily volume limits of natural gas that it can deliver to the individual delivery points to Haverhill Gas Company (Haverhill), all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Petitioner states that it is presently authorized to serve Haverhill pursuant to temporary authorization in the following amounts pursuant to Petitioner's Rate Schedule CD-6:

Delivery point:	*Daily volume limit (1,000 ft³)*
Haverhill	11,561
Wenham	2,040
Essex	918

In response to a letter from Haverhill dated October 3, 1975, Petitioner requests authorization to increase the maximum daily volumes that it is authorized to deliver to the following quantities:

Delivery point:	*Requested daily volume limit (1,000 ft³)*
Haverhill	12,669
Wenham	2,500
Essex	1,200

Petitioner states that the total of the requested daily volume limits exceeds Haverhill's contract demand of 14,519 Mcf of gas per day, but that Haverhill would not be entitled to take more than presently effective maximum daily contract quantity.

The proposed service is said by Petitioner to provide Haverhill with the necessary flexibility during periods of curtailment to serve more adequately its residential and small commercial customers, and to permit more efficient use of its peak shaving facilities. It is further stated that the revised distribution would reduce Haverhill's need to transport liquefied natural gas during the forthcoming winter season.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before November 14, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP76-132]

TRANSCONTINENTAL GAS PIPE LINE CORPORATION

Notice of Application

NOVEMBER 3, 1975.

Take notice that on October 15, 1975, Transcontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77001, filed in Docket No. CP76-132 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Columbia Gas Transmission Corporation (Columbia), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that it has agreed to transport gas for Columbia pursuant to a gas transportation agreement between Columbia and itself dated September 5, 1975. Applicant requests authorization to transport volumes of gas delivered to it by Columbia from Block 247 Field, Ship Shoal Area, offshore Louisiana, at a point of interconnection on Applicant's 16-inch pipeline in Block 246, Ship Shoal Area, for redelivery at the Egan, Louisiana terminus of the Blue Water Project of Columbia Gulf Transmission Company and Tennessee Gas Pipeline Company, a Division of Tenneco Inc., in the Humphreys-Orange Grove Area, Terrebonne Parish, Louisiana, and at the Acadia Plant of Continental Oil Company, Arcadia Parish, Louisiana.

Applicant states that it would not be obligated to transport more than 10,000 Mcf of natural gas per day for Columbia at 14.73 psia. Columbia would pay Applicant 6.262755 cents per Mcf of gas transported.

Any person desiring to be heard or to make any protest with reference to said application should on or before November 14, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with

V 40 N 218 NOV 11 75 XUM

the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

AMERICAN BANCORPORATION

Acquisition of Bank

American Bancorporation, Columbus, Ohio, has applied for the Board's approval under § 3(a) (3) of the Bank Holding Company Act (12 U.S.C. 1842(a) (3)) to acquire 50 percent and more (to a total of 77 percent) of the voting shares of The American Bank of Central Ohio, Harrisburg, Ohio. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Notice of the subject application was published in the FEDERAL REGISTER on September 27, 1973 (38 FR 27550). Additionally, in accordance with section 3(b) of the Act (12 U.S.C. 1842(b)), notice of receipt of subject application was duly given to the Superintendent of Banks of the State of Ohio. Within the time prescribed by law, the Superintendent submitted to the Board in writing his statement expressing disapproval of the application. Accordingly the Board, on October 25, 1973, ordered that a hearing be held on subject application pursuant to section 3(b) of the Act (38 FR 29650). The hearing thus ordered by the Board was commenced, but later terminated by consent of the parties—the Superintendent having preserved his right to submit written comments for the record. The application was previously amended; and notice of receipt of those amendments affording opportunity for interested persons to submit comments and views, was duly given (39 FR 6562).

Notice is hereby given that Applicant has amended subject application once again. These new amendments have been received by the Board and the application, as amended, may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Cleveland. Any person wishing to comment on the amended application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than December 3, 1975.

Board of Governors of the Federal Reserve System, October 29, 1975.

[SEAL] ROBERT SMITH, III,
Assistant Secretary of the Board.

[FR Doc.75-30236 Filed 11-10-75;8:45 am]

INTERNATIONAL BROTHERHOOD OF BOILERMAKERS, IRON SHIP BUILDERS, BLACKSMITHS, FORGERS AND HELPERS

Order Approving Acquisition of Bank Stock

The International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers, Kansas City, Kansas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a) (3) of the Act (12 U.S.C. 1842(a) (3)) for flexible authority to acquire, from time to time, additional voting shares of The Brotherhood State Bank, Kansas City, Kansas ("Bank"), so long as Applicant's interest does not exceed 40 percent of Bank's outstanding voting shares.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired and the Board has considered the application and all comments received in light of the factors set forth in § 3 (c) of the Act (12 U.S.C. 1842(c)).

Applicant, a fraternal labor organization, is a one-bank holding company that became subject to the Act by virtue of the 1970 Amendments thereto. Applicant presently owns or controls 32.3 percent of the shares of Bank. With total deposits of $48 million, Bank controls approximately 1.03 percent of the total deposits in commercial banks in the Kansas City market[1] and is the sixteenth largest bank in that market.[2]

Applicant requests Board approval to acquire, from time to time, up to an additional 7.7 per cent of the voting shares of Bank. Although Applicant does not propose to acquire any additional shares of Bank immediately, the purpose of filing the instant application is to facilitate Applicant's future acquisitions, on an intermittent basis, of additional shares of Bank from shareholders holding nominal amounts of Bank stock. In many cases the shareholders from whom Applicant would purchase shares would be individuals associated with the fraternal organization. Specific examples of such stockholders cited by Applicant in the application include retired persons desiring to transfer their assets to a more income-producing type of asset; widows of deceased stockholders who wish to secure immediate funds; and persons in financial distress. In view of Applicant's status under the Bank Holding Company Act,[3] and the relationship which exists between many of Bank's stockholders and Applicant, a union of which they are members, the Board believes that the unique facts present in this proposal are such that approving Applicant's request would be consistent with the public interest. In this connection, it is noted that no meaningful change in the control of Bank would result from granting Applicant the authority to vary its proportionate interest in Bank within the limits and under the circumstances described herein. Moreover, consummation of the proposal would not have any adverse effect on existing or potential competition, nor would it increase the concentration of banking resources or have an adverse effect on other banks in the area. Accordingly, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and Bank are regarded as favorable and consistent with approval of the application. Similarly, considerations relating to convenience and needs of the community to be served are consistent with approval of the application. It is the Board's judgment that approval of the application would be consistent with the public interest and that the application should be approved.

Accordingly, on the basis of the unique facts in the present record, the application is approved for the reasons summarized above. No such acquisition shall be made before the thirtieth calendar day following the effective date of this Order. Furthermore, the authority to purchase additional shares of Bank so long as Applicant's aggregate holdings in Bank do not exceed 40 per cent of the outstanding shares of Bank shall expire on December 31, 1976. Upon request by the Applicant, the Federal Reserve Bank of Kansas City is hereby authorized, pursuant to delegated authority from the Board, to extend the authority granted herein for not more than one year at a time, if in its judgment, the financial and managerial resources of Applicant and Bank are satisfactory and such extensions would not be detrimental to the public interest, but no such extensions granted by the Reserve Bank shall in the aggregate exceed five years. Any request by Applicant for a one-year extension of the authority granted herein shall be submitted in writing to the Reserve Bank no later than October 1 of the year preceding the expiration of such authority and shall include the number of shares of Bank that Applicant has sold or acquired since the date of this Order, the number of voting shares of Bank then outstanding, the number of shares of Bank then held by Applicant, and any other information that the Reserve Bank may deem relevant in acting on such request.

By order of the Board of Governors,[4] effective October 29, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.75-30237 Filed 11-10-75;8:45 am]

[1] The Kansas City banking market is approximated by Johnson and Wyandotte Counties in Kansas and northern Cass County and Clay, Jackson and Platte Counties in Missouri.

[2] All banking data are as of December 31, 1974.

[3] As a labor organization, Applicant is exempt from the prohibitions in section 4 of the Act, relating to the nonbanking interests of a bank holding company, by virtue of section 4(c)(1) thereof.

NORTHSTREAM INVESTMENTS, INC.

Formation of Bank Holding Company

Northstream Investments, Inc., Geddes, South Dakota, has applied for the Board's approval under § 3(a) (1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 88.3 percent of the voting shares of Security State Bank, Geddes, South Dakota. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than November 21, 1975.

Board of Governors of the Federal Reserve System, October 29, 1975.

[SEAL] ROBERT SMITH III,
Assistant Secretary of the Board.

[FR Doc.75-30238 Filed 11-10-75;8:45 am]

POWELL LUMBER CO.

Acquisition of Additional Shares of Bank

Powell Lumber Company, Lake Charles, Louisiana, has applied for the Board's approval under § 3(a) (3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)), through a pro rata rights offering, to directly acquire 6,474 additional voting shares of American Bank of Commerce, Lake Charles, Louisiana, and also to indirectly acquire 6,474 additional voting shares of American Bank of Commerce as a result of the direct ownership of those shares by its subsidiary, Farmers Land and Canal Company, Lake Charles, Louisiana. Upon consummation herein, Applicant's existing direct and indirect percentage ownership of the voting shares of American Bank of Commerce will remain the same. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than November 21, 1975.

Board of Governors of the Federal Reserve System, October 29, 1975.

[SEAL] ROBERT SMITH III,
Assistant Secretary of the Board.

[FR Doc.75-30239 Filed 11-10-75;8:45 am]

STOCKTON BANCORP, INC.

Order Approving Formation of Bank Holding Company

Stockton Bancorp, Inc., Stockton, Illinois, has applied for the Board's approval under § 3(a) (1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through the acquisition of 80 per cent or more of the voting shares of The First National Bank of Stockton, Illinois ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the application and all comments received have been considered in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a nonoperating corporation recently organized for the purpose of becoming a bank holding company through the acquisition of Bank. The purpose of the transaction is to effect a transfer of the ownership of Bank from individuals to a corporation owned by the same individuals with no change in Bank's management or operations. Bank (deposits of $9.0 million)[1] is the fourth largest of 8 banks in the relevant banking market[2] and controls approximately 12.3 per cent of the total deposits in commercial banks in the market. Upon acquisition of Bank, Applicant would control less than 0.1 per cent of total commercial bank deposits in Illinois.

Among the principals of Applicant are several individuals who are also principals of another one-bank holding company and principals of two other banks. Two of the banks in which principals of Applicant are involved are not located in the relevant banking market. There appears to be no meaningful existing competition between these two banks and Bank, and it appears unlikely that such competition would develop in the future. As regards the third bank, Citizens Bank and Trust Company, Warren, Illinois ("Citizens Bank"), it is located in the relevant market approximately 10 miles from Bank. It appears that no significant competition exists between Citizens Bank and Bank. Furthermore, inasmuch as the present proposal represents a reorganization to effect a transfer of Bank's ownership from individuals to a corporation owned by the same individuals, and in view of the relatively small size of the banks in question and the presence of alternative banking facilities in the market, it appears that the acquisition of Bank by Applicant would not have any significantly adverse effect upon either existing or potential competition in any relevant area. Accordingly, on the basis of the record, it is concluded that competitive considerations are consistent with approval of the application.

The financial considerations relating to the present proposal are consistent with approval of the application. Although Applicant will incur acquisition debt in connection with this proposal, it appears that Applicant will be able to service this debt over a twelve-year period without impairing the financial condition of Bank during that period. Furthermore, it appears that the overall financial condition of Applicant and the one-bank holding company in which principals of Applicant are presently involved is satisfactory and consistent with approval of the application. Managerial considerations are satisfactory and consistent with approval of the application.

Applicant plans no major changes in Bank's operations but does intend to restructure Bank's loan portfolio to include more agricultural, mortgage, consumer and commercial loans. In addition, Applicant plans to renovate and expand Bank's physical facilities and is contemplating extending Bank's current banking hours to more conveniently serve the community needs. Accordingly, considerations related to the convenience and needs of the community to be served are consistent with, and lend some weight toward, approval of the application.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago, pursuant to delegated authority.

By order of the Secretary of the Board acting pursuant to delegated authority from the Board of Governors, effective October 29, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Notice of Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO on November 3, 1975. See 44 U.S.C. 3512 (c) & (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FMC form are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed form, comments (in triplicate) must be received on or before December 1, 1975, and should be addressed to Mr. Carl F. Bogar, Assistant Director, Office of Special Programs, United States General Accounting Office, Room 5216, 425 I Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-376-5425.

FEDERAL MARITIME COMMISSION

Request for extension without change to General Order 20, 46 CFR 540, and form FMC 131 which is a part of the rules. The rules provide procedures whereby persons in the United States who arrange, offer, advertise or provide passage on a vessel having berth or stateroom accommodations for 50 or more passengers and embarking passengers at U.S. ports shall establish their financial responsibility or, in lieu thereof, file a bond or other security to meet liabilities for nonperformance of voyage, or for injury or death to passengers or other persons on voyages to or from U.S. ports. Potential respondents are steamship lines. The application for a Certificate of Financial Responsibility is a one time filing and it is estimated that 50 applications are received per year. Respondent burden is estimated at 6 hours per response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

INTERNATIONAL TRADE COMMISSION

WRAPPER TOBACCO

Finding That Imports Not To Be Substantial Cause of Injury to Growers

The United States International Trade Commission today turned down the request of American wrapper tobacco growers for relief from imports. In their second decision under the new import relief provision of the Trade Act of 1974, all six Commissioners—Will E. Leonard, Daniel Minchew, George M. Moore, Catherine Bedell, Joseph O. Parker, and Italo H. Ablondi—did not find increased imports of wrapper tobacco a substantial cause of serious injury to U.S. growers of tobacco used as the outer wrapping of cigars.

The Commission decision was based on a finding that the decline in U.S. production of large cigars was a more important cause of any injury to the growers than imports of wrapper tobacco. The negative determination of the Commission denies to the tobacco farmers eligibility for relief from imports through higher tariffs, quotas, or financial assistance under the import relief provisions of the Trade Act of 1974.

The investigation was made in response to a petition filed with the Commission by the Cigar Leaf Tobacco Foundation, Inc., of Quincy, Florida. Wrapper tobacco is grown in the United States in southwestern Georgia and north-central Florida and in the Connecticut River valley of Connecticut and Massachusetts.

Commission hearings in the investigation were conducted in Florida, Connecticut, and Washington. Extensive staff investigation supplemented the hearings.

U.S. production of wrapper tobacco decreased from 15.9 million pounds in the 1969/70 crop year to only 11 million pounds in the 1974/75 crop year. In spite of the decrease in the amount of tobacco grown, the dollar value increased from $54.2 million to $59.1 million over the same period. Imports (farm-sales-weight basis) increased in that period from 536,000 pounds to 1.1 million pounds, coming chiefly from Nicaragua and Honduras in Central America and Cameroon in Africa. However, production of large cigars in the United States dropped sharply from 8.4 billion cigars in 1970 to 6.5 billion in 1974.

Copies of the Commission's report, *Wrapper Tobacco* (USITC Publication 746) containing the decision, views of the Commissioners, and information developed during the 6-month investigation may be obtained from the Office of the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436 (202-523-0161).

By order of the Commission:

Issued: November 6, 1975.

[SEAL] KENNETH R. MASON,
Secretary.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 75-91]

SPACE PROCESSING PAYLOAD ADVISORY SUBCOMMITTEE

Notice of Establishment

Pursuant to Section 9(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), and after consultation with the Office of Management and Budget, the National Aeronautics and Space Administration has determined that the establishment of the Applications Steering Committee, Space Processing Payload Advisory Subcommittee is in the public interest and is required for the performance of duties imposed upon NASA by law. The Applications Steering Committee, under which the Subcommittee will operate, is a NASA-sponsored interagency committee, composed wholly of government employees. The Subcommittee will comprise membership from both the public and private sectors.

The intent of this Subcommittee is to obtain the advice of the space processing user community during the development of the Space Transportation System payloads.

WILLIAM W. SNAVELY,
Assistant Administrator for DOD and Interagency Affairs.

NOVEMBER 5, 1975.

NATIONAL CREDIT UNION ADMINISTRATION

NATIONAL CREDIT UNION BOARD

Notice of Meeting and Agenda

Pursuant to the provisions of the Federal Advisory Committee Act, Pub. L. 92-463, 86 Stat. 770, notice is hereby given that the National Credit Union Board will hold its quarterly meeting on December 2-3, 1975, at the offices of the National Credit Union Administration, 2025 M Street, N.W., Washington, D.C. 20456. The meetings will commence at 9:00 a.m. daily in Room 4210.

The agenda for this meeting will consist of an undate briefing regarding the activities of the several offices of the National Credit Union Administration, a briefing on share insurance activities, and other aspects of the Administration.

Matters for discussion will include legislative activities.

This meeting of the National Credit Union Board will be open to the public. Members of the public may file written statements with the Board either before or after the meeting. To the extent that time permits, interested persons may be permitted to present oral statements to the Board only on items listed in the aforementioned agenda. Requests to present such oral statements must be approved in advance by the Chairman of the Board. Such requests should be directed to the Chairman, National Credit Union Board, National Credit Union Administration, Washington, D.C. 20456.

HERMAN NICKERSON, Jr.,
Administrator.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-247]

CONSOLIDATED EDISON CO. OF N.Y., INC. (INDIAN POINT NUCLEAR GENERATING UNIT NO. 2)

Establishment of Atomic Safety and Licensing Board To Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the following proceeding:

THE CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.

(Indian Point Nuclear Generating Unit No. 2)

Docket No. 50-247

This action is in reference to the "Notice of Availability of Licensee's Environmental Report; Notice of Proposed Issuance of Amendment to Facility Operating License and Notice of Opportunity for Hearing for Indian Point Nuclear Generating Unit No. 2", published by the Commission in the above matter (40 FR 45874—Oct. 3, 1975).

The members of the Board are:

Samuel W. Jensch, Esq., Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Mr. R. Beecher Briggs, (Member), 110 Evans Lane, Oak Ridge, Tennessee 37830.

Dr. Franklin C. Daiber, (Member), College of Marine Studies, University of Delaware, Newark, Delaware 19711.

Dated at Bethesda, Maryland this 5th day of November 1975.

For Atomic Safety and Licensing Board Panel.

JAMES R. YORE,
Acting Chairman.

[Docket Nos. 50-260, 50-270, 50-287]

DUKE POWER CO.

Issuance of Amendments to Facility Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments No. 13, 13, and 10 to Facility Operating Licenses No. DPR-38, DPR-47, and DPR-55, respectively, issued to Duke Power Company which revised Technical Specifications for operation of the Oconee Nuclear Station, Units 1, 2, and 3, located in Oconee County, South Carolina. The amendments are effective as of the date of issuance.

These amendments (1) modify the axial power imbalance limits for the Core Protection Safety Limits and the Reactor Protection System Maximum Allowable Setpoints, (2) reduce the flux/flow ratio from 1.07 to 0.961 for single-loop operation, and (3) change the maximum thermal power for three-loop operation from 86.0% to 86.4%.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and The Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments is not required since the amendments do not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendments dated August 26, 1975, (2) Amendments No. 13, 13, and 10 to Licenses No. DPR-38, DPR-47, and DPR-55, with Changes No. 23, 18, and 10, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Oconee County Library, 201 South Spring Street, Walhalla, South Carolina 29691.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 31st day of October 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,
Chief, Operating Reactors Branch No. 1, Division of Reactor Licensing.

[FR Doc.75-30318 Filed 11-10-75;8:45 am]

[Docket Nos. 50-424, 50-425 (CP Amendment)]

GEORGIA POWER CO. (ALVIN W. VOGTLE NUCLEAR PLANT, UNITS 1 AND 2)

Notice of Prehearing Conference

Please take notice that pursuant to § 2.751a of the Commission's Rules of Practice (10 CFR Part 2) and the Atomic Energy Act of 1954, as amended, and consistent with the guidelines prescribed by the Atomic Safety and Licensing Appeal Board (Appeal Board) in its Order dated September 24, 1975 (ALAB-291), the Atomic Safety and Licensing Board (the Board) will conduct a special prehearing conference for this limited, remanded proceeding on November 20, 1975, starting at 9:30 a.m., e.d.t., at the following location:

City County Building, Richmond County Board of Commissioners' Hearing Room, Room 603, 530 Green Street, Augusta, Georgia 30902.

This prehearing conference is preliminary to a public, evidentiary hearing[1] that will be held later in the vicinity of the proposed plant site on a date that will be announced in a future Board notice. The matters to be considered at the prehearing conference are as follows:

(1) Permit identification of the key issues in the proceeding;

(2) Take any steps necessary for further identification of the issues;

(3) Consider the remaining contentions in the Intervenor's petition to allow the Board to make a final determination on the admissibility of the specific contentions; and

(4) Establish a schedule for further actions in the proceeding, including a time table for discovery.

More specifically, the Board expects counsel for the parties to be prepared to orally argue the points raised in Applicant's September 30 "Motion to Schedule Prehearing Conference" regarding the required and permissible scope of the remanded supplemental hearing in light of ALAB-285 (August 12, 1975) and ALAB-291 (September 24, 1975), as well as the scope of discovery necessary to properly inquire into only those limited areas. For the guidance of the parties, the Board does not envision any necessity for an "open-ended reexploration of environmental issues" and will not sanction any unnecessary demands for information on environmental matters which need not be addressed in the remanded hearing, and which would only delay meaningful and prompt preparation for the hearing. The scope of requested discovery should be limited accordingly.

The parties are free to submit written memoranda at the prehearing conference in lieu of all or part of their oral argument.

Counsel for the parties are directed to confer in advance of the public confer-

[1] See this Board's "Notice of Supplemental Hearing on Proposed Amendment to Construction Permits" dated September 8, 1975, which was published in the FEDERAL REGISTER on September 8, 1975 (40 FR 41569).

V 40 N 218 NOV 11 75 XUM

It is so ordered.

ence to work out an agreed schedule for discovery, which will be placed on the record at the prehearing conference.

Issued at Bethesda, Maryland, this 5th day of November, 1975.

For the Atomic Safety and Licensing Board.

THOMAS W. REILLY, ESQ.,
Chairman.

[Doc. No. STN 50-482]

KANSAS GAS AND ELECTRIC CO. AND KANSAS CITY POWER AND LIGHT CO. (WOLF CREEK GENERATING STATION, UNIT NO. 1)

Order Confirming Evidentiary Sessions

On October 30, 1975, the Regulatory Staff of the Commission filed a motion to reschedule hearings in this proceeding and requested modification of the Order issued October 24, 1975 by the Atomic Safety and Licensing Board. The Staff request is primarily directed to the date for the commencement of the presentation of evidence and seeks a change from the November 17th designation. The Board has been in consultation with the attorneys for the parties by a telephonic conference call since time does not permit awaiting answers by mail to the Staff motion. After a consideration of the Staff motion and the oral answers thereto, the Board hereinafter sets January 26, 1976 for the commencement of the sessions for presentation of evidence.

The Board adheres to its schedule of November 12 and 13, 1975 for the presentation of statements by way of limited appearance from members of the public in the District Courtroom of the Coffey County Courthouse in Burlington, Kansas. The November 12th session will commence at 9:00 a.m. and the Board will extend the opportunity for the presentation of such statements for a few evening hours in order to accommodate those members of the public who cannot attend during that daytime. The November 13th session will commence at 10:00 a.m. in the same location.

As provided in the Board's October 24, 1975 Order, further evidentiary sessions shall resume in a courtroom to be designated by later order in Kansas City, Missouri. The Board accepts the agreement by the attorneys for the parties to convene the Kansas City sessions on January 26, 1976 commencing at 2:30 p.m. at the suggestion of one of the attorneys. A session for a few hours will convene in the evening of January 26, 1976 to permit those members of the public from the Kansas City area who desire to present limited appearance statements and who are unable to be present for the Burlington, Kansas sessions, to present such statements.

The Board also accepts suggestions from the attorneys for the parties and hereby directs that all proposed direct evidence shall be prepared in written form and shall be served upon the parties and the Board in accordance with the schedule for the items identified by the contentions designated as follows:

I. Service on or before December 19, 1975 on contentions:

I-1 through I-7, I-9 through I-13, I-14 (a), (h), (k) and (l), I-16, I-17, I-21(b), I-22, I-25, and I-26.

II. Service on or before January 6, 1976 on contentions: I-14 (b), (c), (d), (e), (f), (g), (i) and (j), I-18, I-19, I-20, I-21 (a) ,(c), (d), (e).

III. Service on or before January 15, 1976 of all written statements to be offered as direct evidence related to all remaining radiological safety issues, otherwise designated by the parties as Category II safety issues.

Wherefore, *it is ordered*, In accordance with the Atomic Energy Act, as amended, and the Rules of Practice of the Nuclear Regulatory Commission, that limited appearance statements from members of the public may be presented at evidentiary sessions of this proceeding commencing at 9:00 a.m. on Wednesday, November 12, 1975 in the District Courtroom, Coffey County Courthouse, 6th and Neosho Streets, Burlington, Kansas, and at further sessions to be provided, including November 13, 1975, at times to be reflected by oral orders issued during hearings and reflected in the transcripts which are available for public review.

A further session of evidentiary hearings shall convene in a courtroom in Kansas City, Missouri on January 26, 1976, at a time and location to be designated by later Order. An evening session will be held in Kansas City to permit additional members of the public to present limited appearance statements. The proposed direct evidence from all parties shall be prepared in advance in written form and shall be served on or before the dates hereinbefore provided in this Order.

Issued: November 5, 1975, Bethesda, Maryland.

For the Atomic Safety and Licensing Board,

SAMUEL W. JENSCH,
Chairman.

[FR Doc.75-30320 Filed 11-10-75;8:45 am]

[Docket No. 50-309]

MAINE YANKEE ATOMIC POWER CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 11 to Facility Operating License No. DPR-36 issued to the Maine Yankee Atomic Power Company for operation of the Maine Yankee Atomic Power Station, located in Lincoln County, Maine. The amendment is effective as of its date of issuance.

The amendment modifies the provisions in the Technical Specifications relating to the design of the spent fuel storage racks. As amended, the Technical Specifications will allow the licensee to replace the existing spent fuel storage racks which have a capacity of 318 assemblies with anodized aluminum fixed-poison (Boral) curtain racks which have a capacity of 953 assemblies.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with this action was published in the FEDERAL REGISTER on April 14, 1975 (40 FR 16732). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

For further details with respect to this action, see (1) the application for amendment dated March 27, 1975, as supplemented June 26 and July 25, 1975, (2) Amendment No. 11 to License No. DPR-36 with Change No. 19, (3) the Commission's related Safety Evaluation, and (4) the Commission's Negative Declaration dated October 24, 1975, which is being published concurrently with this notice, and associated Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Wiscasset Public Library Association, High Street, Wiscasset, Maine.

A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 31st day of October, 1975.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Reactors Licensing.

[FR Doc.75-30321 Filed 11-10-75;8:45 am]

[Docket No. 50-309; License No. DPR-36]

MAINE YANKEE ATOMIC POWER STATION

Negative Declaration Regarding Proposed Changes to the Technical Specifications of

The Nuclear Regulatory Commission (the Commission) has considered the issuance of a change to the Technical Specifications of Facility Operating License No. DPR-36 for Maine Yankee Atomic Power Station located in Lincoln County, Maine. The changes would authorize the licensee, Maine Yankee Atomic Power Company, to replace existing spent fuel storage racks having a capacity of 318 assemblies with fixed poison (Boral) curtain racks having a maximum capacity of 953 assemblies.

The Commission's Division of Reactor Licensing has appraised the environmental impact of the proposed change. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the proposed action other than those impacts described in the Commission's Final Environmental Statement of July 1972 concerning the operation of Maine Yankee Atomic Power Station.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Wiscasset Public Library Association, High Street, Wiscasset, Me.

Dated at Rockville, Md., this 24th day of October 1975.

For the Nuclear Regulatory Commission.

GORDON K. DICKER,
Chief, Environmental Projects Branch 2, Division of Reactor Licensing.

[FR Doc.75-30322 Filed 11-10-75;8:45 am]

[Docket No. 50-277]

PHILADELPHIA ELECTRIC CO. (PEACH BOTTOM ATOMIC POWER STATION, UNIT 2)

Order for Modification of License

I. Philadelphia Electric Company (PECO or Licensee) is the holder of Facility Operating License No. DPR-44 which authorizes operation of Peach Bottom Atomic Power Station Unit 2 (Unit 2 or the Facility) at steady-state reactor core power levels not in excess of 3295 megawatts thermal (rated power). The Facility is a boiling water reactor (BWR) located at the Licensee's site in Peach Bottom, York County, Pennsylvania.

II. 1. On July 23, 1975, the Nuclear Regulatory Commission (the Commission) issued an "Order for Modification ofe License" (40 F.R. 32179 of July 31, 1975) which confirmed a plan for limited additional operation of the facility. As explained in the Order of July 23, 1975, the Facility's channel box wear, as indicated by the noise-to-signal ratio recorded by the traversing incore probe (TIP), had exceeded the threshold for remedial action. The remedial action, confirmed by the Order, limited operation of the facility at not more than 40 percent of rated core flow and with a maximum fuel bundle power of 3.35 MWt. In addition, the Order permitted operation up to full flow and power for a brief period of time needed to collect flow vibration data and to conduct fuel preconditioning. The Order further stipulated that the Licensee was to shutdown the facility following approximately 45 equivalent full flow days from June 21, 1975 unless within that period certain specified tests have been completed which demonstrated the efficacy of the 40% flow limit.

2. By letter dated October 24, 1975,[1] the Licensee proposed a plan, previously discussed with the NRC staff, setting forth a course of remedial action, which would allow operation with flow rates above 40 percent of rated flow and maximum bundle power above 3.35 MWt. The plan would involve shutdown of the reactor and appropriate replacement of worn channel boxes and plugging of the core support plate bypass holes.

3. By its letter dated September 29, 1975,[2] the Licensee provided details relating to the fuel channel inspection program and the installation of core bypass flow plugs in the lower core plate and supplied analyses to demonstrate the adequacy of the procedures for plug installation. Additionally, by its letter dated October 24, 1975, the Licensee referenced modifications previously approved and implemented at the Duane Arnold and Vermont Yankee reactors.

4. The installation of the core bypass flow plugs in the lower core plate is designed to reduce the instrument tube—channel box interaction that produced unacceptable wear. The Commission's Safety Evaluations for the plant modifications referenced in the Licensee's letter of October 24, 1975, list a total of 75 channels that were inspected for wear during normal refueling outages in seven plants that have instrument thimbles similar to those in Peach Bottom Unit 2, but that do not have flow bypass holes. The bypass flow for these plants enters through clearances in the fuel assembly and fittings which are similar to the proposed Peach Bottom Unit 2 configuration with plugged bypass flow holes. For this configuration, no significant wear was observed at the corners of the channel boxes adjacent to the instrument thimbles.

5. Plugs identical to those proposed for Peach Bottom Unit 2 had previously been installed in the Vermont Yankee and Pilgrim reactors in 1973 and 1974, respectively, to eliminate the vibration of temporary control curtains that caused channel box wear in those reactors. They have also been installed in the Duane Arnold and Vermont Yankee reactors to mitigate channel box wear. The plugs in the Vermont Yankee reactor were installed in 1973 and, were removed after ten months of successful service, at the time that the temporary control curtains were removed. In addition, the General Electric Company has conducted tests to demonstrate the adequacy of the plug design. These tests included full flow mockup tests which demonstrated negligible leakage flow through the plugged holes. The NRC staff has reviewed the design, the testing, and the previous experience with the proposed plugs in the Vermont Yankee, and Pilgrim reactors, and in its concurrently issued Safety Evaluation of Mechanical Plugs to be Inserted in Peach Bottom Unit 2, the staff concluded that the mechanical design of the proposed bypass flow plugs is acceptable and that the plugs will reduce the vibration of the instrument thimbles caused by flow through the bypass holes and that installation of the plugs should be authorized. Subsequent operation of the facility with the plugs installed is under review.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, *it is ordered*, that Facility Operating License No. DPR-44 is hereby amended by substituting the following provisions for the provisions set out in Appendix A to the Commission's Order for Modification of License dated July 23, 1975:

1. The Licensee is authorized to install bypass hole plugs in the Facility's lower core plate. The Licensee shall not, without prior written approval of the Director, Office of Nuclear Reactor Regulation, return the facility to operation following the installation of the bypass hole plugs.

Dated at Bethesda, Maryland this 4th day of November, 1975.

For the Nuclear Regulatory Commission.

BEN C. RUSCHE, *Director,*
Office of Nuclear Reactor Regulation.

REGULATORY GUIDE

Notice of Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.105, "Instrument Spans and Setpoints," describes a method acceptable to the NRC staff for complying with the Commission's regulations with regard to ensuring that the instrument setpoints initially are within and remain within the specified safety system setting.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed (listed below) or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 1.105 will, however, be particularly useful in evaluating the need for an early revision if received by January 9, 1976.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted and Commission approval is not required to reproduce them.

Other Division 1 Regulatory Guides currently being developed include the following:

Fracture Toughness Class I Vessels Under Overstress Conditions.
Protection Against Postulated Events and Accidents Outside of Containment.
Fracture Toughness Requirements for Materials for Class 2 and 3 Components.
Maintenance of Water Purity in PWR Secondary Systems.
Criteria for Heatup and Cooldown Procedures.
Surveillance Testing and Inservice Inspection of Thermal Barrier and Steam Generator Materials in High-Temperature Gas-Cooled Reactors.
Surveillance and Postirradiation Examination of Fuel Rods in Lead Assemblies.
Design Load Combinations for Component Supports.
Interim Guide on Tornado Missiles.
Criteria for Plugging Steam Generator Tubes.
Structural Design Criteria for Fuel Assemblies in Light-Water-Cooled Reactors.
Overhead Crane Handling Systems for Nuclear Power Plants.
Recommended Procedure for Reintering Test to Monitor Densification Stability of Production Fuel.
Qualifications for Cement Grouting for Prestressing Tendons in Containment Structure.
Inservice Monitoring of Core and Core Support Structure Motion Via Neutron-Flux Measurement.
Loose Parts Monitoring Program for the Primary System.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON THE TYRONE ENERGY PARK, UNIT 1

Agenda Change

The agenda for the November 21, 1975 meeting of the ACRS Subcommittee on the Tyrone Energy Park, Unit 1, which was published at 40 Federal Register 51506, November 5, 1975, is changed as follows:

Thursday, November 20, 1975, 7 p.m. until conclusion of business.

The Subcommittee will meet in closed Executive Session with any of its consultants who may be present, to explore their preliminary opinions, based upon their independent review of safety reports, regarding matters which should be considered during the open session in order to formulate a Subcommittee report and recommendations to the full Committee.

Friday, November 21, 1975, 8:30 a.m. The Subcommittee will meet in closed session with the NRC Staff and representatives of the Northern States Power Company for the purpose of exploring proprietary matters with regard to plant security.

There is no change to the agenda for the open session.

All other matters pertaining to the meeting remain unchanged.

Dated: November 6, 1975.

JOHN C. HOYLE,
Advisory Committee Management Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-11794; File No. SR-Amex-75-6]

AMERICAN STOCK EXCHANGE, INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 31, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The American Stock Exchange, Inc. ("Amex") has adopted amendments to certain of the guidelines adopted by the Amex pursuant to Rule 915(b) of the Amex Rules which relate to standards for issuers of securities underlying options (the "Amendments to the Rule 915 Guidelines"). The Amendments to the Rule 915 Guidelines are set forth below. Brackets indicate words to be deleted, and italics are used to indicate words to be added.

The issuer and its subsidiaries have not during the past [ten] *three* years defaulted in the payment of any dividend or sinking fund installment on preferred stock, or in the payment of any principal, interest or sinking fund installment on any indebtedness for borrowed money, or in the payment of rentals under long term leases.

The issuer and its consolidated subsidiaries had a net income, after taxes but before extraordinary items net of tax effect, of at least [$500,000] *$250,000* for each of the last [five] *three* fiscal years.

[The issuer earned in each of the last five fiscal years any dividends, including the fair market value of any stock dividends, paid in each such year on all classes of securities.]

The purpose of the Amendments to the Rule 915 Guidelines is to conform such guidelines with the recent proposed amendments to the Form S-7 requirements of the Securities and Exchange Commission (the "Commission").

The Amendments to the Rule 915 Guidelines are authorized by Section 6(b)(5) of the Securities Exchange Act of 1934 (the "1934 Act"). Although Section 6 of the 1934 Act, as recently amended by the Securities Acts Amendments of 1975, does not become effective until December 1, 1975, the Amendments to the Rule 915 Guidelines, will be consistent with that Section when such amendments to the 1934 Act become effective.

The Amendments to the Rule 915 Guidelines relate to standards to be considered by the Amex in evaluating potential underlying stocks for Amex option transactions. These guidelines were based upon the Form S-7 requirements in effect at the time such guidelines were adopted.

In adopting the Form S-7 requirements the Commission decided that for certain issuers eligible to use such Form adequate disclosure could be assumed to have been made in reports and proxy statements filed over the years under the 1934 Act. The Commission recently determined that the S-7 qualification standards relating to net income, default and dividends could be reduced without compromising the protection of investors, and that the public interest would be served thereby.

The Amex believes that the Amendments to the Rule 915 Guidelines, in line with the amendments to the Form S-7 requirements, are consonant with the protection of investors and the public interest.

The Amendments to the Rule 915 Guidelines were considered and unanimously approved by the Options Committee of the Amex which is composed of Amex members and representatives of Amex member organizations. No additional comments were solicited and received.

The Amex had determined that the Amendments to the Rule 915 Guidelines would not impose any burden on competition.

On or before December 16, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 11, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 4, 1975.

[FR Doc.75-30283 Filed 11-10-75;8:45 am]

[Release No. 34-11791; File No. SR-BSE-75-4]

BOSTON STOCK EXCHANGE

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 29, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change Chapter XII-B (next to last paragraph) of the Rules:

For the purposes of this paragraph (5) the next transaction in the primary market shall mean the next transaction in the primary market as reported on the Consolidated Tape at the Boston Stock Exchange after the order is placed with the Dealer for execution. Adjustments for lateness of the tape and any similar adjustments shall be made in the same manner as for odd-lot transactions.

STATEMENT OF BASIS AND PURPOSES

Purpose of the proposed rule change. The purpose of the rule change is to eliminate the two minute time requirement on the execution of round-lot orders and to clarify the definition of next transaction occurring in the primary market.

Basis of the proposed rule change:
a (i) Not applicable.
(ii) Not applicable.
(iii) Not applicable.
(iv) Not applicable.
(v) Not applicable.
(vi) Not applicable.
(vii) Not applicable.

Comments received from members, participants or others on proposed rule change. No comments were solicited or received.

Burden on competition. No burden on competition is perceived by adoption of the proposed amendment. Indeed, it was proposed to conform this Exchange's trading rule to those of other Exchanges.

On or before December 16, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, DC 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced

V 40 N 218 NOV 11 75 XUM

in the caption above and should be submitted on or before December 11, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 4, 1975.

[File No. 500-1]

CANADIAN JAVELIN, LTD.

Suspension of Trading

NOVEMBER 4, 1975.

The common stock of Canadian Javelin, Ltd. being traded on the American Stock Exchange pursuant to provisions of the Securities Exchange Act of 1934 and all other securities of Canadian Javelin, Ltd. being traded otherwise than on a national securities exchange; and

It appearing to the Securities and Exchange Commission that the summary suspension of trading in such securities on such exchange and otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on the above mentioned exchange and otherwise than on a national securities exchange is suspended, for the period from November 5, 1975 through November 14, 1975.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-30280 Filed 11-10-75;8:45 am]

[Release No. 34-11789; SR File No. SR-CBOE-75-3]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Order Approving Proposed Rule Change

On September 12, 1975, the Chicago Board Options Exchange, Inc. ("CBOE"), LaSalle at Jackson, Chicago, Illinois 60604, filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s) (b) (1), as amended by the Securities Acts Amendments of 1975 (Pub. L. No. 94-29, Section 16 (June 4, 1975)) (the "Act"), and Rule 19b-4 thereunder, copies of a proposed rule change.

The proposed rule change would: (1) revise the provisions concerning resignation, disqualification and removal of directors to reflect the proposed changes in Board composition (Rule 6.3(b)); (2) alter the composition of its Board of Directors as between public directors and exchange directors and provide for special qualifications for certain exchange directors (Rule 6.1); (3) revise the balloting procedures to ensure that the representation required by virtue of the foregoing change in Board composition is effected (Rule 5.3); (4) facilitate the process through which a member can petition to become a candidate for the Board of Directors or the Nominating Committee by reducing the number of signatures required and by lengthening the time within which petitions can be filed (Rule 4.5); and (5) place a specific obligation on the Nominating Committee to choose candidates for the Board of Directors and for the Nominating Committee which reflect the various membership interests (Rule 4.3).

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 11675 (Sept. 24, 1975)) and by publication in the FEDERAL REGISTER (40 FR 14903 (Sept. 30, 1975)).

Notice of the Commission determination to extend the time period within which the Commission will approve the above referenced proposed rule changes of CBOE or institute proceedings to determine whether it should be disapproved was given by publication of a Commission Release (Securities Exchange Act Release No. 11755 (Oct. 21, 1975)) and by publication in the FEDERAL REGISTER (40 FR 50330 (Oct. 29, 1975)).

CBOE has requested that the Commission consider separately CBOE's proposed rule change insofar as CBOE Rule 4.5 is concerned. The Commission finds the proposed rule change, insofar as CBOE Rule 4.5 is concerned, is consistent with the requirements of the Act and rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change insofar as CBOE Rule 4.5 is concerned, filed with the Commission on September 12, 1975 be, and it hereby is, approved.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMON,
Secretary.

NOVEMBER 4, 1975.

[File No. 500-1]

CONTINENTAL VENDING MACHINE CORP.

Suspension of Trading

NOVEMBER 5, 1975.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock of Continental Vending Machine Corporation being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities otherwise than on a national securities exchange is suspended, for the period from November 6, 1975 through November 15, 1975.

By the Commission.

[70-5763; Rel. No. 19236]

INDIANA & MICHIGAN POWER CO. AMERICAN ELECTRIC POWER COMPANY, INC.

Proposed Issuance and Sale of First Mortgage Bonds at Competitive Bidding and Guaranty Agreement Between Parent and Subsidiary

NOVEMBER 4, 1975.

Notice is hereby given that American Electric Power Company, Inc. ("AEP"), 2 Broadway, New York, New York 10004, a registered holding company, and Indiana & Michigan Power Company ("I&MP"), 2 American Electric Power Service Corporation, 2 Broadway, New York, New York, 10004, an electric generating subsidiary company of Indiana & Michigan Electric Company ("I&M"), an electric utility subsidiary company of AEP, have filed an application-declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(a), 7, & 12 and Rules 42(a), 42(b) and 50 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, as amended, which is summarized below, for a complete statement of the proposed transactions.

I&MP was organized under the laws of the State of Michigan on April 20, 1971 for the purpose of acquiring, completing the construction of, and operating, the Donald C. Cook Nuclear Plant ("Cook Plant"), a nuclear fueled steam electric generating station situated in Michigan along the shore of Lake Michigan near Bridgman, Michigan. The Cook Plant is to consist of two nominally rated 1,100,000 kilowatt generating units, the first of which was placed in commercial operation on August 23, 1975 and the second of which is scheduled to be placed in commercial operation in 1978 or later. It is estimated that the total construction costs of the Cook Plant will equal at least $980,000,000. Construction costs aggregating $758,799,000 have been incurred through June 30, 1975 and it is estimated that additional construction costs aggregating $70,100,000 will be incurred in 1975 and $83,000,000 in 1976.

By order issued May 20, 1971 (HCAR No. 17135), the Commission authorized I&MP to acquire the Cook Plant from I&M in consideration of the issuance by I&MP to I&M of 1,500,000 shares of its common stock, par value $1.00 per share, and $130,000 aggregate principal amount of ten year unsecured promissory notes. By orders issued August 23, 1971 and September 12, 1972 (HCAR Nos. 17247 and 17694), the Commission also authorized I&MP to issue its unsecured promissory notes from time to time to seventeen banks under a Bank Loan Agreement in an aggregate principal amount up to $300,000,000 and, in connection therewith, authorized I&MP and I&M to enter into and to perform a Capital Funds Agreement and a Power Agreement. On September 23, 1971, I&M transferred the Cook Plant to I&MP in consideration of the issuance and delivery by I&MP to I&M of the securities which the Commission authorized I&MP to issue, and thereafter I&MP effected borrowings under the Bank Loan Agreement until it completed in 1974 the borrowing of the $300,000,000 thereunder. The notes issued under the Bank Loan Agreement mature by their terms on September 30, 1977 and bear interest at a rate equal to one-half of one percent plus the prime commercial loan rate of Manufacturers Hanover Trust Company from time to time in effect.

I&M is entitled under the Power Agreement to receive all power (and the energy associated therewith) available at the Cook Plant and I&M agrees to pay I&MP in consideration for the right to receive all such power and energy, such amounts from time to time as, when added to amounts received by I&MP from any other source, will be at least sufficient for I&MP to pay when due all of its operating and other expenses, including (i) any amount which I&MP may be required to pay on account of any interest and/or any substitute interest on all indebtedness for borrowed money issued or assumer by I&MP and on account of the stated maturities of, and/or all required sinking fund payments and other regular amortization requirements applicable to, such indebtedness and (ii) such additional amount as is necessary after any required provision of taxes on, or measured by, income to enable I&MP to pay required dividends on any preferred stock which it may issue and such amount as will represent a fair return on the common stock equity of I&MP as may be permitted by governmental regulatory authorities having jurisdiction. I&MP filed the Power Agreement with the Federal Power Commission ("FPC") on October 8, 1975 as an initial rate schedule, effective as of August 23, 1975 and an investigation was instituted, which is currently continuing, under Section 206 of the Federal Power Act as to the reasonability of the rates and charges specified in the Power Agreement.

I&MP proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, up to $75,000,000 principal amount of First Mortgage Bonds, in one initial series, to mature in not less than 5 and not more than 10 years from the date of issuance of such Bonds. The interest rate (which shall be a multiple of ⅛ of 1%) and the price to be paid to I&MP for the Bonds (which shall not be less than 100% unless I&MP shall authorize a lower percentage not less than 99%, and shall not exceed 102.75%) will be determined by competitive bidding. The Bonds will be issued under and secured by a Mortgage and Deed of Trust, to be dated as of December 1, 1975 to Manufacturers Hanover Trust Company ("Trustee"). The terms of the Bonds preclude I&MP from redeeming any such Bonds prior to December 1, 1980, if such redemption is for the purpose of refunding such Bonds with proceeds of funds borrowed at a lower effective interest cost. I&MP shall notify prospective bidders no later than 72 hours prior to the time designated for the submission of the bids of the maturity date of the Bonds.

The Motgage Indenture is designed to finance 60% of the construction costs of the 2 unit Cook Plant plus additions thereto as defined in the Mortgage Indenture. I&MP will not assign its interest or rights to any funds due or to become due under the Capital Funds Agreement or Power Agreement to any person other than the Indenture Trustee. I&MP will not declare or pay any dividend on any class of its capital stock, nor directly or indirectly make any payment on account of the purchase, redemption, acquisition or other retirement of any shares of its capital stock, of any class, unless, after giving effect to such transaction, the aggregate amount of the proprietary capital of I&MP, including all of its capital stock and paid-in and retained earnings, is at least 53.85% of the principal amount of all then outstanding indebtedness of I&MP for borrowed money. The Mortgage provides for a eash sinking fund pursuant to which I&MP will be required annually to retire a specified principal amount of the Bonds. The amount of the sinking fund payments will be filed by amendment. It is contemplated that the amount of the annual sinking fund payment for the Bonds of this series and the respective amounts of sinking fund payments in the future for additonal series will be sufficient to provide for the retirement of all outstanding Bonds at the expiration of the useful life of the depreciable facilities of the Cook Plant.

The proceeds realized from the sale of the Bonds will be deposited in the construction fund under the Mortgage and will be withdrawn by I&MP on application to the Trustee to pay construction costs of the 2 unit Cook Plant.

AEP proposes to execute and deliver a Guaranty Agreement guaranteeing the payment of the principal, interest, and premium on any Bond, upon notice of default by I&MP. AEP also proposes, prior to the sale by I&MP of the Bonds, to deposit with the Trustee under its Debenture Indenture, an amount (approximately $2,272,000) sufficient to pay, when due, the principal and interest on all of its remaining 3⅜% Sinking Fund Debentures, due June 1, 1977.

The fees and expenses to be incurred in connection with the proposed transactions will be supplied by amendment. The proposed issuance and sale of the Bonds is subject to the jurisdiction of the Michigan Public Service Commission and no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than November 28, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

MIDWEST SECURITIES TRUST CO. AND MIDWEST CLEARING CORP.

Amendment to the Schedule of Charges

Notice is hereby given that the Midwest Stock Exchange ("MSE") has amended the schedule of charges for services rendered by its wholly-owned subsidiaries, the Midwest Securities Trust Company ("MSTC") and the Midwest Clearing Corporation ("MCC") by deleting the $.50 per item charge for directing clearing trades to other clearing systems through MCC's interface arrangements with other systems. Charges for directing trades through the MCC interfaces, which currently are operating on a pilot basis, will be assessed individually against MCC participants involved in the pilot until a standard charge for movements through MCC's interfaces is incorporated in the schedule of charges.

The schedule of charges, which included the interface charge, became effective on September 2, 1975 upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934 [15 U.S.C. 78s(b)(1), as amended by Pub. L. 94-29, 16 (June 4, 1975)].[1] The amendment deleting the in-

[1] Securities Exchange Act Release No. 11669, 40 F.R. 44902.

V 40 N 218 NOV 11 75 XUM

terface charge became effective on October 28, 1975 upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934.

Publication of this notice is expected to be made in the FEDERAL REGISTER during the week of November 10, 1975. Interested persons may submit comments concerning the amendment deleting the interface charge on or before December 2, 1975. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549. Reference should be made to File Nos. SR–MSTC–75–1(a) and SR–MCC–75–1(a).

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

DEPARTMENT OF LABOR

Office of the Secretary

[TA–W–270]

BROWN SHOE CO.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On October 30, 1975, the Department of Labor received a petition filed under Section 221(a) of the Trade Act of 1974 ("the Act") by the United Shoe Workers of America on behalf of the workers and former workers of Sullivan, Illinois, plant of Brown Shoe Company, St. Louis, Missouri (TA–W–270).

Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with women's footwear produced by Brown Shoe Company or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 21, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 30th day of October 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[TA–W–272]

GENERAL ELECTRIC CO.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On October 30, 1975, the Department of Labor received a petition filed under Section 221(a) of the Trade Act of 1974 ("the Act") by the Allied Industrial Workers of America on behalf of the workers and former workers of Owensboro, Kentucky plants of General Electric Company, Fairfield, Connecticut (TA–W–272). Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with electronic receiving tubes for radios & televisions produced by General Electric Company or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 21, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 30th day of October 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[TA–W–271]

LEVERENZ SHOE CO.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On October 30, 1975, the Department of Labor received a petition filed under Section 221(a) of the Trade Act of 1974 ("the Act") on behalf of the workers and former workers of Leverenz Shoe Company, Sheboygan, Wisconsin (TA–W–271). Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with men's dress and casual footwear produced by Leverenz Shoe Company or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than November 21, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 30th day of October 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[Notice No. 116]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

NOVEMBER 11, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before December 1, 1975. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

Finance Docket No. 27992. By order entered November 5, 1975, the Motor Carrier Board approved the transfer to Flowers Transportation, Inc., Greenville, Mississippi, of Cetificate No. W-1227, issued September 25, 1969, to Waxler Towing Company, Incorporated, Memphis, Tennessee, evidencing a right to engage in transportation as a common carrier by water, by non-self-propelled vessels with the use of separate towing vessels in the transportation of general commodities, and by towing vessels in the performance of general towage, between ports and points along the Arkansas-Verdigris Waterway, on the one hand, and, on the other, ports and points along the Ohio River below Pittsburgh, Pa., the Illinois Waterway, and the Mississippi River from St. Paul, Minn., to New Orleans, La. Douglas C. Wynn, P.O. Box 1295, Greenville, Miss. 38701, and R. Dale Woodall, Evans, Petree, Cobb & Edwards, 900 Memphis Bank Building, Memphis, Tenn. 38103, attorneys for applicants.

No. MC-FC-75868. By order of November 5, 1975, the Motor Carrier Board approved the transfer to Homer L. Williamson, Doing business as Williamson Transfer & Storage, Man, West Virginia, of Certificate No. MC 4197, issued October 8, 1975, to Logan Transfer Company, Huntington, West Virginia, authorizing the transportation malt beverages and oil and grease, from points in Kentucky to Logan, W. Va., carbide, from Ivanhoe, Va., to Logan, W. Va., and household goods, between Huntington, W. Va.; and points in Logan and Lincoln Counties, W. Va., on the one hand, and, on the other, points in fifteen states and the District of Columbia. John M. Friedman, 2930 Putnam Avenue, Hurricane, West Virginia 25526, representative of applicants.

No. MC-FC-76058. By order of November 5, 1975, the Motor Carrier Board approved the transfer to R. Lavoie Trucking, Inc., Coaticook, Quebec, Canada, of a portion of Certificate No. MC 108381, issued October 3, 1949, to J. M. Blassberg, Inc., Shelburne Falls, Massachusetts, authorizing the transportation of building materials and electrical supplies between points in Massachusetts, New Hampshire, Vermont, and New York, with a restriction. David M. Marshall, Marshall, and Marshall, 135 State Street, Suite 200, Springfield, Mass. 01103, attorney for Applicants.

No. MC-FC-76072. By order entered November 5, 1975, the Motor Carrier Board approved the transfer to Robert Moreno, Yreka, Calif., of Certificate of Registration No. MC 106086 (Sub-No. 14), issued May 1, 1964, to Winans Bros. Trucking Co., a corporation, Redding, Calif., evidencing a right to engage in transportation in interstate commerce as described in certificate No. 53025, dated May 8, 1956, issued by the Public Service Commission of California. John Paul Fischer, 140 Montgomery Street, San Francisco, Calif. 94104, attorney for applicants.

No. MC-FC-76148. By order of November 6, 1975, the Motor Carrier Board approved the transfer to Van Nata Trucking, Inc., Vesper, Wis., of the operating rights in Permit No. MC 124912, issued January 2, 1975, to Donald F. Dengel and A. William Lind, a partnership, doing business as D & L Trucking Company, Sheboygan, Wis., authorizing the transportation of malt beverages and incidental supplies, premiums and advertising materials when shipped with malt beverages, from points in the Minneapolis-St. Paul, Minn., Commercial Zone as defined by the Commission to Fond du Lac and Sheboygan, Wis., under contract with Donald F. Dengel, doing business as Don Dengel Distributing Company, of Fond du Lac, and Lind Distributing Co., Inc., of Sheboygan. Edward Solie, 4513 Vernon Boulevard, Madison, Wis. 53705, attorney for applicants.

No. MC-FC-76159. By order entered November 5, 1975, the Motor Carrier Board approved the transfer to AGS Enterprises, Inc., Litchfield, Ill., of the operating rights set forth in Certificate No. MC 87566 (Sub-No. 6), issued November 2, 1973, to Schmidt Truck Service, Inc., Litchfield, Ill., authorizing the transportation of plastic products, from the facilities of International Paper Company, at Litchfield, Ill., to points in Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Ohio, Pennsylvania, and Wisconsin. David Axelrod, 39 South LaSalle St., Chicago, Ill. 60603, attorney for applicants.

No. MC-FC-76160. By order entered November 6, 1975, the Motor Carrier Board approved the transfer to The Minuteman Lines, Inc., Winchendon, Mass., of that portion of the operating rights set forth in Certificate of Registration No. MC 99912 (Sub-No. 1), issued May 21, 1964, to Barry & Foley Motor Transportation, Inc., Worcester, Mass., evidence a right to engage in transportation in interstate or foreign commerce, of general commodities, between specified points in Massachusetts. George C. O'Brien, 15 Court Square, Boston, Mass. 02108, attorney for applicants.

No. MC-FC-76172. By order entered November 5, 1975, the Motor Carrier Board approved the transfer to Joseph Struzzieri, Massepequa, N.Y., of the operating rights set forth in Certificates Nos. MC 29796 and MC 29796 (Sub-No. 2), issued by the Commission, July 22, 1969, and September 26, 1972, respectively, to Esbit Transportation & Storage Co., Inc., Glendale, N.Y., authorizing the transportation of new furniture, from New York, N.Y., to points in that part of New York and New Jersey within 50 miles of the New York, N.Y. Commercial Zone, as defined by the Commission in 1 M.C.C. 665, and from New York, N.Y., to points in Fairfield County, Conn., and refused, rejected, or damaged shipments of new furniture in the reverse direction. Charles E. Creager, 1329 Pennsylvania Ave., P.O. Box 1417, Hagerstown, Md. 21740.

[Notice No. 126]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

NOVEMBER 5, 1975.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 26396 (Sub-No. 127TA) (Correction), filed October 17, 1975, published in the FR issue of October 30, 1975, and republished as corrected this issue. Applicant: POPELKA TRUCKING CO., doing business as THE WAGGONERS, P.O. Box 990, Livingston, Mont. 59047. Applicant's representative: Jeanne Charlesworth (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Particleboard*, from Missoula, Mont., to points in Illinois, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: George A. Washington, Plant Sales Manager, Evans Products Co., Drawer L, Missoula, Mont. 59801. Send protests to: Paul J. Labane, District Supervisor, Interstate Commerce Commission, Room 222, U.S. Post Office Bldg., Billings, Mont. 59101. The purpose of this republican is to add the supporting shipper, which was omitted in the previous publication.

No. MC 99427 (Sub-No. 25TA), filed October 25, 1975. Applicant: ARIZONA TANK LINES, INC., 666 Grand Ave., Des Moines, Iowa 50309. Applicant's representative: Earl Check (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sulphuric acid*, in bulk, from Hayden, Ariz., to Glendale, Nev., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Asarco, Inc., 405 Montgomery St., San Francisco, Calif. 94104. Send protests to: Herbert W. Allen, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 875 Federal Bldg., Des Moines, Iowa 50309.

No. MC 107295 (Sub-No. 784TA), filed October 22, 1975. Applicant: PRE-FAB TRANSIT CO., 100 South Main St., Farmer City, Ill. 61842. Applicant's representative: Duane Zehr (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hardwood flooring systems, hardwood flooring, lumber, lumber products, and accessories* used in the installation thereof, from the plantsite of A.G.A., Inc., at Amasa, Mich., to points in the United States (except Alaska and Hawaii), for 180 days. Authority sought to operate as a *common carrier*, by motor vehicle, over regular and irregular routes, transporting: (1) *Automobiles, station wagons, pickup trucks, and vans* of the classification of one (1) ton or less, (2) the *passengers* of said motor vehicles, and (3) the *baggage and similar property of said passengers*, on modified auto transport trailers, (a) special and Charter operations over irregular routes, between all points in the United States (except Alaska and Hawaii), (b) scheduled operations over regular routes, (1) between Milwaukee, Wis., and New Orleans, La., from Milwaukee over Interstate Highway 94 to junction Interstate Highway 294, thence over Interstate Highway 57, thence over Interstate Highway 57 to junction Interstate Highway 55, thence over Interstate Highway 55 to junction U.S. Highway 51, thence over U.S. Highway 51 to junction Interstate Highway 10, thence over Interstate Highway 10 to New Orleans, and return over the same route; (2) between Louisville, Ky., and Minneapolis, Minn., from Louisville over Interstate Highway 65 to junction Interstate Highway 80, thence over Interstate Highway 80 to junction Interstate Highway 294, thence over Interstate Highway 294 to junction Interstate Highway 94 to Minneapolis, and return over the same route.

(3) Between Minneapolis, Minn., and Wichita, Kans., from Minneapolis, over Interstate Highway 35 to Wichita, and return over the same route; (4) between Houston, Tex., and junction Interstate Highway 35W and Interstate Highway 70 (near Salina, Kans.), from Houston over Interstate Highway 45 to junction Interstate Highway 35, thence over Interstate Highway 35 to junction Interstate 35W, thence over Interstate Highway 35W to junction Interstate Highway 70, and return over the same route; (5) between Chicago, Ill., and Denver, Colo., from Chicago, over Interstate Highway 80 to junction Interstate Highway 80S, thence over Interstate Highway 80S to Denver, and return over the same route, serving Des Moines, Iowa and Omaha, Nebraska as intermediate points; (6) between Chicago, Ill., and junction Interstate Highway 55 and Interstate Highway 57 (near Sikeston, Mo.), from Chicago over Interstate Highway 55 to junction Interstate Highway 57 (near Sikeston, Mo.), and return over the same route; (7) between Indianapolis, Ind., and Denver, Colo., from Indianapolis over Interstate Highway 70 to Denver, and return over the same route, serving St. Louis, Mo., and Kansas City, Mo., as intermediate points; (8) between Louisville, Ky., and Oklahoma City, Okla., from Louisville over Interstate Highway 64 to junction Interstate Highway 44, thence over Interstate Highway 44 to Oklahoma City, and return over the same route, serving Tulsa, Okla., as intermediate point; (9) between Nashville, Tenn., and Albuquerque, N. Mex., from Nashville over Interstate Highway 40 to Albuquerque, and return over the same route, serving Memphis, Tenn., and Amarillo, Tex., as intermediate points; (10) between Little Rock, Ark., and Dallas, Tex., from Little Rock over Interstate Highway 30 to Dallas, and return over the same route; (11) between Jackson, Miss., and junction Interstate Highway 20 and Interstate Highway 10 (near Kent, Tex.), from Jackson over Interstate Highway 20 to junction Interstate Highway 10, and return over the same route.

(12) Between New Orleans, La., and El Paso, Tex., from New Orleans over Interstate Highway 10 to El Paso, and return over the same route, serving San Antonio, Tex., as an intermediate point. Applicant intends to tack its existing authority at Louisville, Ky., for 180 days. Supporting shippers: There are approximately 9 statements of support attached to the application, which may be examined at the Interstate Commerce Commission, in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: J. P. Werthmann, District Supervisor, Interstate Commerce Commission, 210 N. 12th St., Room 1465, St. Louis, Mo. 63101.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary*.

MOBILE HOME CONSTRUCTION AND SAFETY STANDARDS

Corrections and Proposed Amendments

V 40 218 NOV 11 75 XUM

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF THE ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT—FEDERAL HOUSING COMMISSIONER (FEDERAL HOUSING ADMINISTRATION), DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-75-340]

PART 280—MOBILE HOME CONSTRUCTION AND SAFETY STANDARDS

Correction

In FR Doc. 75-22727 appearing at page 40261 in the issue for Tuesday, September 2, 1975, the following corrections should be made.

1. On page 40267, in the third column, in the last line of the fifth full paragraph, the effective date which reads "March 15, 1976" should read "June 15, 1976."

2. On page 40284, in the table following § 280.604, under the column headed "Materials":

a. The following items should appear as italicized headings rather than individual items: "Ferrous pipe and fittings", "Nonferrous pipe and fittings", "Plumbing fixtures".

b. The item beginning "Plastic pipe and fittings * * *" should be divided into an italicized heading and an item below the heading, as shown below.

c. The item reading "Miscellaneous pipe nipples, threaded" should be divided into an italicized heading and an item below the heading, as shown below.

d. The item beginning "Anti-siphon trap vent device * * *" should be divided into two items as shown below.

3. In the same table, the corresponding entries under all columns for the following items are corrected to read as shown below: "Vitreous china plumbing fixtures", "Plastic bathtub units", "Gel-coated glass-fiber reinforced polyester resin shower receptor and shower stall units", and "Cultured marble lavatory".

4. Also in the same table, the item "Prefabricated shower receptors, shower enclosures and non-metallic bathtubs" and the corresponding entry under the column headed "Other standards" should be deleted.

5. The corrected items in the table following § 280.604 should appear as shown below.

Materials	ANSI	ASTM	FS	Other standards
Ferrous Pipe and Fittings				
• • •	•	•	•	•
Nonferrous Pipe and Fittings				
• • •	•	•	•	•
Plastic Pipe and Fittings				
ABS plastic drain, waste, and vent pipe and fittings.		D2661-1973	L-P 322B-1973	IAPMO PS 17-71; NSF 14 1970
• • •	•	•	•	•
Miscellaneous				
Pipe nipples, threaded.			WW-N-351B (1)-1970	
• • •	•	•	•	•
Anti-siphon trap vent device				NSF-24
Diversion tees and twin waste elbow				IAPMO PS 9-66
• • •	•	•	•	•
Plumbing Fixtures				
• • •	•	•	•	•
Vitreous china plumbing fixtures	A112.19.2-1973			
• • •	•	•	•	•
Plastic bathtub units	Z124.1-1974			
Gel-coated glass-fiber reinforced polyester resin shower receptor and shower stall units.	Z124.2-1974			
• • •	•	•	•	•
Cultured marble lavatory				IAPMO PS 18-73; CMI-LS 175
• • •	•	•	•	•
Performance specifications and methods of test for safety glazing material used in buildings.	Z97.1-1972			

6. In the table following § 280.703 on pages 40289 and 40290:

a. Under the heading "Appliances:" in the listings for "Electric Air Heater" and "Electric Baseboard Heating Equipment", the entries under the column headed "ANSI" should appear under the column headed "UL".

b. Under the heading "Nonferrous pipe, tubing, and fittings:" in the listing for "Trailer standard for coated flexible metal gas connectors for exterior use", the entry under the column headed "UL" should appear under the column headed "Other Standards".

c. Under the heading "Miscellaneous:" in the listing for "Gas appliance thermostats", the entry under the column headed "ANSI" should read "A21.23—1971".

7. NOTE: Additional corrections to 24 CFR Part 280 appear in FR Doc. 75-30257 which follows this correction.

[Docket No. R-75-340]

PART 280—MOBILE HOME CONSTRUCTION AND SAFETY STANDARDS

Correction

The following are typographical corrections or omissions to the FEDERAL REGISTER, FR Doc. 75-22727, Docket No. R-75-340 as published on September 2, 1975 (40 FR 40261):

I. The preamble is corrected as follows:

1. On page 40262 under "Standard", second paragraph, line 6 is changed from: "1420–1427" to: "Part 280, Subparts A thru J."

2. On page 40262, under "B. Planning Considerations" Item 3, line 22 is changed from: "(§ 280.105(6))" to: "(§ 280.105(b))."

3. On page 40262 under B. Planning Considerations, Item 8, line 14, immediately after the word "areas" change "(280.114(6))" to "(280.114(b))."

4. On page 40262, under C. Fire Safety, Item 4, second sentence is changed from "The FTC considers that plastic foam insulating materials will, under some circumstances, burn with a rapid flame spread, quick flashover, emission of toxic or flammable gases, dense smoke, and intense heat." to: "The FTC considers that plastic foam insulating materials will, under some circumstances; burn with a rapid flame spread, flashover quickly, emit toxic or flammable gases, dense smoke, and intense heat."

5. On page 40265 under G. Plumbing, Item 1, line 3, immediately after the word "and" is changed from: "280.611(a))." to: "280.611(d))."

6. On page 40266 under H. Heating, Cooling, and Fuel Burning Systems. First sentence is changed from: "This Part was renumbered as Part 2525." to: "This Section was renumbered as "subpart H."

7. On page 40266 under H. Heating, Cooling and Fuel Burning Systems, item 5, line 1, immediately after the word "Section" is changed from: "2527.5" to: "280.705."

8. On page 40266 under I. Electrical Systems, Item 3, line 6, immediately after the word "standard." is changed from: "(§ 280.206(d)(9)" to: "(§ 280.-806(d)(9)."

9. On page 40267, under Electrical Systems, Item 6, second paragraph, line 5, immediately after word "the" is changed from: "CPSA" to: "CPSC."

10. On page 40267, under J. Transportation, line 4, paragraph heading is changed from: "K" to: "1." immediately before the word "Compliance."

11. On page 40267, under "Applicability of the Standards" First paragraph, first sentence, is changed from: "The initial Federal mobile home construction and safety standards shall be applicable to all mobile homes meeting the definitions contained in §§ 280.1(a)(16) as modified by 280.2(a)(13) on or after June 15, 1976." to: "The initial Federal mobile home construction and safety standards shall be applicable to all mobile homes, as defined in § 280.2(16), manufactured on or after the effective date of the standard (June 15, 1976).

II. The table of contents is corrected as follows:

1. On page 40268, under Subpart D, delete the "Condensation Control" entry.

2. On page 40268, Subpart K, delete, in its entirety, "Subpart K."

III. Subpart B. Planning Considerations is corrected as follows:

1. On page 40270 under § 280.103(b) Light and Ventilation, line 2, is changed from: "§ 280.103.3(a)" to: "§ 280.103(a)."

2. On page 40270, the heading "§ 288.-113 *Hallways*," is changed to: "§ 280.113 *Hallways*."

IV. Subpart C. Fire Safety is corrected as follows:

1. On page 40271 under § 280.201 *Scope*—second sentence, line 5, immediately after the word "this" is changed from: "Part" to: "Subpart."

V. Subpart D. Body and Frame Construction Requirements is corrected as follows:

1. On page 40271, heading "§ 208.301 Scope" is changed to: "§ 280.301 Scope."

2. On page 40271, heading "§ 208.302 *Definitions*" is changed to: "§ 280.302 *Definitions*."

3. On page 40272, under § 280.302(a)(8) Hurricane Resistive Mobile Home, line 4, immediately after the word "in" is changed from: "§ 2523.5(c)(2)." to: "§ 280.305(c)(2)."

4. On page 40272, under § 280.303(d) Hurricane Resistive Design, line 3, immediately after "of" is changed from: "§ 280.305(c)" to: "§ 280.305(c)(2)."

5. On page 40272 under the Table in § 280.304(b) Steel:

a. Line 1, reference is changed from: "AISC–1969" to: "AISC–1973."

b. Line 4, is changed from: "standard." to: "standard)."

VI. Subpart E. Testing is corrected as follows:

1. On page 42076, the Title under the diagram is changed from: "Figure A–1" to: "Figure A."

2. On page 40277 under § 280.403(c)(2) Performance Requirements, line 9, is changed from: "Zone II and Zone III," to: "Zone II."

3. On page 40277 under § 280.403(d) Test sequence, lines 11 and 13 are changed from: "Zone II and Zone III," to: "Zone II."

4. On page 40280 under § 280.405(2)(iii) Air infiltration test:

a. Line 8 is changed from: "1.2CFM per sq. ft. of door ------ Do." to: "1.2 CFM per sq. ft. of door ------ January 1, 1976."

b. Line 9 in changed from: "1.0 CFM per sq. ft. of door ------ Do." to: "1.0 CFM per sq. ft. of door ------ January 1, 1977."

VII. Subpart F. Thermal Protection is corrected as follows:

1. On page 40280 "§ 200.506 *Heat loss*" heading is changed to: "§ 280.506 *Heat loss*."

2. On page 40280 under § 280.506(a) Transmission heat losses, The Table is changed from:

Zone	*Design temperature*
I	0° F–11 Btu/ft² of envelope area.
II	20° F–11.3 Btu/ft² of envelope area.
III	50° F–12.5 Btu/ft² of envelope area.

to:

Zone	Design temperature (degrees Fahrenheit)	British thermal unit per square foot of envelope area
I	0	11.0
II	−20	11.3
III	−50	12.5

3. On page 40281 under § 280.509(f), line 2, immediately after the word "See" is changed from: "2525.11" to "§ 280.511."

4. On page 40281 under § 280.511(a) Comfort cooling certificate and information, line 7, immediately after the word "in" is changed from "§ 2525.10" to: "§ 280.511."

VIII. Subpart G. Plumbing Systems is corrected as follows:

1. On page 40283, under § 280.603(b)(5) Components. Line 5, immediately after the word "in" is changed from: "§ 208.604" to: "§ 280.604."

2. On page 40285, under § 280.607(a)(3) Fixture connections. Line 6, immediately after the word "materials." is changed from: "In accessible" to: "Inaccessible."

3. On page 40286, under § 280.608(b) Piping supports:

a. Line 5, immediately after the word "in" delete the words "the appendix" and continue the sentence.

b. Line 7, immediately after the word "in" is changed from: "§ 208.604(a)." to: "§ 280.604(a)."

4. On page 40286, under § 280.609(a) Water distribution system. Lines 7 and 8 are changed from: "(See Table in 1424.090(f).)" to: "(See Table in § 280.609(f)(1))."

5. On page 40287, the table under § 280.609(f)(1) Minimum size tubing and pipe for water distribution is changed in line 1, column 2, from:

Tubing (nominal)

Number of fixtures	Diameter (inches)	Outer diameter (inches)	Pipe iron pipe size (inches)
1		1¼	

to:

Tubing (nominal)

Number of fixtures	Diameter (inches)	Outer diameter (inches)	Pipe iron pipe size (inches)
1		¼[1]	

(Place the footnote number "1" on the other side of "¼" to clarify pipe size as "¼" rather than "1-¼" inches in diameter.)

6. On page 40287 under § 280.610(a)(1) General, Line 4, is changed from: "(§ 208.606(a))" to: "(§ 280.606(a))."

7. On page 40287 under § 280.610(e)(1) Fixture load. Line 3, immediately after the word "by" is changed from: "§ 208.611(d)(2)," to: "§ 280.611(d)-(2)."

8. On page 40287 under § 280.610(f)(3) Length of trap arm, immediately after the word "in" is changed from: "§ 208.611(c)(5)" to: "§ 280.611(c)(5)."

9. On page 40288 under § 280.611(c)(1) Main vent. Line 4, is changed from: "§ 208.611(c)(5)" to: "§ 280.611(c)(5)."

10. On page 40288 under § 280.611(c)(1)(iii) Line 8, immediately after the word "in" is changed from: "§ 208.611(c)(5)" to: "§ 280.611(c)(5)."

11. The following items were omitted from page 40288, § 280.611(c) Size of vent piping and are to be inserted at the end of § 280.611(c)(1) immediately after the word "arms." in line 27 as follows:

"(2) *Individual Vents.* Each individually vented fixture with a 1½ inch or smaller trap shall be provided with a vent pipe equivalent in area to a 1¼ inch nominal pipe size. The main vent, toilet vent and relief vent, and the continuous vent of wet-vented systems shall have an area equivalent to 1½ inch nominal pipe size.

"(3) *Common Vent.* When two fixture traps located within the distance allowed from their vent have their trap arms connected separately at the same level into an approved double fitting, an individual vent pipe may serve as a common vent without any increase in size.

"(4) Intersecting Vents. Where two or more vent pipes are joined together, no increase in size shall be required; however, the largest vent pipe shall extend full size through the roof.

"(5) Distance of fixture trap from vent shall not exceed the values given in the following Table:

Maximum Distance of Fixtures From Vent Trap

Size of fixture drain (inches)	*Distance trap to vent*
1¼	4 ft 6 in.
1½	4 ft 6 in.
2	5 ft.
3	6 ft."

IX. Subpart H. Heating, Cooling and Fuel Burning Systems is corrected as follows:

1. On page 40289, in the table Heading—"Commercial cooking and warming equipment * * *" change entry 'NSF–4 1967' from: column headed 'UL' to: column headed 'other standards'."

Type	ANSI	UL	Other standards
Commercial cooking and warming equipment			NSF-4 1967.

2. On page 40293, under § 280.705(e)(2) Appliance connections. Line 4 immediately after the word "in" is changed from: "§ 1425.051(b)" to; "§ 280.705(b)."

3. On page 40294 under § 280.706(b) Materials:

a. Line 2, column 1, is changed from: "§ 280.506(d)" to: "§ 280.706(d)(e)."

b. Line 4, column 1, immediately before "Steel," is changed from "(1)" to: "(1)."

4. On page 40294 under § 280.707(a)(2) Heat producing appliances. Line 7 is

V 40 I 218 NOV 11 75 XUM

changed from: "(See 2527.3)" to: "(See 280.703)."

5. On page 40296 under § 280.715(a) (1) The Table is changed from:

Minimum metal thickness for ducts [1]

Duct type	Diameter (14 in or less)	or Width (over 14 in)
Round	0.013	0.016
Enclosed rectangular	.013	.016
Exposed rectangular	.016	.019

[1] When "nominal" thicknesses are specified, 0.003 in shall be added to these "minimum" metal thicknesses

To:

Minimum metal thickness for ducts [1]

Duct type	Diameter (14 in or less)	or Width (over 14 in)
Round	0.013	0.016
Enclosed rectangular	.013	.016
Exposed rectangular	.016	.019

[1] When "nominal" thickness are specified, 0.003 in shall be added to these "minimum" metal thicknesses.

6. On page 40297 under § 280.715(a) (7), line 12, is changed from: "(a)(4)(ii)" to: "(a)(5)(ii)."

X. Subpart I. Electrical Systems is corrected as follows:

1. On page 40300, § 280.805(a)(3)(v), line 5, immediately after "appliance" is changed from: "See 2529.4(j)," to: "See 280.804(j)."

2. On page 40300 under § 280.805(a)(1) Lighting. Item (1), line 4, immediately after the word "volts" insert "times amperage" before the word "to."

3. On page 40301, under § 280.809(d)(3), line 5, is changed from: "(See 2528.9)" to: "(See § 280.809)."

XI. Subpart J. Transportation is corrected as follows:

1. On page 40303 under § 280.903(a), line 9, is changed from "systems." to: "systems,"

2. On page 40303 under § 280.904(a) General. Column 2, line 5, is changed from: "Note:" to: "(NOTE:"

3. On page 40303 under § 280.904(b)(3) Chassis. Line 7 is changed by inserting a comma immediately after "load" to: "load,"

4. On page 40303, under § 280.904(b)(9) Brake assemblies. Line 8 is changed from: "2529.3(c)" to: "280.903(c)."

5. On page 40303, § 280.904(b)(10) Lights and associated wiring. Line 13 immediately after the parenthesis is changed from: "USC5401)" to: "USC-5401)." (period added after the parenthesis).

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing Production and Mortgage Credit—Federal Housing Commissioner (Federal Housing Administration)

[Docket No. R-75-340]

[24 CFR Part 280]

MOBILE HOME CONSTRUCTION AND SAFETY STANDARDS

Notice of Proposed Rulemaking

On June 25, 1975, the Department of Housing and Urban Development proposed Federal mobile home construction and safety standards (40 FR 26930); and on September 2, 1975, (40 FR 40261) published the final rule in the FEDERAL REGISTER pursuant to the requirements of the National Mobile Home Construction and Safety Standards Act of 1974 (Title VI of Public Law 93-383, 42 U.S.C. 5401 et seq.). On September 10, 1975, corrections to § 280.305 were published at 40 FR 42007. Additional corrections of typographical errors or omissions in the final rule as published on September 2, 1975, are being published concurrently with this document.

Several comments were received in response to the final rule as published in the FEDERAL REGISTER on September 2, 1975. The comments received were from a cross-section of manufacturers, suppliers, trade associations, and government agencies. As a result of these comments, discussions with other Federal and state agencies, and re-evaluations within HUD, the Department is proposing amendments to the final rule.

The following is a discussion, by subpart, of the specific amendments proposed to be made to the final rule.

Subpart A. General. 1. Section 280.1 would be revised to add a new subsection (b). The purpose of this subsection is to make clear that, to the extent possible, the Federal Mobile Home Construction and Safety Standards are written as performance requirements in preference to specification requirements. The subsection also makes it clear that: (1) whenever specific requirements are used in the Standard they are used because, at this time, it is the best available means of identifying the desired performance and; (2) the use of specifications is not intended to prohibit the utilization of any material, piece of equipment or system which cannot meet the precise specifications but which upon evaluation provides equivalent or superior performance.

This section allows the Secretary to waive precise specifications where a material, piece of equipment, or system provides equivalent or superior performance. In these cases, the Secretary will issue interpretative bulletins announcing and explaining the waiver.

2. § 280.1 would be revised to add a new subsection (c) which would establish a mechanism for the issuance of interpretative bulletins. The purpose of the bulletins would be to clarify the meaning of the various sections of the Standard.

3. To conform to industry practice, Section 280.6 would be amended by changing the minimum size of the letters and numbers used in the serial numbering of mobile homes from ½ inch to ⅜ inch in height.

Subpart B. Planning Considerations. 1. Section 280.102(a) would be amended to permit a maximum of 5 square feet of a recessed entry to be included when determining the gross floor area. Section 280.111 would be amended to exclude the recessed entry way from the 5 feet minimum clear horizontal room dimension requirement. These changes would permit the area encompassed by a standard door swing in a typical recessed entry to be included when determining the gross floor area.

2. The preamble to the final rule indicated that a lower exterior door height limitation of 72 inches would be permitted for exterior sliding glass doors than would be required for exterior swinging passage doors. However, this exception was not incorporated in the appropriate section of the final rule. Therefore, § 280.105(b)(2) would be amended to permit this exception from the 74 inch height requirement.

3. In order to make the language of § 280.404(a) consistent with § 280.106(a), the words "or approved device" would be added to permit an alternate means of egress from bedrooms.

Subpart C. Fire Safety. 1. The definition of "interior finish" would be moved from § 280.302(a)(9) to § 280.202(a)(2) and all appropriate subheadings renumbered. This change in the placement of the definition is necessary because the term "interior finish" first appears in Subpart C. Fire Safety.

2. The requirement for "firestopping" in § 280.206(a) would be amended to establish a minimum firestop of 1 inch nominal lumber, or its equivalent, for mobile homes. No minimum was stated in the final rule. The purpose of this amendment, therefore, is to establish a minimum firestopping requirement.

Subpart D. Body and Frame Requirements. 1. The definition of "diagonal tie" in § 280.302(a)(4) would be amended to indicate that while its primary purpose is to resist horizontal forces, the tie may also be used to resist vertical forces. This amendment permits the secondary vertical load carrying capability of the diagonal tie member to be used in determining the structural integrity of the unit.

2. Section 280.304 would be modified to make it clear that each individual wood member need not be marked as having a moisture content of 19% or less. Instead, the moisture content may be measured at the time of installation. (At the time of installation each individual member shall not have a moisture content exceeding 19%.)

3. Section 280.305(a) would permit finished flooring of up to ⅛ inch thickness under load bearing walls. This change is being made because it has been determined that finished flooring of this thickness is not detrimental to the load bearing characteristics of the structure.

Subpart E. Testing. 1. Since roof truss spacing varies in mobile homes, § 280.402(b)(1) would be amended by deleting the 24 inch minimum length requirement for sheathing used in truss testing. The amended section would require that the plywood strip sheathing be at least of sufficient length to cover the top chords of the trusses being tested at the designated design spacing.

2. Section 280.402(b)(1) is being revised to permit an alternate method of bracing the bottom chord of trusses being tested. The purpose of the revision is to provide the manufacturer a choice of test methods.

3. Section 280.402(d)(3) would limit the equivalent load in lieu of failure to a factor of safety (2.50) times the design live load plus the dead load. The load test required by the final rule posed a possible safety hazard to personnel conducting the tests.

4. Section 280.403(c) would be amended to require production line testing of prime windows and sliding glass doors, in addition to the prototype testing required by the Standards. Production testing and the criteria for the tests to be used were recommended by the industry. The industry suggested that the production units tested meet the prototype requirements, except with respect to the test level for water resistance, where a lower level of testing was recommended. HUD has some concern about the proposed level of testing suggested by the industry for water resistance. HUD believes that production testing—even to the level proposed by the industry—will result in better quality windows by reducing leakage and energy losses. Since definitive data is not currently available which demonstrates that the industry proposed level of testing is inadequate, HUD is proposing to accept the industry recommendation. HUD will, however, monitor the results of the production unit testing and, based on the experience gained and future research, may establish more stringent tests to demonstrate the performance of prime windows and sliding glass doors.

5. Section 280.403(i) incorporates into the window certification program the specific production line test requirements for prime windows and sliding glass doors. The testing frequency will be initially established by the agency certifying that the windows comply with the Standard. As previously stated in the preamble to the final rule published on September 2, 1975, HUD will closely monitor the window certification program. Based on the results of its monitoring of the window certification program and planned research, HUD may establish production unit testing frequencies.

Subpart F. Thermal Protection. 1. Section 280.504(b) would be modified to conform to the language of § 1423.080(b) as published in the FEDERAL REGISTER on June 25, 1975, (40 FR 26944). This modification is necessary because the required language was inadvertently omitted from the final rule as published.

Subpart G. Plumbing Systems. 1. In § 280.603(b)(4) the words "complete gravity" would be deleted. As a result of this change drainage of all supply piping would still be required, but such

V 40 218 NOV 11 75 XUM

drainage would not have to be achieved by the use of an absolute gravity system.

2. Section 280.607(b)(3) would be amended by adding the word "bathroom" before the words "floor level" to establish the level from which the height of the shower compartment is measured.

3. In § 280.610(c)(1) the requirement for a "permanent marker" for the drain outlet would be deleted. Since only one drain outlet is permitted, marking of the drain outlet is not required.

Subpart H. Heating and Cooling Systems. 1. Since the manufacturer has no control over the exact pressure of the gas delivered to the mobile home, § 280.705(a) would be amended to clarify the responsibility of the manufacturer with respect to the gas supply system. The proposed revision would require the manufacturer to design the gas piping system in accordance with the pressures listed in § 280.705(a). In addition, the amended section would now require the manufacturer to provide, in his written installation instructions, the pressure range for safe operation of the piping system.

2. Section 280.705(c) would be amended to delete the requirement for the "Quick-Disconnect Device" for expandable or dual mobile homes. Section 280.705(1)(3) requires that a shut-off valve be installed ahead of each appliance. Since these valves provide a greater level of safety, requiring such a device is redundant.

3. Section 280.705(j) would be amended to permit the location for all gas supply connections to be within 24 inches of the left (road) sidewall. Presently, the required location for the connection varies from 18 inches from the left (road) sidewall for total L–P gas system to 24 inches from the left (road) sidewall for combination L–P/natural gas systems. The purpose of this revision is to enable a manufacturer to standarize the location of the gas supply connection for all gas systems.

4. Section 280.705(l)(3) would be amended to indicate that shut-off valves are to be accessible in order to allow servicing of the appliance and removal of its components. Also, requiring that valves be accessible will enable the user to readily turn off the gas supply in the event of an emergency. The purpose of the revision is to clarify that the shut-off valve is to be located and accessible to allow for servicing which may require removal of the components of the appliance, and to stress the life-safety aspects of the valve.

5. Section 280.708(a)(1) has been amended to require listing of termination fittings and moisture lint exhaust duct systems for gas clothes dryers only. This revision is proposed since these devices are ordinarily not listed as required components for electric clothes dryers, but are ordinarily listed as components for gas clothes dryers.

6. § 280.709(e)(5) would require that when a furnace can only be used with a specific coil and the coil has a limited listing, the installation must be in accordance with that listing. The purpose of the revision would be to ensure proper installation of heating and cooling equipment. This requirement would not prevent heating and cooling equipment manufacturers from having their product listed for use in equipment manufactured by others.

Subpart I. Electrical Systems. 1. Section 280.803(1)(2) would delete the requirement that the manufacturer install conductors in the electric service raceway which goes to the underside of the mobile home. Instead, it would require the manufacturer to provide in his written installation instructions the proper service conductor sizes and the proper size of the junction box to be installed at the underside of the mobile home. The purpose of the change is to ensure, to the extent possible, proper installation.

2. Section 280.806(d)(9) would be amended to make clear that the use of receptacle outlet(s) which are integral with the light fixture over the bathroom basin comply with the requirement for a receptacle outlet adjacent to the bathroom basin.

3. Section 280.811 would be amended for clarity. The methods of calculating the supply and/or distribution panel electric loads, however, would not be changed.

Subpart J. Transportation. 1. Section 280.904(b)(5) would be revised to delete the reference to the SAE Handbook and to permit the mobile home manufacturer to use in his design evaluation the allowable stresses recommended by the spring assembly manufacturer. This revision is necessary because the SAE Handbook does not include allowable stresses for spring assemblies.

All of the proposed revisions which in the Department's judgment will have a significant impact on the final rule, as published, have been described above. The Department has under consideration comments submitted by interested parties on specific equipment and installations which may be the subject of interpretative bulletins as described in this proposal. The Department also has under consideration revising the smoke detector location indicated in § 280.208(b) to accommodate specific equipment installations and bedroom door locations in the hallways.

The proposed amendments to the final rule do not affect the Environmental Impact Statement for the Federal Mobile Home Construction and Safety Standards which was prepared and submitted to the Council on Environmental Quality. It is available for inspection and copying according to Department rules and regulations during regular business hours at the address below.

The proposed amendments to the final rule do not affect the Economic Impact Statement assessing the impact of the Federal Mobile Home Construction and Safety Standards on the economy, the labor force, competition, and material and energy supplies which was prepared and submitted to the Council on Wage and Price Stability. This Statement is available for inspection and copying according to the rules and regulations of the Department during regular business hours in Room 10245, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street S.W., Washington, D.C.

Comments on this proposal are solicited from interested persons. Communications should identify the subject matter by the above title and area affected and should be submitted to the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street, S.W., Room 10245, Washington, D.C. 20410. All communications received on or before Dec. 11, 1975, will be considered before action is taken on the proposal. Comments received after that date shall be considered only as time permits.

All written comments shall be available for examination by the public at the above address, except those determined to be exempt from public disclosure in accordance with the requirements of 42 U.S.C. 5408(b) Section 607(b) of the Act) by the Secretary, at the written request of the person submitting the comment.

(Section 7(d), Department of Housing and Urban Development Act, 42, U.S.C. 3535(d), Title VI, Housing and Community Development Act of 1974, 42 U.S.C. 5401.)

Issued at Washington, D.C. on Nov. 4, 1975.

DAVID M. DEWILDE,
Deputy Assistant Secretary-Commissioner for Housing Production and Mortgage Credit.

The following are amendments to FR Doc. 75–22727, Docket R75–340 as published September 2, 1975 (40 FR 40261):

I. Subpart A—General is amended as follows:

1. On page 40268 under 280.1, add new paragraphs (b) and (c) as follows:

§ 280.1 Scope.

* * * * *

(b) These Federal Mobile Home Construction and Safety Standards seek, to the maximum extent possible, to establish performance requirements. In certain instances, however, the use of specific requirements in the Standard is necessary because, at this time, that is the best available means of identifying the desired performance. The use of specific requirements is not intended to prohibit the utilization of any material, piece of equipment, or system which cannot meet the precise specifications, but which upon evaluation provides equivalent or superior performance. Where any material, piece of equipment, or system which does not meet precise specifications set out in the standard is shown, to the satisfaction of the Secretary, to meet the level of performance of a material, piece of equipment or system which meets the precise specifications, the Secretary may waive the specifications set out in the standard for that material, piece of equipment, or system. Whenever a waiver is issued, the Secretary shall issue an interpretative bulletin which announces the waiver, states that the material, piece of equipment or system meets the required standard of performance, and sets out any limitations or other requirements with respect to how the material, piece of equipment, or system must be used, including any tests of the material, piece of equipment, or system which the Secretary determines must be carried out before it can be used. Where a waiver has been issued, the requirements of the section of the Federal standard to which the waiver relates may be met either by meeting the specifications set out in the standard or by meeting any requirements set out in the interpretative bulletin which announces the waiver.

(c) Interpretative bulletins may also be issued for the following purposes:

(1) to clarify the meaning of the standard; and

(2) to assist in the enforcement of the standard.

§ 280.6 [Amended]

2. On page 40269 under § 280.6(a) Serial Number, line 6, immediately after the word "be" is changed from "½ inch" to "⅜ inch."

II. Subpart B—Planning Considerations is amended as follows:

§ 280.102 [Amended]

1. On page 40269 under § 280.102(a) Definitions, line 3, delete "(see § 280.111)" and replace with "not to exceed 5 sq. ft."

§ 280.105 [Amended]

2. On page 40270 under § 280.105(b)(2) Door Design and Construction, line 3 immediately after "opening.", add new sentence: "All exterior sliding glass doors shall provide a minimum 28 inch wide by 72 inch high clear opening."

§ 280.106 [Amended]

3. On page 40270 under § 280.106(a) Exit Facilities; Egress Windows, line 4, immediately after the word "window" and before the word "which" insert "or approved device."

4. On page 40270 revise § 280.111 *Minimum room dimension*, to read as follows:

§ 280.111 Minimum room dimension.

The gross floor area required by § 280.110(a) and (b) shall have no clear horizontal dimension less than 5 feet except as permitted by § 280.102(a).

III. Subpart C—Fire Safety is amended as follows:

1. On page 40271 under § 280.202 *Definitions*, paragraph (a)(2) "Smoke Detector" is renumbered as paragraph (a)(4) and a new paragraph (a)(2) is added to read as follows:

§ 280.202 Definitions.

(a) * * *

(2) "Interior finish" means the surface material of walls, fixed or movable partitions, ceilings and other exposed interior surfaces affixed to the mobile home structure including any material such as paint or wallpaper and the substrate to which they are applied. Interior finish does not include windows and doors or their frames, skylight, trim, moldings, decorations or furnishing which are not affixed to the mobile home structure.

* * * * *

§ 280.206 [Amended]

2. On page 40271 under § 280.206(a) Firestopping, line 1, immediately after the word "Firestopping" and before the word "shall" insert: "of 1 inch minimum nominal lumber or the equivalent,".

IV. Subpart D—Body and Frame Construction Requirements is amended as follows:

§ 280.302 [Amended]

1. On page 40271, § 280.302(a)(4) Definitions is changed to read:

"(4) "Diagonal Tie" means a tie intended to primarily resist horizontal forces, but which may also be used to resist vertical forces."

2. On page 40272 under § 280.302 *Definitions*, delete: paragraph (a)(9), "Interior Finish" and renumber paragraphs (a)(10) thru (15) as paragraphs (a)(9) thru (14) respectively.

3. On page 40272 under § 280.302(e)(2) New Materials and Methods, line 7, delete the last sentence which reads "All testing shall be done by a recognized independent testing agency."

§ 280.304 [Amended]

4. On page 40272 under § 280.304(a) Materials, relocate last sentence to become new paragraph (c) as follows:

"(c) Wood products shall be identified as complying with the appropriate standards."

5. On page 40272 under § 380.304(b) in the Table of Standards, delete the following: "Ponderosa pine panel doors . . . NWMA I.S. 5–73."

§ 280.305 [Amended]

6. On page 40273 under § 280.305(a) Structural Design Requirements, line 15, immediately after the word "Part." delete "Floor finish" and insert before the word "shall" the following. "Finished flooring greater than ⅛ inch in thickness,".

7. On page 40273 § 280.305(c)(3)(iii) Roof Loads, line 3, after "2.5 times the design" and before "wind" insert "uplift".

V. Subpart E—Testing is amended as follows:

§ 280.402 [Amended]

1. On page 40276 under § 280.402(b)(1) Test Procedures for Roof Trusses, General, line 3:

(a) After "with ¼ inch" delete "by 24 inch" and continue the sentence.

(b) Immediately after the word "strips." and before the word "Adjacent" insert a new sentence to read as follows: "The plywood strips shall be at least long enough to cover the top chords of the trusses at the designated design truss spacing."

2. On page 40276 under § 280.402(b)(1) Test Procedure for Roof Trusses. Line 8, immediately after the word "only" delete the remainder of paragraph (b)(1) and replace with the following: "The bottom chords of the adjacent trusses may be either: (i) unbraced, (ii) laterally braced together (not cross braced) with 1" x 2" stripping not closer than 24 inches on center nailed with only one 6d nail at each truss, or (iii) covered with the material, with connections or methods of attachment, as specified for the completed mobile home.

3. On page 40276 under § 280.402(d)(3) Destructive Test Procedure, line 3, after "failure occurs or" delete "1.50 times" and continue the sentence.

§ 280.403 [Amended]

4. On page 40277 under § 280.403(c) Performance Requirements, delete the introductory text of paragraph (c) (lines 1 through 7) and insert the following:

"(c) *Performance Requirements.* Test procedures as outlined in pargaraphs (c)(1) thru (4) of this section are applicable to preproduction prototype units of prime windows and sliding glass doors. Production line units shall be equivalent in design and materials to the tested and passed prototype units and shall also meet the requirements of 280.403(c)(5)."

5. On page 40277 under § 280.403(c) Performance Requirements. After paragraph (c)(4), Water resistance test, add new § 280.403(c)(5) as follows:

"(5) *Production Line Units.* Production line units of prime windows and sliding glass doors shall comply with: (i) The structural performance test to the zone limit certified in paragraph (c)(2) of this section and; (ii) the air infiltration test in paragraph (c)(3) of this section and; (iii) the water resistance test in paragraph (c)(4) of this section except that the test pressure shall be 1.56 psf (0.40" water column) and the water application rate shall be 2.5 GPH, per square foot of window surface area, all other parameters being the same as set forth in paragraph (c)(4) of this section.

6. On page 40278 under § 280.403(1) Certification, line 12 of paragraph (1) immediately after the word "inspection" and before "system" insert "and production unit testing".

§ 280.405 [Amended]

7. On page 40279 under § 280.405(d)(1)(i) Wood:

(a) Line 1, immediately after the word "door" and before the word "parts" delete the word "frame" and continue the sentence.

(b) Line 10, immediately after the words "Type I requirements of" delete "NWMA I.S. 1–73, NWMA I.S. 5–73 or FHDA 4–72." and insert "NWMA I.S. 1–74."

VI. Subpart F—Thermal Protection is amended as follows:

§ 280.502 . [Amended]

1. On page 40280 under § 280.502(a)(2) Definitions, line 8, immediately after "horizontal surfaces using" and before "width" insert "exterior" and continue sentence.

2. On page 40280 under § 280.504(a) Ceilings, line 4, immediately after "living space" and before "of" insert "side".

V 40 218 NOV 11 75 XUM

3. On page 40280, § 280.504(b) Exterior Walls is revised as follows:

§ 280.504 Condensation control (vapor barriers).

. . . . . .

(b) Exterior walls. (1) Exterior walls shall have a vapor barrier not greater than 1 perm (dry cup method) installed on the living space side of the wall, or (2) Unventilated wall cavities shall have an external covering and/or sheathing which forms the pressure envelope. The covering and/or sheathing shall have a combined permeance of not less than 5.0 perms. In the absence of test data, combined permeance may be computed using the formula:

$$P_{Total} = \frac{1}{\frac{1}{P_1} + \frac{1}{P_2}}$$

where P_1 and P_2 are the permeance values of th exterior covering and sheathing in perms.

Formed exterior siding applied in sections with joints not caulked or sealed shall not be considered to restrict water vapor transmission, or (3) Wall cavities shall be constructed so that ventilation is provided to dissipate any condensation occurring in these cavities.

VII. Subpart G—Plumbing Systems is amended as follows:

§ 280.602 [Amended]

1. On page 40283 under § 280.602(a) (50) "Vertical Pipe", line 3, immediately after "45 degrees" delete "or less" and continue the sentence.

§ 280.603 [Amended]

2. On page 40283 under § 280.603(b) (4) Freezing, line 6, immediately after "designed to allow" delete "complete gravity" and continue the sentence.

§ 280.607 [Amended]

3. On page 40285 under § 280.607(b) (3), line 14, change "floor level." to "bathroom floor level."

§ 280.610 [Amended]

4. On page 40287 under § 280.610(c) (1) Drain Outlets, lines 4–6, immediately after "section.", delete entire sentence "A permanent market, stating "Drain Outlet", shall be visibly located near the drain outlet."

§ 280.611 [Amended]

5. On page 40288 under § 280.611(c) (1) (i) Size of Vent Piping, line 5 of paragraph (c) (1) (i) after "3-inch trap arms" change "diminished" to "undiminished."

VIII. Subpart H—Heating, Cooling and Fuel Burning Systems is amended as follows:

§ 280.705 [Amended]

1. On page 40291 under § 280.705(a) General:

(a) Line 4, after the word "home." delete "Gas delivered into the gas supply system shall be at" and insert "The gas piping supply system shall be designed for" and continue the sentence.

(b) Line 7, after "(¼ psi)." insert the following: "The manufacturer shall indicate in his written installation instructions the design pressure limitations for safe operation of the gas piping system."

2. On page 40291 under § 280.705(c) (1) Piping Design, lines 11–38. Delete the following: § 280.705(c) (1) (iii), (iv), (v), and (vi).

3. On page 40292 under § 280.705(j) (1) Location of Gas Supply Connection, line 5, immediately after the word "within" and before the word "inches" delete "18" and insert "24" and continue the sentence.

4. On page 40292 under §280.705(j) (1) Location of Gas Supply Connection, line 7 immediately after "as close as" change "possible" to "practicable".

5. On page 40292 under § 280.705(j) (2) Location of Gas Supply Connection, line 7 immediately after "as close as" change "possible" to "practicable".

6. On page 40293 under § 280.705(l) (3) Valves, line 6 immediately after "arranged" delete "and located to permit removal and servicing of the appliance." and insert "to be accessible to permit servicing of the appliance and removal of its components, and for shutoff in case of emergency."

§ 280.708 [Amended]

7. On page 40294 under § 280.708(a) (1) Clothes Dryer, line 4. End sentence after "fitting." Add new sentence as follows: "Such termination fittings for gas dryers shall be listed or certified as components of the dryer."

§ 280.709 [Amended]

8. On page 40295 under § 280.709(a) Installation of Appliances, line 3 after the word "displacement." add the following sentence: "For the purpose of servicing and replacement, each appliance shall be both accessible and removable."

9. On page 40295 under § 280.709(e) (5) Installation of Appliances, line 2:

(a) Immediately after "shall be" and before "in" insert "installed".

(b) Immediately after the end of the sentence ending with "listing." add new sentence reading. "When a furnace-coil unit has a limited listing, the installation must be in accordance with that listing."

§ 280.714 [Amended]

10. On page 40296 under § 280.714(a) (1) Appliances, Cooling, line 14 of (1) after "values" and before "less" insert "not".

IX. Subpart I—Electrical Systems is amended as follows:

§ 280.803 [Amended]

1. On page 40299 under § 280.803(1) (2) Power Supply, line 6 of (2). End sentence after "of the mobile home." Delete lines 7 and 8, add new sentence to read: "The manufacturer shall provide in his written installation instructions, the proper service conductor sizes for the raceway and the size of the junction box to be used."

§ 280.804 [Amended]

2. On page 40299 under § 280.804(e) Disconnecting Means and Branch-circuit Protective Equipment, line 1 of (e). Immediately after "panelboard" and before "main" insert "employing a."

§ 280.806 [Amended]

3. On page 40300 under § 280.806(c) Receptacle Outlets, line 1 immediately after 'an" delete the word "individual" and continue the sentence.

4. On page 40300 under 280.806(d) (9) Receptacle Outlets, delete period after "basins" and continue sentence with "or integral with the light fixture over the bathroom basin."

5. On page 40301 revise § 280.811 *Calculations*, to read as follows:

§ 280.811 Calculations.

(a) The following method shall be employed in computing the supply-cord and distribution-panelboard load for each feeder assembly for each mobile home and shall be based on a 3-wire, 115/230-volt supply with 115-volt loads balanced between the two legs of the 3-wire system. The total load for determining power supply by this method is the summation of:

(1) Lighting and small appliance load as calculated below:

(i) Lighting Watts: Length times width of mobile home (outside dimensions exclusive of coupler) times 3 watts per square foot; e.g. Length × width × 3=lighting watts.

(ii) Small Appliance Watts: Number of circuits times 1,500 watts for each 20-ampere appliance receptacle circuit (See definition of "Appliance Portable" with note); e.g. Number of circuits × 1,500= small appliance watts.

(iii) Total Watts: Lighting watts plus small appliance=total watts.

(iv) First 3,000 total watts at 100 percent plus remainder at 35 percent=watts to be divided by 230 volts to obtain current (amperes) per leg.

(2) Nameplate amperes for motors and heater loads (exhaust fans, air conditioners, electric, gas, or oil heating). Omit smaller of air conditioning and heating except include blower motor if used as air conditioner evaporator motor. When an air conditioner is not installed and a 40-ampere power supply cord is provided, allow 15 amperes per leg for air conditioning.

(3) 25 percent of current of largest motor in (2).

(4) Total of nameplate amperes for: Disposal, dishwasher, water heater, clothes dryer, wall-mounted oven, cooking units. Where number of these appliances exceeds three, use 75 percent of total.

(5) Derive amperes for free-standing range (as distinguished from separate ovens and cooking units) by dividing values below by 230 volts.

Name plate rating (in watts)	*Use (in watts)*
10,000 or less	80 percent of rating.
10,001 to 12,500	8,000.
12,501 to 13,500	8,400.
13,501 to 14,500	8,800
14,501 to 15,500	9,200.
15,501 to 16,500	9,600.
16,501 to 17,500	10,000.

(6) If outlets or circuits are provided for other than factory-installed appliances include the anticipated load. The following example is given to illustrate the application of this Method of Calculation:

Example. A mobile home is 70×10 feet and has two portable appliance circuits, a 1000 watt 230 volt heater, a 200 watt 115 volt exhaust fan, a 400 watt 115 volt dishwasher and a 7000 watt electric range.

Lighting and small appliance load:	*Watts*
Lighting 70×10×3	2,100
Small appliance 1,500×2	3,000
Total	5,100
1st 3,000 W at 100 pct	3,000
Remainder (5,100−3,000=2,100) at 35 pct	735
Total	3,735

$\frac{3,735}{230}$=16 A per leg

1,000 W (heater) ÷230=4.4 A.
200 W (fan) ÷115=1.7 A.
400 W (dishwaster) ÷115=3.5 A.
7,000 W (range) ×0.8÷230=24.0 A.

	Amperes per leg	
	A	B
Lighting and appliances	16	16
Heater (230 V)	4	4
Fan (115 V)	2	
Dishwasher (115 V)		4
Range	24	24
Totals	46	48

NOTE.—Based on the higher current calculated for either leg, use one 60-A supply cord.

(b) The following is an optional method of calculation for lighting and appliance loads for mobile homes served by a single 3-wire 115/230 volt set of feeder conductors with an ampacity of 100 or greater. The total load for determining the feeder ampacity may be computed in accordance with the following Table instead of the method previously specified. Feeder conductors whose demand load is determined by this optional calculation shall be permitted to have the neutral load determined by Section 220–22 of the National Electrical Code. The loads identified in the Table as "other load" and as "Remainder of other load" shall include the following:

(1) 1500 watts for each 2-wire, 20-ampere small appliance branch circuit and each laundry branch circuit specified.

(2) 3 watts per square foot for general lighting and general-use receptacles.

(3) The nameplate rating of all fixed appliances, ranges, wall-mounted ovens, counter-mounted cooking units, and including 4 or more separately controlled space heating loads.

(4) The nameplate ampere or kVA rating of all motors and of all low-power-factor loads.

(5) The largest of the following: (i) air conditioning load; (ii) the 65 percent diversified demand of the central electric space heating load; (iii) the 65 percent diversified demand of the load of less than four separately-controlled electric space heating units; (iv) the connected load of four or more separately-controlled electric space heating units.

OPTIONAL CALCULATION FOR MOBILE HOMES WITH 110-AMPERE OR LARGER SERVICE

Load (in kilowatt or kilovoltampere:	*Demand factor (percent)*
Air-conditioning and cooling including heat pump compressors	100
Central electric space heating	65
Less than 4 separately controlled electric space heating units	65
1st 10 kW of all other load	100
Remainder of other load	40

X. Subpart J—Transportation is amended as follows:

§ 280.904 [Amended]

1. On page 40303 under § 280.904 (b) (5) Spring Assemblies, delete lines 7 and 8 and replace with "for design spring assembly life as recommended by the spring assembly manufacturer."

NOTICE TO FEDERAL REGISTER READERS

As part of its continuing program to improve the quality of the daily FEDERAL REGISTER and CODE OF FEDERAL REGULATIONS, the Office of the Federal Register is soliciting the views of interested persons on the effectiveness of individual Federal Register documents and on regulations contained in the CODE OF FEDERAL REGULATIONS.

Our goal is twofold:

First—to make each document published in the FEDERAL REGISTER easily understandable, thus making compliance easier, more efficient, and less costly; and

Second—to identify and correct any existing Federal regulations which are obsolete, unnecessarily wordy, or unclearly stated.

We believe this effort is consistent with the objectives stated by President Ford in his October 8th speech on the economy in which he announced "a joint effort by the Congress, the executive branch and the private sector to identify and eliminate existing Federal rules and regulations that increase costs to the consumer without any good reason in today's economic climate."

The Office of the Federal Register welcomes your comments and suggestions. The survey blank below is provided for that purpose. All comments received will be maintained in a public docket and will be available for inspection in the Office of the Federal Register to any interested persons or agencies. Comments which point out the need for substantive changes in existing regulations also will be forwarded to the responsible agency.

- -

I. For the following reasons I found it difficult to understand the document from _____ (agency) in column _____, page _____ of the _____ (date) issue of the FEDERAL REGISTER:

☐ only technical language was used; ☐ document contained long and difficult sentences;
☐ preamble did not contain a clear and concise explanation of the document's purpose;
☐ other (explain) _____

_____

_____

II. I believe that the requirement(s) contained in:

A. The document from _____ (agency) in column _____, page _____ of the _____ (date) issue of the FEDERAL REGISTER, or

B. Section(s) _____ of Title _____ of the CODE OF FEDERAL REGULATIONS

impose(s) an: ☐ unnecessary; ☐ unreasonable; ☐ impractical; or ☐ obsolete requirement on those persons subject to that regulation.

My reasons are: _____

_____

_____

III. (Optional) I suggest that the provision(s) mentioned above be rewritten as follows:

_____

_____

_____

Please mail to:

Office of the Federal Register

federal register
Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 3]

PART 722—COTTON

Marketing Quotas for 1972 and Succeeding Crops of Extra-Long Staple Cotton and Recordkeeping Requirements for Extra-Long Staple and Upland Cotton

The purposes of this amendment are to incorporate the rate of penalty applicable to excess extra-long staple cotton produced in the 1975 crop year and to clarify § 722.90 regarding records to be kept and reports to be made by producers for extra-long staple and upland cotton. This amendment is issued pursuant to the Agricultural Adjustment Act of 1938, as amended and the Agricultural Act of 1949, as amended.

Under the Agricultural Adjustment Act of 1938, the extra-long staple cotton penalty rate per pound on the farm marketing excess is equal to the higher of 50 percent of the parity price as of June 15 of the calendar year in which the crop is produced or 50 percent of the 1975 support price of extra-long staple cotton.

Since the rate of penalty is simply a mathematical determination and States, counties, and producers need to know the clarification of § 722.90 as soon as possible, it is hereby determined and found that compliance with the notice, public procedure, and effective date requirements of 5 U.S.C. 553 is unnecessary and contrary to the public interest, and this document shall become effective on November 12, 1975.

The regulations for Marketing Quotas for the 1972 and Succeeding Crops of Extra-Long Staple Cotton and Recordkeeping Requirements for Extra Long Staple and Upland Cotton (37 FR 25029, 38 FR 20840, 39 FR 30340), are amended as follows:

1. Section 722.73 is amended by adding a new paragraph (c)(4) to read as follows:

V 40 N 219 NOV 12 1975 XUM

§ 722.73 Rate of penalty.

• • • • •

(c) • • •

(4) 1975 ELS cotton penalty rate is 56.0 cents per pound.

2. Section 722.90 is amended by changing paragraphs (a) and (c) to read as follows:

§ 722.90 Records to be kept and reports to be made by producers.

(a) Necessity for records and reports. Each person who produces or who has produced in any crop year, cotton which is subject to the provisions of §§ 722.61 to 722.95 shall, in conformity with the Agricultural Adjustment Act of 1938, as amended and the Agricultural Act of 1949, as amended, keep the records and make the reports prescribed by this section, which records and reports the Secretary hereby finds to be necessary to enable him to carry out, with respect to cotton, the provisions of the acts. The records required to be kept pursuant to this section shall be kept until December 31 of the second year following the year in which cotton is planted, or for such longer period of time as may be requested in writing by the State executive director or by the county executive director.

• • • • •

(c) *Farm operator's report.* The farm operator shall file with the county ASCS office for the county in which the farm is located a report of production on Forms ASCS–503 or ASCS–504. Such production report shall be filed within the time period and in the manner prescribed by the Deputy Administrator.

• • • • •

3. Section 722.92 is amended by revising paragraph (b) to read as follows:

§ 722.92 Revision of county committee determinations and erroneous notices.

• • • • •

(b) *Erroneous notices of cotton allotment and planted acreage.* In any case where an erroneous notice of cotton allotment or an erroneous notice of planted acreage is issued, the county committee shall follow the applicable upland or ELS cotton acreage allotment regulations.

(Secs. 346, 347, 373, 375, 63 Stat. 674, as amended, 63 Stat. 675, as amended, 52 Stat. 65, 66, as amended (7 U.S.C. 1346, 1347, 1373, 1375))

Effective date. This amendment becomes effective on November 12, 1975.

Signed at Washington, D.C., on November 5, 1975.

E. J. PERSON,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.75-30447 Filed 11-11-75;8:45 am]

SUBCHAPTER C—SPECIAL PROGRAMS

[Amdt. 1]

PART 775—FEED GRAINS

Subpart—Feed Grain Program for Crop Years 1975–1977

1976 NATIONAL FEED GRAIN ALLOTMENT

On July 3, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 28093) stating that the Secretary of Agriculture proposed to make determinations and issue regulations relative to the 1976 national feed grain allotment. Interested persons were invited to submit written data, views, and recommendations regarding the determinations. The comments and recommendations received have been duly considered.

The regulations governing the Feed Grain Program for Crop Years 1975–1977 are amended by adding a new § 775.4a. The purpose of this section is to determine and proclaim the 1976 national feed grain allotment.

Pursuant to section 105(b)(2) of the Agricultural Act of 1949, as amended by the Agriculture and Consumer Protection Act of 1973, Pub. L. 93–86, 87 Stat. 221, 231 (1973), the Secretary is required, prior to January 1 of each calendar year, to determine and proclaim for the crop produced in such calendar year a national acreage allotment for feed grains which shall be the number of acres he determines, on the basis of the estimated national average yield of the feed grains included in the program for the crop for which the determination is being made, will produce the quantity (less imports) of such feed grains that he estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of any of the feed grains are excessive or an increase in stocks is needed to assure a desirable carryover, he may adjust the feed grain allotment by the amount he determines will be accomplish the desired decrease or increase in carryover stocks.

The determination in § 775.4a of the 1976 national feed grain allotment is based on the acreages, yields, and usage set out therein. The determination has been made on the basis of the latest available statistics of the Federal Government. Compliance with the feed grain allotment is not a condition of eligibility for participation in the program, and feed grain acreage on the farm may vary widely from the farm feed grain allotment. Hence, in determining the national allotment, an adjustment for the purpose of increasing carryover stocks to a more desirable level was not considered necessary, and no such adjustment was made.

Part 775 is amended by adding a new § 775.4a to read as follows:

§ 775.4a 1976 national feed grain allotment.

Based on estimated utilization (less imports) for the 1976–77 marketing year of 5,899 million bushels of corn, 860 million bushels of sorghum, and 420 million bushels of barley and estimated national yields of 93.0 bushels per acre for corn, 55.0 bushels per acre for sorghum, and 44.0 bushels per acre for barley, the combined acreage of corn, sorghum and barley needed to produce a quantity of feed grains equal to estimated utilization is determined to be 89.0 million acres and a 1976 national feed grain allotment of 89.0 million acres is hereby proclaimed.

(Sec. 105, 63 Stat. 1054, as amended; 87 Stat. 231 (7 U.S.C. 1441 note))

Effective date. This amendment becomes effective on November 12, 1975.

Signed at Washington, D.C., on November 7, 1975.

EARL L. BUTZ,
Secretary.

[FR Doc.75-30448 Filed 11-11-75;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCES AND SHIPPING CONTAINERS THEREON

Importation of Birds

● **The purpose of this amendment to the regulations in Part 92 is to provide for maximum utilization of the United States Department of Agriculture quarantine facilities for the importation of birds.** ●

Statement of considerations. Presently, the use of available USDA quarantine facilities for the importation of birds is limited to small shipments of zoological birds which require special care and handling while in quarantine. To provide greater flexibility in the use of USDA quarantine facilities and to insure maximum utilization of all such facilities, permits and reservations for the importation of all classes of birds through such facilities will be issued as space is available and the use of such facilities will no longer be limited as heretofore.

Accordingly, Part 92, Title 9, Code of Federal Regulations is amended in the following respects: in § 92.11, in paragraph (e) the first sentence is amended to read:

§ 92.11 Quarantine requirements.

• • • • •

(e) *Birds.* Each lot of commercial birds, zoological birds or research birds imported from any part of the world shall be quarantined for a minimum of 30 days, and for such longer period as may be required by the Deputy Administrator, Veterinary Services, in any specific case, on an "all-in, all-out" basis, at one of the ports of entry specified in § 92.8(b), at a USDA quarantine facility when arrangements have been made in advance by the importer and approval is granted in the permit described in § 92.4, or in facilities which are provided by the importer and which have been approved by the Deputy Administrator as provided in paragraph (f) of this section, prior to the issuance of the permit.

• • • • •

(Sec. 2, 32 Stat. 792, as amended; secs. 2, 3, 4, and 11, 76 Stat. 129, 130, 132; (21 U.S.C. 111, 134a, 134b, 134c, and 134f); 37 FR 28464, 28477; 38 FR 19141.)

Effective date. The foregoing amendment shall become effective December 1, 1975.

The amendment relieves certain restrictions no longer deemed necessary to prevent the introduction and spread of poultry disease, and must be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 6th day of November, 1975.

PIERRE A. CHALOUX,
Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Importation of Birds; Correction

In F.R. Doc. 73-21884 appearing on page 28554 in the FEDERAL REGISTER of Monday, October 15, 1973, the proviso in paragraph (a) of § 92.2 appearing on page 28554 is corrected by changing the term "or birds," to read ", or birds".

Done at Washington, D.C., this 6th day of November 1975.

PIERRE A. CHALOUX,
Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

[FR Doc.75-30515 Filed 11-11-75;8:45 am]

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 569a—RECEIVERS FOR INSURED INSTITUTIONS OTHER THAN FEDERAL SAVINGS AND LOAN ASSOCIATIONS

Checking Accounts; Correction

In FR Doc. 75–26847 appearing at page 46094 in the FEDERAL REGISTER of October 6, 1975, the following changes should be made:

1. On page 46094, the reference in the first paragraph of the preamble to "Parts • • • 569 • • •." is corrected to read "Parts • • • 569a • • •".

2. On page 46094, the reference in the last paragraph of the preamble to "§ 571.1(c)(3)" is corrected to read "§ 571.1(c)(3) and (e)(1)".

3. On page 46095, § 569a.4 is corrected by adding the words "and of all offices of such institution" to the end of the fourth sentence of that section and by changing the word "power" in the last sentence of that section to read "powers".

4. On page 46096, § 569a.7 is corrected by adding asterisks after paragraph (a)(5) of that section.

Dated: October 30, 1975.

[SEAL] CHARLES E. ALLEN,
General Counsel.

[FR Doc.75-30488 Filed 11-11-75;8:45 am]

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 1, Amdt. 2]

PART 114—ADMINISTRATIVE CLAIMS UNDER FEDERAL TORT CLAIMS ACT

Action on Approved Claims

In FEDERAL REGISTER published on December 31, 1974, (39 FR 45211) § 114.111, *Action on approved claims*, a procedure is delineated for action on approved administrative claims submitted under the Federal Tort Claims Act. The procedure to be followed under this section is not clear.

This section is amended to read as set forth below and, being procedural, notice and public participation is not required.

Effective date: November 12, 1975.

Dated: November 4, 1975.

LOUIS F. LAUN,
Acting Administrator.

§ 114.111 Action on approved claim.

(a) Payment of a claim approved under this part is contingent upon the claimant's or his duly authorized agent's or legal representative's executing the requisite copies of Standard Form 95, Standard Form 1145, and Standard Form 1145A. When a claimant is represented by an attorney, the voucher shall designate both the claimant and his attorney as payees. The check shall be delivered to the attorney, whose address shall appear on Standard Form 1145, voucher for payment of a claim under the Federal Tort Claims Act.

(b) Acceptance by the claimant, his agent, or legal representative, of any award, compromise, or settlement made pursuant to the Federal Tort Claims Act shall be final and conclusive on the claimant, his agent or legal representative and any other person on whose behalf or for whose benefit the claim has been presented, and shall constitute a complete release of any claim against the United States and against any employee of the Government whose act or omission gave rise to the claim, by reason of the same subject matter.

[FR Doc.75-30423 Filed 11-11-75;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75–CE–26–AD, Amdt. 39–2419]

PART 39—AIRWORTHINESS DIRECTIVES

Cessna Series Airplanes

AD 75–04–01, Amendment 39–2083 (40 F.R. 5348) as amended by Amendments 39–2130 (40 F.R. 11861, 11862) and 39–2338 (40 F.R. 33432), is an Airworthiness Directive (AD) superseding AD 72–10–5, Amendments 39–1442 (37 F.R. 9385, 9386) and 39–1562 (37 F.R. 25021), which is applicable to Cessna T310, 320, 340, 401, 402, 411, 414 and 421 series airplanes. AD 75–04–01 requires parts replacement, repetitive inspections of the exhaust system and the "V" band clamps on the discharge side of the turbosupercharger for cracks or fractures, and the replacement thereof where necessary.

AD 75–17–38, Amendment 39–2341 (40 F.R. 36107, 36108) is an AD applicable to Cessna 421B series airplanes in which exhaust system slipjoint assembly P/N 5155158–1, –8 or –9 are installed. AD 75–17–38 requires inspection of these assemblies for swelling, buckling, distortion or cracks in the aft area just forward of the ball joint under the radiation heat shield assembly and the replacement thereof where necessary.

Service experience subsequent to the issuance of these ADs establishes a need for a one-time inspection and modification of the overboard exhaust stack and installation of a redundant tailpipe support on Cessna T310, 320, 340, 401, 402, 411, 414 & 421 series airplanes. The agency believes this inspection and modification should be the subject of an AD and that this action, as well as ADs 75–04–01 and 75–17–38 should be consolidated into one AD to reduce the possibility of confusion or error in compliance. Also, the manufacturer has advised that AD 75–04–01 presently applies to some serial numbered airplanes in which the one-piece "V" band clamp installation required by the AD has already been accomplished at the factory. In addition, the agency believes that the incorpora-

V 40 219 NOV 12 75 XUM

tion of a simplified one-piece "V" band clamp inspection and the slip joint inspection required by AD 75–17–38 in the exhaust system repetitive inspection will provide an equivalent level of safety to the similar inspections presently required by AD 75–04–01 and AD 75–17–38 respectively.

Accordingly, in the interest of safety a new AD is being issued applicable to the aforementioned airplanes superseding ADs 75–04–01 and 75–17–38 which will correct AD applicability and require repetitive inspections, special inspections and modifications of the exhaust system.

Since a situation exists which requires expeditious adoption of the amendment and is partially relieving in nature, a notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new AD:

CESSNA. Applies to T310, 320, 340, 401, 402, 411, 414 and 421 series airplanes.

This AD is issued to combine in one document inspections and parts replacements required by previous ADs and require modifications now available which will increase the reliability of the exhaust systems on the affected airplanes.

Compliance: Required as indicated, unless previously accomplished.

To detect incipient failure and improve reliability of the engine exhaust systems installed on the above-noted airplanes, accomplish the following:

I. Repetitive general exhaust system inspection.

A. On all new and in service airplanes listed above, within 50 hours time in service after the effective date of this AD (new airplanes) or 50 hours time in service after the last AD 75–04–01 inspection (in-service aircraft) visually inspect the exhaust system in accordance with the following procedure.

1. *Cleaning.* In order to properly inspect the exhaust system, components must be clean and free of oil, grease, etc. If required, clean as follows:

a. Spray engine exhaust components with a suitable solvent (such as Stoddard Solvent), allow to drain, and then wipe dry with a clean cloth.

WARNING

NEVER USE HIGHLY FLAMMABLE SOLVENTS ON ENGINE EXHAUST SYSTEMS. NEVER USE A WIRE BRUSH OR ABRASIVES TO CLEAN EXHAUST SYSTEMS OR MARK ON THE SYSTEM WITH LEAD PENCILS.

b. Remove the heat shields from the turbocharger in accordance with heat shield removal procedures in the Service Manual.

c. Remove shields around the exhaust bellows or slip joints, multisegment "V" band clamps at joints, and other items which might hinder inspection of the system.

NOTE: Do not remove clamps.

2. *Visual inspection of complete system.*

NOTE: Conduct this inspection when the engine is cool.

a. Visually inspect exhaust stacks for burned areas, cracks and looseness. Insure that attach bolts are properly torqued in accordance with the aircraft Service Manual.

NOTE: During this inspection give special attention to condition of bellows and welded areas along seams and around bellows, and weld seams around exhaust system components.

b. Visually inspect the flexible connection between the waste-gate and overboard duct (when applicable) for cracks and security.

c. Correct any major leaks in all areas of the exhaust system except waste-gate to tailpipe flexible coupling (when applicable) by replacement of defective parts or by repair in accordance with Part 43 of the FARs.

d. Visually inspect exhaust joint springs for correct compression. If the joint is disturbed or if springs are obviously loose, procede with the following inspection. (See Figure 1).

i. Before removal of exhaust joint springs, measure installed length of each spring. Those compressed to less than 0.45 inch must be replaced.

ii. Remove all springs and measure free length. Springs having a free length of less than 0.57 inch must be replaced.

NOTE: Add AN960–10 washers under head of joint bolts as required to obtain correct dimension.

During installation, joint bolts should be tightened gradually and spring length checked frequently to prevent over compression of springs.

iii. Reinstall springs and measure installed length. Length must be 0.51 +.00, −.03 inch.

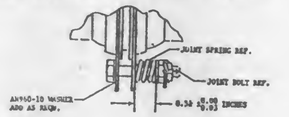

Figure 1. Typical Exhaust Joint Spring Installation

e. If installed, visually inspect the slip joint(s) for bulges beyond normal manufacturing irregularities of .03 inches and/or cracks. If any bulges and/or cracks are present, replace bulged or cracked slipjoint(s) (refer to Service Manual). See Figure 2.

NOTE: This inspection was previously required on Model 421B airplanes, S/N 421B0001 through 421B0935 by AD 75–17–38 effective August 22, 1975.

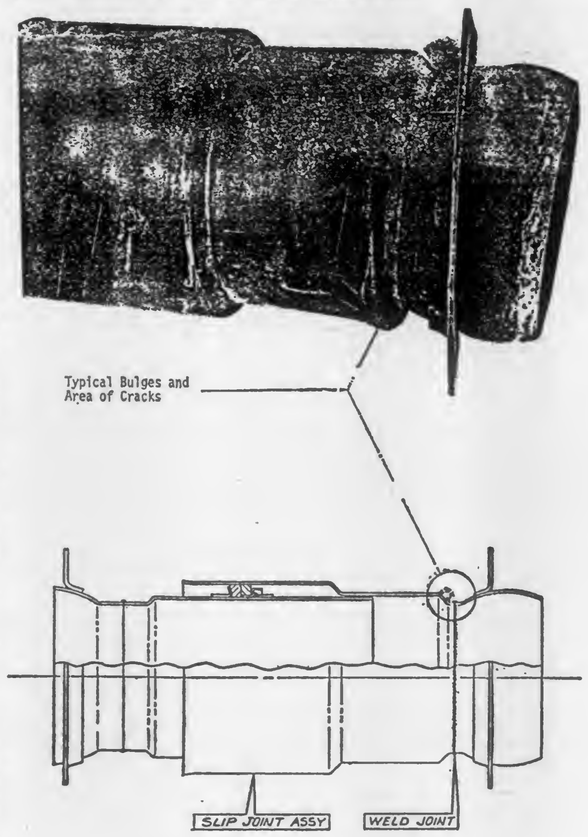

FIGURE 2

f. Inspection of multi-segment "V" band clamp(s) (Between engine and turbocharger).

1. Using crocus cloth, clean the outer band of the multi-segment "V" band clamp(s) Pay particular attention to the spot weld area on the clamp(s).

ii. With clamp(s) properly torqued:

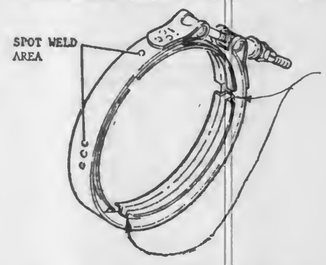

Figure 3. Multi-Segment "V" Band Clamp

NOTE: When replacement is required, install the new multi-segment "V" band clamp over the exhaust flanges and torque to the correct value (see Torque Value Chart, Table 1 to this AD). As the clamp is tightened, lightly tap it circumferentially in a radial direction with a rawhide or soft plastic mallet.

(3) Visually inspect flatness of the outer band, especially within two inches of the spot welded tabs which retain the T-bolt fastener. This can be done by placing a straight edge across the flat part of the outer band as shown in Figure 4, then checking the gap between the straight edge and the outer band. This gap should be less than 0.062 inch. If deformation exceeds 0.062 inch limit, replace clamp(s) with new multi-segment clamp(s). (See Note preceding this step).

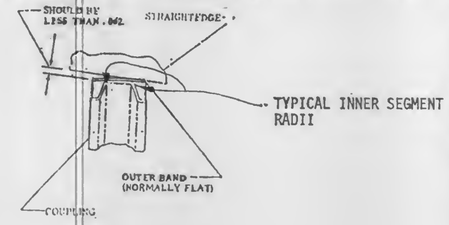

Figure 4. Multi-Segment "V" Band Clamp Outer Band Flatness Check

g. One-piece "V" band clamp inspection (Overboard exhaust to turbocharger).

Visually inspect with a light and mirror, the clamp surfaces adjacent to the intersection of the "V" apex and bolt clips, and the entire length of the "V" apex of the clamp for signs of cracks or fractures. If cracks or fractures are visible, replace the clamp. (See Figure 5).

NOTE: The above inspections, except for Paragraph e. and f., were previously required by AD 75–04–01 effective February 11, 1975. Inspections per Paragraph e. were previously required by AD 75–17–38 effective August 22, 1975. Inspections per Paragraph f. were previously required by AD 75–04–01 as amended by Amendment 39–2338 effective August 15, 1975.

II. Parts replacement.

A. Replacement of multi-segment "V" band clamps between aft engine cylinders and turbocharge inlet.

On all airplanes listed above within 50 hours time in service after February 11, 1975, for those clamps having more than 350 hours time in service as of that date or prior to 400 hours time in service for those clamps having less than 350 hours time in service as of that date, and at or prior to each additional 400 hours time in service thereafter, replace existing multi-segment "V" band exhaust system clamps located between aft engine cylinders and the turbocharger inlet (except for waste-gate to exhaust overboard pipe clamp on 421 airplanes) with new parts having Cessna part numbers in accordance with Attachment 4 to Cessna Service Letter ME–75–17 dated July 14, 1975, or later revisions. Use aircraft total time for clamp time in service unless aircraft maintenance records establish location and time in service on previously replaced clamps. See Figure 3 for multi-segment type clamp configuration.

NOTE: The above clamp replacement was previously required by AD 75–04–01 effective February 11, 1975.

B. Replacement of multisegment turbocharger to overboard tail pipe clamps.

Within 200 hours time in service after August 15, 1975, replace presently installed multisegment type turbocharger to overboard tailpipe clamps on Model T310, 320, 401, 402, 340, 414 and 421 airplanes with the clamps specified below:

(1) Visually inspect the outer band in the area of the spot weld for cracks (see Figure 3). If cracks are found, replace the clamp(s) with new multi-segment "V" band clamp(s).

(2) Visually inspect the corner radii of clamp inner segments for cracks (See Figure 3). This inspection requires careful use of artificial light and inspection mirrors.

On T310 (all aircraft through S/N 310Q-0600,) 320D (all aircraft), 320E (all aircraft), 320F (all aircraft), 401 (all aircraft), and 402 (all aircraft through S/N 402B0300 series airplanes, replace the existing multisegment "V" band turbocharger to overboard tailpipe clamp with a new Part Number V57A4234 or 41195AA423 clamp. These new clamps are not "life limited".

On 340 (all aircraft through S/N 3400150, 414 (all aircraft through S/N 4140350), and 421 (all aircraft through 421B0398) series airplanes, replace the existing multi-segment "V" band turbocharger to overboard tailpipe clamp with a Part Number V57A5019 or 41195AA502 clamp. These new clamps are not "life limited".

NOTE: The above clamp replacement was previously required by AD 75–04–01 as amended by Amendment 39–2338 effective August 15, 1975.

III. Special inspections.

A. Unless previously accomplished, within 25 hours time in service after August 15, 1975, the inspection described below is to be conducted on the following aircraft on which the one-piece "V" band tail pipe clamps have been installed. (Clamps bearing a Cessna inspection stamp on the back side (a large C with a number) and installed on airplanes exempted from this inspection on Attachment No. 2 of Cessna Service Letter ME–75–17 have been inspected by the manufacturer and comply with this requirement). T310 (All aircraft S/N 310P0001 through 310R0275), 320D, 320E, 320F (All aircraft), 340 (All aircraft through S/N 3400550), 401 (All aircraft), 402 (All aircraft S/N 4020001 through 402E0912), 414 (All aircraft through S/N 4140648), 421 (All aircraft S/N 4210001 through 421B0827).

1. Remove upper cowling from LH and RH engine.

a. (Aircraft Turbo 310, 320, 401, 402, and 421 series equipped with metal heat shield). Detach heat shield from turbocharger turbine housing by cutting safety wire and removing hinge pin located at top of shield assembly securing shield halves together.

b. The heat shield does not need to be removed on 320, 340 or 414 and any aircraft equipped with insulation blanket shield.

2. Clean and visually inspect with a light and mirror, the clamp surfaces adjacent to the intersection of the "V" apex and bolt clips (see Figure 5) for signs of cracks or fractures. If cracks or fractures are visible, replace clamp. (This step allows inspection of the clamp under tension).

3. Remove nut, washer, and bolt from clamp, unseat coupling, and slide clamp down exhaust stack to gain adequate visibility. CAUTION: DO NOT REMOVE EXPANSION LIMITER.

4. Visually inspect for cracks and fractures the entire length of the "V" apex of the clamp (see Figure 5), and pay particular attention to the surfaces adjacent to the intersection of the "V" apex and bolt clips.

NOTE: The use of artificial light and at least a 10-power magnifying glass is necessary to detect minute cracks or signs of incipient failure. Do not use dye penetrant inspection procedures since noncritical metal forming folds yield misleading failure indications.

5. If clamp is found to be defective, replace clamp.

6. If clamp has no defects, steel stamp or using a vibrating pencil, mark an "X" on the back side of metal torque tag.

7. Reinstall clamp on turbocharger turbine housing and overboard exhaust stack and install bolt, washer and nut. Torque nut to 40 inch-pounds.

CAUTION: DO NOT EXCEED NUT TORQUE BY MORE THAN 5 INCH-POUNDS.

8. Resecure heat shield on turbocharger turbine housing when detached, by aligning

V 40 I 219 NOV 12 75 XUM

shield hinge halves and reinstalling pin previously removed. Secure lower halves of shield using two pieces of .032 monel safety wire twisted together, through opposing eyelets of shield halves, draw shield snug on turbine housing, and safety by twisting end of wire together. Insure heat shield is snug on housing.

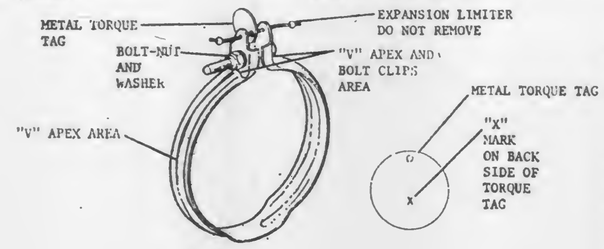

Figure 5. One-Piece "V" Band Type Clamp

IV. Modifications.

A. On the following aircraft within 50 hours time in service after the effective date of this AD inspect/modify the overboard exhaust stack flange (turbocharger and exhaust stack interface) in accordance with the instructions below. T310P0001 through T310R0230, T310R0232 through T310R0254, T310R0256, T310R0257, T310R0259 through T310R0263, T310R0265, T310R0266, T310R 0268 through T310R0272, T310R0274, T310R 0275, 3400001 through 3400550, 4010001 through 401B0221, 4020001 through 402B 0630, 402B0632 through 402B0909, 402B0911, 4020912, 4140001 through 4140643, 4140645 through 4140648, 4210001 through 421B0889, 421B0891 through 421B0918, 421B0921, 421B 0922, 421B0924, 421B0926 and 421B0927.

1. Remove any existing overboard support clamps, and remove overboard exhaust stack.

NOTE: Take precautions to prevent collection of any dirt or foreign particles in opening of turbocharger turbine housing during modification.

2. Visually inspect the mating surfaces of flanges of overboard exhaust stack and turbochargers for uniform contact over their entire perimeter.

3. If such contact is not evident, remove excess material (shaded area) of overboard exhaust stack as required, and as shown typical in Figure 6, by grinding, to allow mating surfaces of flanges of overboard exhaust stack and turbine housing to have uniform contact over their entire perimeter. Exercise care to prevent damage to flange surface of overboard exhaust stack when grinding off excess material.

4. Reinstall overboard stack and secure clamps in accordance with turbine outlet exhaust stack one-piece "V" band clamp inspection.

NOTE: This one-time inspection/modification may be performed in conjunction with the one-piece "V" band clamp 25-hour inspection and redundant tail pipe support installation required by IV. B, below.

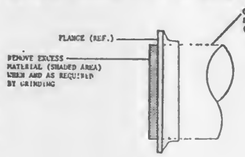

Figure 6.

B. On the following aircraft, prior to but not later than December 31, 1975, install redundant tail pipe support clamps and brackets in accordance with Cessna Service kits specified below. T310 (All aircraft through S/N 310Q0600), 320D0001 through 320F0045, 3400001 through 3400150, 4010001 through 401B0300, 4020001 through 402B0300, 4140001 through 4140350, 4210001 through 421B0300.

1. Kit number and applicability.

a. SK402-31—Turbo 310P0001 through Turbo 310Q0600, 320D0001 through 320F0045, 4010001 through 401B0300, 4020001 through 402B0300.

b. SK414-9—3400001 through 3400150, 4140001 through 4140350.

c. SK421-67—4210001 through 421B0300.

V. Any equivalent method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This AD supersedes AD 75-04-01, Amendments 39-2083, 39-2130, and 39-2338, and AD 75-17-38, Amendment 39-2341.

Cessna Service Letter ME 75-17, dated July 14, 1975, or later approved revision pertains to this subject.

This amendment becomes effective November 17, 1975.

Issued in Kansas City, Mo., on November 3, 1975.

C. R. MELUGIN, Jr.,
Director, Central Region.

[FR Doc.75-30251 Filed 11-11-75;8:45 am]

[Docket No. 75-NW-32-AD, Amdt. 39-2424]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing 707-300, -300B, -300C, and -400 Series Airplanes

Pursuant to the authority delegated to me by the Administrator a telegraphic airworthiness directive was adopted on October 17, 1975, which superseded a previous telegraphic AD issued on October 15, 1975, and made effective immediately as to all known United States operators of Boeing Model 707-300, -300B, -300C, and -400 series airplanes. The directive requires a one-time low frequency eddy current inspection or a visual inspection of the W.S. 360 splice plate within 50 landings.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the airworthiness directive effective immediately. These conditions still exist, and the airworthiness directive is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of the Federal Aviation Regulations.

BOEING: Applies to all Boeing 707-300, and -400 series airplanes with 13,000 or more landings; all 707-300B airplanes with 11,000 or more landings; and all 707-300C series airplanes with 8,000 or more landings, listed in Boeing Service Bulletin No. 3157 Revision 3, certificated in all categories. Compliance required as indirected.

To detect cracks in the upper wing skin splice plate at W.S. 360, within the next 50 landings:

(1) Conduct the low frequency eddy current inspection in accordance with Boeing Field Service Message M-7010-1256, dated October 9, 1975, unless already accomplished, or

(2) Remove the aerodynamic sealant between the upper wing skins at W.S. 360 from the front spar to the rear spar and visually inspect for a crack in the splice plate, unless accomplished since October 3, 1975. If cracks are found, repair in accordance with Boeing Service Bulletin No. 2510, Revision 3, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Northwest Region.

This is a one-time inspection. AD 75-03-01 (Amendment 39-2074) will be amended to provide for inspections similar to those provided herein. Telegraphic AD on this subject on October 15, 1975, is hereby superseded.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. The documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective on November 12, 1975, for all persons except those to whom it was made effective immediately by telegram dated October 17, 1975.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c)))

Issued in Seattle, Wash., November 4, 1975.

NOTE: The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

C. B. WALK, Jr.,
Director,
Northwest Region.

[FR Doc.75-30427 Filed 11-11-75;8:45 am]

[Docket No. 75-RM-2-AD,, Amdt. 39-2423]

PART 39—AIRWORTHINESS DIRECTIVES

Learjet Model 24A Airplane

There are Gates Learjet Model 24A airplanes in cargo service which, when modified in accordance with Supplemental Type Certificate No. ST7RM held by Alpine Aircraft Charters, Inc., do not have adequate emergency exit provisions for the flight crew. STC ST7RM permits cargo operation without benefit of an alternate emergency exit in addition to the main cabin door. With modifications per STCs SA9RM (cargo net) and SA10RM (cargo liner) held by Alpine Aircraft Charters, Inc., the existing emergency exit on the right side of the fuselage is blocked leaving only the main cabin door for emergency exit use. Since this condition exists on all airplanes modified in accordance with the STC No. ST7RM, an airworthiness directive is being issued to require installation of cockpit emergency egress provisions on such airplanes.

The 150 hour compliance time for the modifications has been established by the Federal Aviation Administration on the basis of safety considerations. This compliance time provides the lead time necessary for operators to schedule and plan compliance with the AD without undue delay. To prescribe the modifications required by this AD under the usual notice and public procedures would necessarily result in a reduction of the compliance time for the modification required by this AD and possibly leave the operator insufficient time to schedule aircraft for compliance with the AD. Therefore, accomplishment of the modification required by this AD within the time the FAA has determined is necessary makes strict compliance with the notice and public procedure provisions of the Administrative Procedure Act impracticable and this amendment becomes effective on or before December 12, 1975. However, interested persons are invited to submit such written data, views, or arguments as they may desire regarding this AD. Communications should identify the docket number and be submitted to the Federal Aviation Administration, Office of the Regional Counsel, P.O. Box 7213, Park Hill Station, Denver, Colorado 80207. All communications received before the effective date will be considered by the Administrator, and the AD may be changed in the light of comments received. All comments will be available both before and after the effective date in the Airworthiness Rules Docket for examination by interested persons. Operators are urged to submit their comments as early as possible, since it may not be possible to evaluate comments received near the effective date in sufficient time to amend the AD before it becomes effective.

The substance of this AD has been informally coordinated with Alpine Aircraft Charters, Inc. Their pertinent objections concerned the compliance time being insufficient to allow orderly modifications of their aircraft currently under contract cargo operation without unreasonable financial burden. The time frame as set forth in this AD reflects consideration of these objections.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new Airworthiness Directive:

LEAR JET MODEL 24A. Applies only to airplanes modified per STC ST7RM when used in cargo operation.

Compliance required within the next 150 hours time in service after the effective date of this AD, unless already accomplished.

To provide an adequate emergency exit for flight crew members, install Alpine Aircraft Charters, Inc., STC SA14RM or equivalent approved by Chief, Engineering and Manufacturing Branch, Rocky Mountain Region, or provide access to the existing emergency exit on the right side of the fuselage in a manner approved by Chief, Engineering and Manufacturing Branch, Rocky Mountain Region.

This amendment becomes effective on December 18, 1975.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c))

Issued in Aurora, Colo., on November 3, 1975.

M. M. MARTIN,
Director,
FAA Rocky Mountain Region.

[FR Doc.75-30429 Filed 11-11-75;8:45 am]

[Docket No. 75-SO-147, Amdt. 39-2422]

PART 39—AIRWORTHINESS DIRECTIVES

Piper Models PA-28, PA-32, PA-34

There has been one accident involving a Piper PA-34 airplane in which the four aft seats came loose during the accident and were projected forward. Since this condition may exist in other airplanes of the same type design, an airworthiness directive is being issued to require inspection of the seat retention mechanisms on the quick-disconnect type seats on Piper PA-28, PA-32 and PA-34 airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

PIPER. Applies to: PA-28-180 serial numbers 28-7105001 through 28-7505046 inclusive, PA-28R-180 serial numbers 28R-7130001 through 28R-7130013 inclusive, PA-28R-200 serial numbers 28R-7135001 through 28R-7535041 inclusive, PA-28-235 serial numbers 28-7110001 through 28-7510016 inclusive, PA-32-260 serial numbers 32-1 through 32-7500002 inclusive, PA-32-300 serial numbers 32-40001 through 32-7540028 inclusive, PA-34-200 serial numbers 34-7250001 through 34-7450220 inclusive, and PA-34-200T serial numbers 34-7570001 through 34-7570054 inclusive, certificated in all categories.

Compliance required within the next 100 hours time in service or at the next annual inspection, whichever comes first.

To prevent the seats from coming loose during an accident, accomplish the following:

1. Within the next 100 hours time in service after the effective date of this airworthiness directive or at the next annual inspection (whichever comes first) and thereafter at each annual inspection, inspect the rear legs on the quick-disconnect seats in accordance with Piper Service Letter No. 763.

2. If the retention is satisfactory, make appropriate log book entry.

3. If the retention is unsatisfactory, adjust or replace in accordance with Piper Service Letter No. 763, and make appropriate log book entry.

This amendment becomes effective November 21, 1975.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c))

Issued in East Point, Ga., on November 3, 1975.

P. M. SWATEK,
Director,
Southern Region.

V 40 N 219 NOV 12 75 XUM

[Airspace Docket No. 75-NE-25]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Designation of Transition Area

On page 26686 of the FEDERAL REGISTER dated June 25, 1975 (40 FR 26686), the Federal Aviation Administration published a notice of proposed rulemaking which would designate a 700-foot transition area at Wiscasset, Maine.

Interested parties were given twenty (20) days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulations are hereby adopted effective 0901 G.m.t., December 12, 1975.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749; 49 U.S.C. 1348); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c))).

Issued in Burlington, Mass., on July 18, 1975.

WILLIAM E. CROSBY,
Acting Director,
New England Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to add the following transition area:

WISCASSET, MAINE

That airspace extending upward from 700-feet above the surface within a 5-mile radius of the Center, 43°57'40" N. 69°42'50" W. of the Wiscasset, Maine, Airport; within 6-miles on the north side and 4-miles on the south side of the 252° and 072° bearings from the Wiscasset, Maine, NDB, 43°58'57" N. 69°38'27" W. extending to 5.5 miles southwest, and 11.5 miles northeast of the NDB; excluding that portion which coincides with the Brunswick, Maine, 700-foot transition area.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release 34-11759]

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Registration of Transfer Agents

Correction

In FR Doc. 75-29495, appearing at page 51181 in the issue for Tuesday, November 4, 1975, make the following changes:

1. On page 51181, in the preamble, the information that appears just after the second paragraph, which is in small type and labeled "(i) through (iv) * * *" should appear just below footnote 2 at the bottom of the page.

2. On page 51184, second column, the paragraph beginning with *"Delegation of authority,"* should be transposed so that it appears just below "Part 200—Organization; Conduct and Ethics; and Information and Requests on page 51183.

3. On page 51184, second column, the paragraph beginning with *"Effective immediately"*, should be transposed so that it appears just after the last line of five stars in § 200.30-11 on page 51183.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

[Docket No. 75N-0025]

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Crufomate Liquid

The Commissioner of Food and Drugs has evaluated supplemental new animal drug applications (13-514V) filed by The Dow Chemical Co., Midland, MI 48640, which propose revised labeling regarding the safe and effective use of crufomate drench as a wormer for sheep and goats and regarding a new use in cattle. The supplemental applications are approved.

Safe tolerances, covering uses of this drug, for residues of crufomate and its metabolite in edible tissues of cattle, sheep, and goats have been established previously in 40 CFR 180.295. This tolerance also covers residues expected from use of crufomate established by this section.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner (21 CFR 2.120), Part 520 (formerly Part 135c prior to recodification published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802)) is amended by adding the following new section:

§ 520.512 Crufomate liquid.

(a) *Chemical name.* 4-tert-Butyl-2-chlorophenyl methyl methylphosphoramidate.

(b) *Specifications.* The drug contains 21 percent crufomate (223 mg/ml).

(c) *Related tolerances.* See § 180.295 of Title 40 of the Code of Federal Regulations.

(d) *Sponsor.* See No. 025700 in § 510.600(c) of this chapter.

(e) *Conditions of use.* It is used as a drench as follows: (1) *Cattle.* (i) For the control of large stomach worms (*Haemonchus spp.*), medium stomach worms (*Ostertagia spp.*) and Cooper's worms (*Cooperia spp.*). As an aid in the control of stomach and intestinal hairworms (*Trichostrongylus spp.*), thread-necked strongyles (*Nematodirus spp.*) and nodular worms (*Oesophagostomum spp.*).

(ii) It is administered at the rate of ¼ fluid ounce per 100 pounds of body weight, or as follows:

Animal weight (pounds):	*Amount of crufomate drench (fluid ounces)*
100 to 150	¼
151 to 250	½
251 to 350	¾
351 to 450	1
451 to 550	1¼
551 to 650	1½
651 to 750	1¾
751 to 850	2
851 to 950	2¼
951 to 1050	2½
1051 to 1150	2¾
1151 or more	3

NOTE: Do not treat cattle under 1 month of age.

(2) *Sheep and goats.* (i) For the control of large stomach worms, wire worms, barber pole worms (*Haemonchus spp.*); medium stomach worms, brown stomach worms (*Ostertagia spp.*); stomach hair worms, bankrupt (black scours) worms, intestinal hairworms (*Trichostrongylus spp.*); Cooper's worms (Cooperids) (*Cooperia spp.*), intestinal threadworms (*Strongyloides spp.*), whipworms (*Trichuris spp.*), and head grubs (nose bots), (*Oestrus ovis*).

(ii) It is administered at the rate of 2 milliliters per 10 pounds of body weight, or as follows:

Animal weight (pounds):	*Amount of crufomate drench (fluid ounces)*
30 to 39	¼
40 to 69	½
70 to 99	¾
100 and over	1

NOTE: Do not treat lambs under 30 pounds of body weight.

(f) The label includes the following information: (1) Crufomate is a cholinesterase inhibitor. Do not treat animals with this drug simultaneously or within a few days before or after treatment with, or exposure to, cholinesterase-inhibiting drugs, pesticides or chemicals. Atropine is an antidote.

(2) To prevent residues in milk, do not treat dairy goats or cattle of breeding age or older.

(3) Do not treat animals within 7 days of slaughter.

(4) Do not treat sick, weak, or overheated animals, or animals under stress; do not treat within 10 days after shipping, weaning or exposure to diseases.

(5) Avoid starving animal prior to and following treatment.

(6) For most effective results, the following should be treated every 21-28 days: Severely parasitized animals; animals grazing in contaminated, heavily stocked, or irrigated pastures; and/or animals located in areas where stomach hairworms, intestinal hairworms, or whipworms are a severe problem.

(7) Consult a veterinarian before treating animals that are severely weakened or underweight from lice or internal parasites. If animals react abnormally, encourage exercise. If abnormal condition persists, consult a veterinarian.

(8) Do not treat sheep and goats in confinement. Cattle fed in confinement should be treated at least 24 hours before confinement.

Effective date. This order shall be effective on November 12, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: November 5, 1975.

FRED J. KINGMA,
Acting Director,
Bureau of Veterinary Medicine.

[FR Doc.75-30432 Filed 11-11-75;8:45 am]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Clopidol-Bacitracin Methylene Disalicylate

The Commissioner of Food and Drugs has evaluated a new animal drug application (99-150V) filed by The Dow Chemical Co., P.O. Box 1706, Midland, MI 48640, proposing safe and effective use of clopidol-bacitracin methylene disalicylate in the feed of broiler chickens as an aid in the control of coccidiosis and for increased rate of weight gain. The application is approved, effective November 12, 1975.

The Commissioner is amending § 558.175 (21 CFR 558.175) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner (21 CFR 2.120), Part 558 is amended in § 558.175 by adding new paragraph (e)(1)(v), to read as follows:

§ 558.175 Clopidol.

* * * * * *

(e) * * *

(1) * * *

(v) *Amount per ton.* Clopidol, 113.5 grams (0.0125 percent) plus bacitracin methylene disalicylate, 4 to 50 grams per ton.

(a) *Indications for use.* For increased rate of weight gain; to aid in the prevention of coccidiosis caused by *E. tenella, E. necatrix, E. acervulina, E. maxima, E. mivati,* and *E. brunetti.*

(b) *Limitations.* Feed continuously as the sole ration from the time chicks are placed in floor pens until slaughter. Do not feed to chickens over 16 weeks of age. Bacitracin methylene disalicylate as provided by No. 000794 in § 510.600(c) of this chapter.

* * * * * *

Effective date. This amendment shall be effective November 12, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: November 5, 1975.

FRED J. KINGMA,
Acting Director,
Bureau of Veterinary Medicine.

[FR Doc.75-30435 Filed 11-11-75;8:45 am]

[Docket No. 75N-0182]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Clopidol and Chlortetracycline

The Commissioner of Food and Drugs has evaluated a new animal drug application (46-209V) filed by The Dow Chemical Company, P.O. Box 1706, Midland, MI 48640, proposing safe and effective use of clopidol and chlortetracycline in feed for treatment of broiler chickens and replacement chickens. The application is approved, effective November 12, 1975.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), in accordance with 21 CFR 510.6, and under authority delegated to the Commissioner (21 CFR 2.120), Part 558 is amended in § 558.175 by revising paragraph (e)(2) to read as follows:

§ 558.175 Clopidol.

* * * * * *

(e) * * *

(2) *Broiler chickens and replacement chickens*—(i) *Amount per ton.* Clopidol, 113.5 or 227 grams (0.125 or 0.025 percent).

(a) *Indications for use.* Aid in the prevention of coccidiosis caused by *E. tenella, E. necatrix, E. acervulina, E. maxima, E. brunetti,* and *E. mivati.*

(b) *Limitations.* Feed up to 16 weeks of age if intended for use as caged layers; feed continuously as the sole ration; withdraw 5 days before slaughter if given at the level of 0.025 percent in feed or reduce level to 0.0125 percent 5 days before slaughter.

(ii) *Amount per ton.* 113.5 grams (0.0125 percent) clopidol with 200 grams chlortetracycline.

(a) *Indications for use.* Aid in the prevention of coccidiosis caused by *E. tenella, E. necatrix, E. acervulina, E. maxima, E. mivati,* and *E. brunetti,* and infectious synovitis caused by *Mycoplasma synoviae.*

(b) *Limitations.* Feed continuously as sole ration from the time chicks are placed in floor pens, up to 21 days of age.

* * * * * *

Effective date. This regulation shall be effective on November 12, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: November 5, 1975.

FRED J. KINGMA,
Acting Director,
Bureau of Veterinary Medicine.

[FR Doc.75-30434 Filed 11-11-75;8:45 am]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Virginiamycin

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (91-513V), filed by Smith Kline Animal Health Products, Division of Smith Kline Corp., 1500 Spring Garden St., Philadelphia, PA 19101, proposing safe and effective use of a virginiamycin premix containing 11 percent (50 grams per pound) virginiamycin for the manufacture of swine feed. The supplemental application is approved, effective November 12, 1975.

The Commissioner is amending § 558.635 to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), § 558.635 is amended by revising paragraph (b), to read as follows:

§ 558.635 Virginiamycin.

* * * * * *

(b) Premix levels of 2.2 percent virginiamycin activity (10 grams per pound), 11 percent virginiamycin activity (50 grams per pound), and 50 percent virginiamycin activity (227 grams per pound) granted to No. 000007 in § 510.600(c) of this chapter.

* * * * * *

Effective date. This regulation shall be effective November 12, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: November 5, 1975.

FRED J. KINGMA,
Acting Director,
Bureau of Veterinary Medicine.

V 40 I 219 NOV 12 75 XUM

Title 29—Labor

CHAPTER XXV—OFFICE OF EMPLOYEE BENEFITS SECURITY

PART 2530—RULES AND REGULATIONS FOR MINIMUM STANDARDS FOR EMPLOYEE PENSION BENEFIT PLANS

Extension of Time for Filing Comments

The time for filing comments relating to the proposed, temporarily effective regulations prescribing minimum participation, vesting and benefit accrual standards for covered employee pension benefit plans, published at pages 41654 thru 41667 of the FEDERAL REGISTER on September 8, 1975, is extended until January 9, 1976.

The extension is granted to provide interested persons adequate time to consider these regulations in conjunction with related Internal Revenue Service regulations, including those concerning minimum participation and vesting standards. The Department of Labor has determined that the complexity of the proposed regulations in this area and the interrelationship between the Department and the Internal Revenue Service regulations makes it appropriate to grant an extension so that the comment period for the Department's regulations coincides with the comment period for the proposed regulations relating to minimum vesting standards published by the Internal Revenue Service.

Interested persons are invited to submit written data, views, or arguments concerning the proposed Department of Labor regulations cited above on or before January 9, 1976. Such data, views and arguments should be submitted to the Office of Employee Benefits Security (DEVD–PV Comments), Labor-Management Services Administration, U.S. Department of Labor, Washington, D.C. 20216. Comments should be clearly referenced to the numbers of the sections to which the comments are directed.

Signed at Washington, D.C. this 4th day of November, 1975.

JAMES D. HUTCHINSON,
Administrator of Pension and Welfare Benefit Programs.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

[FRL 455–4; PP5F1599/R65]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

2-[[4-Chloro-6-(Ethylamino)-S-Triazin-2-yl]Amino]-2-Methylpropionitrile

On March 28, 1975, notice was given (40 FR 14117) that Shell Chemical Co., Suite 200, 1025 Connecticut Ave. NW., Washington DC 20036, had filed a pesticide petition (PP5F1599) with the Environmental Protection Agency (EPA). This petition proposed that 40 CFR 180.307 be amended by establishing a tolerance for negligible residues of the herbicide 2-[[4-chloro-6-(ethylamino)-s-triazin-2-yl] amino]-2-methylpropionitrile in or on the raw agricultural commodity cottonseed at 0.05 part per million.

The data submitted in the petition and other relevant material have been evaluated, and the herbicide is considered to be useful for the purpose for which the tolerance is sought. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies. The tolerance established by amending § 180.307 of the regulations will protect the public health, and it has been concluded, therefore, that the tolerance should be established as set forth below.

Any person adversely affected by this regulation may, on or before December 12, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, Room 1019, East Tower, 401 M St. SW, Washington DC 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective November 12, 1975, Part 180, Subpart C, § 180.307, is amended as set forth below.

(Sec. 408(d)(2), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)))

Dated: November 6, 1975.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, § 180.307, is amended by revising the paragraph "0.05 part per million • • •" as follows:

§ 180.307 2-[[4-Chloro-6-(ethylamino)-s-triazin-2-yl]amino]-2-methylpropionitrile; tolerances for residues.

• • • • •

0.05 part per million (negligible residues) in or on fresh corn including sweet corn (kernels plus cob with husk removed), corn grain, cottonseed, and sorghum fodder, forage, and grain.

• • • • •

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

PART 0—COMMISSION ORGANIZATION

PART 1—PRACTICE AND PROCEDURE

Miscellaneous Amendments

In the matter of editorial amendments of §§ 0.121(a) and 1.83(a) of the Commission's rules and regulations.

1. The following editorial changes will be made to the Rules and Regulations:

(a) Section 0.121(a) will be amended to reflect the new address of the Federal Communications Commission field office located in Philadelphia, Pennsylvania:

Field office	From—	To—
3	1005 New U.S. Customhouse, Philadelphia, Pa. 19106.	11425 James A. Byrne Federal Courthouse, 601 Market St., Philadelphia, Pa. 19106.

(b) Section 1.83(a)(1)(i) will be amended by eliminating the "A" after the identification of FCC Form 753.

2. Since the amendments are editorial in nature the prior notice and effective date provisions of the Administrative Procedure Act are not applicable. Authority for the promulgation of this amendment is contained in section 4(i) and 5(d) of the Communications Act of 1934, as amended, and section 0.231(d) of the rules.

3. Accordingly, it is ordered, effective November 17, 1975 §§ 0.121(a) and 1.83(a) of the rules and regulations are amended as set forth below.

In Chapter I of Title 47 of the Code of Federal Regulations, Part 0 is amended as follows:

1. In § 0.121, paragraph (a) is amended to read as follows:

§ 0.121 Location of Field Installations.

(a) Field offices and sub-offices are located at the following address:

Field office	Address of the engineer in charge	Territory within district	
		States	Counties
•	•	•	•
3	11425 James A. Byrne Federal Courthouse, 601 Market St., Philadelphia, Pa. 19106.	Delaware, New Jersey	
•	•	•	•

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303))

Adopted: October 31, 1975.

Released: October 31, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] RICHARD D. LICHTWARDT,
Executive Director.

2. In § 1.83, paragraph (a) is amended to read as follows:

§ 1.83 Application for radio operator license.

(a) • • •

(1) Restricted radiotelephone operator permit. (i) Applications for a Restricted Radiotelephone Operator Permit filed by U.S. Citizens or Nationals shall be on FCC Form 753 entitled "Application for Restricted Radiotelephone Operator Permit by Declaration." (ii) Applications for Restricted Radiotelephone Operator Permits filed by aliens shall be on FCC Form 755 entitled "Application for Restricted Radiotelephone Operator Permit (By an Alien)".

[Docket No. 20489; FCC 75–1217]

PART 31—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS A AND CLASS B TELEPHONE COMPANIES

PART 33—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C TELEPHONE COMPANIES

Deferral Accounting for Income Tax Differentials

In the matter of amendment of Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, and Part 33, Uniform System of Accounts for Class C Telephone Companies, of the Commission's rules to provide for deferral accounting for income tax differentials occasioned by the use of depreciation based on class lives and asset depreciation ranges for income tax purposes and to provide for below-the-line accounting in certain instances for investment credits made available by the Revenue Act of 1971; Docket No. 20489.

1. The Commission adopted a Notice of Proposed Rule Making in the above entitled matter on May 21, 1975, which was published in the FEDERAL REGISTER on June 10, 1975 (40 FR 24743) in accordance with section 4(a) of the Administrative Procedure Act. The Notice presented for comments on or before July 8, 1975 and for reply comments on or before July 21, 1975 a proposal to amend the Commission's accounting rules to permit normalization accounting for income tax differentials occasioned by the use of depreciation based on Class Lives and Asset Depreciation Ranges for income tax purposes. Further the Notice set forth a proposal to amend the accounting rules to permit below-the-line accounting in certain instances for investment credits.

2. Timely comments were filed by the American Telephone and Telegraph Company and the associated Bell System operating companies (AT&T), GTE Service Corporation on behalf of its affiliated telephone companies, Arthur Andersen & Company (Arthur Andersen) and the American Institute of Certified Public Accountants. Also, comments were received from Coopers & Lybrand dated July 31, 1975. No reply comments were received. All of the comments favorably supported the changes proposed in the Notice.

3. Arthur Andersen recommends, in addition, that the Commission adopt comprehensive interperiod income tax allocation at this time. We are not adopting this recommendation since, in effect, it goes beyond the matters covered in the Notice of Proposed Rule Making. We are adopting, however, as proposed in the Notice, appropriate changes in the language of certain accounts to accommodate any additional tax timing differences the Commission may authorize normalization accounting for in the future. In this regard, AT&T urges the Commission to reflect its intent at this time to follow a policy of normalization for rate making purposes where such normalization accounting may be approved in the future. Until such time as normalization accounting may be authorized for additional items we do not believe it appropriate to go beyond the policy statement set forth in paragraph 6 of the Notice and reiterated in paragraph 4 of this Order pertaining to the specific items covered in this rule making proceeding for which normalization accounting is herein being adopted in our accounting rules for telephone companies.

4. Arthur Andersen also suggests clarification of certain aspects of the proposed rule making particularly with regard to the Commission's intent concerning the use of normalization for ratemaking purposes. We believe the Commission's intent, as indicated in paragraph 6 of the Notice, is quite clear. Therein it was stated that consistent with our decision in Docket No. 18828, we propose to follow, for rate-making purposes, a policy of normalization in determining a telephone company's cost of service. This policy would meet the requirements of § 1.167(a)–11(b)(6) and § 1.167(a)–12(a)(4)(iii) of the Treasury Department's regulations concerning the use of class lives and asset depreciation ranges for income tax purposes. Further, also consistent with our decision in Docket No. 18828, and as indicated in paragraph 6 of the Notice, we would not permit a company to earn a return on the amount of the cost free capital represented by the increased reserve for deferred taxes subject to the requirement that we consider any evidentiary showing to the contrary in a particular rate case.

5. AT&T also recommends that the Commission revise the language in § 31.3–32 of Part 31 to make it consistent with the proposed definition of "accelerated depreciation." We believe that the reference to straight-line depreciation in § 31.3–32(b) is appropriate since this language conforms to the language used to describe the computation of depreciation rates in § 31.02–80 of Part 31.

6. AT&T further recommends that the Commission adopt the requirement that the entries to and the balance in proposed account 176.1, "Accumulated deferred income taxes—accelerated tax depreciation," be maintained by vintage year separately for each tax account, rather than by class or subclass of eligible depreciable telephone plant for which an accelerated method of depreciation has been used for income tax purposes, in order to reduce the volume of work and attendant worksheets required. AT&T urges the Commission to consider carefully the costs involved but furnishes no cost data for the Bell System. The question of keeping items in account 176.1 by vintage year separately for each tax account was raised and discussed in Docket 18828. We stated therein that it is desirable to establish and maintain the deferred tax reserve on a basis consistent with the plant classifications used for book depreciation accounting purposes rather than on the basis of those used for Federal Income Tax purposes. This procedure will enable a regulatory body to determine whether the deferred tax amounts are appropriately spread over the life of the related plant. We still hold to this view. To the extent, however, that tax deferrals arise from the use of Treasury Department Regulations 167(a)–11 and 167(a)–12 which cannot be specifically attributed to each class or subclass of eligible depreciable telephone plant, which AT&T indicates could happen, then, of course, such attribution would not be expected.

7. In a related comment AT&T recommends that the Commission revise the language in the Notice which describes the manner in which the underlying records are to be designed for maintaining the tax differentials to make it clear that only separate subaccounts for the direct and indirect effects should be maintained rather than separate subaccounts for the direct and indirect effects for each method of accelerated depreciation in use. We indicated in the Notice that the carrier's underlying records should be designed to readily determine the separate direct and indirect effects of using class lives, asset depreciation ranges, sum-of-the-year digits or double-declining balance depreciation methods, etc. We are of the view that the detailed records being maintained by the larger telephone companies to support their tax deductions will serve as the basis for this information. It was not our intention to require the establishment of subaccounts but merely to assure that such information could be readily determined from the carrier's records. We are further of the view that having this information readily available would provide the carriers and the Commission with a clearer picture of the effects of using an accelerated method of depreciation.

8. Further, AT&T suggests that the proposed requirement that any debit balance in any subaccount of account 176.2 should be treated for financial statement purposes as a special subaccount of account 139 should not be adopted. AT&T believes that this proposal is inconsistent with accounting prescribed by the Commission in the past. We have deleted this requirement from the Appendix; however, appropriate revisions will be proposed to the Annual Report Forum M in order that subdivisions of account 176.2 can be reported separately.

V 40 I 219 NOV 12 75 XUM

9. Lastly, AT&T is concerned that adoption at this time by this Commission of Case 27 covering the accounting for tax effects arising from the use of accelerated depreciation for excise tax purposes in the State of Tennessee may be prejudicial to litigation on this matter currently in process in Tennessee. Beyond this generalized statement, AT&T furnished no details on the litigation referred to or any specifics as to how such litigation could be affected by this Commission's action in this proceeding. Further, AT&T furnished nothing in opposition to the accounting position set forth in Case 27. Accordingly, AT&T's request for deletion of Case 27 is denied.

10. As proposed in the Notice of Proposed Rule Making, Annual Report Form M and Monthly Report Form 901 will be amended in a separate rule making in order to reflect the changes made in this procedure. These changes cannot be made in time for inclusion in the 1975 annual report. Therefore, telephone companies are requested to interline new accounts 176.2 and 308.2, together with amounts included in Schedules 10 and 11, respectively, in their 1975 Annual Report Form M.

11. Since all the comments favorably supported the changes proposed in the Notice, the Commission has considered and commented herein on the suggestions received in this proceeding and has reviewed and hereby adopts the staff's study and recommendations in this matter, Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, and Part 33, Uniform System of Accounts for Class C Telephone Companies, are to be amended as set forth in the Appendix. Further, as discussed in paragraph 9 of this Notice, the rule amendments being made herein are to be effective January 1, 1976 with a provision for retroactive application to January 1, 1971, in order that the use of class lives and asset depreciation ranges may be made available to telephone companies as soon as possible and made effective at the beginning of a year, and since the rule amendments pertaining to investment tax credits are not "alterations . . . in the required manner or form of keeping accounts" for which advance notice of the effective date is required to be given by section 220(g) of the Communications Act.

12. *Accordingly, It is ordered,* That, under authority contained in sections 4(i) and 220 of the Communications Act of 1934, as amended, Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, and Part 33, Uniform System of Accounts for Class C Telephone Companies, of the Commission's Rules are amended as set forth below effective January 1, 1976, provided, however, that any company may make such amendments retroactive to January 1, 1971;

13. *It is further ordered,* That this proceeding is hereby terminated.

(Secs. 4, 220, 48 Stat., as amended, 1066, 1078; 47 U.S.C. 154, 220.)

Adopted: October 29, 1975.

Released: November 6, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] VINCENT J. MULLINS,
Secretary.

I. Part 31, Uniform System of Accounts for Class A and Class B Telephone Companies, is amended as follows:

1. Section 31.01–3 is amended by adding a new paragraph (a) and redesignating the present paragraphs (a) through (jj) as (b) through (kk). New paragraph (a) reads as follows:

§ 31.01–3 Definitions.

(a) "Accelerated depreciation" means a depreciation method or period of time, including the treatment given cost of removal and gross salvage, used in calculating depreciation deductions on income tax returns which is different from the depreciation method or period of time prescribed by this Commission for use in calculating depreciation expense recorded in a company's books of account.

. . . . . .

2. Section 31.176 is amended by redesignating it § 31.176:1 and paragraphs (b) and (c) are revised to read as follows:

§ 31.176:1 Accumulated deferred income taxes-accelerated tax depreciation.

. . . . . .

(b) This account shall be credited with the amounts charged to accounts 307, "Other operating taxes," 308.1, "Operating Federal income taxes deferred-accelerated tax depreciation," 326, "Federal income taxes-Nonoperating," and 327, "Other nonoperating taxes," in accordance with the provisions of § 31.3–32.

(c) This account shall be charged with the amounts credited to accounts 307, 309 "Income credits and charges resulting from prior deferrals of Federal income taxes," 326 and 327 in accordance with the provisions of § 31.3–32.

. . . . . .

3. New § 31.176:2 is added to read as follows:

§ 31.176:2 Accumulated deferred income taxes—other.

(a) This account shall include the balance of income tax expense that has been deferred to later periods as a result of the use of the normalized method of accounting for tax differentials arising from the use of the asset guideline class repair allowance feature of the Revenue Act of 1971. It shall also include, when authorized by the Commission, any balances that have been deferred to later periods as a result of the use of the normalized method of accounting for any other tax differentials not provided for elsewhere. A separate subaccount shall be maintained for each item included in this account.

(b) This account shall be credited with amounts charged to accounts 307, "Other operating taxes," 308.2, "Operating Federal income taxes deferred—other," 326, "Federal income taxes—Nonoperating," and 327, "Other nonoperating taxes," in accordance with the provisions of those accounts.

(c) This account shall be charged with the amounts credited to accounts 307, 309, "Income credits and charges resulting from prior deferrals of Federal income taxes," 326 and 327 in accordance with the provisions of those accounts.

(d) This account shall be maintained so as to show separately (1) deferred operating income taxes, further subdivided as between Federal income taxes and State and local income taxes, and (2) deferred non-operating income taxes.

(e) Adjustments shall be made between this account and account 307, account 309, account 326, or account 327, as appropriate, upon the sale of any property with respect to which amounts are included herein.

4. In § 31.3–32 paragraphs (b), (c), and (d) are revised and a new paragraph (f) is added to read as follows:

§ 31.3–32 Normalization accounting for tax differentials resulting from the use of accelerated depreciation for income tax purposes.

. . . . . .

(b) With respect to each vintage class or subclass of eligible depreciable telephone plant (except as provided in paragraph (d) of this section) that is recognized for depreciation accounting purposes, or the amount in account 103, "Miscellaneous physical property," for which the use of accelerated depreciation for income tax purposes results in a greater amount of tax depreciation in the current year than under straight line depreciation, the tax differential occasioned by such use shall be accounted for in the manner indicated hereinafter. A tax differential with respect to State and local income taxes relating to eligible depreciable telephone plant shall be charged to account 307, "Other operating taxes"; a tax differential with respect to Federal income taxes relating to eligible depreciable telephone plant shall be charged to account 308.1, Operating Federal income taxes deferred—accelerated tax depreciation"; a tax differential with respect to Federal income taxes on eligible nonoperating depreciable property shall be charged to account 326, "Federal income taxes—Nonoperating"; and a tax differential with respect to State and local income taxes relating to eligible nonoperating depreciable property shall be charged to account 327, "Other nonoperating taxes." The appropriate subaccount of account 176.1, "Accumulated deferred income taxes—accelerated tax depreciation," shall be credited with the amounts charged to each of the foregoing accounts in accordance with the provisions of paragraph (d) of the section.

(c) With respect to each vintage class or subclass of eligible depreciable plant or the amount in account 103 for which the use of accelerated depreciation for income tax purposes results in a lesser amount of tax depreciation in the current year than under straight line depreciation, the tax differential resulting from such use that is determined on an equitable basis as being applicable to the current year, shall be charged to the appropriate subdivision of account 176.1, "Accumulated deferred income taxes——accelerated tax depreciation," and credited to account 307, "Other operating taxes," account 309, "Income credits and charges resulting from prior deferrals of Federal income taxes," account 326, "Federal income taxes—Nonoperating," or account 327, "Other nonoperating taxes," as appropriate: *Provided, however,* That, in lieu of continuing to amortize the balance in account 176.1 in the manner indicated above until the retirement of all plant of a vintage class or subclass, any company may submit for the consideration and approval of the Commission a plan of straight-line amortization for relatively small balances remaining in account 176.1.

(d) Account 176.1 shall be maintained so as to show separately (1) deferred operating income taxes, further subdivided as between Federal income taxes and State and local income taxes, and (2) deferred nonoperating income taxes. The records underlying entries to and the balances in account 176.1 shall be kept so as to show the deferred tax amounts by vintage year separately for each class or subclass of eligible depreciable telephone plant for which an accelerated method of depreciation has been used for income tax purposes, except that any company that had a balance of $40 million or less in account 100:1, "Telephone plant in service," as at the end of the previous year may use as its vintage class all or any portion of the eligible depreciable telephone plant added in a single year.

. . . . . .

(f) The tax differentials to be normalized as indicated herein shall encompass both the direct effect of using accelerated depreciation (depreciation differences) and the additional effect of State and local income tax changes on Federal income taxes (income tax effect) produced by (1) the use of accelerated depreciation for determining State and local income taxes, and (2) the changes in Federal income tax realized from the use of accelerated depreciation when Federal income tax is a deduction in State or local tax computations. The provisions of this paragraph shall also apply to the tax differentials produced by the use of an asset guideline class repair allowance when a company uses normalization accounting therefor. (Note also Appendix A, Case 27.)

5. Section 31.304 is amended by adding new paragraph (c) to read as follows:

§ 31.304 Investment credits-net.

. . . . . .

(c) In lieu of crediting account 174 under paragraph (a) of this section or this account under paragraph (b) of this section, account 316, "Miscellaneous income," may be credited.

6. In § 31.306, Note A is amended to read as follows:

§ 31.306 Federal income taxes—Operating.

. . . . . .

NOTE A: No entries shall be made in this account to reflect interperiod allocation of taxes except as provided in Case 26. (See, however, § 31.3–32 with respect to interperiod allocation of income taxes in connection with the use of an accelerated method of depreciation for Federal income tax purposes and § 31.308:2 with respect to interperiod allocation of income taxes in connection with the use of an asset guideline class repair allowance for Federal income tax purposes.)

. . . . . .

7. In § 31.307, paragraphs (c) and (d) are revised to read as follows:

§ 31.307 Other operating taxes.

. . . . . .

(c) This account shall be charged also and account 176.1, "Accumulated deferred income taxes—accelerated tax depreciation," shall be credited, in accordance with the provisions of § 31.3–32, with the amounts of income tax differentials applicable to the current period resulting from the deferral of income taxes occasioned by the use of accelerated depreciation for State and local income tax purposes with respect to eligible depreciable telephone plant. In addition, this account shall be charged and account 176.2, "Accumulated deferred income taxes—other," shall be credited with the amounts of income tax differentials applicable to the current period resulting from the deferral of income taxes occasioned by the use of an asset guideline class repair allowance for State and local income tax purposes with respect to eligible depreciable telephone plant. This account shall also be charged or credited, as appropriate, with contra entries to account 176.2, with the amounts of income tax differentials relating to telephone operations, and not provided for elsewhere, applicable to the current period resulting from the deferral of income taxes for State and local income tax purposes when authorization therefor has been obtained from the Commission.

(d) This account shall be credited and account 176.1 shall be charged, in accordance with the provisions of § 31.3–32, with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of accelerated depreciation for State and local income tax purposes with respect to eligible depreciable telephone plant. In addition, this account shall be credited and account 176.2 shall be charged with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of an asset guideline class repair allowance for State and local income tax purposes with respect to eligible depreciable telephone plant. This account shall also be credited or charged, as appropriate, with contra entries to account 176.2 with the amounts of income tax differentials relating to telephone operations, and not provided for elsewhere, applicable to the current period resulting from the deferral in prior years of income taxes for State and local income tax purposes when authorization therefor has been obtained from the Commission.

. . . . . .

8. Section 31.308 is amended by redesignating it § 31.308:1 to read as follows:

§ 31.308:1 Operating Federal income taxes deferred—accelerated tax depreciation.

This account shall be charged and account 176.1, "Accumulated deferred income taxes—accelerated tax depreciation," shall be credited, in accordance with the provisions of § 31.3–32, with the amounts of income tax differentials applicable to the current period resulting from the deferral of income taxes occasioned by the use of accelerated depreciation for Federal income tax purposes with respect to eligible depreciable telephone plant.

9. New § 31.308:2 is added to read as follows:

§ 31.308:2 Operating Federal income taxes deferred—other.

(a) This account shall be charged and account 176.2, "Accumulated deferred income taxes—other," shall be credited, with the amounts of income tax differentials applicable to the current period resulting from the deferral of income taxes occasioned by the use of the asset guideline class repair allowance feature of the Revenue Act of 1971 for Federal income tax purposes with respect to eligible depreciable telephone plant.

(b) This account shall also be charged or credited, as appropriate, with contra entries to account 176.2 with the amounts of income tax differentials not provided for elsewhere applicable to the current period resulting from the deferral of income taxes for Federal income tax purposes when authorization therefor has been obtained from the Commission. A separate subaccount shall be maintained for each item included in this account.

10. Section 31.309 is revised to read as follows:

§ 31.309 Income credits and charges resulting from prior deferrals of Federal income taxes.

(a) This account shall be credited and account 176.1, "Accumulated deferred income taxes—accelerated tax depreciation," shall be charged, in accordance with the provisions of § 31.3–32, with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of accelerated depreciation for Federal income tax purposes with respect to eligible depreciable telephone plant.

[1] Commissioner Reid absent.

V 40 I 219 NOV 12 75 XUM

(b) This account shall be credited and account 176.2, "Accumulated deferred income taxes—other," shall be charged with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of the asset guideline class repair allowance feature of the Revenue Act of 1971 for Federal income tax purposes with respect to eligible depreciable telephone plant.

(c) This account shall also be credited or charged, as appropriate, with contra entries to account 176.2 with the amounts of income tax differentials not provided for elsewhere applicable to the current period resulting from the deferral in prior years of income taxes for Federal income tax purposes when authorization therefor has been obtained from the Commission. A separate subaccount shall be maintained for each item included in this account.

§ 31.326 Federal income taxes—Nonoperating.

* * * * *

(b) This account shall be charged also and account 176.1, "Accumulated deferred income taxes—accelerated tax depreciation," shall be credited, in accordance with the provisions of § 31.3–32, with the amounts of income tax differentials applicable to the current period resulting from the deferral of income taxes occasioned by the use of accelerated depreciation for Federal income tax purposes with respect to eligible nonoperating depreciable property. In addition, this account shall be charged and account 176.2, "Accumulated deferred income taxes—other," shall be credited with the amounts of income tax differentials applicable to the current period resulting from the deferral of income taxes occasioned by the use of an asset guideline class repair allowance for Federal income tax purposes with respect to eligible nonoperating depreciable property. This account shall also be charged or credited, as appropriate, with contra entries to account 176.2 with the amounts of income tax differentials applicable to items included in the accounts referenced in paragraph (a) of this section, and not provided for elsewhere, applicable to the current period resulting from the deferral of income taxes for Federal income tax purposes when authorization therefor has been obtained from the Commission.

(c) This account shall be credited and account 176.1 shall be charged, in accordance with the provisions of § 31.3–32, with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of accelerated depreciation for Federal income tax purposes with respect to eligible nonoperating depreciable property. In addition, this account shall be charged and account 176.2 shall be charged with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of an asset guideline class repair allowance for State and local income tax purposes with respect to eligible nonoperating depreciable property. This account shall also be charged or credited, as appropriate, with contra entries to account 176.2, with the amounts of income tax differentials applicable to items included in the accounts referenced in paragraph (a) of this section, and not provided for elsewhere, applicable to the current period resulting from the deferral of income taxes for State and local income tax purposes when authorization therefor has been obtained from the Commission.

(d) This account shall be credited and account 176.1 shall be charged, in accordance with the provisions of § 31.3–32, with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of accelerated depreciation for State and local income tax purposes with respect to eligible nonoperating depreciable property. In addition, this account shall be credited and account 176.2 shall be charged with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of an asset guideline class repair allowance for State and local income tax purposes with respect to eligible nonoperating depreciable property. This account shall also be credited or charged, as appropriate, with contra entries to account 176.2 with the amounts of income tax differentials applicable to items included in the accounts referenced in paragraph (a) of this section and not provided for elsewhere, applicable to the current period resulting from the deferral in prior years of income taxes for State and local income tax purposes when authorization therefor has been obtained from the Commission.

* * * * *

13. Appendix A to Part 31 is amended by adding a new Case 27 as follows:

APPENDIX A

INTERPRETATIONS OF THE ACCOUNTING REQUIREMENTS CONTAINED IN THIS SYSTEM OF ACCOUNTS.

* * * * *

Case 27

STATEMENT OF FACTS

In the State of Tennessee an excise tax based on taxable income earned in the State of Tennessee is levied on telephone companies, among others. In addition, a separate Tennessee statute imposes a gross receipts privilege tax which is based on gross receipts from Tennessee intrastate business. Thereunder, the intrastate portion of excise taxes actually paid applicable to the preceding year is permitted to be used as a credit against the gross receipts privilege tax currently due. As a result of a company's use of accelerated depreciation in computing its excise tax, a lesser amount is paid currently resulting in a lower credit available to reduce the current gross receipts privilege tax. Accordingly, a higher gross receipts privilege tax is currently paid. In the future, as the amount of excise tax currently deferred reverses, a larger excise tax payment will be due and paid, and hence a larger credit against and a lower payment of the gross receipts privilege tax will occur.

Question: What is the proper accounting to be followed for the tax effects arising from the use of accelerated depreciation for excise tax purposes in the State of Tennessee and straight-line depreciation for book purposes and for the effect such use has on the Tennessee gross receipts privilege tax?

Answer: The provisions of Section 31.3–32 shall apply. Thereunder, if a company normalizes the tax effects arising from the use of accelerated depreciation, paragraph (f) provides, in effect, that the additional or secondary effects thereof shall also be normalized. Accordingly, if a company normalizes the tax effects arising from the use of accelerated depreciation for excise tax purposes, the company shall also normalize the effect such use has on the gross receipts privilege tax.

II. Part 33, Uniform System of Accounts for Class C Telephone Companies is amended as follows:

1. Section 33.5 is amended by adding a definition for "accelerated depreciation" immediately before "Accounts," reading as follows:

§ 33.5 Restrictive use of certain terms.

* * * * *

"Accelerated depreciation" means a depreciation method or period of time, including the treatment given cost of removal and gross salvage, used in calculating depreciation deductions on income tax returns which is different from the depreciation method or period of time prescribed by this Commission for use in calculating depreciation expense recorded in a company's books of account.

* * * * *

2. In § 33.2590, paragraph (a) is revised to read as follows:

§ 33.2590 Other deferred credits.

(a) This account shall include the amounts of all deferred credits, not provided for elsewhere, that cannot be entirely cleared or disposed of until additional information has been received or amounts that are being held for credit to other accounts in the future, including investment credits and deferred income taxes occasioned by the use of accelerated depreciation and an asset guideline class repair allowance for income tax purposes.

* * * * *

3. In § 33.5500, paragraphs (b) and (c) are revised and a new paragraph (d) is added to read as follows:

§ 33.5500 Income taxes.

* * * * *

(b) This account shall be charged and account 2590, "Other deferred credits," shall be credited with the amounts of income tax differentials applicable to the current period that are occasioned by the use of accelerated depreciation and an asset guideline class repair allowance for Federal, State, and local income tax purposes with respect to eligible depreciable telephone plant.

(c) This account shall be credited and account 2590 shall be charged with the amounts of income tax differentials applicable to the current period resulting from the deferral in prior years of income taxes occasioned by the use of accelerated depreciation and an asset guideline class repair allowance for Federal, State, and local income tax purposes with respect to eligible depreciable telephone plant.

(d) The tax differentials referred to herein shall encompass both the direct effect of using accelerated depreciation (depreciation differences) and an asset guideline class repair allowance and the additional effect of State and local income tax changes on Federal income taxes (income tax effect) produced by (1) the use of accelerated depreciation and an asset guideline class repair allowance for determining State and local income taxes, and (2) the changes in Federal income taxes realized from the use of accelerated depreciation and an asset guideline class repair allowance when Federal income tax is a deduction in State or local tax computations.

* * * * *

4. Section 33.5490 is amended by adding new paragraph (c) to read as follows:

§ 33.5490 Investment credits—net.

* * * * *

(c) In lieu of crediting account 2590 under paragraph (a) of this section or this account under paragraph (b) hereof, account 6900, "Other income, miscellaneous," may be credited.

5. In Appendix A to Part 33, the answer in Case 13–R–1 is amended and a new Case 27 is added to read as follows:

APPENDIX A

INTERPRETATION OF THE ACCOUNTING REQUIREMENTS CONTAINED IN THIS SYSTEM OF ACCOUNTS

* * * * *

Case 13–R–1 (Cancels Case 13)

* * * * *

Answer: No. Account 5500, "Income taxes," should include provision for actual taxes only, except for taxes deferred with respect to the use of accelerated depreciation and an asset guideline class repair allowance for income tax purposes with respect to eligible telephone plant. Account 5500 should not be increased by the amount which would have been paid had the refunding transaction not occurred. In other words, there was an actual saving in taxes and this saving should be reflected in the income statement because it is a fact.

* * * * *

Case 26

(Applicable only to class A and class B companies)

Case 27

STATEMENT OF FACTS

In the State of Tennessee, an excise tax based on taxable income earned in the State of Tennessee is levied on telephone companies, among others. In addition, a separate Tennessee statute imposes a gross receipts privilege tax which is based on gross receipts from Tennessee intrastate business. Thereunder, the intrastate portion of excise taxes actually paid applicable to the preceding year is permitted to be used as a credit against the gross receipts privilege tax currently due. As a result of a company's use of accelerated depreciation in computing its excise tax, a lesser amount is paid currently resulting in a lower credit available to reduce the current gross receipts privilege tax. Accordingly, a higher gross receipts privilege tax is currently paid. In the future, as the amount of excise tax currently deferred reverses, a larger excise tax payment will be due and paid, and hence a larger credit against and a lower payment of the gross receipts privilege tax will occur.

Question: What is the proper accounting to be followed for the tax effects arising from the use of accelerated depreciation for excise tax purposes in the State of Tennessee and straight line depreciation for book purposes and for the effect such use has on the Tennessee gross receipts privilege tax?

Answer: The provisions of Section 33.5500 shall apply. Thereunder, if a company normalizes the tax effects arising from the use of accelerated depreciation, paragraph (d) provides, in effect, that the additional or secondary effects thereof shall also be normalized. Accordingly, if a company normalizes the tax effects arising from the use of accelerated depreciation for excise tax purposes, the company shall also normalize the effect such use has on the gross receipts privilege tax.

[Docket No. 20395; RM-2384]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations, Table of Assignments, Minn.

In the matter of amendment of § 73.202 (b), Table of Assignments, FM Broadcast Stations (Brainerd, Minnesota), Docket No. 20395; RM-2384.

1. The Commission has under consideration the notice of proposed rulemaking, adopted March 17, 1975 (40 Fed. Reg. 13319), inviting comments on a proposal to assign Channel 294 to Brainerd, Minnesota, as its second FM channel assignment. Comments have been received from the petitioner, Greater Minnesota Broadcasting Corporation, licensee of AM Station KVBR, Brainerd, Minnesota, and from Brainerd Broadcasting Company (BBC), licensee of Station KLIZ(AM) and KLIZ–FM (Channel 239), Brainerd, Minnesota.

2. Brainerd, Minnesota (pop. 11,667),[1] is located in central Minnesota in Crow Wing County (pop. 34,826), 108 miles north-northwest of Minneapolis, 55 miles north of St. Cloud and 125 miles west of Duluth. Brainerd is presently served by two AM stations, KVBR (Class IV, unlimited-time) licensed to petitioner, and KLIZ (Class III, unlimited-time); and by one FM station, KLIZ–FM (Channel 239).[2] The assignment of Channel 294 to Brainerd will not affect any existing FM assignments. The transmitting antenna for a station must be located two miles northwest of the community to avoid short spacing.

3. Petitioner states that Brainerd is a center for industrial and commercial concerns for a large rural area in central Minnesota. Its AM station presently broadcasts local sports events, weather reports and warnings, etc., to residents. It is alleged that due to low soil conductivity in the area, petitioner's AM station is unable to give aural coverage to the entire city during the early morning hours and at night. In addition, petitioner asserts that an FM station operating with proposed facilities of 45 kW power at an antenna height of 320 feet above average terrain would offer a second FM service to nearly all of Crow Wing County except the northernmost area and to an area south, southeast of Brainerd.

4. In its comments, BBC states that it has no objection to the assignment of a second Class C channel to Brainerd. However, it refers to a pending proceeding in Docket No. 20316 which proposes, among other things, the substitution of Channel 298 for Channel 239 and modification of BBC's license to specify the new channel. BBC requests that if a substitution is made at Brainerd as a result of the above pending proceeding then its present license should be modified to specify Channel 294 instead of Channel 298. It states that, in its opinion, Channel 294 is a preferable channel and that we should consider the past history of the

[1] All population data are taken from the 1970 U.S. Census.

[2] In Forest Lake, Brainerd and Morris, Minnesota, Docket No. 20316, 40 Fed. Reg. 2712, 40 Fed. Reg. 34391 (1975), the Commission has under consideration a proposal to substitute Channel 298 for Channel 239 at Brainerd.

V 40 N 219 NOV 12 75 XUM

operation of BBC's existing station in this regard.

5. In its reply comments, petitioner argues that the effort by BBC to obtain a modification by intervening in this proceeding is an attempt to consolidate two unrelated rule makings. It notes that an issue in Docket No. 20316 regarding the proper amount or reimbursement to be paid for a shift in channels may cause significant delay in the disposition of that proceeding. This delay, it states, would in turn suspend the grant of a station license to petitioner should the two proceedings be consolidated. Petitioner asserts that there is no conflict between the two proceedings and that BBC has not shown that Channel 294 is a preferable assignment to Channel 298.

6. We believe that the public interest would be best served by adopting the proposal to assign Channel 294 to Brainerd. We agree with the petitioner that BBC has offered no adequate reasons for delaying action on this proposed assignment. We do not view the proposals in Docket No. 20316 and this docket as mutually exclusive. The public interest in obtaining a second FM service for a significant population and area without further delay outweighs BBC's own private preference in a choice of channels, and we are unaware of any technical advantage in the use of Channel 294 over Channel 298.[3]

7. As stated in the Notice, significant preclusion occurs on Channels 294 and 296A. The affected area on Channel 294 includes a large region west and north of Brainerd with no cities of sufficient size for a Class C assignment. In the Channel 296A preclusion area, Channel 257A would be available for assignment to most of that region. We also note that if Channel 298 is substituted at Brainerd in Docket No. 20316, the same Channel 296A preclusion area will be affected.

8. The Canadian Government has given its concurrence to the assignment of Channel 294 herein.

9. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303 and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules.

10. *Accordingly, it is ordered*, That effective December 18, 1975, the FM Table of Assignments, § 73.202(b) of the Commission's rules, is amended, for the city listed below as follows:

City:	*Channel No.*
Brainerd, Minnesota	239, 294

11. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303))

Adopted: October 31, 1975.

Released: November 5, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FCC 75-1226]

PART 73—RADIO BROADCAST SERVICES

Temporary Suspensions of Certain Regulations

In the matter of temporary suspension of certain portions of §§ 73.313, 73.333, 73.684 and 73.699 of the Commission's rules and regulations, FCC 75-1226.

1. On August 1, 1975, pursuant to a Report and Order in Dockets 16004/18052, adopted May 29, 1975, amendments to Part 73 of the Commission's rules and regulations became effective which:

(a) Provided revised charts for the prediction of field strengths of FM and TV broadcast stations.

(b) Prescribed the employment of a procedure for refining the results obtained by application of the field strength charts to reflect the effects of abnormally rough terrain.

(c) Amended the procedure set forth in the rules for conducting field strength measurements of TV stations, and, for the first time, adopted a parallel procedure for measuring field strengths of FM stations.

2. The aforementioned Report and Order required TV station licensees to submit showings of service contours revised with the use of the new charts, and as modified by the application of roughness corrections, with renewal applications filed after the effective date of the rule amendments.

3. Existing FM stations were not required to submit revised contours, except when applications contemplating modification of authorized operating conditions were submitted. However, applications for new stations were fully subject to the new rules.

4. Because those TV stations whose renewal applications were due for submission on August 1 and October 1 were afforded insufficient time to include revised contour information with timely filed applications, the Commission, by a Public Notice adopted August 28, 1975 (FCC 75-980) extended the time for filing such information by these applicants until December 1, 1975. In the same Notice, because substantial questions had arisen as to the application of terrain roughness corrections to field strength predictions in developing contour information in FM applications, the Commission suspended the requirement that such corrections be employed until further notice.

5. While the Commission believes that, in the great majority of cases, the application of terrain roughness corrections to field strengths predicted with the use of the revised field strength charts produces results which are closer to reality than if such corrections are not made, there appear to be other instances involving atypical terrain configurations in which the use of the roughness correction procedures produces clearly erroneous results.

6. Recognition that such results not infrequently occur, in part prompted the Commission's decision to suspend the employment of roughness corrections in FM cases. However, the problem also is encountered when contours for TV stations are predicted in areas where the terrain is atypical.

7. Alternative methods of contour prediction are possible when the prescribed method produces specious results. However, appropriate alternatives are not set forth in the rules, and, if they are to be employed, some consistent procedure must be established for their use.

8. In view of the immediacy of the problem, as it affects the filing of renewal applications, the Association of Federal Communications Consulting Engineers (AFCCE), a body which represents many of the engineers involved in the preparation of the engineering showings for TV and FM stations, filed a petition on October 21, 1975, requesting that the application of terrain roughness corrections to field strength predictions for TV stations be suspended for six months, to afford a period of time in which to study the problem and develop procedures for resolving it.

9. We are in agreement with AFCCE that the problem presented is of sufficient magnitude that the relief requested should be granted. We also believe it appropriate at this time to formalize the provision of similar relief for FM broadcast stations, previously afforded by the August 28 Public Notice.

10. Accordingly, *it is ordered*, That showings of service contours for FM and TV broadcast stations, which are tendered for filing prior to May 1, 1976, either in applications for new or modified facilities, or as required with respect to TV renewal applications, shall be prepared without reference to the following rules, which shall be without force and effect until said date:

Section 73.313, paragraphs (f), (g), (h), (i), and (j).
Section 73.333, Figures 4 and 5.
Section 73.684, paragraphs (h), (i), (j), (k), and (l).
Section 73.699, Figures 10d and 10e.

11. The question remains as to what showings the Commission will accept at this time in those cases placed before us where the location of a predicted signal strength contour is contested. Until the Commission is able to resolve its current terrain roughness difficulties, the Commission will recognize and give prima facie weight, in the application of its rules in contested cases, to predicted contours calculated from the new curves without regard to terrain roughness. In those cases where the accuracy of such contours appears in doubt, parties will be free to file supplemental showings in accordance with § 73.684(f) of the Commission's rules. The use of predicted contours calculated with the new propagation curves is limited, naturally, only to those regulatory areas not subject to earlier Commission proclamations as to use of predicted contours.[1]

[1] See *e.g.*, Notice of Proposed Rule Making in Docket 20496, FCC 75-635, 53 F.C.C. 2d 1009 (1975), where the Commission adopted special procedures for the use of signal strength contours in cases concerning, inter alia, cable television broadcast station carriage.

12. The above action is taken pursuant to authority contained in sections 4(i), 403 and 408 of the Communications Act of 1934, as amended.

(Secs. 4, 403, 408, 48 Stat., as amended, 1066, 1094, 1096; 47 U.S.C. 154, 403, 408.)

Adopted: October 30, 1975.

Released: November 5, 1975.

FEDERAL COMMUNICATIONS COMMISSION,*
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75-30459 Filed 11-11-75;8:45 am]

[Docket No. 19554; FCC 75-1218]

PART 73—RADIO BROADCAST SERVICES
PART 76—CABLE TELEVISION SERVICE

Cablecasting Charges

In the matter of amendment of Part 76 Subpart G, of the Commission's rules and regulations pertaining to the cablecasting of programs for which a per-program or per-channel charge is made,[1] Docket No. 19554, FCC 75-1218.

1. On March 20, 1975, the Commission adopted its First Report and Order in Docket 19554, FCC 75-369, 52 FCC 2d 1 (1975), recon. denied, FCC 75-925, 54 FCC 2d 794 (1975) (Hereafter First Report and Order). That action revised Sections 73.643 and 76.225 of the Commission's Rules which govern the use of feature films, sports events, and series type programs by subscription over-the-air television (STV) and cable television operations for which a per-program or per-channel charge is made.[1a] A Second Further Notive of roposed Rule Making in Docket 19554, FCC 75-370, 52 FCC 2d 83 (1975) (Hereafter Second Further Notice) was issued concurrently with the First Report and Order. In the Second Further Notice we requested comments on whether rules restricting the subscription use of series programs should be retained, and if so, whether the rules adopted in the First Report and Order should be further revised to more appropriately reflect the Commission's regulatory goals.

2. The "anti-siphoning" restrictions adopted in the First Report and Order reflect the Commission's long-standing policy of seeking to assure that subscription television will not seriously impair the capacity of the present system to continue to provide advertiser-financed programming of the present or foreseeable quantity and quality, free of direct charge to the public.[2] In our March action, we concluded that the previously existing rules governing feature films and sports programming were in need of revision and we made some significant changes in the rules. We also questioned whether it was necessary to continue to restrict the subscription use of series programs. Because the record was not sufficient for us to conclude that all series program restrictions should be abandoned, we retained the series rules in a modified form and issued the Second Further Notice in order to collect information that would provide a basis for a decision as to whether the public interest requires the maintenance of series program restrictions, and if so, whether the present rules should be modified from their present form.

3. The previous subscription rules included an outright ban on the subscription use of series type programs. In the First Report and Order, this broad proscription was relaxed to allow the subscription use of entirely new series programs no episode of which has been exhibited on conventional television. We emphasized, however, that these new rules were merely an interim measure, pending a final resolution of the issue subsequent to our study of the comments invited in the Second Further Notice.

4. In addition to posing the threshold question of whether any series restrictions were necessary, the Second Further Notice set out for comment a specific alternative to the present rules. The alternative proposal, modeled after the rules relating to feature films which were adopted in the First Report and Order, reads as follows concerning subscription cablecasting:

(e) Series type programs shall not be cablecast by a cable television system except as provided in this paragraph.

(1) The series has never been purchased for broadcast over conventional television;

(2) A conventional television broadcast station licensed in the market holds a present contractual right to exhibit the series. For purposes of this subparagraph, a television station affiliated with a television network will be deemed to hold a present contractual right to exhibit a series if the network with which it is affiliated holds such a right;

(3) The series has not been exhibited in the market over conventional television for three (3) years prior to its proposed cablecast;

(4) The series consists of fifty (50) or fewer episodes.

NOTE: For purposes of this paragraph, the exhibition of any episode of a series shall constitute the exhibition of the series.

A similar rule would apply to STV operations. We also invited comment on whether, if the present series restrictions are retained or some modified rules are adopted, the definition of series programs should be revised.

5. Regrettably, the comments inspired by our Second Further Notice are sparse in new information despite the burgeoning growth now taking place in the subscription cablevision industry. The fourteen parties who responded to our request for information merely restate the same arguments which were presented in the earlier stages of this proceeding. Having had several years to observe the trends in the subscription television industry, we must now determine whether the arguments which gave rise to our original series program rule warrant retention of some form of series program restriction, or whether experience has shifted the weight of evidence against maintenance of series program restrictions.

6. All of the parties generally agree that new and innovative series programs of the type not now exhibited over conventional television should be permitted over subscription television. However, conventional television interests contend that the arguments advanced in favor of the 1968 series program prohibition continue to justify restrictions designed to prevent the siphoning of series programs from conventional to subscription television. These arguments are summarized by National Broadcasting Company, Inc. (NBC) as follows. First, series type programs remain a staple of conventional television, just as they were in 1968. Second, series type programs continue to attract wide audiences, just as they did in 1968. Third, receipt of a relatively small sum from a relatively small group of subscribers could make it worthwhile for subscription enterpreneurs to siphon attractive series programs from the general public. According to NBC only 1,250,000 subscribers paying eighteen cents each could generate $200,000, which was the estimated cost of an hour of prime time entertainment programming in 1974. To prevent realization of this siphoning potential, while allowing for the subscription exhibition of original and innovative series programs, American Broadcasting Companies, Inc. (ABC) and a group of television station licensees (Television Licensees) suggest the following regulatory approach:

(1) Pay cablecasting of off network series programming should be banned; there is no public interest in permitting pay cable to carry such programming for pay (thereby risking its availability to free television) and there is no diversity in such offerings.

(2) Pay cable exhibition of any nonnetwork series program which has appeared on free television during any one of the five years preceding pay cablecast should also be banned; this is necessary to prevent the siphoning of series presentations (for example, Wild Kingdom) which are produced for syndication and are now widely available through free television.

(3) There should be no ban on the presentation by pay cable of any original productions which are innovative and diverse.

Additionally, ABC and Television Licensees propose that the definition of a series program be modified to include any program presentation characterized by episodes with interconnected plot or

* Commissioner Reid absent.

[1] This proceeding also deals with amending the over-the-air subscription television rules as well as the pay cablecasting rules.

[1a] Subsequent use of the term "subscription television" is meant to include both STV and subscription cable television unless the contrary is specifically indicated.

[2] A thorough discussion of the history and rationale of the anti-siphoning rules is included in the First Report and Order in Docket 19554, FCC 75-369, 52 FCC 2d 1 (1975).

V 40 N 219 NOV 12 75 XUM

substantially the same cast of principal characters or where the episodes have been marketed utilizing the same title and the episodes are related by general theme or content. In order to prevent the siphoning of "spin-offs" or other derivatives of series created for conventional television, CBS Inc. (CBS) suggests that the Commission's series restriction should include series with casts or characters substantially similar to, or derived from, those of a series, any episode of which has been broadcast by conventional television.

7. Cable television interests, program producers and certain non-industry groups contend that subscription television poses no substantial threat to the present level of conventional television programming, and urge the Commission to delete all restrictions on the subscription exhibition of series programs. It is argued that the vast pool of unused talent and production capacity that exists in the United States indicates that series programs can be created for subscription television without affecting the availability of such programming to conventional television. The siphoning of popular network series will not occur, it is claimed, because the potential reward from subscription television, either now or in the foreseeable future, could not begin to match the losses that would be sustained by cancelling the network run. Further, program producers state that almost all network series contracts give a purchase option not only from development stage to initial network production, but from one television season to another. It is claimed that these options extend for a period of five television seasons or more and prevent the transfer of series programs to other media. With regard to series programs available for syndication, program producers argue that they would be unwilling to sacrifice revenues returned by syndication sales for speculative subscription revenues. Subscription television entrepreneurs would not pay substantial sums for these programs it is claimed, because most series in syndication have already been exposed one or more times on network television.

8. Although the arguments and assertions of those opposed to and those in favor of series subscription program restrictions have remained essentially the same since our initial consideration of the program siphoning issue, our observation of the developing subscription television industry and our present analysis of the likely interrelationships between the subscription and conventional television markets has convinced us that the program siphoning that we have sought to prevent is unlikely to occur in the absence of regulations restricting the subscription exhibition of series programs. For the reasons set forth below, it would appear that the market forces now in effect will operate to assure that the present level of series programs now available over conventional television will be maintained. This being the case, regulations which artificially restrict the distribution of series programs can no longer be justified.

9. When the original series rule was adopted in 1968, the Commission placed no restrictions on the subscription exhibition of "specials," variety shows and talk shows. With regard to "specials," we stated "that some competition between STV and free TV in the programming area may be beneficial to free TV and to STV as well, and we leave this type of program to competing factors in the marketplace and the performer's desire for exposure."[3] In the absence of restrictions on these types of programs, we have not found instances of program siphoning despite the fact that such programs continue to attract large conventional television audiences. In fact, because these programs are not now exhibited in significant quantity by subscription operations, it would appear that there is little demand for such programs by subscribers.

10. It cannot be disputed that feature films and to a lesser degree sports events now constitute almost the entire quantity of subscription programming. The supply of this programming is relatively fixed vis-a-vis both the conventional and the subscription television markets. The primary markets for feature films and sports events are theaters and sports stadia, respectively. Television markets, although important revenue sources, constitute secondary markets for these programs and their supply is relatively inelastic with regard to television market demand. We have determined that the inherent capacity of the subscription television market to generate large revenues places it in a position to outbid conventional television for the fixed supply of feature films and sports events in existence. Hence, we have adopted rules to assure that this competitive imbalance does not result in the siphoning of feature films and sports events from conventional television to subscription television.

11. While television constitutes a secondary market for feature films and sports events, television is the primary market for series programs. Series programs are produced for and sold exclusively to the television market. Substantial evidence exists to support the claim of program producers that their industry contains a great amount of unused capacity.[4] Therefore, it would appear that increased demand in the television market for series programs will be met by increased supply.

12. We possess no evidence which indicates that the advertising revenues generated by conventional television will be diminished as a result of subscription operations. If the funds available to conventional television for the purchase of series programs remains the same, and the supply of series programs is elastic, the series programs available to conventional television are not likely to be affected in either quantity or quality by increased demand resulting from growth in the subscription television market. The only effect which might be expected from this increased demand is a corresponding increase in the number of series programs available for all forms of television.[5]

13. It is argued that once a series program has become popular on conventional television, its producer will withdraw future episodes from conventional television and they will be sold to subscription television where a higher price can be obtained. It does not appear, however, that this would be likely. We have been advised that almost all network series contracts include a purchase option from one season to another for a period of five year or more television seasons. Such contracts bind the producer to the network and the producer has no freedom to transfer his programs. In view of the number of new series program offerings each year which must compete for a limited number of network positions available, it is likely that the networks will continue to have sufficient leverage to demand and receive similar contract provisions. In any case, there is no evidence that subscription operators would seek to compete for such programming, that subscriber demand for such programming would provide sufficient financial resources necessary to engage in any such competition, or that subscribers would accept the switch of such programming from a free to a pay basis. Therefore, series program siphoning from network television to subscription television does not appear to be a substantial possibility.

14. It can be argued that the foregoing analysis applies to the network television market, but not to the syndication market. The syndication market is primarily a secondary market for series programs, most syndicated series programs being originally produced for network exhibition. Because the supply of off-network series programs to the syndication market is inelastic, at least in the short run, it may be argued that subscription television entrepreneurs will outbid syndication purchasers for series programs which have completed their network run, thereby reducing the supply of programs available for syndicated exhibition. However, this argument ignores the fact that, if there is an increase of demand for series programs as a result of developing subscription operations, this is likely to result in a net increase of series programs available to all forms of television. Although subscription television may purchase some off-network series programs which otherwise would have been purchased by the syndication market, the new demand created by subscription television may also cause new series programs to be produced, and these new programs would be available to the syndication market after their subscription run. Thus, any reduction of off-network series available to the syndication market may be offset by new series which will at some time be available to the syndication market. Additionally, because there is no evidence of strong subscriber demand for syndicated series programs, it is not at all certain that the subscription industry will purchase a significant number of these programs.

15. The foregoing discussion demonstrates that subscription television operations do not pose, at least at this point in time, the siphoning threat to series programs that we once thought they might. We have seen no indication that the demand of the subscription market for series programs is greater, and even if greater demand comes about, it would appear that unregulated market forces will maintain the supply of series programs now available to conventional television. Therefore, we have determined that our series program restrictions are no longer necessary. This conclusion should not be interpreted as a lessening of our concern with regard to program siphoning, however. Although we have deleted regulations which do not appear to be necessary, our policy remains the same. We will monitor future events closely, and stand ready to reimpose series program restrictions should subscription operations threaten to reduce the quantity and quality of series programs now available to the public over conventional television. We are leaving this proceeding open to facilitate our taking prompt further action should that become necessary.

16. Authority for adoption of the rules herein is contained in sections 2, 4(i) and (j), 303, 307, 307, and 309 of the Communications Act of 1934, as amended.

Accordingly, it is ordered, That effective December 15, 1975, Parts 73 and 76 of the Commission's rules and regulations are amended as set forth below.

It is further ordered, That the proceeding in Docket 19554 is retained open.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; (47 U.S.C. 154, 303, 307))

Adopted: October 31, 1975.

Released: November 7, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[6]

[SEAL] VINCENT J. MULLINS, *Secretary.*

[6] Commissioner Hooks and Quello concurring in the result.

[3] *Fourth Report and Order in Docket 11279,* FCC 68-1174, 15 FCC 2d 466, 572 (1968).

[4] The existence of such excess production capacity was noted in a number of comments filed in this and earlier phases of this proceeding and does not appear to have been seriously disputed. See for example the written comments and oral testimony presented on behalf of the Motion Picture Association of America, Inc.

[5] We have previously recognized the desirability of such an effect. In our prime time access proceeding we have sought to encourage the production of a body of new syndicated programming which would be available to all television broadcast stations. See, First Report and Order in Docket 19622, FCC 75-67, 50 FCC 2d 829, 836 (1975).

Parts 73 and 76 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

1. In § 73.643 paragraph (g) is deleted and paragraphs (c), (d), (e) and (f) are revised to read as follows:

§ 73.643 General operating requirements.

* * * * *

(c) No commercial advertising announcements shall be carried during subscription television operations except for promotion of subscription television broadcast programs before and after such programs.

(d) Not more than 90 percent of the total subscription programming hours shall consist of feature films and sports events combined. The percentage calculations may be made on a yearly basis, but, absent a showing of good cause, the percentage of such programming hours may not exceed 95 percent of the total subscription programming hours in any calendar month.

(e) Any television broadcast station licensee or permittee authorized to broadcast subscription programs shall broadcast in addition to its subscription broadcasts, at least the minimum hours of nonsubscription programming required by § 73.651.

(f) Except as they may be otherwise waived by the Commission in authorizations issued hereunder, the rules and policies applicable to regular television broadcast stations are applicable to subscription television operations.

NOTE: As referred to in this section, "the market" of a subscription broadcast station includes all commercial broadcast stations which place a Grade A contour over the entire community to which the subscription station is licensed.

2. In § 76.225 paragraph (e) is deleted and paragraphs (c) and (d) are revised to read as follows:

§ 76.225 Subscription cablecasting.

* * * * *

(c) Not more than ninety (90) percent of the total cablecast programming hours shall consist of feature films and sports events combined. The percentage calculations may be made on a yearly basis, but absent a showing of good cause, the percentage of such programming hours may not exceed ninety-five (95) percent of the total cablecast programming hours in any calendar month.

(d) No commercial advertising announcements shall be carried on subscription channels during such operations except before and after such programs for promotion of other programs for which a per-program or per-channel charge is made.

NOTE: As referred to in this section, "the market" of a cable television system includes all commercial broadcast stations which must be carried by the cable television system upon request pursuant to Subpart D of Part 76.

[FR Doc.75-30460 Filed 11-11-75;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Horicon National Wildlife Refuge, Wis.

The following special regulation is issued and is effective on November 12, 1975.

§ 33.5 Special regulations; sport fishing for individual wildlife refuge areas.

WISCONSIN

HORICON NATIONAL WILDLIFE REFUGE

Sport fishing on the Horicon National Wildlife Refuge, Mayville, Wisconsin, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 15 acres, are delineated on maps available at refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota, 55111. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from January 1, 1976 through February 29, 1976, inclusive.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through February 29, 1976.

THOMAS S. SANFORD,
Refuge Manager, Horicon National Wildlife Refuge, Mayville, Wisconsin.

NOVEMBER 4, 1975.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF DEFENSE

Office of the Secretary

[32 CFR Part 216]

IDENTIFICATION OF INSTITUTIONS OF HIGHER LEARNING THAT BAR RECRUITING PERSONNEL FROM THEIR PREMISES

Proposed Rulemaking

Pursuant to the authority vested in the Secretary of Defense by section 606 of the Department of Defense Appropriations Authorization Act, 1973, Pub. L. 92–436, 86 Stat. 734 (September 26, 1973), notice is hereby given that the Secretary of Defense proposes to add Part 216 to this subchapter.

Part 216 prescribes interim regulations to implement section 606 of Pub. L. 92–436, which provides that no funds appropriated for the Department of Defense may be used at an institution of higher learning if the Secretary of Defense or his designee determines that recruiting personnel of any of the Armed Forces are banned by policy from the institution's premises. This part constitutes a more precise statement of previously uncodified procedures for determining what institutions fall within that category in order to implement section 606 of Pub. L. 92–436.

Persons wishing to comment on the interim regulations may address their comments in writing to the Deputy Assistant Secretary of Defense (Military Personnel Policy), Pentagon, Washington, D.C. 20301. All such submissions received on or before December 12, 1975, will be considered prior to the promulgation of final regulations on this subject.

The proposed Part 216 is to read as set forth below:

Sec.
216.1 Purpose.
216.2 Applicability.
216.3 Policy.
216.4 Responsibilities.
216.5 Guidelines and procedures for identifying institutions of higher learning that bar military recruiters from their premises.
216.6 Reports.
216.7 Effective date and implementation.

AUTHORITY: Sec. 606, Pub. L. 92–436, 86 Stat. 734 (Sept. 26, 1973)

§ 216.1 Purpose.

This part incorporates procedures for the identification of institutions of higher learning which bar recruiting personnel from their premises.

§ 216.2 Applicability.

The provisions of this part apply to the Military Departments.

§ 216.3 Policy.

(a) Subsection (a), section 606 of Pub. L. 92–436 provides that no funds appropriated for the Department of Defense may be used at any institution of higher learning if the Secretary of Defense or his designee determines that recruiting personnel of any of the Armed Forces are barred by policy from the institution's premises. Exceptions may be made for: (1) Cases where the Secretary of the Service concerned certifies to the Congress in writing that a specific course of instruction is not available at any other institution of higher learning and furnishes to the Congress the reasons why such course of instruction is of vital importance to the security of the United States (subsection (a), section 606, Pub. L. 92–436; and (2) research and development funds if the Secretary of Defense, or his designee, determines that the expenditure is a continuation or a renewal of a previous program with such institution which is likely to make a significant contribution to the Defense effort (subsection (b), section 606, Pub. L. 92–436.)

(b) Subsection (c), section 606, Pub. L. 92–436, requires the Secretaries of the Military Departments to furnish to the Secretary of Defense, or his designee, the names of any institutions which they have found to be affected by the prohibitions stated in Pub. L. 92–436.

§ 216.4 Responsibilities.

(a) The Assistant Secretary of Defense (Manpower and Reserve Affairs) is hereby designated as the official responsible for determining that recruiting personnel are being barred from the premises of institutions of higher learning as prescribed in Pub. L. 92–436. This determination will be based upon the official evaluation of the reports prepared by the Secretaries of the Military Departments.

(b) The Director of Defense Research and Engineering is hereby designated as the official responsible for determining whether the expenditure of research and development funds for research and development in an institution which has been found to bar recruiters is likely to make a significant contribution to the Defense effort as provided in Pub. L. 92–436, section 606(b).

(c) The Secretaries of the Military Departments will be responsible for the preparation of the reports required by section 606(c) of Pub. L. 92–436 and § 216.5, in accordance with the guidelines set forth in this section of this part; and for making the exceptions to policy where the specific course of instruction is not available elsewhere, as prescribed in § 216.3(a).

§ 216.5 Guidelines and procedures for identifying institutions of higher learning that bar military recruiters from their premises.

(a) *Criteria.* An institution will be reported as "barring recruiting personnel" when it has been determined that military recruiters are not permitted to conduct recruiting activities any place on campus at the time of the report, as a matter of the stated or effective policy of the institution. In making this determination:

(1) The stated policy barring on-campus recruiting should be in writing by an appropriate official. If written confirmation is not obtainable, verbal policy statements will suffice when attributed to an appropriate official.

(2) It will be considered that the institution is in effect barring military recruitment if:

(i) Repeated requests to schedule and accomplish recruiting visits have been unsuccessful, or

(ii) The institution has indefinitely suspended recruiting visits.

(3) A rule of reason will be followed in applying paragraph (a)(2)(ii) of this section. The following are examples of institutions which will not be considered as barring on-campus recruiting:

(i) An institution, unable to schedule recruiting visits in the past academic period because of student disturbances, or whose student body is on vacation at the time of the report, which states its intention to permit recruiting in the coming academic period.

(ii) An institution which follows a policy of permitting visits to its campus by any potential employer, public or private, only in response to an expression of student or faculty interest and which carries out such policy in good faith without discrimination against military recruitment.

(iii) An institution which has a policy of not permitting job recruiting by an employer on its campus, but which does permit recruiting by all employers (including military recruiters) at some other location.

(b) *Coverage.* The report is to be limited to institutions of higher learning normally visited by recruiters. It should be based on:

(1) Experience with these institutions in the past academic semester or period and on any subsequent information received from the institution as to its policies and intentions in the event these are in doubt.

(2) Experience with institutions visited by recruiters since the close of the past academic period in connection with normal recruiting activities.

It is not intended that a survey be made of all institutions of higher learning for purposes of this report, but rather that the report be limited to experience obtained as a result of normal recruiting visits and on any further information furnished by the institution in connection therewith.

(c) *Procedures.* (1) Recruiters will continue to observe the long standing policy of accommodating to the institution's preferences as to times and places for scheduling on-campus recruiting.

(2) Where an appropriate official of the institution has previously informed recruiting officials, verbally or in writing, that the policy of the institution is not to permit military recruiting on campus, or in the event of repeated inability to schedule recruiting visits, or when there is reason to believe that the institution has indefinitely suspended recruiting visits, written clarification as to the present policy will be sought by a letter of inquiry addressed to the head of the institution from the headquarters level of the Recruiting Service. The prototype letter of inquiry, enclosure—1, should be followed to the maximum extent possible.

(3) Based on responses to the letters of inquiry and on such other evidence as is appropriate and consistent with the criteria in paragraph (c)(1) of this section, the Secretary of each Military Department will furnish the Assistant Secretary of Defense (Manpower and Reserve Affairs) the names of any institutions of higher learning which bar military recruiting personnel from their premises or property at the time of the report. Full documentation should be furnished for each institution named, including the institution's formal response to the letter of inquiry.

§ 216.6 Reports.

The Secretaries of the Military Departments will submit a separate report for each of the Military Services to the Assistant Secretary of Defense (Manpower and Reserve Affairs) each January 31st and June 30th listing the names of any institution of higher learning which the Secretaries have determined on such dates are affected by the prohibitions of section 606 of Pub. L. 92–436. The basis for each listing must be included in the report. The reporting requirement has been assigned Report Control Symbol DD–M(SA) 1386.

§ 216.7 Effective date and implementation.

This part is effective immediately. Two copies of implementing regulations shall be forwarded to the Assistant Secretary of Defense (Manpower and Reserve Affairs) within 60 days.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

NOVEMBER 7, 1975.

PROTOTYPE LETTER OF INQUIRY

Dr. JOHN DOE
President
---------- *University*
Washington, D.C.

Dear Mr. Doe: Section 606 Public Law 92–436, the Department of Defense Authorization Act, 1973, prohibits use of DoD appropriations at any institution of higher learning which by policy bars military recruiting personnel from the premises of the institution. It further provides that the Secretaries of the Military Departments shall furnish the Secretary of Defense sixty days after date of enactment and each January 31 and June 30 thereafter the names of any institutions of higher learning which the Secretaries determine on such dates are affected by the prohibitions contained in this section on barring recruiting personnel from the premises or property of any such institution.

Funds for tuition assistance, research, development, test and evaluation for the Armed Forces are included in this Act. The applicable section of Public Law 92–436 is attached for your information.

In order to enable the (Service) Recruiting Command to provide authoritative information for use in complying with the requirements of this law, I would appreciate clarification of the current policy of your institution in regard to on-campus military recruiting. (Recite information previously received concerning the institution's policy or intentions in regard to on-campus recruiting, recite record of unsuccessful efforts to schedule recruiting visits, recite other facts or points of departure, as appropriate.)

Specifically, I would appreciate answers to the following questions:

Is it the present policy of ---------- University to bar military recruiting personnel from its premises or property?

Does ---------- University intend to permit military recruiting on campus in the near future and is it now able to schedule a date for a recruiting visit?

What is the policy of ---------- University with respect to the visits of civilian employers (public or private) to the campus for the purpose of recruiting college students?

In order to comply with the reporting requirements of the laws, it will be necessary to receive the answers to these questions, together with any clarifying information which will be helpful, no later than ---- days from the date of this letter.

I earnestly solicit your cooperation in this matter and trust it will be possible for the (Service) to schedule a recruiting visit in the near future at a mutually agreed upon time and place.

Sincerely,

PUBLIC LAW 92–436

September 26, 1972

Sec. 606. (a) No part of the funds appropriated pursuant to this or any other Act for the Department of Defense or any of the Armed Forces may be used at any institution of higher learning if the Secretary of Defense or his designee determines that recruiting personnel of any of the Armed Forces of the United States are being barred by the policy of such institution from the premises of the institution; except in a case where the Secretary of the service concerned certifies to the Congress in writing that a specific course of instruction is not available at any other institution of higher learning and furnishes to the Congress the reasons why such course of instruction is of vital importance to the security of the United States.

(b) The prohibition made by subsection (a) of this section as it applies to research and development funds shall not apply if the Secretary of Defense or his designee determines that the expenditure is a continuation or a renewal of a previous program with such institution which is likely to make a significant contribution to the defense effort.

(c) The Secretaries of the military departments shall furnish to the Secretary of Defense or his designee within 60 days after the date of enactment of this Act and each January 31 and June 30 thereafter the names of any institution of higher learning which the Secretaries determine on such dates are affected by the prohibitions contained in this section.

[FR Doc.75–30439 Filed 11–11–75;8:45 am]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 42]

FOOD CONTAINERS

Proposed Standards for Condition

Notice is hereby given that the U.S. Department of Agriculture is considering amendments to the U.S. Standards For Condition Of Food Containers (7 CFR Part 42) under authority contained in the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 et seq.).

Statement of Considerations. In 1966 the United States Standards For Condition of Food Containers were promulgated. They were amended in 1971 to clarify certain provisions and to broaden the scope of their application. The Department is now proposing amendments to provide procedures for skip lot sampling and inspection. Skip lot sampling and inspection are special procedures for inspecting stationary lots in which only one-half or one-fourth of the lots offered for inspection are formally inspected. Such procedures would apply only when approved by the Administrator and when previous lots from the user of the procedures have been consistently acceptable. Skip lot sampling and inspection rewards good processors by reducing inspection costs and by reducing destructive sampling. It also requires less sampling and achieves essentially the same results as sampling and inspecting every lot.

Another amendment being proposed would provide an additional defect in the table of defects for "Label, Numbering or Code" (§ 42.113). The defect would be: "Torn or scratched, obliterating any markings on the label (military purchases)." It would be in the "Major" category. Addition of this defect was requested by the Department of Defense.

For clarification, additional numbers would be added to Table III–B "Limit Numbers For Reduced Inspection" in § 42.111.

Use of the skip lot sampling and inspection procedures is optional. However, the Department encourages the use of such procedures to determine their effectiveness pending formal adoption. Therefore, at least six months are being permitted for application of the procedures and for comment on them.

All persons who desire to submit written data, views, or comments in connection with this proposal shall file the same in duplicate with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than June 1, 1976.

V 40 N 219 NOV 12 1975 XUM

All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendments are as follows:

1. In § 42.102, the following new definitions would be added in alphabetical order to read:

§ 42.102 Definitions, general.

* * * * *

"Probability of Acceptance." The chance that a lot with a given level of quality will be accepted. Probability of acceptance is synonymous with "Percent of Lots Expected to be Accepted." The probability of acceptance is normally designated as "Pa" but is designated as "Pas" when referring to skip lot sampling and inspection.

* * * * *

"Stationary Lot Sampling." The process of randomly selecting sample units from a lot whose production has been completed. This type of lot is usually stored in a warehouse or in some other storage area and is offered "in toto" for inspection.

* * * * *

"User." The person or agency at whose request inspection is conducted.

2. In Subpart B the title would be amended to read:

Subpart B—Procedures for Stationary Lot Sampling and Inspection

3. In § 42.103, the first sentence in paragraph (a) would be amended and a new paragraph (c) would then be added to read as follows:

§ 42.103 Purpose and scope.

(a) This subpart outlines the procedures to be used to establish the condition of containers in stationary lots of packaged foods. * * *

* * * * *

(c) Under certain conditions, special procedures (Skip Lot Sampling and Inspection) may be used to determine the condition of containers in stationary lots of packaged foods. Subpart C sets forth the requirements and procedures for Skip Lot Sampling and Inspection.

§ 42.111 [Amended]

4. In § 42.111, the following underlined numbers would be added to Table III–B "Limit Numbers for Reduced Inspection" in the existing blank spaces:

TABLE III–B.—*Limit numbers for reduced inspection*

[Acceptable quality level]

2.5	4.0	6.5	10.0
4	8	14	24
7	14	25	40
14	24	42	68
24	40	69	110
40	68	115	181
67	111	186	293
110	181	307	472
181	297	491	765
290	471	777	1207

5. In § 42.112 the title would be amended to read:

§ 42.112 Defects of Containers: Tables IV, V, VI, AND VII.

* * * * *

6. In § 42.113, Table VIII would be revised to read:

§ 42.113 Defects of label, marking or code: Table VIII.

TABLE VIII.—*Label, marking, or code*

Defects	Categories	
	Major	Minor
Not specified method	101	
Missing (when required)	102	
Loose or improperly applied		201
Torn or mutilated		202
Torn or scratched, obliterating any markings on the label (military purchases)	103	
Text illegible or incomplete		203
Incorrect		204
In wrong location		205

7. Subpart C would be revised to read:

Subpart C—Skip Lot Sampling and Inspection Procedures

Sec.
42.120 Description and qualification.
42.121 Sampling and inspection procedures.
42.122 Applicability of other procedures.
42.123 Flow diagram for skip lot sampling and inspection.

AUTHORITY: Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 et seq.)

Subpart C—Skip Lot Sampling and Inspection Procedures

§ 42.120 Description and qualification.

Skip lot sampling and inspection are special procedures for inspecting stationary lots in which only one-half or one-fourth of the lots offered for inspection are formally inspected. Skip lot sampling and inspection procedures may be instituted only when all of the following conditions are met:

(a) When authorized by the Administrator and acceptable to the user and producer, if different from the user.

(b) When inspection is origin inspection (see § 42.102).

(c) When all lots can be expected to be of essentially the same quality.

(d) When lots from the producer are currently on, or eligible to be on, either normal or reduced inspection.

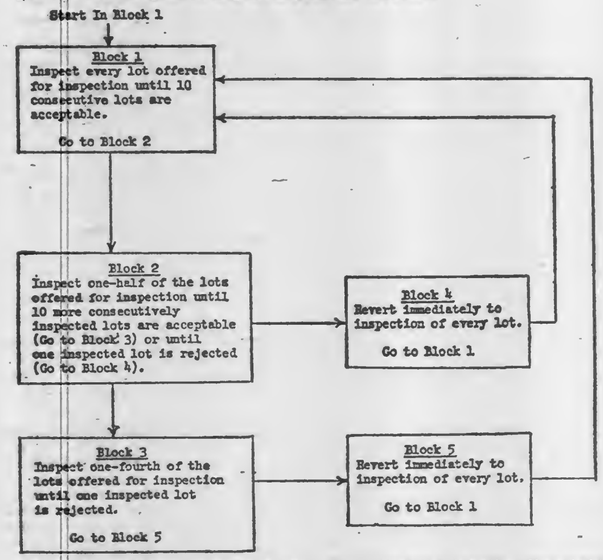
§ 42.121 Sampling and inspection procedures.

(a) Following skip lot procedure authorization, inspect every lot consecutively offered for inspection using normal inspection procedures as set forth in Subpart B of this part. When 10 consecutive lots are acceptable, inspect only one-half of the lots offered for inspection using normal inspection procedures. While on the one-half inspection rate, when 10 consecutively inspected lots are acceptable, inspect only one-fourth of the lots offered for inspection using normal inspection procedures. While on the one-half or one-fourth inspection rate, if any formally inspected lot is unacceptable, revert immediately to the inspection of every lot using normal inspection procedures and recommence the above procedure. See § 42.123 for a flow diagram of the skip lot sampling plan.

(b) Two exceptions to the procedures in paragraph (a) of this section are as follows:

(1) The skip lot sampling and inspection rate of one-half can be instituted immediately if the lots from the producer are currently on, or eligible to be on, reduced inspection and all other conditions in § 42.120 are met. After skip lot sampling and inspection begins, however, only normal inspection is permitted.

(2) While inspecting every lot consecutively as offered for inspection, i.e., while not on the one-half or one-fourth sampling and inspection rate, if requirements for switching from normal to tightened inspection are met as specified in § 42.108 then skip lot procedures terminate, tightened inspection is initiated, and stationary lot sampling and inspection procedures in Subpart B are instituted. Skip lot procedures may be instituted again only when all conditions of § 42.120 are met.



(c) All lot selections for the one-half and one-fourth inspection rates must be strictly random (for example, not every other lot or every fourth lot). Use of random number tables, coin flipping, or numbered cards is encouraged.

(d) Preliminary scanning procedures (see § 42.105) shall be used on all lots scheduled for formal inspection and also shall be used on lots not scheduled for inspection ("skipped" lots) whenever the inspector feels such action is prudent to further insure the acceptability of such lots.

§ 42.122 Applicability of other procedures.

Whenever appropriate, the procedures for classifying and recording defects in § 42.106 and for appeal inspections in § 42.108 also apply to skip lot sampling and inspection.

§ 42.123 Flow diagram for skip lot sampling and inspection.

NOTES: 1. Only normal inspection is permitted.

2. All lot selections for the one-half and one-fourth sampling rates must be strictly random (for example, not every other lot or every fourth lot).

3. Two exceptions to the procedures shown above are as follows:

(a) The skip lot sampling and inspection rate of one-half can be instituted immediately if the lots from the producer are currently on, or eligible to be on, reduced inspection and all other conditions in § 42.120 are met. When skip lot inspection begins, however, only normal inspection is permitted.

(b) While inspection every lot consecutively as offered for inspection, i.e., while not on the one-half or one-fourth rate, if requirements for switching from normal to tightened inspection are met as specified in § 42.108 then skip lot procedures terminate, tightened inspection is initiated, and stationary lot sampling and inspection procedures in Subpart B are instituted. Skip lot procedures may be instituted again only when all conditions of § 42.120 are met.

8. All of the material presently appearing in Subpart C "Miscellaneous" would be incorporated in a new Subpart D "Miscellaneous," except that § 42.115 would be redesignated as § 42.140, the title would be amended to read "Operating Characteristic Curves (OC) For Stationary Lot Sampling and Inspection," and new §§ 42.141 and 42.142 would be added to read:

Subpart D—Miscellaneous

Sec.
42.140 Operating Characteristic curves (OC) for stationary lot sampling and inspection.
42.141 Obtaining Operating Characteristic (OC) curve information for skip lot sampling and inspection.
42.142 Curve for obtaining operating Characteristic (OC) curve information for skip lot sampling and inspection.

AUTHORITY: Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 et seq.).

Subpart D—Miscellaneous

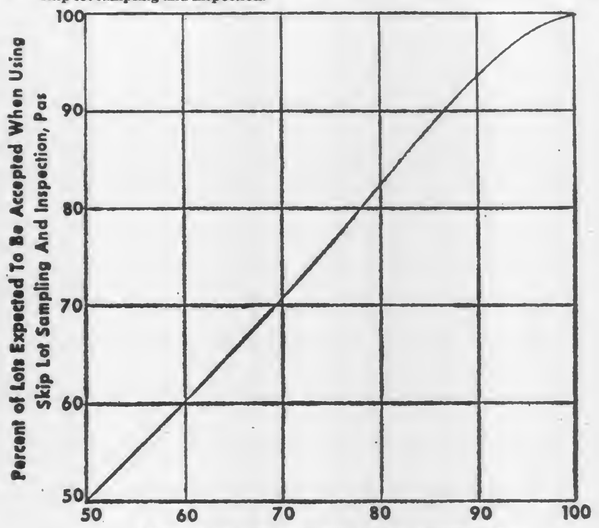
§ 42.140 Operating Characteristic curves (OC) for stationary lot sampling and inspection.

§ 42.141 Obtaining Operating Characteristic (OC) curve information for skip lot sampling and inspection.

The Operating Characteristic (OC) curve information (probability of acceptance) for skip lot sampling and inspection procedures described in § 42.121 is easily obtained from the single curve in § 42.142 is as follows:

(a) Select any sampling plan for normal condition of container inspection from Table I or Table I–A of § 42.109.

(b) For a given Quality of Submitted Lots, $100p$, find the Percent of Lots Expected to be Accepted, Pa from the respective OC curve in § 42.140.



(c) Refer to § 42.142 with this Percent of Lots Expected to be Accepted, Pa, and read the new Percent of Lots Expected to be Accepted, Pas, which results when using these skip lot procedures.

For example, let's assume the lot size is 6,001 to 12,000 containers, and we use the single sampling plan of size 168 for

V 40 I 219 NOV 12 75 XUM

normal inspection (Table I of § 42.109) along with an AQL for total defects of 6.5. The OC curve for this sampling plan is curve N and R3. Also, assume that the quality of the lot is 6.5 defects per hundred units. From curve N and R3, then, the Pa is determined to be 95 percent. Then refer to the graph is § 42.142 and locate Pa of 95 percent along the horizontal axis. From this point, proceed vertically to the curve and then horizontally to the left to the vertical axis. From this point on the vertical axis, Pas is determined to be approximately 98[1] percent for skip lot sampling and inspection.

§ 42.142 Curve for obtaining Operating Characteristic (OC) curve information for skip lot sampling and inspection.

(Obtained from § 42.140)

NOTES: 1. This curve applies only to the specific skip lot sampling and inspection plan described in § 42.121 and § 42.123.

2. Pa and Pas are essentially equal for values under 50 percent.

Issued at Washington, D.C., on November 6, 1975.

DONALD E. WILKINSON,
Administrator.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 121]

[Docket No. 75N-0180]

ANIMAL FOOD OR FEED

Prohibited Substances; Extension of Time for Comments

The Commissioner of Food and Drugs proposed, in the FEDERAL REGISTER of September 9, 1975 (40 FR 41797), to establish a regulation on substances that are prohibited from use in food or feed for animals other than man. Certain industrial grade vegetable oil byproducts are affected by the proposal. Comments were to be filed on or before November 10, 1975.

The Commissioner has received a request for extension of the comment period from the Institute of Shortening and Edible Oils, Inc., to permit completion of gathering and organizing materials for presentation.

The Commissioner has considered the request for extension of the period for comments and concludes that an additional period of time should be provided. Therefore, the period for filing comments on the subject is hereby extended to December 10, 1975.

Written comments, preferably in quintuplicate and identified with the Hearing Clerk document number found in brackets in the heading of this document, regarding the proposal shall be submitted to the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

This action is taken under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 402, 409, 701(a), 52 Stat. 1046-1047, 1055, 72 Stat. 1784-1788, as amended (21 U.S.C. 321(s), 342, 348, 371(a))) and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 6, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

Social Security Administration

[20 CFR Part 404]

[Reg. 4]

FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE

Father's Insurance Benefits and Changes in Wife's, Child's, Widow's, Widower's, Mother's, and Parent's Benefits

Notice is hereby given pursuant to the Administrative Procedure Act (5 U.S.C. 553) that the amendments to the regulations set forth in tentative form below are proposed by the Commissioner of Social Security, with the approval of the Secretary of Health, Education, and Welfare. The proposed amendments are necessitated by the decision of the United States Supreme Court in the case of "Weinberger v. Wisenfeld,"——U.S.——, 95 S.Ct. 1225 (1975). Specifically, the Court decided on March 19, 1975, that the gender-based distinction mandated by section 202(g) of the Social Security Act (42 U.S.C. 402(g)) granting survivor's benefits to widows of deceased workers when they had minor children of such workers in their care, but not providing such benefits to the widowers of deceased workers with minor children of such workers in their care, violates the Due Process Clause of the Fifth Amendment to the U.S. Constitution. This decision has, in effect, created a new category of benefits, which is designated for ease of reference, as "father's insurance benefits" and which are payable on the same basis and under the same conditions as those currently payable to mothers having minor children of the deceased worker in their care. Benefits may be paid to such new category of beneficiaries beginning March 1975, the month of the Supreme Court decision. The proposed amendments also implement the provisions of section 108 of Pub. L. 92-603 which permit an entitled child disabled before age 22 to qualify as a child in the care of a mother or father claimant. Marriage to such a disabled child will not be a terminating event for certain beneficiaries. The following specific revisions are included:

(1) Proposed sections (§§ 404.335a and 404.336a) have been added concerning father's insurance benefits, conditions and duration of entitlement. These sections parallel the structure and wording, with appropriate changes, of § 404.335 and § 404.336 respectively, specifying the conditions and duration of entitlement to mother's insurance benefits.

(2) The rate of benefits for mothers and fathers will be identical (§ 404.337).

(3) Sections 404.342-404.349 of the regulations have been revised to make the child-in-care (formerly "in-her-care") rules applicable to mother's and father's insurance benefits.

(4) The child-in-care requirement for wife's and mother's benefits has been revised to restrict the qualification—that such child, if over age 18, has been disriods prior to January 1973. A comparable prior to attainment of age 18—peble parenthetical revision has been made with respect to terminating events.

(5) As in (4), the statutory change eliminating the "disabled before attainment of age 18" provision has required revisions in the effect of remarriage provisions for divorced wives (§ 404.314), widows (§ 404.329, widowers (§ 404.332), mothers (§ 404.336), and parents' (§ 404.-339).

In order to implement the Supreme Court's decision granting benefits to fathers, the rules set forth in the proposed regulations will be applied on an interim basis by the Social Security Administration for the period March 1975 until final regulations are adopted.

Prior to the final adoption of the proposed amendments, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in triplicate to the Commissioner of Social Security, Department of Health, Education, and Welfare, PO Box 1585, Baltimore, Maryland 21203, on or before December 12, 1975.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue, SW., Washington, D.C. 20201.

The proposed amendments are to be issued under the authority contained in sections 202, 205, 216, 1102 of the Social Security Act as amended; 49 Stat. 623, as amended, 53 Stat. 1368 as amended, 68 Stat. 1080, as amended, 49 Stat. 647, as amended, 42 U.S.C. 402, 405, 416, and 1302.

Dated: September 25, 1975.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: October 30, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

Part 404 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. Section 404.313 is amended by revising paragraph (c) to read as follows:

§ 404.313 Wife's insurance benefits; conditions of entitlement.

• • • • • •

(c) *Child over 18 not disabled.* For the purposes of paragraph (a)(2) of this section and § 404.314(a)(5), a child age 18 or over who is entitled to child's insurance benefits for any month but is not under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973, began before he attained age 18) is deemed not entitled to child's insurance benefits for such month, unless he was under such a disability in the third month before such month.

• • • • • •

2. Section 404.314 is amended by revising paragraph (b) to read as follows:

§ 404.314 Wife's insurance benefits; duration of entitlement.

• • • • • •

(b) *Remarriage of a divorced wife.* If a divorced wife entitled to a wife's insurance benefit marries an individual entitled to widower's, father's (for months after February 1975) or parent's insurance benefits, such divorced wife's entitlement to wife's insurance benefits is not terminated by reason of such marriage. If a divorced wife who is entitled to wife's insurance benefits marries an individual who has attained the age of 18 and is entitled to child's insurance benefits, and was under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973 began before such child attained the age of 18) or had been under such a disability in the third month before the month in which such marriage occurred, such divorced wife's entitlement to wife's insurance benefits is not terminated by reason of such marriage; except that her entitlement to such benefits will end with the last month for which such individual is entitled to child's insurance benefits, provided his entitlement ends for a reason other than death.

• • • • • •

3. Section 404.321 is amended by revising paragraph (d) to read as follows:

§ 404.321 Child's insurance benefits; duration of entitlement.

• • • • • •

(d) The marriage of a child, age 18 or over and entitled to child's insurance benefits based on a disability, will not terminate such entitlement (however, see paragraph (c) of this section for terminated because of a subsequent event) if the marriage is to:

(1) A person age 18 or older entitled to child's insurance benefits based on a disability; or

(2) A person entitled to old-age, widow's, widower's, mother's, father's (for months after February 1975), parent's or disability insurance benefits, or, effective after August 1965, wife's insurance benefits.

• • • • • •

4. Section 404.329 is amended by revising paragraph (b)(1) to read as follows:

§ 404.329 Widow's insurance benefits; duration of entitlement.

• • • • • •

(b) *Effect of remarriage on entitlement after August 1965.* (1) A widow or surviving divorced wife's entitlement to widow's insurance benefits is not terminated by reason of her remarriage to a man who is entitled to widower's, father's (for months after February 1975), or parent's insurance benefits or to a man who has attained age 18 and is entitled to child's insurance benefits, and was under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973, began before he attained age 18) or had been under such a disability in the third month before the month in which such marriage occurred.

• • • • • •

5. Section 404.332 is amended by revising paragraph (b)(1) to read as follows:

§ 404.332 Widower's insurance benefits; duration of entitlement.

• • • • • •

(b) *Effect of remarriage on entitlement to benefits.* (1) A widower's entitlement to widower's insurance benefits is not terminated by reason of his subsequent marriage to a woman entitled to wife's (after August 1965), widow's, mother's, or parent's insurance benefits, or who has attained age 18 and is entitled to child's insurance benefits, and was under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973, began before such child attained the age of 18) or had been under such a disability in the third month before the month in which such marriage occurred.

• • • • • •

6. Section 404.335 is amended by revising paragraph (b) to read as follows:

§ 404.335 Mother's insurance benefits: conditions of entitlement.

• • • • • •

(b) *Child over 18 not disabled.* For the purposes of paragraph (a)(2) of this section a child age 18 or over who is entitled to child's insurance benefits for any month but is not under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973, began before he attained age 18) shall be deemed not entitled to child's insurance benefits, unless he was under such a disability in the third month before such month.

• • • • • •

7. A new § 404.335a is added to read as follows:

[1] This slight increase of Pas over Pa results because all the lots offered for inspection are no longer being inspected. Some lots are being "skipped", and thereby accepted, which would have been rejected if inspected. The largest increase in Pa which will occur using skip lot sampling is approximately 4 percent. It is for this reason that skip lot sampling procedures are applied only in instances where past production quality has been consistently high—as evidenced by the requirement to have 10 consecutively acceptable lots prior to a reduction in sampling rate—and where all requirements in § 42.120 also have been met.

V 40 219 NOV 12 75 XUM

§ 404.335a Father's insurance benefits; conditions of entitlement.

(a) *General.* The widower (as defined in § 404.1107) of an individual who died fully or currently insured is entitled to father's insurance benefits for the first month after February 1975 in which he:

(1) Has filed application for father's insurance benefits; and

(2) At the time of filing such application had in his care (see §§ 404.342–404.349) a child of such individual entitled to child's insurance benefits (see paragraph (b) of this section); and

(3) Is not married; and

(4) Is not entitled to a widower's insurance benefit; and

(5) Is not entitled to old-age insurance benefits, or is entitled to an old-age insurance benefit which is less than three-fourths of the primary insurance amount of such individual.

(b) *Child over 18 not disabled.* For the purposes of paragraph (a)(2) of this section a child age 18 or over who is entitled to child's insurance benefits for any month but is not under a disability (as defined in section 223(d) of the Act) shall be deemed not entitled to child's insurance benefits, unless he was under such a disability in the third month before such month.

8. Section 404.336 is amended by revising paragraph (b)(1) and paragraph (c) to read as follows:

§ 404.336 Mother's insurance benefits; duration of entitlement.

* * * * *

(b) *Effect of remarriage after August 1965.* For purposes of paragraph (a)(2) of this section:

(1) A widow's or surviving divorced mother's entitlement to mother's insurance benefits is not terminated by reason of her remarriage to a man entitled to old-age, widower's, father's (for months after February 1975), parent's, or disability insurance benefits, or to a man who has attained age 18 and is entitled to child's insurance benefits, and was under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973, began before such child attained the age of 18) or had been under such a disability in the third month in which such marriage occured.

* * * * *

(c) *Child over 18 not disabled.* For purposes of paragraph (a)(5) of this section, a child age 18 or over who is entitled to child's insurance benefits for any month but is not under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973, began before he attained age 18) shall be deemed not entitled to child's insurance benefits, unless he was under such a disability in the third month before such month.

* * * * *

9. A new § 404.336a is added to read as follows:

§ 404.336a Father's insurance benefits; duration of entitlement.

(a) *General.* The widower of a deceased individual is entitled to a father's insurance benefit for each month beginning with the first month after February 1975 in which all the conditions of entitlements described in § 404.335a(a) are satisfied. The last month for which he is entitled to such benefits is the month before the first month in which any one of the following events occurs:

(1) He dies; or

(2) He remarries (except as provided in paragraph (b) of this section); or

(3) He becomes entitled to an old-age insurance benefit which is equal to or exceeds the amount of the father's insurance benefit as determined in accordance with § 404.337; or

(4) He becomes entitled to a widower's insurance benefit; or

(5) No child of the deceased individual is entitled to a child's insurance benefit (see paragraph (c) of this section); or

(6) If he is married to a person age 18 or older who is under a disability (as defined in section 223(d) of the Act) and who is entitled to child's insurance benefits (see paragraphs (b) and (c) of this section), his wife's entitlement to such benefits terminates for a reason other than her death; or

(7) If he is married to a person entitled to disability insurance benefits (see paragraph (b) of this section), his wife's entitlement to such benefits terminates for a reason other than her death or her entitlement to old-age insurance benefits; or

(8) In the case of a man entitled to father's insurance benefits based on a purported marriage (see § 404.1101(c)(2)) to the deceased individual, another man is certified for entitlement to widower's or father's insurance benefits based on such deceased individual's earnings record and such other man is the widower (or is deemed to be the widower) of the deceased individual under the provisions of section 216(h)(1)(A) of the Act.

(b) *Effect of remarriage.* For purposes of paragraph (a)(2) of this section:

(1) A widower's entitlement to father's insurance benefits is not terminated by reason of his remarriage to a woman entitled to old age, wife's, widow's, mother's, parent's, or disability insurance benefits, or to a woman who has attained age 18 and is entitled to child's insurance benefits, and was under a disability (as defined in section 223(d) of the Act) which began before such child attained the age of 22 or had been under such a disability in the third month before the month in which such marriage occurred.

(2) If a widower marries a woman not entitled to any of the benefits enumerated in paragraph (b)(1) of this section, and consequently his entitlement to father's insurance benefits is terminated, he may become reentitled to such benefits upon termination of the later marriage for any reason, provided all other conditions of entitlement are satisfied.

(c) *Child over 18 not disabled.* For purposes of paragraph (a)(5) of this section, a child age 18 or over who is entitled to child's insurance benefits for any month but is not under a disability (as defined in section 223(d) of the Act) shall be deemed not entitled to child's insurance benefits, unless he was under a disability in the third month before such month.

10. Section 404.337 is revised to read as follows:

§ 404.337 Mother's or father's insurance benefits; rate of benefit.

The amount of the mother's or father's insurance benefit for any month is equal to 75 percent of the primary insurance amount for such month of the deceased individual upon whose earnings the mother's or father's insurance benefit is based. (See § 404.352 for minimum sole survivor's insurance benefit rate.)

11. Section 404.339 is amended by revising paragraph (b) to read as follows:

§ 404.339 Parent's insurance benefits; duration of entitlement.

* * * * *

(b) *Effect of remarriage on entitlement to benefits.* A parent's entitlement to parent's insurance benefits is not terminated by marriage to an individual entitled to wife's, widow's, widower's, mother's, father's (for months after February 1975), or parent's insurance benefits, or to an individual who has attained age 18 and is entitled to child's insurance benefits, and was under a disability (as defined in section 223(d) of the Act, and which, for months before January 1973, began before such child attained age 18) or had been under such a disability in the third month before the month in which such marriage occurred.

12. Section 404.342 is revised to read as follows:

§ 404.342 Child in care of claimant.

(a) *Child in care after February 1975.* For purposes of §§ 404.313, 404.335, 404.335a, and Subpart E of this part, a child is in the care of a mother (whether a wife, widow, or surviving divorced mother) or father (widower only) claimant if such claimant exercises parental control and responsibility for the welfare and care of a child under age 18, or of a child age 18 or older who is mentally incompetent. If the child is age 18 or older and mentally competent, "child in care" means that the mother or father is performing personal services (as defined in § 404.344) for the child.

(b) *Child in care before March 1976.* The provisions of paragraph (a) of this section are applicable in determining if a child is in the care of a mother (whether a wife, widow, or surviving divorced mother).

13. Section 404.343 is revised to read as follows:

§ 404.343 Child in care; exercising parental control and responsibility.

(a) *Child in care after February 1975.* For purposes of § 404.342:

(1) Parental control and responsibility may be exercised solely by the claimant (mother or father) or jointly with the claimant's spouse. However, the exercise of parental control and responsibility exclusively by one parent and then by the other over successive periods of time does not constitute the joint exercise of parental control and responsibility.

(2) Parental control and responsibility may be exercised directly or, where the claimant (mother or father) and child are apart, it may be exercised indirectly. The fact that the parent claimant has not lost the legal right to the child's care and custody, and retains the right to exercise parental control and responsibility, does not constitute the exercise of such parental control and responsibility even if such claimant furnishes the child's food, clothing, and shelter or makes provisions therefor.

(b) *Child in care before March 1975.* The provisions of paragraph (a) of this section are aplicable in determining if a child is in the care of a mother (whether a wife, widow, or surviving divorced mother).

14. Section 404.344 is revised to read as follows:

§ 404.344 Child in care; performing personal services.

(a) *Child in care after February 1975.* For purposes of § 404.342, personal services mean services performed for a child other than any routine household services which ordinarily are performed for any adult member of a household. For example, nursing care, or feeding or dressing a child who is unable because of his disability to perform these functions satisfactorily for himself, would constitute personal services, as would the direction or supervision of the activities of a child who is unable to manage his own funds, or who is able to do so only with considerable help and guidance. Also, if the parent claimant's presence and attention is required because of the nature of the child's impairment, such claimant would be considered to be performing personal services for the child. Such services may be performed by the claimant (mother or father) alone, or jointly with the claimant's spouse or another person.

(b) *Child in care before March 1975.* The provisions of paragraph (a) of this section are applicable in determining if a child is in the care of a mother (whether a wife, widow, or surviving divorced mother).

15. Section 404.345 is revised to read as follows:

§ 404.345 Child in care; mother or father claimant and child living together.

Where the mother claimant (or mother or father claimant for months after February 1975) and child regularly live together, the child is considered to be in the claimant's care if such claimant either is exercising parental control and responsibility by supervising the child's activities and participating in the important decisions about the child's physical and mental needs, or performing personal services, as the case may be. However, if the mother or father claimant and child are living together only temporarily, the child is not considered to be in the claimant's care during the period they are together, even if the claimant exercises parental control and responsibility, or performs personal services, as the case may be, during such period unless:

(a) The child is in such claimant's care while they are apart; or

(b) Such claimant and child live together for a period of at least 30 consecutive days, and the child is not on furlough while in the armed forces.

16. Section 404.346 is revised to read as follows:

§ 404.346 Child in care; mother or father claimant and child not living together; general.

Where the claimant and child are not living together, a child is not considered to be in such claimant's care except under the conditions described in §§ 404.347 and 404.348.

17. Section 404.347 is revised to read as follows:

§ 404.347 Child in care; claimant (mother or father) and child not living together; separation not in excess of 6 months.

Except as provided in § 404.349, where the separation is expected to end within 6 months from the date it began, a child is considered to be in the care of a claimant only if the child customarily lives with such claimant and is in the claimant's care when they so live together (see § 404.345). If the separation continues beyond the 6-month period, the provisions of § 404.348 are applicable in determining whether the child is in the care of a mother or father claimant.

18. Section 404.348 is revised to read as follows:

§ 404.348 Child in care; claimant (mother or father) and child not living together; separation expected to be indefinite or to exceed 6 months.

Where the claimant and child are not living together and the separation will be for an indefinite period, or is not expected to end within 6 months, such claimant is exercising parental control and responsibility for the welfare of the child only under the conditions described in paragraphs (a), (b), (c), and (d) of this section. If the child resumes living with the claimant before the end of 6 months, the provisions of § 404.347 are applicable in determining whether the child is in the care of such claimant. Special situations include:

(a) *Child away at school.* Where the claimant and a mentally competent child are separated because the child is away at school, such claimant is exercising parental care and responsibility during such separation if:

(1) The child is under 18 years of age and spends an annual vacation of at least 30 consecutive days with the claimant, unless it is not feasible for the child to return to the claimant, or to remain with the claimant for that length of time, during vacations; and

(2) The claimant supervises the child's activities and participates in the important decisions about the child's physical and mental needs; and

(3) Where the child's mother and father are separated, the school authorities look to the claimant when they have a question concerning the child's welfare and care, and the child normally returns to such claimant during vacations.

(b) *Claimant and child not living together because of the claimant's employment.* Where the claimant and a mentally competent child under 18 years of age are separated because of such claimant's employment, the claimant is exercising parental control and responsibility if such claimant supervises the child's activities, participates in the important decisions about the child's physical and mental needs, and makes regular and substantial contributions towards the child's support.

(c) *Claimant and child not living together because of physical illness or disability.* Where the claimant and a mentally competent child under 18 years of age are separated because of the physical disability of either claimant or child, such claimant is exercising parental control and responsibility if the claimant supervises the child's activities and participates in the important decisions about the child's physical and mental needs.

(d) *Claimant and child not living together; child mentally incompetent.* Where a claimant and child are not living together (regardless of reason) and the child is mentally incompetent, such claimant is exercising parental control and responsibility if the claimant supervises the activities of the child, participates in the important decisions about the child's physical and mental needs, and measurably controls the child's upbringing, and development.

19. Section 404.349 is revised to read as follows:

§ 404.349 Child in care; when a child is not in the care of a mother or father claimant.

Notwithstanding the provisions in §§ 404.342–404.348, a child is not in the care of a claimant, for purposes of this subpart or Subpart E of this part, if:

(a) The child is in the armed forces; or

(b) The claimant and the child are not living together and either:

(1) The child is living with the father or mother other than the mother or father claimant; or

(2) The mother or father claimant is mentally incompetent; or

(3) The child was removed from the mother or father claimant's custody and control by a court order; or

V 40 219 NOV 12 75 XUM

(4) The mother or father claimant has relinquished such claimant's right to custody and control of the child to some other person or agency; or

(5) The separation is for a period of more than 6 months, and the child is age 18 or older and is mentally competent.

[20 CFR Part 416]

[Reg. 16]

SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Reimbursement to States for Interim Assistance Payments; Cost-of-Living Adjustments in Benefits

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553) that the amendments to the regulations set forth in tentative form below are proposed by the Commissioner of Social Security with the approval of the Secretary of Health, Education, and Welfare. The proposed amendments to Part 416 reflect and implement the provisions of Pub. L. 93-368, enacted August 7, 1974, relating to cost-of-living adjustments in supplemental security income benefits and reimbursement to States for interim assistance payments made to or on behalf of an individual during the period such individual's claim for supplemental security income is pending. Section 5 of Pub. L. 93-368 amends Section 1631 of the Social Security Act to permit the Social Security Administration to enter into an agreement with a State whereby such State would be reimbursed for interim assistance payments furnished an applicant for supplemental security income benefits. The proposed amendments dealing with this interim assistance provision are contained in a new Subpart S. Reimbursement would be made from the initial payment which would otherwise be payable to the individual who is found eligible, but only upon his written authorization to withhold benefits due him for the purpose of reimbursing the State for the interim assistance furnished him.

Any authorization will be in effect until the Social Security Administration has made a final determination on the applicant's claim. If the individual's supplemental security income application is denied, the denial is the final determination unless the individual files a timely appeal. If the individual applies again at a later time, a new authorization must be obtained.

Section 6 of Pub. L. 93-368 provides for cost-of-living adjustments in the supplemental security income payment standards in conjunction with and by the same percentage as benefits under title II of the Act in accordance with section 215(i) of the Act.

Since approximately one-half of the States have interim assistance agreements with the Secretary which are already effective and since the cost-of-living adjustments have already gone into effect, the proposed amendments to the regulations will be applied by the Social Security Administration on an interim basis until a final regulation is adopted.

Prior to the final adoption of the proposed revisions and amendments to the regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in triplicate to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203, on or before December 12, 1975.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue, SW., Washington, D.C. 20201.

The proposed amendments are to be issued under the authority contained in sections 1102, 1611(b), 1617, 1631(d), and 1631(g) of the Social Security Act, 49 Stat. 647, as amended, 86 Stat. 1466, as amended, 88 Stat. 422, 86 Stat. 1475, 88 Stat. 420; 42 U.S.C. 1302, 1382(b), 1382f, 1383(d), and 1383(g).

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program)

Dated: August 14, 1975.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: October 30, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. A new § 416.405 is added to read as follows:

§ 416.405 Cost-of-living adjustments in benefits.

Whenever benefit amounts under title II of the Act (Part 404 of this Chapter) are increased by any percentage effective with any month as a result of a determination made under section 215(i) of the Act, each of the dollar amounts in effect for such month under §§ 416.410, 416.412, 416.413, 416.432(c) and 416.531, as specified in such sections or as previously increased under this section, shall be increased by the same percentage (and rounded on an annual basis, when not a multiple of $1.20 to the next higher multiple of $1.20), effective with respect to benefits for months after such month.

2. Section 416.410 is revised to read as follows:

§ 416.410 Amount of benefits; eligible individual.

The benefit under this part for an eligible individual who does not have an eligible spouse, who is not in an institution (see § 416.231), who is not living in the household of another under the conditions set forth in § 416.1125, and who is not a qualified individual (as defined in § 416.242), shall be payable at the rate of $1,680 per year ($420 per quarter, $140 per month) for the period ending June 30, 1974, at the rate of $1,752 per year ($438 per quarter, $146 per month) for the period beginning July 1, 1974, and ending June 30, 1975, and at the rate of $1892.40 per year ($473.10 per quarter, $157.70 per month) for the remainder of 1975 and any calendar year thereafter (however, see § 416.405 with respect to cost-of-living increases) reduced by the amount of such individual's income not excluded pursuant to Subpart K of this part.

3. Section 416.412 is revised to read as follows:

§ 416.412 Amount of benefits; eligible couple.

The benefit under this part for an eligible couple neither of whom is in an institution (see § 416.231) nor is living in the household of another under the conditions set forth in § 416.1125, nor is a qualified individual (as defined in § 416.242), shall be payable at the rate of $2,520 per year ($630 per quarter, $210 per month) for the period ending June 30, 1974, at the rate of $2,628 per year ($657 per quarter, $219 per month) for the period beginning July 1, 1974, and ending June 30, 1975, and at the rate of $2,839.20 per year ($709.80 per quarter, $236.60 per month) for the remainder of 1975 and any calendar year thereafter (however, see § 416.405 with respect to cost-of-living increases) reduced by the amount of income not excluded pursuant to Subpart K of this part, of such individual and spouse. (See § 416.502.)

4. Section 416.413 is revised to read as follows:

§ 416.413 Amount of benefits; qualified individual.

A qualified individual (as defined in § 416.242) will receive in addition to the amount specified in § 416.410 or § 416.412, as applicable, $70 per month for the period ending June 30, 1974, $73 per month for the period beginning July 1, 1974, and ending June 30, 1975, and $78.90 per month for the remainder of 1975 and any calendar year thereafter (however, see § 416.405 with respect to cost-of-living increases) for each essential person (as defined in § 416.243) living in his household. (See §§ 416.531 and 416.532.)

5. In § 416.432 paragraph (c) is revised to read as follows:

§ 416.432 Change in eligibility status within a quarter involving a couple; eligibility exists in all months of the quarter.

* * * * *

(c) When one member of a couple is in an institution and subject to payment reduction for Medicaid (§ 416.231), and the other member of the couple is living in the household of another and receiving support and maintenance from that person, the rate of payment for such couple shall be $1,420 per year ($355 per quarter, $118.34 per month) for the period ending June 30, 1974, at the rate of $1,468 per year ($367 per quarter, $122.34 per month) for the period beginning July 1, 1974, and ending June 30, 1975, and at the rate of $1561.80 per year ($390.40 per quarter, $130.14 per month) for the remainder of 1975 and any calendar year thereafter (however, see § 416.405 with respect to cost-of-living increases). These amounts are based on the sum of $25 and the reduction of the rate of payment for an individual by one-third (⅓). This rate of payment shall then be reduced by the amount of income not excluded pursuant to Subpart K of this part, of such individual and spouse and paid in accordance with § 416.502. As in paragraph (b) of this section, no more than $25 shall be paid to the institutionalized member of the couple.

* * * * *

6. A new § 416.525 is added to read as follows:

§ 416.525 Reimbursement to States for interim assistance payments.

Notwithstanding § 416.542, the Social Security Administration may, in accordance with the provisions of Subpart S of this part, withhold supplemental security income benefits due with respect to an individual and may pay to a State (or political subdivision thereof, if agreed to by the Social Security Administration and the State) from the benefits withheld, an amount sufficient to reimburse the State (or political subdivision) for interim assistance furnished on behalf of the individual.

7. Section 416.531 is revised to read as follows:

§ 416.531 Standard of payment based on existence of an essential person.

In determining the amount of the supplemental security income standard of payment to any qualified individual (see § 416.242), for months after December 1973, such standard shall be increased to take into account the needs of an essential person (see § 416.243). The amount of such increase shall be at the rate of $840 per year, in the case of any period prior to July 1974, at the rate of $876 per year for the period beginning July 1, 1974, and ending June 30, 1975, and at the rate of $946.80 per year ($236.70 per quarter, $78.90 per month) for the remainder of 1975 and any calendar year thereafter (however, see § 416.405 with respect to cost-of-living increases). The total amount due the qualified individual will be computed in accordance with section 1611 of the Act. The resulting monthly payment will be made to the qualified individual. If State records appropriately identify two or more essential persons for a qualified individual, an increment of $70 per month for the period ending June 30, 1974, ($73 for the period beginning July 1, 1974, and ending June 30, 1975, and $78.90 for the remainder of 1975 and any calendar year thereafter) shall be added to the qualified individual's standard of payment for each such essential person (however, see § 416.405 with respect to cost-of-living increases).

8. Section 416.533 is revised to read as follows:

§ 416.533 Transfer or assignment of benefits.

Except as provided in § 416.525 and Subpart S of this part, the Social Security Administration shall not certify payment of supplemental security income benefits to a transferee or assignee of a person eligible for such benefits under the Act. The Social Security Administration shall not certify payment of supplemental security income benefits to any person claiming such payment by virtue of an execution, levy, attachment, garnishment, or other legal process or by virtue of any bankruptcy or insolvency proceeding against or affecting the person eligible for benefits under the Act.

9. A new Subpart S is added to read as follows:

Subpart S—Interim Assistance Provisions; Agreements; Payments

Sec.
416.1901 Purpose and scope.
416.1906 General provisions and definitions.
416.1911 Interim assistance agreements.
416.1916 Effective period for reimbursement to States for interim assistance.
416.1921 Hearings and review.
416.1926 Term of the agreement.

AUTHORITY: Secs. 1102, 1611(b), 1617, 1631(d), 1631(g) of the Social Security Act, 49 Stat. 647, as amended, 86 Stat. 1466, as amended, 88 Stat. 422, 86 Stat. 1475, 88 Stat. 420; 42 U.S.C. 1302, 1382(b), 1382f, 1383(d), 1383(g).

Subpart S—Interim Assistance Provisions; Agreements; Payments

§ 416.1901 Purpose and scope.

This subpart implements section 1631(g) of the Act (added by section 5 of Pub. L. 93-368) which permits the Social Security Administration to enter into an agreement with a State whereby such State (or a political subdivision of the State) would be reimbursed for interim assistance payments furnished an applicant for supplemental security income benefits upon the written authorization of such applicant to withhold benefits due for the purpose of reimbursing the State (or political subdivision) for the interim assistance furnished.

§ 416.1906 General provisions and definitions.

(a) *General provisions.* Notwithstanding § 416.542, the Social Security Administration may, upon receipt of written authorization by an individual or a proper party executing an application on his behalf (see § 416.310), withhold supplemental security income benefits due with respect to that individual and may pay to a State (or political subdivision thereof if agreed to by the Social Security Administration and the State) from the benefits withheld, an amount sufficient to reimburse the State (or political subdivision) for interim assistance furnished on behalf of the individual.

(b) *Definitions.* For purposes of this subpart:

(1) "Authorization" means an authorization which is written and is in a form which is acceptable to the Social Security Administration and legally acceptable in the State from which the individual received interim assistance;

(2) "Benefits" with respect to any individual means supplemental security income benefits under title XVI of the Act, and any State supplementary payments under section 1616 of the Act or section 212 of Pub. L. 93-66 which the Social Security Administration makes on behalf of a State (or political subdivision thereof), that the Social Security Administration has determined to be due with respect to the individual at the time the Social Security Administration makes the first payment of benefits. A cash advance made pursuant to § 416.520 shall not be considered as the first payment of benefits for purposes of the preceding sentence;

(3) "Interim assistance" with respect to any individual means assistance, including vendor payments, financed from State or local funds and furnished for meeting basic needs during the period beginning with the month in which the individual filed an application for benefits and for which such individual was eligible. Assistance payments financed in whole or in part from Federal funds (e.g., aid to families with dependent children) do not come within the meaning of interim assistance.

(c) *Effective life of authorization.* An authorization is in effect until the Social Security Administration has made a final determination on the applicant's claim. If the individual's supplemental security income application is denied, the denial is the final determination unless the individual files a timely appeal. If the individual applies again at a later time, a new authorization must be obtained.

§ 416.1911 Interim assistance agreements.

In order for a State to receive reimbursement under the provisions of this subpart, the State shall have in effect an interim assistance agreement with the Social Security Administration which shall provide that:

(a) The Social Security Administration will make payments to the State (or political subdivision) pursuant to the provisions of this subpart and § 416.525; and

(b) If the Social Security Administration makes payment to the State (or political subdivision) in reimbursement for interim assistance for an individual in an amount greater than the amount of interim assistance reimbursable under this subpart,

(1) The State (or political subdivision) shall pay to the individual the excess amount as soon as feasible but not later than 10 working days (or a shorter period specified in the agreement) from the date the State (or political subdivision) receives the payment; or

(2) If the State is unable to pay the excess to the individual, the State shall

V 40 N 219 NOV 12 75 XUM

refund the excess to the Social Security Administration; and

(c) The State will comply with such other rules as the Social Security Administration finds necessary to achieve efficient and effective administration of this subpart, and to carry out the provisions of this part, including the furnishing of a notice to the individual of action taken pursuant to paragraph (b)(1) of this section, and the protection of hearing rights (see § 416.1921) for any individual aggrieved by action taken by the State (or political subdivision) pursuant to this subpart.

§ 416.1916 Effective period for reimbursement to States for interim assistance.

The provisions for reimbursement to States for interim assistance as set out in § 416.1911 shall be effective with respect to authorizations received by the Social Security Administration on or before June 30, 1976.

§ 416.1921 Hearings and review.

The provisions of Subpart N of this part shall not be applicable to any disagreement concerning payment by the Social Security Administration to a State (or political subdivision) pursuant to the provisions of this subpart nor the amount retained by the State (or political subdivision). The State shall provide an opportunity for a hearing to any individual aggrieved by action taken by the State (or political subdivision) pursuant to this subpart. However, provisions of Subpart N shall be applicable to any disagreement concerning the total amount of the payment made by the Social Security Administration.

§ 416.1926 Term of the agreement.

The Social Security Administration and the State shall mutually agree upon the term of agreement. In no event, however, shall it extend beyond June 30, 1976.

[FR Doc.75-30265 Filed 11-11-75;8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 75-WE-52-AD]

LOCKHEED-CALIFORNIA COMPANY MODEL L-1011-385 SERIES AIRPLANES

Proposed Airworthiness Directives

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to Lockheed Model L-1011-385 series airplanes. The FAA has received reports of failures of the L-1011 emergency evacuation system hard container release cable assemblies. The emergency evacuation system hard container release cable assembly failures resulted in arresting the passenger door motion, thereby preventing deployment of the passenger evacuation system. Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed airworthiness directive would require inspection, replacement and rework, if necessary, of the emergency evacuation system hard container release cable assemblies and container latching parts on Lockheed L-1011-385 series airplanes.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Administration, Office of the Regional Counsel, FAA Western Region: Attention: Airworthiness Rules Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. All communications received on or before December 16, 1975, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

This amendment is proposed under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

LOCKHEED-CALIFORNIA COMPANY. Applies to Lockheed-California Company Model L-1011-385 series airplanes certificated in all categories.

Compliance required within 300 hours flight time after effective date of this AD, unless already accomplished:

To prevent possible emergency evacuation system hard container release cable assembly failures, accomplish the following:

(a) Inspect each slide, slide/raft evacuation system to determine if a modified cable assembly has been installed in accordance with Lockheed Alert Service Bulletin No. 093-25-A239, dated October 23, 1975, and Air Cruisers Company Service Bulletin 25-29, dated October 23, 1975, or later FAA-approved revisions or an FAA-approved equivalent modification approved by the Chief, Aircraft Engineering Division, FAA Western Region. Modified cable assemblies are identified by either blue or green paint on the parachute pin in the swaged area.

(b) Replace all unmodified cable assemblies located during the inspections required by paragraph (a) with a modified cable assembly in accordance with Air Cruisers Company Service Bulletin 25-29, dated October 23, 1975, and Lockheed Alert Service Bulletin No. 093-25-A239, dated October 23, 1975, or later FAA-approved revisions, or equivalent modifications approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(c) Inspect each slide, slide/raft evacuation system hard container latching parts which interrelate with the hard container release cable parachute pins for burrs and/or sharp edges and replace or rework as necessary in accordance with Lockheed Alert Service Bulletin No. 093-25-A239, dated October 23, 1975, and Air Cruisers Company Service Bulletin No. 25-29, dated October 23, 1975, or later FAA-approved revisions or equivalent modifications approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(d) Reidentify slide, slide/raft evacuation assemblies having modified cable assemblies which have been installed as required by paragraph (b), in accordance with Lockheed Alert Service Bulletin No. 093-25-A239, dated October 23, 1975, or later FAA approved revisions, or equivalent modifications approved by the Chief, Aircraft Engineering Division, FAA Western Region. This paragraph supersedes the re-identification requirement of paragraph (e), AD 75-03-07.

Issued in Los Angeles, Calif., on November 4, 1975.

ROBERT H. STANTON,
Director,
FAA Western Region.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 180]

[FRL 455-5; PP4F1464/P6]

PESTICIDE CHEMICAL N-(MERCAPTOMETHYL) PHTHALIMIDE S-(O,O-DIMETHYL PHOSPHORODITHIOATE)

Proposed Tolerance

On March 6, 1974, notice was given (39 FR 8656) that Stauffer Chemical Co., 1200 S. 47th St., Richmond CA 94804, had submitted a pesticide petition (PP 4F1464) to the Environmental Protection Agency (EPA). This petition proposed to amend 40 CFR 180.261 by establishing tolerances for combined residues of the insecticide N-(mercaptomethyl) phthalimide S-(O,O-dimethyl phosphorodithioate) and its oxygen analog N-(mercaptomethyl) phthalimide S-(O,O-dimethyl phosphorothioate) in or on the following raw agricultural commodities: almond hulls, blueberries, corn fodder and forage (including sweet corn, field corn, and popcorn), cranberries, and peavine forage and hay at 10 parts per million (ppm); the raw agricultural commodity group citrus fruits (40 CFR 180.34) at 5 ppm; fresh corn, including sweet corn (kernels plus cob with husk removed), corn grain (including popcorn), and peas (including succulent peas with pods and dry peas) at 0.5 ppm; and nuts at 0.1 ppm (negligible residue). Stauffer Chemical Co. subsequently amended the petition to include a request for a tolerance for residues in the meat, fat, and meat byproducts of horses at 0.2 ppm.

Based upon an evaluation of the data submitted in the petition and other relevant material, on March 11, 1975, tolerances were established for combined residues of the insecticide and its oxygen analog in the raw agricultural commodities and commodity groups listed above, with the exception of citrus fruits, for which it was found that additional residue data were needed (40 FR 11352). This action represented a departure from normal practice in that the Agency did act at one time on all of the commodities or commodity groups for which, tolerances were requested in the petition, but rather, acted on the request for tolerances on some commodities and deferred action on the request for tolerances on other commodities and commodity groups until a later time.

There were speical circumstances with regard to this petition which justified a different procedure. As discussed above, the commodities for which tolerances were requested in the petition included peas and peavine forage and hay. Data which had been gathered by the U.S. Department of Agriculture laboratory in Yakima, Washington, in 1974 suggested that N-(mercaptomethyl) phthalimide S-(O,O-dimethyl phosphorodithioate) and its oxygen analog were promising for control of the pea leaf weevil as an alternative to DDT, the only chemical that had been widely used by pea growers (39 FR 10323). Because the necessary data were available to support the requested tolerances on all commodities covered in the request except citrus fruits, and the Stauffer Chemical Co. did not wish to amend the petition by withdrawing the request for a tolerance on citrus fruits and, subsequently, refiling at a later date, the Agency determined that it was in the public interest to establish the requested tolerances on peas and other commodities, rather than to delay action on the entire petition pending the submission of additional data to support the tolerance for citrus.

Accordingly, on March 11, 1975, the EPA granted the petition in part by establishing tolerances for those commodities (including peas) for which adequate supporting data were available, while at the same time deferring action on that part of the petition which requested a tolerance on citrus fruits. Since promulgation of the regulation on March 11, 1975, Stauffer Chemical Co. has revised the directions for use for citrus, and it is now concluded that residues of the insecticide and its oxygen analog of citrus fruits treated according to these revised use directions will not exceed the 5 ppm tolerance requested for citrus fruits in that part of the petition which remained to be acted upon. The pesticide is considered to be useful for the purpose for which the tolerance is sought, there is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies. The tolerance established by amending § 180.261 will protect the public health.

Under the procedures established in section 408 of the Federal Food, Drug, and Cosmetic Act and the implementing regulations, the Agency would normally at this juncture promulgate a regulation establishing the tolerance in question, effective on the date of publication in the FEDERAL REGISTER. It is possible, however, that the March 11, 1975 FR Document may not have adequately communicated to some readers that the Agency was deferring action on that part of the petition requesting a tolerance on citrus. Accordingly, action on the remaining portion of the petition at this time might unfairly surprise some persons and thereby defeat the policies underlying the requirements in the statute that the Agency inform the public (by way of a FEDERAL REGISTER notice) of petitions for tolerances that have been filed. For this reason, the Agency has decided to treat the remaining portion of this petition as if it were a petition under section 408(e) of the statute by proposing that a tolerance be established as described below rather than by promulgating a regulation establishing such a tolerance at this time. This procedure will provide adequate notice to any persons who might have been misled by the March 11, 1975, FR Document.

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act which contains any of the ingredients listed herein may request, on or before December 12, 1975, that this proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this proposal to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M St. SW, Washington, DC 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in reviewing them. The comments must be received on or before December 12, 1975, and should bear a notation indicating the subject (PP 4F1464/P6). All written comments filed pursuant to this notice will be available for public inspections in the office of the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

(Sec. 408(e), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346(a)(d)(2)))

Dated: November 5, 1975.

JOHN B. RITCH, Jr.,
Director, Registration Division.

It is proposed that Part 180, Subpart C, § 180.261 be amended by revising the paragraph "5 parts per million • • •" to include the raw agricultural commodity group citrus fruits to read as follows:

§ 180.261 N-(Mercaptomethyl) phthalimide S-(O,O-dimethyl phosphorothioate) and its oxygen analog; tolerances for residues.

• • • • •

5 parts per million in or on apricots, citrus fruits, nectarines, and plums (fresh prunes).

• • • • •

[FR Doc.75-30390 Filed 11-11-75;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 87]

[Docket No. 20664; FCC 75-1212]

AIR TRAFFIC CONTROL FREQUENCIES

Availability to Aeronautical Utility Mobile Stations

In the matter of amendment of Parts 2 and 87 of the Commission's rules to make available to aeronautical utility mobile stations, under certain conditions, all the ATC frequencies listed in § 87.401, Docket No. 20664, FCC 75-1212.

1. Notice of Proposed Rule Making in the above-entitled matter is hereby given.

2. In this Notice the Commission is proposing to amend Parts 2 and 87, of our rules to make available for assignment to aeronautical utility mobile stations, under certain conditions, any of the frequencies listed in § 87.401 of our rules and generally referred to as air traffic control (ATC) frequencies. Under the present rules the frequencies available to this class of station are the fourteen frequencies shown in § 87.431 which are also listed in §§ 87.183 and 87.401 as available for use as ATC frequencies on a secondary basis.

3. The ATC frequencies are allocated for civil aviation use. These frequencies are assigned to both Government and non-Government radio stations and are used in the ATC system which is administered by the Federal Aviation Administration (FAA). Aeronautical utility mobile stations are licensed for use aboard non-Government maintenance, police, fire, emergency and other vehicles which operate on runways at airports having airdrome control towers or FAA flight service stations and are limited to communications involving the management of ground traffic by the airdrome control station located at the control tower or the FAA flight service station. This proposal makes available all of the ATC frequencies for communication between airdrome control stations or FAA flight service stations and aeronautical utility mobile stations. It is in response to action taken by the FAA which authorized its FAA flight service stations to communicate with aeronautical utility mobile stations on ATC frequencies as well as the fourteen frequencies shown in § 87.431.

4. Under this proposal the aeronautical utility stations at an airport would be authorized that ATC frequency which is used by the airdrome control station or FAA flight service station at the airport to communicate with ground vehicles. These assignments would be coordinated with the FAA. The use of the fourteen frequencies now available to aeronautical utility mobile stations would still be primarily for ground traffic control including aircraft on the ground. Footnote "A" in the tables of frequencies in §§ 87.183(i) and 87.401(a) would be amended to clarify this use.

5. Presently no reference is made to FAA flight service stations in Subpart J, Aeronautical Utility Mobile Stations, of Part 87 of the rules. These stations provide advisory information to aircraft and, also, ground advisory service to vehicles on airports which do not have airdrome control towers and on airports which have part-time towers during the off duty hours of the tower. This proposal would insert in appropriate rule sections of Subpart J reference to FAA flight service stations.

V 40 I 219 NOV 12 75 XUM

6. The proposal also would delete the definition, "Aeronautical utility land station," from § 87.5 of the rules. This definition is unnecessary since aeronautical utility land stations are either airdrome control stations or FAA flight service stations and are referred to as such in the rules.

7. The proposed amendments to the rules as set forth below are issued pursuant to the authority contained in sections 4(i), 303(c) and (r) of the Communications Act of 1934, as amended.

8. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's rules, interested persons may file comments on or before December 15, 1975, and reply comments on or before December 26, 1975. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

9. In accordance with the provisions of § 1.419 of the Commission's rules, an original and 11 copies of all statements, briefs or comments filed shall be furnished to the Commission. Responses will be available for public inspection during regular busines hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

Adopted: October 29, 1975.

Released: November 5, 1975.

FEDERAL COMMUNICATIONS COMMISSION [1]

[SEAL] VINCENT J. MULLINS, *Secretary.*

[1] Commision Reid absent.

Parts 2 and 87 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

§ 2.1 [Amended].

1. Section 2.1 is amended by deleting the definition "Aeronautical utility land station."

§ 2.106 [Amended].

2. In § 2.106 the frequency table is amended by deleting from column 11 the term, "Aeronautical utility land," which is next to the frequency band 121.600–121.925 MHz listed in column 10.

3. In § 87.5 the definition "Aeronautical utility land station" is deleted and the definition, "Aeronautical utility mobile station," is revised to read as follows:

§ 87.5 Definition of terms.

* * * * *

Aeronautical utility mobile station. A mobile station used for communications at airdromes with and under control of airdrome control stations or FAA flight service stations.

* * * * *

4. In § 87.183 paragraph (i) is amended by revising footnote "A" at the end of the table to read as follows:

§ 87.183 Frequencies available.

* * * * *

(i) * * *

A—Primarily used for control of ground traffic.

* * * * *

5. In § 87.401 paragraph (a) is amended by revising footnote "A" at the end of the table to read as follows:

§ 87.401 Frequencies available.

* * * * *

(a) * * *

A—Primarily used for control of ground traffic.

* * * * *

6. Section 87.431 is revised to read as follows:

§ 87.431 Frequencies available.

The frequencies listed in § 87.401(a) are available for assignment to aeronautical utility mobile stations. The aeronautical utility mobile stations at each airport will be authorized only that frequency which is used by the airdrome control station or the FAA flight service station at the airport to communicate with ground vehicles.

7. A new § 87.432 is added to read as follows:

§ 87.432 Eligibility.

Authorization to operate an aeronautical utility mobile station will be issued only for operation at landing areas having an airdrome control tower or an FAA flight service station.

8. Section 87.433 is revised to read as follows:

§ 87.433 Scope of service.

Communications by an aeronautical utility mobile station shall be limited to the management of ground traffic at an airdrome.

9. Section 87.437 is revised to read as follows:

§ 87.437 Supervision by airdrome control operator or FAA flight service station operator.

Transmissions by the aeronautical utility mobile station shall be under control of the airdrome control station or the FAA flight service station and shall be discontinued immediately when so requested by either the airdrome control station or FAA flight service station. The aeronautical utility mobile station shall guard its assigned frequency during periods of operation.

[FR Doc.75-30461 Filed 11-11-75;8:45 am]

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF THE TREASURY

Office of the Secretary

TUNERS (OF THE TYPE USED IN CONSUMER ELECTRONIC PRODUCTS) FROM JAPAN

Tentative Determination To Modify or Revoke Dumping Finding

A finding of dumping with respect to tuners (of the type used in consumer electronic products) from Japan was published as Treasury Decision 70–257 in the FEDERAL REGISTER of December 12, 1970 (35 FR 18914).

After due investigation, it has been determined tentatively that tuners (of the type used in consumer electronic products) exported by Tokyo Shibaura Electric Co., Ltd., are not being, nor are likely to be, sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

Statement of reasons on which this tentative determination is based. The investigation indicated that with the exception of three sales for which dumping duties in a de minimis amount were assessed, all sales by Tokyo Shibaura Electric Co., Ltd., for a period of over two years from the date of withholding of appraisement (Notice published in FEDERAL REGISTER of April 16, 1970, 35 FR 6192) have been made at not less than fair value. Written assurances have been given that future sales of such tuners to the United States will not be made at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding of dumping with respect to tuners (of the type used in consumer electronic products) from Japan to exclude the tuners sold by Tokyo Shibaura Electric Co., Ltd. from the finding.

In accordance with § 153.37, Customs regulations (19 CFR 153.37), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any request that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW, Washington, D.C. 20229, in time to be received by this office on or before Noevmber 24, 1975. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office on or before December 12, 1975.

This notice is published pursuant to § 153.41(c) of the Customs regulations (19 CFR 153.41(c)).

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES 15338; Survey Group 158]

FLORIDA

Filing of Plat of Survey

NOVEMBER 4, 1975.

The plat of survey of the following described lands, which was accepted on June 26, 1975, will be officially filed in the Eastern States Office, Silver Spring, Maryland as of 10 a.m. on December 15, 1975:

TALLAHASSEE MERIDIAN, FLORIDA

T. 46 S., R. 24 E.,
Tract 37 (0.57 of an acre);
Tract 38 (1.75 acres);
Tract 39 (0.69 of an acre);
Tract 40 (0.96 of an acre);
Tract 41 (0.09 of an acre).

The area aggregates 4.06 acres.

The plat represents the survey of islands omitted from the original survey of T. 46 S., R. 24 E., as shown on the plat approved September 30, 1873.

Tracts 37, 38, 39, 40 and 41 are islands of sandy, shell formation, ranging in height from fifteen inches to fifteen feet. Each island is stable in position with no erosive action and has an outer fringe of tidal mangrove. The upland portions support moderate growths of such vegetation as gumbo limbo, sea grape, palm and buttonwood; undergrowth consists of cacti, vines and small shrubs. The inner tidal areas are covered with red and black mangrove. Each island is surrounded by a fringe of red mangrove, with no apparent connecting bars, shell or sand ridges to any other islands.

The formation of the islands is similar in all respects to that of the adjacent surveyed lands. All characteristics of the mainland indicate that the islands were in existence in 1845 when Florida was admitted to the Union and at all subsequent dates.

The islands are well over 50 percent upland in character within the interpretation of the Swampland Act of September 28, 1850.

Except for valid existing rights, these lands will not be subject to application, petition, location, selection or to any other type of appropriation under any public land law, including the mining and mineral leasing laws, until a further order is issued.

All inquiries relating to these lands should be sent to Director, Eastern States, Bureau of Land Management, 7981 Eastern Avenue, Silver Spring, Maryland 20910.

LOWELL J. UDY,
Director,
Eastern States.

NEW MEXICO

Application

NOVEMBER 4, 1975.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Natural Gas Pipeline Company of America has applied for a 4 inch natural gas pipeline and .01 acre meter site right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 21 S., R. 28 E.,
Sec. 26, W½SE¼;
Sec. 35, W½NE¼ and NW¼SE¼.

This pipeline will convey natural gas across .954 mile of national resource land in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, PO Box 1397, Roswell, NM 88201.

FRED E. PADILLA,
Chief, Branch of
Lands and Minerals Operations.

[NM 26900, 26901, 26902, 26904, 26911]

NEW MEXICO

Applications

NOVEMBER 3, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for five 4½ inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 26 N., R. 12 W.,
Sec. 21, NW¼NW¼.
T. 29 N., R. 9 W.,
Sec. 28, E½NW¼.
T. 30 N., R. 8 W.,
Sec. 29, Lots 11 and 12.
T. 30 N., R. 9 W.,
Sec. 33, NW¼NE¼.
T. 32 N., R. 10 W.,
Sec. 29, SW¼SW¼.

These pipelines will convey natural gas across .197 mile of national resource lands in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, 3550 Pan American Freeway, NE, Albuquerque, NM 87107.

Designation of Jordan Crater Research Natural Area

NOVEMBER 3, 1975.

Pursuant to the authority in 43 CFR Subpart 2070, and the authorization from the Director dated June 2, 1975, I hereby designate the public lands in the following described area as the Jordan Crater Research Natural Area:

WILLAMETTE MERIDIAN

T. 27 S., R. 43 E.,
Secs. 33, 34, 35, and 36.
T. 28 S., R. 43 E.,
Secs. 1, 2, and 3;
Sec. 4, lots 1, 2, and 4, S½N½, and S½;
Secs. 5, 8, 9, 10, and 11;
Sec. 12, W½ and SW¼SE¼;
Secs. 13, 14, 15, and 17;
Sec. 20, N½, W½SW¼, SE¼SW¼, SW¼SE¼, and E½SE¼;
Secs. 21 to 29, inclusive;
Secs. 32 to 35, inclusive.
T. 28 S., R. 44 E.,
Sec. 18, lots 3 and 4, SE¼SW¼, and SW¼SE¼;
Sec. 19;
Sec. 20, S½SW¼;
Sec. 28, W½W½;
Secs. 29 to 32, inclusive.
T. 29 S., R. 43 E.,
Secs. 1 to 5, inclusive.
T. 29 S., R. 44 E.,
Sec. 4, W½;
Sec. 5, lots 1, 2, 3, and 4, S½N½, N½SW¼, and E½SE¼;
Sec. 6, lots 1 to 7, inclusive, S½NE¼, SE¼NW¼, E½SW¼, and W½SE¼;
Sec. 7;
Sec. 8, S½NE¼, W½, and SE¼;
Sec. 9, W½ and W½SE¼;
Sec. 16, W½NE¼ and E½NW¼.

The area described aggregates about 30,114.70 acres.

The Jordan Crater Research Natural Area lands are a "Class IV—Outstanding Natural Area" under the Bureau of Outdoor Recreation system of classification.

MURL W. STORMS,
State Director.

GRAIN STANDARDS

Louisiana Grain Inspection Point

Notice is hereby given that the designation of the Delta Weighing and Inspection Bureau, Inc., to operate as an official inspection agency at Myrtle Grove, Louisiana, has been canceled at the agency's request effective 12 p.m. November 17, 1975, pursuant to § 26.101 of the regulations (7 CFR 26.101) under the U.S. Grain Standards Act.

In order to provide an orderly continuation of needed official grain inspection services at Myrtle Grove, Louisiana, the assignment of the New Orleans Board of Trade is hereby amended to add Myrtle Grove, Louisiana, as a designated inspection point on an interim basis to be effective on November 17, 1975, and continuing until a replacement agency is formally designated, in accordance with § 26.101(c)(2) of the regulations (7 CFR 26.101(c)(2)) under the U.S. Grain Standards Act (7 U.S.C. 71 et seq.).

Interested persons are hereby afforded the opportunity to submit written views and comments with respect to the interim designation of the New Orleans Board of Trade to operate as an official inspection agency at Myrtle Grove, Louisiana, in accordance with § 26.101(c)(2) of the regulations.

All such views and comments should be submitted in writing to the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250. All materials submitted should be in duplicate and mailed to the Hearing Clerk not later than December 12, 1975. All materials submitted pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Done in Washington, D.C., on: November 10, 1975.

DONALD E. WILKINSON,
Administrator,
Agricultural Marketing Service.

Forest Service

ALASKA LUMBER AND PULP COMPANY TIMBER SALE 1976–1981 OPERATING PERIOD

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental for the Alaska Lumber and Pulp Company Timber Sale 1976–1981 Operating Period, USDA–FS–FES(Adm) 76–03.

The environmental statement deals with the timber harvest plan for the 1976–1981 operating period of the Alaska Lumber and Pulp Company long-term timber sale. Approximately 668 million board feet of mature Sitka spruce, western hemlock, and yellow cedar is proposed for harvest from Chichagof Island, Baranof Island, Kuiu Island on the Tongass National Forest in southeast Alaska.

This draft environmental statement was filed with SCQ on November 6, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, So. Agriculture Bldg., Room 3231, 12th St. & Independence Ave., SW., Washington, D.C. 20250

USDA, Forest Service, Alaska Region, Federal Bldg., Juneau, Alaska 99802

Forest Supervisor, Chatham Area, Tongass National Forest, Lloyd Center Bldg., Sitka, Alaska 99835

Forest Supervisor, Ketchikan Area, Tongass National Forest, Federal Bldg., Room 213, Ketchikan, Alaska 99901

Forest Supervisor, Stikine Area, Tongass National Forest, Federal Bldg., Petersburg, Alaska 99833

Forest Supervisor, Chugach National Forest, 121 W. Fireweed Lane, Suite 205, Anchorage, Alaska 99503

A limited number of single copies are available upon request to Forest Supervisor, Chatham Area, Tongass National Forest, P.O Box 757, Sitka, Alaska 99835.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor, Chatham Area, Tongass National Forest, P.O. Box 757, Sitka, Alaska 99835. Comments must be received within 60 days from the date of transmittal of this environmental statement to the Council on Environmental Quality in order to be considered in the preparation of the final environmental statement.

R. MAX PETERSON,
Deputy Chief, Forest Service.

BIG SWEDE-PIPE PLANNING UNITS MULTIPLE USE PLAN

Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture has prepared a draft environmental statement for Big Swede-Pipe Planning Units, Forest Service Report Number R1–76–8 USDA–FS–DES (Adm).

The environmental statement concerns a proposed implementation of a revised multiple use plan for the Big Swede-Pipe Planning Units, Libby and Fisher River Ranger Districts, Kootenai National Forest, and located in Lincoln County, Montana. The proposal affects approximately 142,135 acres of National Forest lands which have been stratified into twelve management situations or units with similar resource implications.

This draft environmental statement was filed with CEQ November 4, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3231, 12th St. and Independence Ave., SW., Washington, D.C. 20250

USDA, Forest Service, Northern Region, Federal Building, Missoula, MT 59801

Supervisor's Office, Kootenai National Forest, 418 Mineral Avenue, Libby, MT 59923

USDA, Forest Service, Libby Ranger District, Libby Ranger Station, Libby, MT 59923

USDA, Forest Service, Fisher River Ranger District, Canoe Gulch Ranger Station, Libby, MT 59923

A limited number of single copies are available upon request to Forest Supervisor, Floyd J. Marita, Kootenai National Forest, Box AS, Libby, MT 59923.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from state and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor, Floyd J. Marita, Kootenai National Forest, 418 Mineral Avenue, Libby, MT 59923. Comments must be received by January 6, 1976, in order to be

V 40 N 219 NOV 12 1975 XUM

considered in the preparation of the final environmental statement.

Dated: November 4, 1975.

FLOYD J. MARITA,
Forest Supervisor, Kootenai National Forest, Northern Region.

Domestic and International Business Administration

GLAMORISE FOUNDATIONS, INC.

Petition for a Determination

A petition by Glamorise Foundations, Inc., of New York City, was accepted for filing on November 6, 1975, under section 251 of the Trade Act of 1974 and in conformity with Adjustment Assistance Certification Regulations for Firms, 15 CFR Part 350, 40 FR 14291 (April 3, 1975) (the "Regulations"). Consequently, the United States Department of Commerce has instituted an investigation to determine whether increased imports into the United States contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm. The petitioner asserts that imported articles classified in items 376.24 and 376.28 of the Tariff Schedules of the United States ("TSUS") are like or directly competitive with women's body-supporting garments produced by the firm.

Any party having a substantial interest in the subject matter of the proceedings (as described in § 350.40(b) of the regulations) may request a public hearing on the matter. A request for a hearing conforming to § 350.40 of the Regulations must be received by the Director, Office of Trade Adjustment Assistance, Room 3011, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230, on or before November 24, 1975.

(Catalog of Federal Domestic Assistance Program No. 11.106, Trade Adjustment Assistance)

U.S. MERCHANT MARINE ACADEMY ADVISORY BOARD

Public Meeting

Notice is hereby given of a meeting of the U.S. Merchant Marine Academy Advisory Board (the Board) on December 10, 1975, at 2:30 p.m. in the Board Room at the U.S. Merchant Marine Academy, Kings Point, New York.

The Advisory Board to the United States Merchant Marine Academy was established by the Secretary of Commerce under the authority of 46 U.S.C. 1126d to examine the course of instruction and the overall management of the U.S. Merchant Marine Academy (the Academy) and advise the Assistant Secretary of Commerce for Maritime Affairs with respect thereto.

The Board consists of not more than seven members appointed by the Secretary of Commerce, selected from segments of the Maritime industry, labor, educational institutions, and other fields relating to the objectives of the Academy.

The agenda for the meeting is:

1. Call meeting to order.
2. Approval of the minutes of the September 19, 1975 meeting.
3. Reports of Advisory Board members on project assignments.
4. Discussion of legislative matters related to the U.S. Merchant Marine Academy.
5. Setting of next Board meeting.

This meeting is open to public observation, and a period will be set aside for oral comments or questions. Public statements may be submitted at any time before or after the scheduled meeting. Approximately 15 seats will be available for the public on a first-come, first-served basis.

Copies of the minutes will be available upon request.

Inquiries may be addressed to the Committee Control Officer, Kathleen A. Shetler, Office of Assistant Secretary for Maritime Affairs, Room 3731, Main Commerce Building, telephone A/C 202-967-2851.

Dated: November 10, 1975.

So ordered by Assistant Secretary of Commerce for Maritime Affairs, Maritime Administration.

JAMES S. DAWSON, JR.,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Institute of Education

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH

Meeting

Notification is hereby made of the final agenda for the meeting of the National Council on Educational Research to be held on November 21, 1975, in Room 823, at 1200—19th Street, NW., Washington, D.C. The meeting will convene at 9:30 a.m. and adjourn at 3:30 p.m. The tentative agenda appeared on page 52076 of the FEDERAL REGISTER on November 7, 1975. The National Council on Educational Research is established under section 405(b) of the General Education Provisions Act (20 U.S.C. 1221e(b)). Its statutory duties include:

(a) Establishing general policies for, and reviewing the conduct of the Institute;

(b) Advising the Assistant Secretary for Education and the Director of the Institute on development of programs to be carried out by the Institute;

(c) Recommending to the Assistant Secretary and the Director ways to strengthen educational research, to improve the collection and dissemination of research findings, and to insure the implementation of educational renewal and reform based upon the findings of educational research.

This meeting will be open to the public except for the closed session. The following is the revised agenda:

9:30 -------	Convene open session.
9:30–9:35 --	Approval of minutes of September 18 meeting.
9:35–10 ----	Director's report.
10–11 ------	Review of actions following council resolutions, end open session.
11–12:30 ---	Closed session (FY 1977 Budget).
12:30–1:30 -	Luncheon.
1:30–2 -----	Resume open session, presentation by National Education Task Force de la Haza.
2–3 --------	NIE Staff presentation on education, research issues.
3–3:30 ----	Brief discussion of dissemination strategies.
3:30 -------	Adjourn.

Members of the public are invited to attend the open sessions. Written statements relevant to an agenda item (or to any other item considered of interest to the Institute) may be submitted at any time and should be sent to the Chairman and the Executive Secretary of the Council at the address shown below.

Requests to address the Council meeting should be submitted in writing to the Chairman and the Executive Secretary.

The Chairman will determine whether a presentation should be scheduled.

In accordance with Council policy (NCER Resolution No. 013074-8) copies of Council resolutions and minutes of Council meetings can be obtained by contacting the Executive Secretary. Resolutions are available shortly after the particular meeting at which adopted. Because minutes require approval by the Council at a subsequent meeting, they are usually available approximately four to six weeks after the date of the meeting to which they refer.

In order to verify the agenda, assure adequate seating arrangements, or to obtain summaries of this meeting and copies of any resolutions adopted by the Council at this meeting, interested persons are requested to contact the Executive Secretary, National Council on Educational Research, whose address and telephone number are listed below:

National Council on Educational Research, National Institute of Education, Washington, D.C. 20208, 202–254–7900.

Dated November 7, 1975.

HAROLD L. HODGKINSON,
Director, National Institute of Education.

FOREIGN LANGUAGE AND AREA STUDIES RESEARCH PROGRAM

Closing Date for Receipt of Proposals

Notice is hereby given that pursuant to the authority contained in section 602 of Title VI of the National Defense Education Act of 1958, as amended (20 U.S.C. 512), proposals will be accepted for contracts under the Foreign Language and Area Studies Research Program. Under this program the Commissioner is authorized to contract for studies and surveys to determine the need for increased or improved instruction in modern foreign languages and related fields, to conduct research on training methods for use in such languages and fields, and to develop specialized materials for use in training students and language teachers.

Proposals for such contracts will be treated as unsolicited proposals in accordance with Subpart 3–4.52 of the HEW Procurement Regulations (41 CFR 3–4.52). In order to be assured of consideration for funding with fiscal year 1976 funds, however, proposals must be received by the Office of Education Application Control Center on or before February 2, 1976.

A. *Proposals sent by mail.* A proposal sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, S.W., Washington, D.C. 20202, Attention: 13.436. A proposal sent by mail will be considered to be received on time by the Application Control Center if:

(1) The proposal was sent by registered or certified mail not later than January 28, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The proposal is received on or before the closing date by either the Department of Health, Education, and Welfare or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare or the U.S. Office of Education.

B. *Hand delivered proposals.* A proposal to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets SW., Washington, D.C. Hand delivered proposals will be accepted daily between the hours of 8 a.m. and 4 p.m. Washington, D.C. time except Saturdays, Sundays or Federal holidays. Proposals will not be accepted after 4 p.m. on the closing date.

C. *Program information.* Information may be obtained from the Foreign Language and Area Research Program, Bureau of Postsecondary Education, U.S. Office of Education, Room 3928, 7th and D Streets, S.W., Washington, D.C. 20202.

D. *Applicable regulations.* The priorities and funding criteria applicable to this program were published in the FEDERAL REGISTER, 40 FR, October 29, 1975.

(20 U.S.C. 512)

(Catalog of Federal Domestic Assistance Number 13.436. Higher Education—Foreign Language and Area Research Program)

Dated: November 6, 1975.

T. H. BELL,
U.S. Commissioner of Education.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N-75-452]

COUNTRY SQUIRE LAKES SUBDIVISION

Hearing

In the matter of Country Squire Lakes Subdivision, OILSR Nos. 0–2884–15–26, 0–02884–15–26(A–C); Docket No. 75–201–IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d).

Notice is hereby given that:

1. Hidden Valley Lake, Inc., James J. Rupel, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90–448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued September 26, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Country Squire Lakes, located in Jackson County, Indiana, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received October 14, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d): *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, SW., Washington, D.C., on December 4, 1975, at 10 a.m.

The following time and procedure is applicable to such hearing:

All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before November 20, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: November 3, 1975.

By the Secretary.

JAMES W. MAST,
Administrative Law Judge.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. EX75-23; Notice 2]

SBARRO REPLICA BMW 328

Petition for Temporary Exemption From Federal Motor Vehicle Safety Standards

This notice grants the petition by the manufacturer of the Sbarro Replica BMW 328, Ateliers d'Etudes de Construction Automobiles S.a.r.l. of Yverdon, Switzerland, for temporary exemption from several Federal motor vehicle safety standards on the basis that compliance would cause it substantial economic hardship. Notice of the petition was published on August 25, 1975 (40 FR 37076) and an opportunity afforded for comment.

Petitioner manufactured 24 Sbarro Replica BMW 328 passenger cars in 1974 and has manufactured only 42 automobiles in all since commencing manufacturing in 1965. The vehicle for which it sought exemption is an open-bodied two-seater replica of the German BMW 328 sports car manufactured in the 1930's. The company requested a 1-year exemption from portions of Motor Vehicle Safety Standard No. 101, *Control Location, Identification and Illumination*, (requirements for illumination of head lamps, hazard warning, and windshield wiper controls) and Standard No. 114 (audible warning requirements). It wished a 2-year exemption from portions of Standard No. 108 (photometric requirements for front side marker lamps, backup lamps) and Standard No. 208 (audible and visible warnings). It asked for a 3-year exemption from eight additional standards: No. 201, *Occupant Protection in Interior Impact*, No. 202, *Head Restraints*, No. 203, *Impact Protection for the Driver from Steering Control System*, No. 204, *Steering Control Rearward Displacement*, No. 206, *Door Locks and Door Retention Components*, No. 212, *Windshield Mounting*, No. 214, *Side Door Strength*, and No. 215, *Exterior Protection*.

In support of its petition, it stated that it will comply with Standards Nos. 101, 108, 114 and 208 at the end of the exemption period. It needs the time to develop complying parts and to exhaust its inventory. To require immediate compliance would cause a loss of $55,000. With respect to the standards for which a 3-year exemption is requested, it states that "we must face the conclusion that our replica cannot be engineered or tested to comply with these standards due to its appearance and our finances and construction capacities. A 1930's automobile does not lend itself to these crash tests." The company has, however, incorporated the following safety items in an attempt at least partially to meet the standards indicated: full interior padding (No. 201); double joint steering shaft tube and Volkswagen collapsible steering column assembly (No. 203, No. 204); lock striker plates mounted within door jamb, encased in steel (No. 206); and construction of front and rear sections of vehicle from laminated polyester (No. 215). The car utilizes an upper-torso restraint, not required by Standard No. 208 for open-bodied cars. The company had a net income of $5,884 in 1974. Denial would cost it an opportunity to enter the American market.

It argued that an exemption is in the public interest as the vehicle will be powered by propane, qualifying it for exemption also as a low-emission motor vehicle.

No comments were received on the petition.

In granting hardship exemptions pursuant to 15 U.S.C. 1410, the Administrator must determine that compliance would cause the petitioner substantial economic hardship and that the petitioner has in good faith attempted to comply with each standard from which it requests to be exempted. He must also find that the exemption is consistent with the public interest and the objectives of the National Traffic and Motor Vehicle Safety Act. There appears to be little question that immediate compliance with all standards is not feasible for this company, whose latest annual net income was less than $6,000, and that to require compliance as a pre-condition to entry in the American market would cause substantial economic hardship. Sbarro appears to be making a good faith effort to achieve compliance within 1 and 2 years with four standards. Its attempt to comply with the eight remaining standards, in its view, would destroy the sales appeal of the vehicle. With the exception of Standard No. 215, *Exterior Protection*, the Administrator finds it difficult to understand how such items as interior padding, improved door locks, an side door beams significantly affect the character of the replica. It is clear, however, that Sbarro lacks the financial resources to presently effect compliance, and a 3-year exemption is being granted with the expectation that Sbarro will work to achieve conformance by the end of that period. An exemption is in the public interest and consistent with the objectives of the Act since it will allow importation of a low-emission motor vehicle and afford the American consumer a choice of product not otherwise available. Because of the small number of vehicles likely to be produced under the exemption, the effect upon traffic safety should be minimal.

In consideration of the foregoing, Ateliers d'Etudes de Construction Automobiles S.a.r.l. is hereby granted NHTSA Exemption No. 75-23 from the following Federal motor vehicle safety standards (sections of Title 49, Code of Federal Regulations), expiring on the dates indicated:

October 1, 1976

Standard No. 101 (§ 571.101), *Control Location, Identification, and Illumination* (illumination of controls for headlamps, hazard warning, and windshield wiper system).

Standard No. 114 (§ 571.114), *Theft Protection* (audible warning).

October 1, 1977

Standard No. 108 (§ 571.108), *Lamps, Refective Devices and Associated Equipment* (photometric requirements for front side marker lamps and backup lamps).

Standard No. 208 (§ 571.208), *Occupant Crash Protection* (audible and visible warnings).

October 1, 1978

Standard No. 201 (§ 571.201), *Occupant Protection in Interior Impact.*

Standard No. 202 (§ 571.202), *Head Restraints.*

Standard No. 202 (§ 571.203), *Impact Protection for the Driver from Steering Control System.*

Standard No. 204 (§ 571.204), *Steering Control Rearward Displacement.*

Standard No. 206 (§ 571.206), *Door Locks and Door Retention Components.*

Standard No. 212 (§ 571.212), *Windshield Retention.*

Standard No. 214 (§ 571.214), *Side Door Strength.*

Standard No. 215 (§ 571.215), *Exterior Protection.*

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410); delegation of authority at 49 CFR 1.51.)

Issued on November 6, 1975.

JAMES B. GREGORY,
Administrator.

[Docket No. 23138]

LOOMIS CORP. ET AL.

Proposed Approval Regarding Control and Interlocking Relationships

Application of Loomis Corporation, Loomis Courier Service, Inc., F. E. Baker, G. A. DeBon, O. H. Johnson, C. W. Loomis, W. F. Loomis, J. O. Wilson, and Q. M. Rochefort for exemption, approval and/or disclaimer under sections 408 and 409 of the Federal Aviation Act of 1958, as amended (the Act) Docket 23138.

Notice is hereby given, pursuant to the statutory requirements of section 408 (b) of the Federal Aviation Act of 1958, as amended, that the undersigned intends to issue the attached order under delegated authority. Interested persons are hereby afforded until November 17, 1975 within which to file comments or request a hearing with respect to the action proposed in the order.

Dated at Washington, D.C., November 7, 1975.

[SEAL] WILLIAM B. CALDWELL, Jr.,
Director, Bureau of Operating Rights.

Issued under delegated authority. Application of Loomis Corporation, Loomis Courier Service, Inc., F. E. Baker, G. A. Debon, O. H. Johnson, C. W. Loomis, W. F. Loomis, J. O. Wilson, and Q. M. Rochefort for exemption, approval, and/or disclaimer under sections 408 and 409 of the Federal Aviation Act of 1958, as amended (the Act).

ORDER GRANTING APPROVAL

Loomis Corporation and Loomis Courier Service, Inc. (Loomis Courier), request exemption or approval without hearing under section 408 of the Federal Aviation Act of 1958, as amended (the Act), with respect to the control relationship described herein involving the proposed acquisition of Stanley Smith Security, Inc. (Smith), by Loomis Corporation. In addition, the aforementioned corporate applicants and F. E. Baker, G. A. DeBon, O. H. Johnson, C. W. Loomis, W. F. Loomis, J. O. Wilson, and Q. M. Rochefort, individually, seek approval or disclaimer of jurisdiction with respect to the interlocking relationships described herein.

Loomis Corporation controls all the shares of Loomis Armored Car Services, Inc. (Loomis Armored Car), which in turn controls all the shares of Loomis courier,[1] an indirect air carrier by virtue of its operating authorizations as a domestic and international air freight forwarder. Smith is primarily engaged in the private security field, and, among other things, performs passenger-screening services mandated by U.S. Department of Transportation directive at various airports. Such activity has been interpreted by the Board to constitute a "phase of aeronautics."[2] The applicants assert, however, that less than 10 percent of Smith's gross revenues of about $8 million per year have been generated by these activities.

The seven individual applicants, enumerated *supra*, presently constitute a majority of the board of directors of Loomis Corporation. Three of such seven individual applicants, F. E. Baker, C. W. Loomis, and W. F. Loomis, are also directors of two Loomis subsidiaries, Loomis Armored Car and Loomis Courier, and constitute the entire board of each of those two companies. In addition, C. W. Loomis and W. F. Loomis serve as officers of the three Loomis companies, as does G. A. DeBon, another of the seven individual applicants. W. F. Loomis and C. W. Loomis each own more than 5 percent of the outstanding stock of Loomis Corporation. Should the Board consent to the instant relationships, the seven individual applicants would concurrently serve on the board of Smith. The application states that no officer or director of Loomis Corporation or Smith will hold any office or position with any air carrier or any corporation or individual engaged in a phase of aeronautics except Courier and Smith.

No comments respecting this application have been received.

Upon consideration of the facts as presented by the applicants, it is concluded that Loomis Corporation is a person controlling an air carrier, that Loomis Courier is an air carrier, and that Smith is a person engaged in a phase of aeronautics, and that, when consummated, the above-described control relationship will constitute the acquisition of control of a person in a phase of aeronautics by a person controlling an air carrier. Accordingly, the instant acquisition of control is subject to 408(a)(6) of the Act, and can only be authorized by the Board by way of approval, pursuant to section 408(b) of the Act.[3] However, it is found that the consummation of this control relationship will not affect the control of an air carrier directly engaged in the operation of aircraft in air transportation, result in creating a monopoly, or tend to restrain competition.[4] Furthermore, no person disclosing a substantial interest in this proceeding is presently requesting a hearing, and it is therefore determined that the public interest does not require a hearing. Thus, it is found that the above-described control relationship will not be inconsistent with the public interest or fail to fulfill the conditions of section 408 of the Act. In the past, the Board has approved similar control relationships pursuant to the third proviso of section 408(b) of the Act.[5]

Notice of intent to dispose of the application without hearing has been published in the FEDERAL REGISTER, and a copy of such notice has been furnished by the Board to the Attorney General not later than the day following such date of publication, both in accordance with the requirements of section 408(b) of the Act.

The above-described acquisition of control also gives rise to certain interlocking relationships within the meaning of section 409 of the Act. To the extent these interlocking relationships are subject to the jurisdiction of the Board under the terms of that section and Part 251 of the Board's Economic Regulations, however, it is found that they are covered by the approval and exemption conferred by Part 287 of the Board's Economic Regulations. Accordingly, to the extent the instant application requests approval or disclaimer of jurisdiction with respect to interlocking relationships, it shall be dismissed.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.3 and 385.13, it is found that the above-described control relationship should be approved without a hearing pursuant to the third proviso of section 408(b) of the Act. All other requests in docket 23138 should be dismissed.

Accordingly, it is ordered, That:

1. The instant control relationship involving the acquisition of Smith by Loomis Corporation be and it hereby is approved pursuant to the third proviso of section 408(b) of the Act.

[1] This relationship was the subject of application of Loomis Corporation *et al.*, order 69-5-50, May 13, 1969.

[2] Cf. Braniff Airways, Inc., and Braniff International Corporation, order 75-1-23, Jan. 7, 1975.

[3] Cf. Anthony Cosimano *et al.*, order 75-2-89, Feb. 21, 1975; and Berwind Corporation *et al.*, order 69-11-12, Nov. 4, 1969.

[4] Our assessment of the likely competitive impact of the proposed acquisition of control is based on our review of the application and related financial statements submitted by the applicants. We note that the acquiring firm, Loomis Corporation, controls a firm whose principal line of commerce is air freight forwarding. We note further that the relevant line of commerce of the acquired firm, Smith, is airport security screening. It is not our belief that any cross-elasticity of demand or reasonable interchangeability of use exists between these two particular lines of commerce. Accordingly, we find no significant horizontal competitive overlap should result from this acquisition. Also, we have found no evidence indicating a subjective intent on the part of Loomis Corporation to make a *de novo* entry into the airport security screening business, or that Loomis Corporation should otherwise be viewed as a likely potential entrant into that market on a *de novo* basis. It would not appear then that the instant acquisition of control will eliminate a significant potential entrant (and new competitor) into the airport security screening business. Further, we do not consider the airport security screening business to be an unduly concentrated industry, nor have we been able to discern a significant trend towards concentration in this industry. Accordingly, we have determined that the proposed acquisition of control will not violate traditional merger guidelines.

[5] Cf. Pan American World Airways, order 75-5-117, May 29, 1975.

V 40 I 219 NOV 12 75 XUM

2. Except to the extent noted above, all other requests in docket 28138 be and they hereby are dismissed.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within 10 days from the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

[FR Doc. 75-30502 Filed 11-11-75; 8:45 am]

[Docket No. 28417]

PAN AMERICAN WORLD AIRWAYS, INC.

Proposed Approval

Application of Pan American World Airways, Inc., for approval under section 408 of the Federal Aviation Act of 1958, as amended, or an exemption pursuant to section 416 thereof, Docket 28417.

Notice is hereby given, pursuant to the statutory requirements of section 408(b) of the Federal Aviation Act of 1958, as amended, that the undersigned intends to issue the attached order under delegated authority. Interested persons are hereby afforded until November 17, 1975 within which to file comments or request a hearing with respect to the action proposed in the order.

Dated at Washington, D.C., November 6, 1975.

[SEAL] WILLIAM B. CALDWELL, JR.,
Director, Bureau of Operating Rights.

Issued under delegated authority. Application of Pan American World Airways, Inc., for approval under section 408 of the Federal Aviation Act of 1958, as amended, or an exemption pursuant to section 416 thereof.

ORDER OF APPROVAL

Pan American World Airways, Inc. (Pan American), seeks approval without a hearing pursuant to section 408 of the Federal Aviation Act of 1958, as amended (the Act), or in the alternative, seeks an exemption pursuant to section 416(b) thereof, of the sales transaction described herein.

Pan American and Alaska Airlines, Inc. (Alaska), have entered into agreements pursuant to which Pan American will sell to Alaska five B-727 aircraft at a price of $2.825 million per airplane and spare engines at a total price of $674,000, and Alaska will transfer to Pan American four B-720 aicraft for a total of $1.6 million.

Pan American is a certificated air carrier holding domestic trunkline and international authorizations.

Alaska is a certificated air carrier holding domestic and international authorizations.

Pan American has filed for Board action the agreement involving Alaska's sale of four B-720's, contending that the sale by Pan American is not subject to section 408 of the Act because the aircraft involved do not constitute a sufficient portion of Pan American's fleets.[1]

The four B-720's to be sold by Alaska pursuant to the agreement which has been submitted for Board action will constitute 25 percent of the number of aircraft in Alaska's fleet, 27 percent of the seating capacity of its fleet, and 4 percent of the fleet's book value.

In support of the application, the applicant contends that the five B-727's to be acquired by Alaska are better suited to its operations than the B-720's it will be selling; that the sales of aircraft are arm's-length transactions; that the net effect of the transactions will be to increase Alaska's seating capacity; that Part 299 of the Board's Regulations would have permitted exemption had not the aircraft exceeded permissible percentages of Alaska's capacity; that the Board has authorized similar transactions in the past;[2] that the Board has granted rapid approval of transactions involving aircraft when it found unusual circumstances affecting the party acquiring aircraft;[3] that Pan American is affected by unusual circumstances in international air transportation; and that the transfer of the four aircraft from Alaska to Pan American would not affect the control of an air carrier directly engaged in operation of aircraft, does not result in creating a monopoly, and does not restrain competition.

No objections to this application or requests for a hearing have been received.

Notice of intent to dispose of this application without a hearing has been published in the FEDERAL REGISTER, and a copy of such notice has been furnished by the Board to the Attorney General not later than the day following the date of such publication, both in accordance with the requirements of section 408(b) of the Act.

Upon consideration of the foregoing, it is concluded that the five B-727's to be sold by Pan American as part of this transaction do not constitute a substantial part of the property of an air carrier and that, as a result, the transaction is not subject to section 408 of the Act. It is further concluded that the four B-720's to be sold by Alaska do constitute a substantial part of the property of an air carrier and that the transaction involving them is subject to section 408 of the Act. However, it is further concluded that the transaction will not affect the control of an air carrier directly engaged in the operation of aircraft in air transportation, or tend to unreasonably restrain trade, substantially lessen competition, or create a monopoly. This sale agreement was entered into after arm's-length bargaining and there appear to be no interlocking or control relationships between Pan American, Alaska Airlines, or any of their affiliates. Furthermore, no person disclosing a substantial interest in the proceeding is currently requesting a hearing, and it is concluded that the public interest does not require a hearing. It does not appear that the transaction will impair Alaska's ability to perform its certificate obligations inasmuch as the purchase by Alaska of five B-727's to which the sale of its four aircraft is tied will have the net effect of increasing Alaska's capacity.

The transaction for which approval is sought is similar to others which have been authorized by the Board and does not raise any new substantive issues.[4] Accordingly, on the basis of these facts, we find that the above-described sales agreement is not adverse to the public interest or otherwise in violation of the Act.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.13 and 385.3, it is found that the foregoing transaction should be approved, under section 408(b) of the Act, without a hearing pursuant to the third proviso thereof, and that, to the extent not granted herein, the application should be dismissed.

Accordingly, it is ordered, That: 1. The subject sales agreement involving the sale of four B-720's by Alaska Airlines, Inc., to Pan American World Airways, Inc., be and it hereby is approved; and

2. Except to the extent specifically granted herein, the application in docket 28417 be and it hereby is dismissed.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within 10 days of the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon the expiration of the above period unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

[FR Doc.75-30501 Filed 11-11-75;8:45 am]

[1] As of June 30, 1975, the five B-727's constituted 4.5 percent of the number of aircraft in Pan American's fleet, 1.5 percent of the book value of aircraft in its fleet, and 2.3 percent of the aircraft load capacity of its fleet. Based on these figures and an analysis of the agreement involving the sale of the B-727's which was filed with the Board for information purposes, the aircraft do not appear to constitute a substantial part of the properties of Pan American. (Cf. PAA-Panagra aircraft lease, order E-23631, May 3, 1966.) The Board has in the past disclaimed jurisdiction in aircraft sales transactions involving similar circumstances. (See orders 70-11-13 and 70-11-14, Nov. 4, 1970.)

[2] See Continental Sale of Equipment, order E-23063, Dec. 30, 1965. In this order, the Board approved the sale by Continental Airlines of 42 percent of the number of its aircraft and 27 percent of its seating capacity for the purpose of acquiring more suitable aircraft and raising capacity.

[3] See AAXICO-Saturn Lease Exemption, order E-22087, Apr. 27, 1965.

[4] See n. 2, *supra*.

[Docket No. 28440; Order 75-11-23]

VARIOUS CARRIERS

Order Dismissing Complaint Regarding Domestic Passenger-Fare Increase

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 7th day of November 1975.

By tariff revisions[1] marked to become effective November 15, 1975, all ten domestic trunkline and eight regional carriers[2] operating within the 48 contiguous states and the District of Columbia, propose a three percent general increase in the level of their passenger fares. In their justifications, the carriers argue essentially that such an increase is warranted under the analysis contained in Order 75-9-115, September 30, 1975, even without consideration of any additional factors which have taken place since that time.

A complaint has been filde by the Honorable John E. Moss, et al., Members of Congress (MOC), requesting the Board to investigate the issue of price elasticity, contending that "the public cannot sustain another temporary period of depressed revenues."[3] The complainant also contends that the Board has approved several fare increases over the past few years through automatic application of its DPFI regulatory standards. In summary, the complainant believes that the proper course of action for the Board would be to suspend the proposed increase and to institute an investigation to determine the effect of the proposed fares upon the movement of traffic.

Upon consideration of all relevant matters, the Board finds that the complaint does not set forth sufficient facts to warrant investigation of the proposals, and consequently the request for suspension will be denied and the complaint dismissed.

The carriers have correctly concluded that application of the Board's ratemaking approach, explained fully in Orders 75-6-72 and 75-8-99, with the inclusion of a three percent fare increase, results in a ratemaking return on investment of 11.98 percent (See Attachment A below). Accordingly the proposed three percent fare increase is justified. No argument has been advanced that an increase in revenue is not needed to offset experienced increases in airline costs.

The Board has extensively and repeatedly discussed the question of price elasticity raised by the complaint in disposing of similar complaints previously filed by MOC.[4] The thrust of the complaint, once again, is that the Board should suspend the proposed fare increase because it may have a sufficiently adverse impact on traffic to temporarily reduce revenues. However, the Board answered this argument in detail in Order 74-3-43, March 8, 1974, wherein it stated:

Moreover, even assuming the correctness of MOC's assertion that the demand for air transportation has become relatively more price-elastic, it would not follow that the proposed fare increases are unwarranted. As the Board determined in the DPFI, the level of passenger fares must be based on the long-term unit costs of providing air transportation. The fact that a fare increase might temporarily depress revenues would not warrant disapproval if the increase were necessary to cover the unit costs of operation. Failure to permit such increases would in the long run result either in an insufficient level of earnings for the carriers or an inadequate level of service to the public. (p. 4)

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404 and 1002 thereof:

It is ordered, That: (1) The complaint in Docket 28440 is dismissed, and

2. Copies of this order be served on all certificated scheduled carriers operating between points within the 48 contiguous states and the District of Columbia, and the Honorable John E. Moss, et al., Members of Congress.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

APPENDIX A.—*Domestic trunk industry rate of return on investment 48-State scheduled passenger service for the 12 mo ended June 30, 1975*

[Dollar amounts in thousands]

YUSEN AIR & SEA SERVICE COMPANY, LTD., (JAPAN) AND YUSEN AIR & SEA SERVICE (U.S.A.), INC.

Prehearing Conference and Hearing

Notice is hereby given that a prehearing conference in the above-entitled matter is assigned to be held on December 11, 1975, at 10:00 a.m. (local time) in Room 1003B, North Universal Building, 1875 Connecticut Avenue NW., Washington, D.C., before Administrative Law Judge Janet D. Saxon.

Notice is also given that the hearing may be held immediately following conclusion of the prehearing conference unless a person objects or shows reason for postponement on or before November 28, 1975.

Ordinary transcript will be adequate for the proper conduct of this proceeding.

Dated at Washington, D.C., November 5, 1975.

[SEAL] ROBERT L. PARK,
Chief Administrative Law Judge.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

GENERAL TECHNICAL ADVISORY COMMITTEE

Meeting

NOVEMBER 7, 1975.

The General Technical Advisory Committee will hold a meeting on December 8, 1975, at the Argonne National Laboratory, Argonne, Illinois, Building 362, Auditorium. The meeting will be open to the public and will begin at 9 a.m.

The following agenda items will be discussed:

9–9:30 -----	Opening remarks by Dr. Philip C. White, Assistant Administrator for Fossil Energy.
9:30–10:30 -	Demonstration Plant Program chaired by George R. Risi, Director, Division of Fossil Demonstration Plants; GTAC members to discuss and comment upon.
10:30–11:30-	Synthetic Fuels Commercialization Program chaired by Mr. Harry R. Johnson, Director, Office of Program Planning and Analysis; GTAC members to discuss and comment upon.
11:30–12:30-	Fossil Energy MHD Program chaired by Dr. William D. Jackson, Director, Division of MHD; GTAC members to discuss and comment upon.
12:30–1:30 -	Recess for Lunch.
1:45–2:45 --	ERDA role of National Laboratories and Energy Research Centers by Dr. Michael I. Yarymovych, Assistant Administrator for Laboratory and Field Coordination.
2:45–3:15 --	Discussion on roles of Laboratories and Energy Research Centers.
3:15–4:15 --	ERDA and Fossil Energy University Program by Mr. Colonel C. Armstrong, Assistant Director for Operations, Division of University Manpower and Development Programs and Dr. Paul C. Scott, Acting Assistant Director, University Relations, Division of Fossil Energy Research.
4:15–5 -----	General Discussion.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in agenda items, scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 12 copies thereof, postmarked no later than December 26, 1975, to Mr. George Fumich, Jr., Secretary, General Technical Advisory Committee, U.S. Energy Research and Development Administration, Fossil Energy, Washington, D.C. 20545. Comments shall be based on the above agenda items.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call on December 5, 1975, to the Office of the Secretary of the Committee on (202) 376–4644 between 8:30 a.m. and 5 p.m., eastern time.

(c) Questions at the meeting may be propounded only by members of the General Technical Advisory Committee.

(d) Seating to the public will be made available on a first-come, first-served basis.

(e) Copies of the minutes will be made available for copying, following their certification by the Chairman, in accordance with the Federal Advisory Committee Act, at the Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue, N.W., Washington, D.C. 20545, upon payment of all charges required by law.

HARRY L. PEEBLES,
Deputy Advisory Committee Management Officer.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 455–2; PF22]

ATLANTIC AND PACIFIC RESEARCH, INC.

Filing of Pesticide Petition

Atlantic and Pacific Research, Inc., PO Box 14366, N. Palm Beach FL 33408, has submitted a petition (PP 6F1691) to the Environmental Protection Agency which proposed the establishment of a regulation (40 CFR Part 180) exempting the plant growth regulator aqueous extract of seaweed meal from the requirement of a tolerance for residues. The proposed analytical method for determining residues is a radish leaf bioassay procedure.

Notice of this submission is given pursuant to the provisions of 408(d)(1) of the Federal Food, Drug, and Cosmetic Act. Interested persons are invited to submit written comments on the petition referred to in this notice to the Federal Register Section, Technical Services Division (WH–569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M St., SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting them. The comments should be submitted as soon as possible and should bear a notation indicating the petition number "PP 6F1691". Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: November 4, 1975.

JOHN B. RITCH, Jr.,
Director, Registration Division.

DEPARTMENT OF AGRICULTURE

Crisis Exemption To Control West Indian Sugarcane Root Borer on Citrus in Florida

Pursuant to the provisions of Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), the Environmental Protection Agency (EPA) hereby gives notice that the U.S. Department of Agriculture (USDA) has availed itself of a crisis exemption for use of the pesticide heptachlor to control the West Indian sugarcane root borer on citrus crops outside an established quarantine area near Apopka, Florida. This exemption is subject to the provisions of §§ 166.2, 166.8, and 166.9 of 40 CFR Part 166. These regulations concerning exemption of Federal and State agencies for the use of pesticides under emergency conditions were published in the FEDERAL REGISTER on December 3, 1973 (38 FR 33303). As required, the USDA has submitted in writting the following certified information.

According to the USDA, the West Indian sugarcane root borer (*Diaprepes abbreviatus*) poses a serious threat to U.S. citrus production. This exotic beetle became established in the United States in 1968 in Apopka, Orange County, Florida. The adult beetles feed on foliage of a variety of plants; the host range is wide, including many commercial crops, especially sugarcane and citrus. At present, there are no pesticides registered to control this pest on citrus.

Treatment and eradication efforts began on July 7, and were completed on July 15, 1975. Initially, the USDA indicated that approximately 250 acres outside an established quarantine area would be treated; however, only 144 acres of infested grove outside that area were treated with approximately 720 pounds of heptachlor. A soil application of 10 percent granular heptachlor was applied at 5 pounds actual per acre, using ground equipment. The heptachlor was disked into the top 3 inches of the soil. This 144 acre infested grove is located near Forest City, Seminole County, Florida. The program was directed by the Plant Protection and Quarantine Programs' personnel in Florida. A monitoring program is in operation to detect trends in the change of heptachlor residues in environmental components through time.

The official file concerning this exemption is available for inspection in the Office of the Director, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., SW., Room E–347, Washington, D.C. 20460.

Dated: November 5, 1975.

JOHN B. RITCH, Jr.,
Director, Registration Division.

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered In Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by each applicant will be available for examination at the Environmental Protection Agency, Room EB–31, East Tower, 401 M Street, SW., Washington, DC 20460.

On or before January 12, 1976, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH–569), Office of Pesticide Programs, 401 M Street, SW., Washington, DC 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60-day period has expired. If no claims are received within the 60-day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after January 12, 1976.

Dated: November 5, 1975.

JOHN B. RITCH, Jr.,
Director, Registration Division.

DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Control the Oriental Fruit Fly in California

Pursuant to the provisions of section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), notice is hereby given that the Environmental Protection Agency (EPA) has granted a specific exemption to the U.S. Department of Agriculture (hereafter referred to as the "Applicant") to use a toxicant, viscid bait consisting of 88 percent methyl eugenol, 5 percent Naled and 7 percent Thixcin E; a toxicant bait consisting of 4 parts Staley's No. 7 protein bait and 1 part Malathion; and a Diazinon (50 percent wettable powder) spray for the control of recently established infestations of the Oriental fruit fly located in San Diego County and the municipality of National City, California. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, issued December 3, 1973 (38 FR 33303), which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information set forth in the application. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M Street SW., Room E–315, Washington, D.C. 20460.

According to the Applicant, the Oriental fruit fly (*Dacus dorsalis* Hendel) is one of the most destructive pests of fruits and vegetables. It attacks over 150 crop species, including apricots, avocados, citrus, figs, mangoes, papayas, peaches, pears, peppers, and tomatoes, as well as ornamental plants. This insect thus poses a serious economic threat to the fruit and vegetable industries in the United States. The Oriental fruit fly has been detected in California numerous times in the past 13 years, but eradication has nearly always been possible by male annihilation techniques. Previous to the present situation, the most recent eradication effort occurred on September 24, 1974, when the Applicant availed itself of a crisis exemption to control this pest in San Diego County and the municipalities of San Diego, La Jolla, and Los Angeles. In January of 1975, the EPA authorized a specific exemption to the Applicant for calendar year 1975 to control the Oriental fruit fly in the specified areas of California. On June 6, 1975, the Applicant withdrew its request for a specific exemption because the pest was declared to be eradicated from California.

However, on September 5, 1975, the Applicant again exercised its prerogative in availing itself of another crisis exemption regarding this pest, and so notified the Administrator. In addition, in accordance with § 166.8(c) of the controlling regulations, the Applicant requested a specific exemption for use of Diazinon, Naled, and Malathion, since it was obvious that treatment pursuant to the crisis exemption would continue for more than a total of fifteen (15) days. The treatment area is approximately 90 square miles in San Diego County and National City, California. At present, there are no pesticides registered specifically to control the Oriental fruit fly because the pest is not endemic to the Continental United States.

In terms of the pesticides to be used, pesticide products containing Malathion as the active ingredient are currently registered to control fruit flies in Hawaii. Residue tolerances for Diazinon have been established (except on grains), and application of Diazinon WP foliage sprays is a recognized use pattern. Naled is registered for use on citrus crops as a foliage application. Methyl eugenol is an attractant and Thixcin E is a thickening agent, both of which pose no known threat to man or the environment. The Applicant will use a lure bait, consisting of 7 percent Thixcin E, 88 percent methyl eugenol, and 5 percent Naled, applied at the rate of 3 to 5 milliliters per station in and around the treatment area. The Applicant will also use a Diazinon soil drench (50 percent wettable powder at the rate of 0.25 pounds actual Diazinon per 100 gallons of water) under all host plants where Oriental fruit fly larvae are detected in fruits. Spot applications of a Malathion bait spray will also be made when such larvae are discovered. The amounts of pesticides to be used in the control program will be 10, 200, and 1,000 pounds of actual Diazinon, Naled, and Malathion, respectively. Thus, the amounts of pesticides to be used are small. Economic benefits in eradication of this pest are high since economic losses can also be high if the pest becomes established. The controls proposed will be adequate to prevent misuse of the pesticides and prevent any serious short-term or long-term adverse environmental effects.

After reviewing the application and other available information, EPA has determined that: (a) a pest outbreak of the Oriental fruit fly has occurred; (b) there is no pesticide presently registered and available for use to control the Oriental fruit fly in California; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the Oriental fruit fly is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticides noted above for control of the Oriental fruit fly in California. The specific exemption is also subject to the following additional provisions:

1. The pesticide treatments shall be limited to the California infestations delineated above;

2. The amounts of pesticides to be used in the eradication program will be 10, 200, and 1,000 pounds of actual Diazinon, Naled, and Malathion, respectively;

3. Precautions will be taken to preclude Diazinon spray drift from contaminating small grains; and

4. The specific exemption expires October 21, 1976.

The Applicant has agreed to provide the additional data required for registration of Diazinon, Malathion bait, and a bait consisting of 88 percent methyl eugenol, 5 percent Naled and 7 percent Thixcin E for control of the Oriental fruit fly. The Applicant has further agreed to carry out one of the following three courses of action with regard to these three pesticides:

1. Submit an application for registration;

2. Ensure that an application for registration is submitted by another party; or

3. Withdraw the use of these pesticides no later than October 21, 1976, provided, however, that there are no external conditions which disrupt the planned research or methods development program, making it impossible to obtain the data necessary for registration.

Dated November 6, 1975.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

RADIO ASTRONOMY SERVICE WORKING GROUP FOR 1979 ITU WORLD ADMINISTRATIVE RADIO CONFERENCE

Meeting

NOVEMBER 7, 1975.

An organizational meeting of the Radio Astronomy Service Working Group for the 1979 General World Administrative Radio Conference is scheduled to be held on Wednesday, November 26, 1975, at 9:30 a.m. in Room 752 of the Commission's offices located at 1919 M Street NW., Washington, D.C. Additionally, there will be a preliminary discussion on the interface of problems between the FCC and the issues raised in the Committee on Radio Frequencies working papers.

Membership is restricted to members of the Sub-Committee on Radio Astronomy, Committee on Radio Frequencies, National Academy of Science and to interested Federal Government representatives; however, attendance at this meeting will be open to the general public and any written comments will be accepted.

FEDERAL COMMUNICATIONS COMMISSION
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.75–30627 Filed 11–11–75;8:45 am]

FEDERAL ENERGY ADMINISTRATION

ALLOCATION OF FEEDSTOCK TO SYNTHETIC NATURAL GAS FACILITY

Petition for Assignment of Base Period Volume and Supplier

On July 31, 1974, the Federal Energy Administration issued a Statement of Policy and Special Rule governing the allocation of petroleum feedstocks to synthetic natural gas (SNG) plants (39 FR 27910, August 2, 1974). The special rule sets forth the criteria which are to be considered by the FEA in granting or denying the petition of an SNG manufacturer for ssignment or adjustments of its base period volume under § 211.29 of FEA's Mandatory Petroleum Allocation Regulations (10 CFR 211.29). In the introduction to its statement of policy, the FEA indicated that such petitions would generally be considered on a case-by-case basis. The case-by-case approach was adopted to develop fully the information necessary to ascertain the effects on competing energy users of an allocation decision respecting a given SNG facility.

The Statement of Policy further provided that "in specific cases, opportunity will be afforded interested parties to challenge or support the implementation of this policy through factual or legal presentation." FEA has determined that personal service of notice on all persons who might be aggrieved by the issuance of a decision and order on an SNG petition is impracticable since such persons are not, at this point, readily identifiable. Therefore, in accordance with the July 31, 1974 statement and pursuant to the provisions of 10 CFR 205.23 and 205.33 the FEA hereby provides notice of a petition requesting a base period volume of 2,550,100 barrels per year of butane for the Commonwealth Natural Gas Corporations' SNG plant located at Chesapeake, Virginia. The output of SNG is 30 million cubic feet per day. Tropigas International Corporation, Coral Gables, Florida and Hideca Petroleum Corporation, Houston, Texas would be the designated suppliers of the feedstock.

A file containing all information and data filed in conjunction with this petition, other than confidential business information which FEA has determined to be exempt from the disclosure requirements of 5 U.S.C. 552, will be made available for public inspection and copying at the Freedom of Information Office Public Reading Room, Room 3120, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:30 a.m. and 4:30 p.m., Monday through Friday.

Written comments regarding this petition will be accepted and considered if filed on or before November 24, 1975. Any person submitting written comments with respect to the petition of Commonwealth Natural Gas Corporation should comply with the requirements of 10 CFR 205.23 or 205.33 of the FEA procedural regulations, as appropriate. Comments should be submitted to the Office of Specialty Fuels and Products, Federal Energy Administration, Room 6318, 2000 M Street NW., Washington, D.C. 20461. Comments should be identified on the outside envelope and on documents submitted to FEA with the designation "Allocation of Petroleum Products to Commonwealth Natural Gas Corporation's SNG Plant." Five copies should be submitted.

Dated: November 7, 1975.

DAVID G. WILSON,
Acting General Counsel.

[FR Doc.75–30524; Filed 11–7–75;4:25 pm]

CONFERENCE TO DISCUSS POWER PLANT PRODUCTIVITY

Meeting

Notice is hereby given that a "Conference to Discuss Power Plant Productivity," will be held from 8:30 a.m., to 6 p.m., December 2, 1975, in Room 250 of the Federal Energy Administration at 2626 West Mockingbird Lane, Dallas, Texas.

The purpose of the conference is to provide for an exchange of information and ideas among owner/operators of nuclear and large fossil-fired electric power generating units aimed at improving the productivity of these units.

Invitees to the conference will be from electric utilities located in FEA Region VI, i.e., New Mexico, Oklahoma, Arkansas, Louisiana and Texas that own/operate or have under construction or in planning nuclear and 390 megawatts and larger oil or coal-fired generating units.

The agenda for the meeting is as follows:

8:30–8:45 --	FEA Introductory Remarks.
8:45–9:15 --	FEA Status Report on Actions to Implement Recommendations Contained in Report on Improving the Productivity of Electric Power Plants.
9:15–12 ----	Utility Statements.
12–1:30 ----	Lunch Break.
1:30–4:30 --	Utility Statements.
4:30–5:30 --	Statements by Others.
5:30–6 -----	Summary by FEA & Questions/Answers.
6 ----------	Adjourn.

The meeting is open to the public. The meeting chairman is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the conference chairman will be permitted to so do either before or after the meeting. Members of the public who wish to make oral statements should inform Bob Nelson (202) 961–6193, at least five days before the meeting and reasonable provisions will be made for their appearance on the agenda. Further information concerning this meeting may be obtained from Mr. Nelson.

Minutes of the meeting will be made available for public inspection at the Federal Energy Administration, Washington, D.C., and Dallas, Texas.

FEA intends to hold similar meetings in the near future in Boston, Massachusetts and Atlanta, Georgia. These will be announced in the FEDERAL REGISTER.

Issued at Washington, D.C. on November 9, 1975.

DAVID G. WILSON,
Acting General Counsel.

FEDERAL MARITIME COMMISSION

BARBER LINES, ET AL.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126, or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before November 24, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

In the matter of Barber lines, A/S; Black Star Line; Compagnie Maritime Belge, S.A.; Compagnie Maritime Des Chargeurs Reunis, S.A.; Compagnie Maritime Zairoise, S.A.R.L.; Dafra Lines; Delta Steamship Line, Inc.; Elder Dempster Lines, Ltd.; Farrell Lines Inc.; Nopal West Africa Line.

Notice of agreement filed by:

John K. Cunningham, Chairman, American West African Freight Conference, 67 Broad Street, New York, New York 10004.

V 40 N 219 NOV 12 75 XUM

Agreement No. 10159–1, among Barber Lines, A/S; Black Star Lines; Compagnie Maritime Belge, S.A.; Compagnie Maritime Des Chargeurs Reunis, S.A.; Compagnie Maritime Zairoise, S.A.R.L.; Dafra Lines; Delta Steamship Line, Inc.; Elder Dempster Lines, Ltd.; Farrell Lines Inc. and the Nopal West Africa Line, all of whom are members of the American West African Freight Conference, will amend Agreement No. 10159, a rationalization agreement, to include as a party thereto Westwind Africa Line Ltd.

Dated: November 7, 1975.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

IBERIAN/U.S. NORTH ATLANTIC WESTBOUND FREIGHT CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before December 2, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Stanley O. Sher, Esquire, Billing, Sher & Jones, P. C., Suite 300, 1126 16th Street, NW., Washington, D.C. 20036.

Agreement No. 9615–18, among the member lines of the above-named conference, modifies the basic agreement to provide for a scale of increased maximum fines for succeeding violations of the agreement.

Dated: November 7, 1975.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. ER76-188]

ALABAMA POWER CO.

Filing of Initial Rate Schedule

NOVEMBER 4, 1975.

Take notice that Alabama Power Company on October 20, 1975, tendered for filing an Agreement with Tallapoosa River Electric Cooperative, Inc., intended as an initial rate schedule. The filing is for the proposed Newsite delivery point of the Tallapoosa River Electric Cooperative, Inc., and increase of capacity at the Browns-Uchee (Uchee) delivery point. The delivery points will be served under the Company's Revision No. 1—Rate Schedule REA–1 incorporated in FPC Electric Tariff, Original Volume No. 1, of Alabama Power Company as allowed to become effective, subject to refund, by Commission Order dated September 12, 1974, in FPC Docket No. E–8851.

Copies of the filing were served upon Tallapoosa River Electric Cooperative, Inc., and its attorneys of record, in FPC Docket No. E–8851.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 25, 1975. Protests will be considered by the Commission in determining the appropriate actions to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-195]

ARKANSAS-MISSOURI POWER CO.

Cancellation

NOVEMBER 4, 1975.

Take notice that on October 28, 1975, Middle South Services, Inc., as agent for Arkansas-Missouri Power Company, tendered for filing a notice of cancellation of Supplement No. 2 to Rate Schedule FPC No. 36, filed with the Commission by Middle South Services, Inc., as agent for Arkansas-Missouri Power Company. This rate schedule between the power company and the Union Electric Company became effective on September 1, 1974.

The company requests an effective date of December 1, 1975 for this cancellation. Notice of the proposed cancellation has been served on the Union Electric Company.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 17, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP75-86]

COLORADO INTERSTATE GAS CO. AND COLORADO INTERSTATE CORP.

Extension of Procedural Dates and Prehearing Conference

NOVEMBER 4, 1975.

On October 23, 1975, Colorado Interstate Gas Company, a division of Colorado Interstate Corporation (CIG), filed a motion to extend the procedural dates set by order issued April 30, 1975, as most recently extended by notice issued July 29, 1975, and to establish a prehearing conference in the above-designated proceeding.

Notice is hereby given that a prehearing conference will be held at 10:00 e.s.t. on December 2, 1975, in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. (20426). The procedural dates in the above proceeding are modified as follows:

Service of Intervenor Testimony, January 9, 1976.
Service of Company Rebuttal, January 23, 1976.
Hearing, March 2, 1976 (10 a.m., e.s.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30409 Filed 11-11-75;8:45 am]

[Project Nos. 892, 1100]

FOREST SERVICE, DEPARTMENT OF AGRICULTURE

Order Vacating Land Withdrawals

NOVEMBER 4, 1975.

The Forest Service, United States Department of Agriculture, has requested that the land withdrawals for transmission line Project Nos. 892 and 1100 be vacated in their entirety, thereby requiring Commission consideration under section 24 of the Federal Power Act.

NEW MEXICO PRINCIPAL MERIDIAN, COLORADO

1. Portions (totaling about 6 acres) of the following described subdivisions were withdrawn pursuant to the filing on May 5, 1928, of an application for license for Project No. 892 for which the Commission gave notice of land withdrawal to the General Land Office (now Bureau of Land Management) by letter dated May 10, 1928:

T. 47 N., R. 7 E.,
Sec. 13, SE¼NE¼, N½SE¼.

T. 47 N., R. 8 E.,
Sec. 18, S½NW¼.

2. Portions (totaling about 6 acres) of the following described subdivisions were withdrawn pursuant to the filing on June 6, 1930, of an application for license for Project No. 1100 for which the Commission gave notice of land withdrawal to the General Land Office by letter dated June 16, 1930:

T. 47 N., R. 7 E.,
Sec. 23, NE¼NE¼;
Sec. 24, N½NW¼, SE¼NW¼.

All of the subject lands lie within the Rio Grande National Forest.

Project No. 892 consistent of a 16 kv distribution line, 1.11 miles long, which supplied power to the Antoro Mine near the town of Bonanza in northern Saguache County, Colorado. Project No. 1100 consisted of a 16 kv distribution line, 0.68 of a mile long, which supplied power to a saw mill near Bonanza.

The lines that constituted Project Nos. 892 and 1100 were not primary lines or parts of a "project" as defined in section 3(11) of the Federal Power Act, and the licenses for both projects have been surrendered. The Forest Service has reported that the distribution lines on the withdrawn lands are now covered by special use permit.

The Commission finds. The withdrawals for Project Nos. 892 and 1100 serve no useful purpose and should be vacated.

The Commission orders. The withdrawals pursuant to the applications for Project Nos. 892 and 1100 are hereby vacated in their entirety.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

HAMPSHIRE GAS CO.

Further Extension of Procedural Dates

NOVEMBER 3, 1975.

On October 29, 1975, The Maryland Public Service Commission filed a motion to extend the procedural dates fixed by order issued May 30, 1975, as most recently modified by notice issued August 18, 1975, in the above-designated proceeding.

Upon consideration, notice is hereby given that the procedural dates in the above proceeding are modified as follows:

Service of Intervenor and additional Staff Testimony, December 12, 1975.
Service of Company Rebuttal, December 24, 1975.
Hearing, January 13, 1976 (10:00 a.m., e.s.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30402 Filed 11-11-75;8:45 am]

[Docket No. ER76-70]

INTERSTATE POWER CO.

Order on Rehearing

NOVEMBER 5, 1975.

By order issued September 10, 1975, we rejected a proposed increase in rates filed herein by Interstate Power Company (Interstate) on August 13, 1975, since that filing was based on what we considered to be stale data. On September 8, 1975, the Cooperative Power Association (CPA) filed a petition to intervene which we did not consider in our September 10 order. On October 6, 1975, Interstate filed an Application for Rehearing of our order of September 10, 1975.

CPA states in its petition to intervene that the rate increase sought by Interstate contravenes the existing contract rights and responsibilities between CPA and Interstate. Our review of Interstate's Rate Schedule FPC No. 88, the agreement governing transmission service between Interstate and CPA as accepted for filing effective May 1, 1968, indicates that the agreement provides for a fixed rate for such transmission service, and does not permit unilateral rate increase filings to increase such rates. Accordingly, Interstate's proposed increase in rates is barred by the rule of Mobile-Sierra.[1]

The pertinent parts of the contract between CPA and Interstate contain the following provisions. Section 1.10(c) provides a specific charge for each Kwh delivered. The term of the agreement, pursuant to § 3.15 thereof, is of indefinite duration, subject to termination by either party upon four years written notice. The agreement also provides, in § 3.17, that "This Agreement, as well as any amendment thereof, is subject to the approval of any regulatory body or bodies having jurisdiction thereof." Amendments are specifically governed by § 3.18 "This Agreement contemplates amendment from time to time of the various original exhibits attached hereto."

The meaning of these provisions when read together is clear. Amendments, if any, are subject to the approval of the regulatory body having jurisdiction. However, any amendment contemplated is restricted to the original exhibits at-

[1] United Gas Pipe Line Co. v. Mobil Gas Service Corp., 350 U.S. 332 (1956); F.P.C. v. Sierra Pacific Power Co., 350 U.S. 348 (1956).

V 40 N 219 NOV 12 75 XUM

tached to the agreement, and not to the term (including rates) of the agreement itself. It is thus clear that Interstate is prohibited from unilaterally increasing its rates to CPA. As the United States Court of Appeals for the District of Columbia Circuit so clearly stated in Richmond Power and Light, et al. v. F.P.C., 481 F.2d 490 (1974), "[t]he rule of Mobile-Sierra and Memphis is refreshingly simple. The contract between the parties governs the legality of the filing. Rate filings consistent with contractual obligations are valid." 481 F.2d at 493 (footnotes omitted). Therefore, Interstate's filing for a rate increase pursuant to section 205 must be rejected on Mobile-Sierra grounds. Accordingly, we need not take any action on Interstate's application for rehearing since the arguments therein go only to our rejection of the filing on the basis of the staleness of the data supporting that increase. We shall, however, grant CPA's petition to intervene.

The Commission finds. Good cause exists to permit CPA to intervene in the instant proceeding.

The Commission orders. (A) The above named petitioner is hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission. *Provided, however,* That the participation of such intervenor shall be limited to matters affecting rights and interests specifically set forth in its petition to intervene; *And provided, further,* That the admission of such intervenor shall not be construed as recognition that it might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30419 Filed 11-11-75;8:45 am]

[Docket No. ER76-191]

INTERSTATE POWER CO.

Revised Exhibits to Rate Schedule

NOVEMBER 4, 1975.

Take notice that on October 24, 1975, Interstate Power Company (IPCo) tendered for filing: Seventh Revised Exhibit C; Seventh Revised Exhibit E; and, Seventh Revised Exhibit F to its Rate Schedule FPC No. 88.

IPCo states that revisions which have been made in these exhibits are: (1) Elimination of existing CPA 24KV Amboy Substation; (2) add new CPA 69KV Sterling Center Substation; (3) add new CPA 69KV Willow Creek Substation; (4) revise CPA Winnebago point of delivery; (5) add CPA 69KV Midway Substation. IPCo further states these changes either have been recently completed or are expected to be completed this year.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 24, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP73-48, (PGA No. 76-1b)]

NORTHERN NATURAL GAS CO.

Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

NOVEMBER 4, 1975.

Take notice that Northern Natural Gas Company on October 28, 1975, tendered for filing First Substitute Tenth Revised Sheet No. 3a of its F.P.C. Gas Tariff, Original Volume No. 4. Northern states that the proposed changes, for which it requests an effective date of October 2, 1975, would decrease the rate per Mcf to jurisdictional customers by 1.52¢ per Mcf. Northern states that this change results from revised rates filed by Colorado Interstate on October 14 to become effective October 1, 1975. Northern states that the revised rates of Colorado Interstate reflect the net effect of a general increase at Docket No. RP75-86 and a Purchased Gas Adjustment. Northern states that Colorado Interstate is the pipeline supplier to Northern for sales made under Volume 4.

Northern states that copies of the filing were served upon the Gas Utility Customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 17, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30413 Filed 11-11-75;8:45 am]

[Project No. 108]

NORTHERN STATES POWER CO.

Issuance of Annual License

NOVEMBER 4, 1975.

On February 24, 1970 Northern States Power Company, Licensee for Chippewa Reservoir Project No. 108, located in Sawyer County, Wisconsin, filed an application for a new license under the Federal Power Act (Act) and Commission regulations thereunder.

The Chippewa Reservoir (Flowage) Project consists of: (1) A dam about 1,290 feet long and about 50 feet high, comprising a concrete gravity control section 78 feet long with three tainter gates 20 feet wide and 26 feet high and three steel vertical sliding sluice gates 7 feet wide and 10 feet high, and two earth-fill concrete core wall sections extending 234 feet on the west side and 978 feet on the east side; (2) Chippewa Reservoir which impounds 223,000 acre-feet of useable storage capacity with a water surface area of about 15,800 acres at normal full pool elevation 1318.0 (m.s.l.); and (3) all other facilities and interests appurtenant to operation of the project.

The Chippewa Reservoir is a storage reservoir, impounded primarily for regulation of the flow of the Chippewa River for downstream hydroelectric power production. There are no generating facilities at the project. During the winter months, the reservoir is drawn down to accommodate snow melt and spring rains, thereby contributing to flood control. The regulated flow of the Chippewa River provides for low-flow augmentation downstream. During the summer months, as nearly as is practicable, reservoir fluctuations are held to three feet in the interest of recreational activities.

The license for Project No. 108 was issued effective August 8, 1921 for a period ending August 7, 1971. Since the date of expiration of the original license, the project has been operated under annual licenses.

Evidentiary hearings on the issues related to the relicensing application and the recommendations for Federal takeover were completed and the record closed. However, on February 14, 1975, the Commission issued an order reopening the record in this proceeding in order that a Land Use and Resource Management Plan, relating to Federal takeover of the project, could be introduced into evidence and opportunity afforded for cross-examination thereupon. According to the joint petition of the Secretaries of Agriculture and the Interior, this plan was "to be prepared through a cooperative effort by the United States Forest Service and the Lac Courte Oreilles Band." The Commission ordered this plan to be filed within eight months of the February 14, 1975 date of issuance of the order. A hearing will be held before an Administrative Law Judge on issues presented by the filing of the management plan.

On March 21, 1975, the Commission's authority to issue annual licenses for Project No. 108, notwithstanding the refusal of the Lac Courte Oreilles Band to consent to such further use of tribal lands by the licensee, was affirmed by the United States Court of Appeals for the District of Columbia Circuit (510 F. 2d 198 (D.C. Cir. 1975)). In order that all rights be preserved and that the status quo be maintained pending determination of the questions presented, notice is given in accordance with § 16.5 of the regulations under the Federal Power Act of the issuance of annnual license for Project No. 108 for the period of August 8, 1975, through August 7, 1976, or until Federal takeover, or the issuance of a new license, whichever comes first, for the continued operation and maintenance of the project, subject to the terms and conditions of its present license.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30414 Filed 11-11-75;8:45 am]

[Project No. 137]

PACIFIC GAS & ELECTRIC CO.

Issuance of Annual License

NOVEMBER 5, 1975.

On December 26, 1972, Pacific Gas & Electric Company, Licensee for the Mokelumne River Project No. 137, located in Alpine, Amador, and Calaveras Counties, California, filed an application for a new license under the Federal Power Act and Commission regulations thereunder.

The license for Project No. 137 was issued effective November 24, 1925, for a period ending November 23, 1975. In order to authorize continued operation and maintenance of the project pending completion of Commission action on Licensee's application, it is appropriate and in the public interest to issue an annual license to Pacific Gas & Electric Company for the continued operation and maintenance of Project No. 137.

Take notice that an annual license is issued to Pacific Gas & Electric Company (Licensee) for the period November 24, 1975, to November 23, 1976, or until Federal takeover, or the issuance of a new license for the project, whichever comes first, for the continued operation and maintenance of Project No. 137, subject to the terms and conditions of its present license.

KENNETH F. PLUMB,
Secretary.

[Dockets Nos. RP73-114, RP74-24 (PGA75-3)]

TENNESSEE GAS PIPELINE CO.

Order Granting Motion To Terminate Investigation

NOVEMBER 3, 1975.

On October 1, 1975, Tennessee Gas Pipeline Company (Tennessee) filed herein a motion to terminate the investigation initiated by the Commission in its order issued in these dockets on June 30, 1975. The said investigation related to two small producer purchases by Tennessee at rates in excess of the level established by Opinion 699-H.

In its motion, Tennessee refers to the fact that subsequent to the order of June 30, 1975, the Commission issued Opinion No. 742, establishing the just and reasonable rate level for small producer purchases at a level not exceeding 130 percent of the rate for comparable purchases from large producers. Tennessee states that the two small producer purchases at issue, Dow Chemical and Estate of Coates, are at rate levels below those established in Opinion No. 742, and are therefore just and reasonable.

A review of the two purchases demonstrates that they are, in fact, at rates below those established in Opinion No. 742. Since the subject rates are just and reasonable under the standards of Opinion No. 742, the investigation thereof is no longer necessary, and should be terminated. Accordingly, Tennessee's motion will be granted.

The Commission orders. (A) The investigation initiated by the Commission's order issued in these dockets on June 30, 1975, is hereby terminated.

(B) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. RP76-30]

TEXAS GAS PIPE LINE CORP.

Proposed Changes in Gas Tariff

NOVEMBER 4, 1975.

Take notice that Texas Gas Pipe Line Corporation (TGPLC), on October 24, 1975, tendered for filing proposed changes in its FPC Gas Tariff First Revised Volume No. 1. The proposed changes would provide for the inclusion of a purchase gas adjustment (PGA) clause in the current tariff of TGPLC. TGPLC states that the principal reason for the proposed PGA clause is to enable it to better reflect the cost of purchased gas in the rates it charges its resale customers under existing rate schedules CD-1 and G-1. TGPLC also states that the instant filing does not propose any change in its currently effective rates. TGPLC has requested Commission approval to make the tariff changes effective on October 24, 1975.

TGPLC states that copies of its filing were served upon the company's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.0 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 17, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP75-75]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Filing Pursuant to Commission Order

NOVEMBER 5, 1975.

Take notice that on October 28, 1975, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing certain revisions to its FPC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2, as required by Commission order issued October 16, 1975, in the referenced docket. Transco states that this filing has the effect of: (1) Reflecting an increase in its rates for storage service under Rate Schedule S-2 to track increased storage costs from Texas Eastern; (2) eliminating certain costs for carrying charges under an advnce payment agreement with Louisiana Land and Exploration Company (LL&E); and (3) eliminating all advance payments not reflected in the original filing (March 14, 1975) in this docket. Transco states further that this filing should not be deemed to prejudice its rights of rehearing and appeal with re-

V 40 N 219 NOV 12 75 XUM

spect to the elimination of costs for carrying charges under the LL&E agreement and those advance payments not reflected in the original filing.

Transco requests that the instant filing be made effective as of October 1, 1975, subject to refund, in accordance with the aforementioned October 16, 1975, order herein.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 19, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP76-133]

UNITED GAS PIPE LINE CO. AND FLORIDA GAS TRANSMISSION CO.

Application

NOVEMBER 4, 1975.

Take notice that on October 16, 1975, United Gas Pipe Line Company (United), 1500 Southwest Tower, Houston, Texas 77002, and Florida Gas Transmission Company (Florida Gas), P.O. Box 44, Winter Park, Florida 32789, jointly Applicants, filed in Docket No. CP76-133 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicants state that they agreed pursuant to the terms of a letter agreement dated July 29, 1975, for Florida Gas to deliver or cause to be delivered to United up to 1,000 Mcf of natural gas per day at a point in the Ichibon (Hockley) Field, on United's pipeline in the Jose Maris Uranaga Grant, Bee County, Texas. United would redeliver equal volumes to Florida Gas at mutually agreeable existing points of interconnection. Applicants state that no facilities are proposed in the instant application, and that the proposed exchange would be straight gas-for-gas, with no price involved.

Any person desiring to be heard or to make any protest with reference to said application should on or before November 25, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30417 Filed 11-11-75;8:45 am]

FEDERAL RESERVE SYSTEM

BROWARD BANCSHARES, INC.

Acquisition of Bank

Broward Bancshares, Inc., Fort Lauderdale, Florida, has applied for the Board's approval under section 3(a)(5) of the Bank Holding Company Act (12 U.S.C. 1842(a)(5)) to merge with Charter Bankshares Corporation, Jacksonville, Florida, under the charter and name of Broward Bancshares, Inc. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of either the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than December 4, 1975.

Board of Governors of the Federal Reserve System, November 4, 1975.

[SEAL] ROBERT SMITH III,
Assistant Secretary of the Board.

[FR Doc.75-30471 Filed 11-11-75;8:45 am]

FIRST BANC GROUP OF OHIO, INC., COLUMBUS, OHIO

Order Approving Acquisition of Citizens Bank & Trust Company Wadsworth, Ohio

First Banc Group of Ohio, Inc., Columbus, Ohio (Applicant), a bank holding company within the meaning of the Bank Holding Company Act, has applied for approval of the Board of Governors of the Federal Reserve System, under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)), to acquire up to 100 percent, less directors' qualifying shares, of The Citizens Bank & Trust Company, Wadsworth, Ohio (Bank).

Notice of the application affording opportunity for interested persons to submit comments and views has been given in accordance with section 3(b) of the Act (12 U.S.C. 1842(b)). The time for filing comments and views has expired and the application and all comments received have been considered in light of the factors set forth in section 3(c) of the Act.

Applicant, the sixth largest banking organization in Ohio, controls sixteen banks with consolidated deposits of $1.26 billion, representing 4.26 percent of the total deposits in commercial banks in the State.[1] Consummation of the proposal would increase Applicant's share of total state deposits to 4.32 percent, and it would not change its relative position in the State.

Bank (deposits of $19 million), headquartered in the Medina County portion of the Akron banking market[2] is the tenth largest of fifteen banking organizations with 1.1 percent of market deposits Applicant, with one subsidiary bank located in the Portage County portion of the market, ranks eighth in the Akron market with 2.6 percent of market deposits. Applicant's closest banking office to Bank, however, is a branch of its subsidiary located in a separate but adjacent banking market, approximately 20 miles southwest of Wadsworth. There is no significant existing competition between Applicant's subsidiary banks and Bank, and there is little likelihood for any competition to develop under the county-wide branching restrictions of Ohio law. Upon consummation of the proposed acquisition, Applicant would become the seventh largest banking organization in the Akron market with 3.7 percent of market deposits. It is unlikely, therefore, that Applicant could acquire a dominant position in the Akron market in which the five largest organizations control 81.7 percent of total market deposits. Furthermore, de novo entry by Applicant into Medina County does not appear to be an attractive alternative in light of the relatively low population and deposits per banking office in the county compared to State averages. Accordingly, consummation of the proposed transaction would appear to have no adverse effects on existing or future competition.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks, and nonbanking companies, are generally satisfactory and consistent with approval of the application. There is no evidence to indicate that the banking needs of the Akron banking market are not being adequately met. However, Applicant plans to assist Bank in establishing several branch offices. In addition, Bank would increase its lending activities and improve trust services. Therefore, factors relating to convenience and needs of the communities to be served are consistent with approval of the application. It has been determined that consummation of the proposal would be in the public interest.

On the basis of record, the application is approved for the reasons summarized above. The transaction, however, shall not be consummated (a) before the thirtieth calendar day following the date of this order or (b) later than three months after the date of this order, unless such period is extended for good cause by the Board or by this bank pursuant to delegated authority.

By order of the Federal Reserve Bank of Cleveland, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System effective October 28, 1975.

[SEAL] WILLIS J. WINN,
President.

[FR Doc.75-30472 Filed 11-11-75;8:45 am]

[1] Banking data are as of December 31, 1974.
[2] The Akron banking market is approximated by the southern two-thirds of Summit and Portage Counties, and portions of Medina, Wayne, and Stark Counties. Data for individual market shares are as of June 30, 1974.

PEOPLES BANKSHARES, INC.

Formation of Bank Holding Company

Peoples Bankshares, Inc., Mora, Minnesota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 per cent or more of the voting shares of Peoples National Bank of Mora, Mora, Minnesota. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Peoples Bankshares, Inc., Mora, Minnesota has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of Peoples Credit Company of Mora, Mora, Minnesota. Notice of the application was published on October 16, 1975 in Kanabec County Times, a newspaper circulated in the Village of Mora, County of Kanabec, Minnesota.

Applicant states that the proposed subsidiary would engage in the activities extending credit for persons, firms or corporations engaged in the production and/or marketing of staple agricultural products, including livestock and poultry. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than November 28, 1975.

Board of Governors of the Federal Reserve System, November 4, 1975.

[SEAL] ROBERT SMITH, III,
Assistant Secretary of the Board.

FEDERAL OPEN MARKET COMMITTEE

Domestic Policy Directive of September 16, 1975

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on September 16, 1975.[1]

The information reviewed at this meeting suggests that output of goods and services—which had turned up in the second quarter—is increasing appreciably further in the current quarter. In August industrial production and nonfarm payroll employment expanded at a faster pace than in July, and the average workweek in manufacturing continued to lengthen. The unemployment rate remained at 8.4 per cent, as the civilian labor force increased about as much as total employment. Retail sales apparently declined slightly, following 4 months of large gains. The index of wholesale prices of industrial commodities rose somewhat more in August than in July, chiefly because of increases in prices of energy products; prices of farm and food products declined slightly. The advance in average wage rates over recent months has been somewhat less rapid than in 1974 and early 1975.

In recent weeks the exchange value of the dollar against leading foreign currencies has risen somewhat further. In July the U.S. foreign trade surplus declined from the very

[1] The Record of Policy Actions of the Committee for the meeting of September 16, 1975, is filed as part of the original document. Copies are available on request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

V 40 N 219 NOV 12 75 XUM

high second-quarter level, as imports rose sharply. Bank-reported capital movements showed a net inflow, in contrast to the net outflows of earlier months, while U.S. liabilities to foreign official agencies, which earlier had been rising, declined.

Expansion in M_1 picked up somewhat in August from the low July rate. Growth in M_1 and M_2 slowed further, however, as inflows of consumer-type time and savings deposits to banks and to nonbank thrift institutions continued to moderate, reflecting in part the increased attractiveness of alternative investments. Interest rates on short-term securities and on longer-term Treasury and corporate securities have shown little net change in recent weeks, except that longer-term yields adjusted upward following the Treasury's September 10 announcement of its sizable borrowing requirements over the rest of this year. Yields on State and local government securities rose to new highs in early September, as a result of widespread concern about possible repercussions of New York City's financial crisis; on September 9 a State program to assist the City was enacted.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster financial conditions conducive to stimulating economic recovery, while resisting inflationary pressures and contributing to a sustainable pattern of international transactions.

To implement this policy, while taking account of developments in domestic and international financial markets, the Committee seeks to achieve bank reserve and money market conditions consistent with moderate growth in monetary aggregates over the months ahead.

By order of the Federal Open Market Committee, November 3, 1975.

[SEAL] ARTHUR L. BROIDA,
Secretary.

[FR Doc.75-30474 Filed 11-11-75;8:45 am]

FOREIGN-TRADE ZONES BOARD

[Docket No. 3-75]

CUSTOMS PORT OF ENTRY, BUFFALO, NEW YORK

Application for a Foreign-Trade Zone Public Hearing Scheduled

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the County of Erie, State of New York, requesting a grant of authority for the establishment of a foreign-trade zone in Buffalo, a Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81) and the regulations of the Board (15 CFR Part 400). It was formally filed on November 4, 1975. Under Chapter 201 of the Laws of the State of New York (Act of April 16, 1974), the County of Erie has authority to apply for the right to establish, operate and maintain foreign-trade zones within the County.

The proposal calls for a general purpose foreign-trade zone within the Buffalo Port Terminal complex of the Niagara Frontier Transportation Authority (NFTA), a public benefit corporation under New York law. Requested as zone area within the 200-acre terminal situated on Lake Erie are some 175,000 square feet of space within Warehouses "A" and "B" and some 15 acres of adjacent open space. There is ample expansion space if needed.

Operation of the zone will be assigned to NFTA which in turn will subcontract the actual operation to a subsidiary of Marine Intercontinental Terminals of Buffalo, Inc., the firm which operates NFTA's port facilities.

The application includes information and economic data concerning the basis for a zone facility to serve the special Customs needs of the area's business community. The proposed zone is intended to augment the County's overall efforts to restore Buffalo as a transportation and transshipment center and assist its industrial development program. Among the expected initial zone users are: A meat processing company; a firm which processes electric components; a hospital and laboratory supply company; a jewelry box manufacturer; an industrial bearing distributor; a sugar manufacturer; a sporting goods manufacturer; and, a firm which assembles medical equipment.

In accordance with the Board's regulations an examiners committee has been appointed to investigate the application and report thereon to the Board. The Committee consists of: Hugh J. Dolan (Chairman), Office of the Secretary, U.S. Department of Commerce, Washington, D.C. 20230; Donald F. Kelly, Assistant Regional Commissioner (Operations), U.S. Customs Service, Region I, 100 Summer Street, Boston, Massachusetts 02110; and Colonel Bernard C. Hughes, District Engineer, U.S. Army Engineer District, Buffalo, 1776 Niagara Street, Buffalo, New York 14207.

In connection with its investigation of the proposal the examiners committee will hold a public hearing on December 4, 1975 at the Federal Building, Room 914, 111 West Huron Street, Buffalo, New York, beginning at 9:00 a.m., local time. The purpose of the hearing is to help inform interested persons about the proposal, to provide an opportunity for their expression of views, and to obtain information useful to the examiners committee.

Interested persons are invited to present their views at the hearing. They should notify the Board's Executive Secretary in writing by November 26 at the address below of their desire to be heard. In lieu of an oral presentation, written statements may be submitted to the examiners committee through the Executive Secretary at any time from the date of this notice through December 19, 1975. Any material submitted during the post-hearing period cannot be made part of the record unless it is new evidence. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Office of the Director, Inspection and Control Division, U.S. Customs Service, Buffalo District, Room 603, Federal Building, 111 West Huron Street, Buffalo, New York 14202.

Office of the Director, U.S. Department of Commerce District Office, Room 1312, Federal Building, 111 West Huron Street, Buffalo, New York 14202.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 6886B, 14th and E Streets, NW., Washington, D.C. 20230.

Dated: November 7, 1975.

JOHN J. DA PONTE, Jr.,
Executive Secretary,
Foreign-Trade Zones Board.

GENERAL SERVICES ADMINISTRATION

REGIONAL ADVISORY PANELS ON ARCHITECTURAL AND ENGINEERING SERVICES

Annual Report on Closed Meetings

Notice is hereby given that the annual report on the closed meetings held in 1974 by each of the 10 General Services Administration Regional Advisory Panels on Architectural and Engineering Services is now available to the public.

The contents of the report are as follows:

1. The regions concerned.
2. The purpose of each meeting.
3. The date of each meeting.
4. The cost of each meeting.
5. The results of each meeting.

Any person wishing information concerning this report should contact the following person:

Mr. Lewis V. Hall, Committee Management Officer, Public Buildings Service, Room G-316, 18th & F Streets, NW., Washington, D.C. 20405, Telephone: (202) 343-5114.

Dated: October 31, 1975.

LOY M. SHIPP, Jr.,
Acting Commissioner,
Public Buildings Service.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

MUSIC ADVISORY PANEL (PLANNING/OPERA)

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the Music Advisory Panel (Planning/Opera) to the National Council on the Arts will be on December 2-3, 1975 in the first floor conference room of the Shoreham Building, 806 15th Street, NW. Washington, D.C. The meeting will be held from 9:30 a.m.-6:00 p.m. on both days.

A portion of this meeting will be open to the public on December 2 from 9:30 a.m. until noon and on December 3 from 9:30 a.m.-1:00 p.m. on a space available basis. Accommodations are limited. During the open sessions, policy matters and Program Guidelines will be discussed.

The remaining sessions of this meeting on December 2 from noon to 6:00 p.m. and on December 3 from 1:00 p.m.-6:00 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of June 16, 1975, these sessions, which involve matters exempt from the requirements of public disclosure under the provisions of the Freedom of Information Act (5 U.S.C. 552 (b), (4), (5), and (6)) will not be open to the public.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

[FR Doc.75-30487 Filed 11-11-75;8:45 am]

PUBLIC MEDIA ADVISORY PANEL

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the Public Media Advisory Panel to the National Council on the Arts will be held on December 1-4, 1975 at the Columbia Plaza Office building, 2401 E Street, NW., Washington, D.C. The December 1-3 meeting will be held in the 14th floor conference room from 9:00 a.m.-5:30 p.m. and the December 4 meeting will be held in the 13th floor conference room from 9:00 a.m.-5:30 p.m.

A portion of this meeting will be open to the public on December 4, 1975 from 1:00 p.m.-5:30 p.m. on a space available basis. Accommodations are limited. Discussion will include Guidelines: Filmmakers-in-Residence, Post Graduate Fellowship, Media Studies, and Regional Development.

The remaining sessions of this meeting on December 1-3 from 9:00 a.m.-5:30 p.m. and December 4 from 9:00 a.m.-12:00 noon are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of June 16, 1975, these sessions, which involve matters exempt from the requirements of public disclosure under the provisions of the Freedom of Information Act (5 U.S.C. 552(b), (4), (5), and (6) will not be open to the public.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

[FR Doc.75-30486 Filed 11-11-75;8:45 am]

NATIONAL SCIENCE FOUNDATION

ANTICIPATED ADVANCES IN SCIENCE AND TECHNOLOGY ADVISORY GROUP

Committee Management; Determination and Establishment

The National Science Foundation is establishing an Advisory Group on Anticipated Advances in Science and Technology. It is determined that this action is consistent with the public interest and is necessary in performance of duties imposed upon the National Science Foundation Act of 1950, as amended, Reorganization Plan No. 1 of 1973, and other applicable laws. The establishment procedures have been executed in accordance with the Federal Advisory Committee Act (P.L. 92-463) and the Office of Management and Budget (OMB) Circular No. A-63, Revised.

1. *Name of Advisory Group.* Advisory Group on Anticipated Advances in Science and Technology.

2. *Purpose.* To advise the President through the Vice President and the President's Science Adviser (Director, NSF) on developments that may take place in science and engineering and examine the national policy implications of these developments.

3. *Effective date of establishment and duration.* The Advisory Group's establishment is effective after the charter is filed with the Director, NSF and with the standing committees of Congress having legislative jurisdiction of the National Science Foundation. The Group will continue for two years from the effective date.

4. *Membership.* Membership of the Group will be fairly balanced in terms of the points of view represented and the Group's function. Membership of the Advisory Group on Anticipated Advances in Science and Technology will be composed of approximately 15 eminent persons from universities, industry, the Government and other organizations which can provide expertise and advice contributing to the wise use of science and technology in achieving national goals.

5. *Advisory Group Operations.* The Group will operate in accordance with provisions of the Federal Advisory Committee Act (Pub. L. 92-463), Foundation policy and procedures, OMB Circular No. A-63, Revised, and other directives and instructions issued in implementation of the Act.

The Committee Management Secretariat, OMB, has waived the 15-day requirement for publication of the notice of establishment in the FEDERAL REGISTER. A meeting of the Advisory Group is planned for early December, and a notice of meeting will be published in the FEDERAL REGISTER.

H. GUYFORD STEVER,
Director.

NOVEMBER 7, 1975.

CONTRIBUTIONS OF TECHNOLOGY TO ECONOMIC STRENGTH ADVISORY GROUP

Committee Management; Determination and Establishment

The National Science Foundation (NSF) is establishing an Advisory Group on Contributions of Technology to Economic Strength. It is determined that this action is consistent with the public interest and is necessary in performance of duties imposed upon the National Science Foundation by the National Science Foundation Act of 1950, as amended, Reorganization Plan No. 1 of 1973, and other applicable laws. The establishment procedures have been executed in accordance with the Federal Advisory Committee Act (Pub. L. 92-463) and the Office of Management and Budget (OMB) Circular No. A-63, Revised.

1. *Name of Advisory Group.* Advisory Group on Contributions of Technology to Economic Strength.

2. *Purpose.* To advise the President through the Vice President and the President's Science Adviser (Director, NSF) on issues that may lead to policy supporting an approved utilization of technology and fostering economic strength.

3. *Effective date of establishment and duration.* The Advisory Group's establishment is effective after the charter is filed with the Director, NSF and with the standing committees of Congress having legislative jurisdiction of the National Science Foundation. The Group will continue for two years from the effective date.

4. *Membership.* Membership of the Group will be fairly balanced in terms of the points of view represented and the Group's function. Membership of the Advisory Group on Contributions of Technology to Economic Strength will be composed of approximately 15 eminent persons from universities, industry, the Government, and other organizations which can provide expertise and advice contributing to the wise use of science and technology in achieving national goals.

5. *Advisory Group Operation.* The Group will operate in accordance with provisions of the Federal Advisory Committee Act (Pub. L. 92-463), Foundation policy and procedures, OMB Circular No. A-63, Revised, and other directives and instructions issued in implementation of the Act.

The Committee Management Secretariat, OMB has waived the 15-day requirement for publication of the Notice of Establishment in the FEDERAL REGISTER. A meeting of the Advisory Group is

V 40 N 219 NOV 12 75 XUM

planned for early December and a notice of meeting will be published in the FEDERAL REGISTER.

H. GUYFORD STEVER,
Director.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-510, 50-511]

GULF STATES UTILITIES CO. (BLUE HILLS STATION, UNITS 1 AND 2)

Hearing on Application for Construction Permits

Pursuant to the Atomic Energy Act of 1954, as amended (the Act), and the regulations in Title 10, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities," Part 51, "Licensing and Regulatory Policy and Procedures for Environmental Protection", and Part 2, rules of practice, notice is hereby given that a hearing will be held before an Atomic Safety and Licensing Board (Board), to consider the application filed under the Act by the Gulf States Utilities Company (the applicant), for construction permits for two pressurized water nuclear reactors designated as the Blue Hills Station, Units 1 and 2 (the facilities), each of which will be designed for operation at 2814 thermal megawatts with a net electrical output of approximately 930 megawatts. The proposed facilities are to be located in the northeast corner of Newton County, Texas.

The hearing, which will be scheduled to begin in the vicinity of the site of the proposed facilities, will be conducted by an Atomic Safety and Licensing Board (Board), which has been designated by the Chairman of the Atomic Safety and Licensing Board Panel. The Board consists of Thomas W. Reilly, Esq., Chairman, Mr. Lester Kornblith, Jr., and Dr. Linda W. Little.

Pursuant to 10 CFR 2.785, an Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commission. Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER at a later date.

Upon completion by the Commission staff of a favorable safety evaluation of the application and environmental review and upon receipt of a report by the Advisory Committee on Reactor Safeguards, the Director of Nuclear Reactor Regulation will consider making affirmative findings on Items 1–3, a negative finding on Item 4, and an affirmative finding on Item 5 specified below as a basis for the issuance of construction permits to the applicant. In the event that a separate hearing is held with respect to a limited work authorization, Item 6 below describes the matters for consideration.

ISSUES PURSUANT TO THE ATOMIC ENERGY ACT OF 1954, AS AMENDED

1. Whether in accordance with the provisions of 10 CFR 50.35(a):

(a) The applicant has described the proposed design of the facilities including, but not limited to, the principal architectural and engineering criteria for the design, and has identified the major features or components incorporated therein for the protection of the health and safety of the public.

(b) Such further technical or design information as may be required to complete the safety analysis and which can reasonably be left for later consideration, will be supplied in the final safety analysis report;

(c) Safety feautres or components, if any, which require research and development have been described by the applicant and the applicant has identified, and there will be conducted a research and development program reasonably designed to resolve any safety questions associated with such features of components; and

(d) On the basis of the foregoing, there is reasonable assurance that (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facilities, and (ii) taking into consideration the site criteria contained in 10 CFR Part 100, the proposed facilities can be constructed and operated at the proposed location without undue risk to the health and safety of the public.

2. Whether the applicant is technically qualified to design and construct the proposed facilities;

3. Whether the applicant is financially qualified to design and construct the proposed facilities; and

4. Whether the issuance of permits for construction of the facilities will be inimical to the common defense and security or to the health and safety of the public.

ISSUE PURSUANT TO NATIONAL ENVIRONMENTAL POLICY ACT OF 1969 (NEPA)

5. Whether, in accordance with the requirements of 10 CFR Part 51, the construction permits should be issued as proposed.

ISSUES PURSUANT TO 10 CFR 2.761(a) (LIMITED WORK AUTHORIZATION)

6. Pursuant to 10 CFR 2.761(a), a separate hearing and partial decision by the Board on issues pursuant to NEPA and general site suitability and certain other possible issues may be held and issued prior to and separate from the hearing and decision on other issues. In the event the Board, after the hearing, makes favorable findings on such issues, the Director of Nuclear Reactor Regulation may, pursuant to 10 CFR 50.10(e), authorize the applicant to conduct certain onsite work entirely at its own risk prior to completion of the remainder of the proceeding.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR 2.4(n), the Board will determine, without conducting a *de novo* evaluation of the application: (1) Whether the application and the record of the proceeding contain sufficient information, the review of the application by the Commission's staff has been adequate to support the proposed findings to be made by the Director of Nuclear Reactor Regulation on Items 1–4 above, and to support, insofar as the Commission's licensing requirements under the Act are concerned, the issuance of the construction permits proposed by the Director of Nuclear Reactor Regulation; and (2) whether the NEPA review conducted by the Commission staff has been adequate.

In the event that this proceeding becomes a contested proceeding, the Board will consider and initially decide, as issues in this proceeding, Items 1–5 above as a basis for determining whether the construction permits should be issued to the applicant.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with § 51.52(c) of 10 CFR Part 51: (1) Determine whether the requirements of section 102(2) (A), (C) and (D) of NEPA and Part 51 have been complied with in this proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding for the permits with a view to determining the appropriate action to be taken; and (3) determine after weighing the environmental, economic, technical and other benefits against environmental and other costs, and considering available alternatives whether the construction permits should be issued, denied, or appropriately conditioned to protect environmental values.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, or their counsel, to be held within sixty (60) days after the notice of hearing is published or at such other time as the Board deems appropriate, for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any required special prehearing conference, and within sixty (60) days after discovery has been completed or at such other time as the Board may specify, for the purpose of dealing with the matters specified in 10 CFR 2.752.

The Board will set the time and place for any special prehearing conference, prehearing conference and evidentiary hearing, and the respective notices will be published in the FEDERAL REGISTER.

Any person who does not wish, or is not qualified, to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715. A person making a limited appearance may make an oral or written statement on the record. He does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of Item 1–5 above. Limited appearances will be permitted at the time of the hearing at the discretion of the Board, within such limits and such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission by January 12, 1976. The presiding Atomic Safety and Licensing Board may make further provision with respect to limited appearances subsequently during the course of this proceeding.

Any person whose interest may be affected by the proceeding, who wishes to participate as a party in the proceeding, must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR 2.714. A petition for leave to intervene shall set for the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as Report has not been accepted for docketing due to lack of complete environmental information required by the Commission staff. Under 10 CFR 2.101, the applicant is expected to tender a revised Environmental Report in January 1976. The staff must find that the revised Environmental Report is complete before it is accepted for the detailed licensing review. The availability of an acceptable Environmental Report will be noticed in the FEDERAL REGISTER. Accordingly, any person who wishes to participate as a party pursuant to 10 CFR 2.714 need not set forth in any petition to intervene, required to be filed by December 12, 1975, any contentions related to matters covered in Issue 5. A deadline for the filing of any such contentions will be established by the Board and noticed in the FEDERAL REGISTER, subsequent to the filing by the applicant of an acceptable Environment Report. In all other aspects said petition must meet the requirements of 10 CFR 2.714, namely, setting forth the interest of the petitioner in the proceeding, facts and reasons why intervention should be permitted, and a general statement as to the subject matter in the proceeding as to which intervention is sought.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the applicant by December 2, 1975.

Papers required to be filed in this proceeding shall be filed by mail or telegram addressed to the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR 2.708, an original and twenty (20) conformed copies of each such paper with the Commission. A copy of any petition for intervention should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Stanley Plettman, Esq., Orgain, Bell & Tucker, Beaumont Saving Building, Beaumont, Texas 77701, and Troy B. Conner, Jr., Esq., Conner & Knotts, 1747 Pennsylvania Avenue NW., Washington, D.C. 20006, attorneys for the applicant.

For further details, see the application for construction permits dated August 23, 1974, including site suitability information, and the applicant's Environmental Report. The Environmental Report is to be submitted approximately January 30, 1976, which, along with any amendments or supplements thereto, are or will be available as noted above for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. between the hours of 8:30 a.m. and 5:00 p.m. on weekdays. Copies of those documents will also be available at the Newton County Library, Newton, Texas, for inspection by members of the public between the hours of 9:00 a.m. and 5:00 p.m. Monday through Saturday. As they become available, a copy of the safety evaluation report by the Commission's Office of Nuclear Reactor Regulation, the draft and final environmental statements, the report of the Advisory Committee on Reactor Safeguards (ACRS), the proposed construction permits, the transcripts of the prehearing conferences and of the hearing, and other relevant documents, will also be available at the above locations. Copies of the proposed construction permits and the ACRS report may be obtained, when available, by request to the Director, Division of Reactor Licensing, United States Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the Division of Reactor Licensing's safety evaluation and final environmental statement may be obtained, when available, from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Washington, D.C., this 29th day of October 1975.

For the United States Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.75-30094 Filed 11-11-75;8:45 am]

ADVISORY COMMITTEE ON THE MEDICAL USES OF ISOTOPES

Meeting

In accordance with the Atomic Energy Act of 1954, as amended, primarily section 161a, and with Pub. L. 92-463 (Federal Advisory Committee Act) and with Executive Order 11686, the Advisory Committee on the Medical Uses of Isotopes will hold a meeting at 9:00 a.m. on December 12, 1975, in Room P-118, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland.

The following agenda is scheduled:

I. Opening Comments.
II. Regulation of Nuclear Medicine.
A. Status of NRC–FDA Interrelationships
B. Amendment to 10 CFR Part 35–Implementation.
C. Amendment to 10 CFR 32—Implementation.
D. Licensing of Nuclear Pharmacies.
III. Status of Proposed Amendments to 10 CFR Part 35.
A. Reports of Misadministration of Radiopharmaceuticals.
B. Technician Training.
IV. Physician Training.
A. Current Criteria for Physician Training.
B. Alternatives to NRC Regulating Physician Training.
V. New Medical Licensing Guide.
VI. Future Role of the Advisory Committee.

Practical consideration may dictate alterations in the above agenda or schedule.

The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in agenda items listed above, the following requirements shall apply:

(a) Persons wishing to submit written statements on those agenda items may do so by mailing 25 copies thereof, postmarked, if possible, no later than December 10, 1975, to Mr. R. E. Cunningham, Acting Director, Division of Fuel Cycle and Material Safety, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Minutes of the meeting will be kept open for 30 days for the receipt of written statements for the record.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement, and shall set forth reasons justifying the need for such oral statement and its usefulness to the Committee. To the extent that the time available for the meeting permits, the Committee will receive oral statements during a period of not more than 60 minutes at an appropriate time, chosen by the Chairman.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Committee, who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to the Chairman's ruling on requests for the opportunity to present oral statements, and the time

V 40 N 219 NOV 12 1975 XUM

allotted, can be obtained by a prepaid telephone call on December 10, 1975, to Mr. R. E. Cunningham (301) 492–7553 between 9 a.m. and 5 p.m. Eastern time.

(e) Questions may be asked only by members of the Committee and NRC consultants.

(f) Seating for the public will be available on a first-come-first-served basis.

(g) Copies of minutes of public sessions will be made available for copying, in accordance with the Federal Advisory Committee Act, on or after January 12, 1975, at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., upon payment of all charges required by law.

Dated: November 6, 1975,

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc.75-30494 Filed 11-11-75;8:45 am]

[Docket No. 50-298]

COOPER NUCLEAR STATION

Negative Declaration Regarding Proposed Changes Technical Specifications of License DPR–46

The Nuclear Regulatory Commission (the Commission) has considered the issuance of changes to the Technical Specifications of Facility Operating Licensing No. DPR–46. These changes would authorize the Nebraska Public Power District (the licensee) to operate the Cooper Nuclear Station (located in Nemaha County Nebraska) with changes to limiting conditions for operation resulting from application of the Acceptance Criteria for Emergency Core Cooling System (ECCS). This action is associated with a planned shutdown to effect needed alterations associated with the reactor coolant system.

The U.S. Nuclear Regulatory Commission, Division of Reactor Licensing has prepared an environmental impact appraisal for the proposed changes to the Technical Specifications of License No. DPR–46, Cooper Nuclear Station, described above. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for the particular action is not warranted because there will be no environmental impact attributable to the proposed action other than that which has already been predicted and described in the Commission's Final Environmental Statement for Cooper Nuclear Station issued in February 1973. The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Auburn Public Library, 118—15th Street, Auburn, Nebraska.

Dated at Rockville, Md., this 29th day of October 1975.

For the Nuclear Regulatory Commission.

WM. H. REGAN, JR.,
Chief, Environmental Projects Branch 4, Division of Reactor Licensing.

[FR Doc.75-30497 Filed 11-11-75;8:45 am]

[Docket No. 50-298]

NEBRASKA PUBLIC POWER DISTRICT

Issuance of Amendment to Facility Operating License and Order Modifying License

Notice is hereby that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 16 to Facility Operating License No. DPR–46, issued to the Nebraska Public Power District (the licensee), which revised Technical Specifications for operation of the Cooper Nuclear Station (the facility) located in Nemaha County, Nebraska. The amendment is effective as of its date of issuance.

The amendment revised the Technical Specifications for the facility to authorize operation: (1) Using operating limits based on the General Electric Thermal Analysis Basis (GETAB), and (2) with modified operating limits based upon an evaluation of emergency core cooling system performance calculated in accordance with an acceptable evaluation model that conforms with the requirements of § 50.46 of 10 CFR Part 50 of the Commission's regulations.

The Commission also has issued an Order for License Modification which authorizes operation of the facility with the bypass holes of the lower core support plate plugged, subject to the conditions set forth in the Technical Specifications, as revised by the issuance of Amendment No. 16. The Order is effective as of the date of its issuance.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Ch. I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with items (1) and (2) above was published in the FEDERAL REGISTER on September 18, 1975, (40 FR 43099). The Order for Modification of License (dated October 8, 1975) which authorized plugging of the bypass holes was published in the FEDERAL REGISTER on October 16, 1975 (40 FR 48554). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action on items (1) and (2) above.

For further details with respect to this action, see (1) the applications for amendment dated July 10, 1975, July 14, 1975 and September 11, 1975 and supplements thereto dated September 12, 1975 and October 7, 17 and 24, 1975, (2) Amendment No. 16 to License No. DPR–46, with Change No. 19, (3) the concurrently issued Order for Modification of License, (4) the Commission's concurrently issued related Safety Evaluation, (5) the Commission's Negative Declaration dated October 29, 1975 (which is also being published in the FEDERAL REGISTER) and associated Environmental Impact Appraisal, and (6) the Order for Modification of License dated October 8, 1975 and the documents referenced therein. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Auburn Public Library, 1118—15th Street, Auburn, Nebraska 68305. A single copy of item (2) through (5) and the October 8, 1975 Order may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Md., this 31st day of October, 1975.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch #2, Division of Reactor Licensing.

PRESIDENT'S ADVISORY COMMITTEE ON REFUGEES

RESETTLEMENT ACTIVITIES

Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), that the next meeting of the President's Advisory Committee on Refugees will be held on December 17, 1975, beginning at 10:00 a.m., in Room 4203, New Executive Office Building, 17th and Pennsylvania Avenue, NW., Washington, D.C. 20503.

The President's Advisory Committee on Refugees is established under Executive Order 11860 and is governed by the provisions of 5 U.S.C. Appendix I. The Committee shall advise the President and the heads of appropriate Federal agencies concerning the expeditious and coordinated resettlement of refugees, including: Health and environmental matters related to resettlement; interrelationship of the governmental and volunteer roles in resettlement; educational and cultural adjustments required by these efforts; the general well-being of resettled refugees and their families and such other related concerns as the President may, from time to time, specify.

The meeting of the Committee shall be open to the public.

The proposed agenda includes reports from Committee members and staff, discussion of the final Report to the President, a progress report on resettlement activities and problems provided by the Interagency Task Force, and other appropriate items as may later be included.

Records shall be kept of all Committee proceedings (and shall be available for public inspection at the library of the Department of Health, Education and Welfare located in Room 1436, 330 Independence Avenue, SW., Washington, D.C. 20201).

Signed at Washington, D.C., on November 7, 1975.

ROGER D. SEMERAD,
Executive Director, President's Advisory Committee on Refugees.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-11803; File No. SR-Amex-75-8]

AMERICAN STOCK EXCHANGE, INC.

Proposed Rule Change; Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94–29, 16 (June 4, 1975), notice is hereby given that on October 31, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The American Stock Exchange, Inc. ("Amex") proposes to amend Rule 610 to expand the scope of the simplified arbitration procedure presently offered as a service to members and non-members and to revise its schedule of arbitration fees for users of the Amex's arbitration facility.

AMEX STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purposes of the proposed rule change and the revised schedule of arbitration fees are to (i) expedite the resolution of controversies through the expansion of the simplified arbitration procedure for both members and non-members and (ii) distribute on a more equitable basis among users of the Amex's arbitration facility the costs incurred by the Amex in providing this service.

The proposed amendments to Rule 610 and the proposed revised arbitration fee schedule are based upon sections 6(b)(1) and (4), as amended, of the Act, which become effective on December 1, 1975. The proposed amendments, and fee schedule, if approved prior to that date, will be consistent with such sections when so amended.

The proposed amendments to Rule 610 relate to the capacity of the Amex to carry out the purposes of the Act and to comply and enforce compliance with the Act by its members and persons associated with its members.

Subparagraph (d) of Rule 610 would be amended to raise the jurisdictional amount for member controversies required to be determined by a single arbitrator from $2,000 to $5,000. Such a change would expedite the resolution of minor claims by avoiding the necessity to assemble multiple-arbitrator panels, which are difficult to schedule at a date convenient to all. In 1974, only 4 of the 53 controversies settled through the Amex's arbitration facilities involved claims between members amounting to $5,000 or less. The impact of this change therefore is expected to be minimal.

Under the proposed amendment to subpaargraph (e) of Rule 610, non-members would be able to elect to have controversies with members involving claims not exceeding $2,500 determined by a single arbitrator by agreeing with the respondent in writing to the simplified arbitration procedure. The arbitrator would be selected from one of the three arbitrator groups as mutually agreed upon by the parties. In 1974, 4 controveries between non-members and members settled through arbitration involved claims under $2,500. It is felt that the availability of the optional simplified procedure in cases of this nature will enable non-members to obtain swift, equitable, and economical relief.

The proposed revision to the schedule of arbitration fees is designed to establish an equitable allocation of reasonable fees among users of the Amex's arbitration facility.

The present arbitration fee schedule was established in the 1930's. Since that time, the costs incurred by the Amex in providing this service to non-members and members have increased substantially. For example, in 1974 the Amex paid arbitrators approximately $9,100 for their services in conducting arbitration hearings based on a fee schedule of $50 per session for panel members and $100 per session for the chairman. By contrast, the Amex received about $5,000 in fees from the parties to the 53 proceedings based on users' fees of $25 to $120 per session. The unreimbursed cost to the Amex for each session last year therefore ran between $80 and $175 depending upon the type of hearing and the amount in controversy without including additional disbursements for transportation, meals, lodging, postage, reproduction, staff salaries and other administrative services. The Amex expends about $40,000 to $50,000 per year to provide the arbitration facility at a nominal cost to its users.

The revised arbitration fee schedule will have the folowing effect:

First, there would be imposed a $25 non-refundable handling fee for each claim submitted for arbitration. This charge would partially cover the Amex's expenses in reviewing the claim, reproducing the documents and notifying the respondent. If the claim is subsequently settled without arbitration, no additional fee would be assessed and no payment would be made to panel members.

Second, for members utilizing the simplified procedure (a single arbitrator) the fee would be raised from $60 to $100 per session. The fee would then equal the amount paid by the Amex to the arbitrator for her or his services.

Third, the fee for multiple-arbitrator panels hearing member controveries would rise from the present range of $90 to $120 per session to between $300 and $500 depending upon the amount of the claim as reflected in the fee schdule.

Lastly, with respect to non-member claims, the present fee schedule would remain unchanged if the controversy were presented to a single arbitrator under the proposed optional simplified procedure for non-members (claims of $2,500 or less). For those claims referred to multiple-arbitrator panels, the fees would increase from the present range of $25 to $120 to between $50 and $350 depending upon the amount in controversy.

While the proposed revised fee schedule will not completely offset the Amex's direct costs, it would significantly reduce the net cost to the Amex without making its arbitration facilities unduly expensive.

Before the proposed rule changes and arbitration fee schedule changes were approved by the Board of Governors, the Amex administration solicited the views of members and arbitration panel members. These parties indicated that an expansion of the simplified arbitration procedure would be an excellent solution

V 40 N 219 NOV 12 75 XUM

to the problem of increasing arbitration costs and that the users of the Amex's arbitration facility should be expected to share a greater portion of the Amex's out-of-pocket costs through a reasonable increase in fees. In addition, the Amex announced the Board's decision to increase the arbitration fee schedule in an information circular sent to the membership on July 16, 1975. As of the date of this submission, no comments have been received in response to that announcement.

The Amex has determined that the proposed amendments to Rule 610 and the proposed revised arbitration fee schedule will not impose a burden on competition.

On or before December 17, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 12, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 6, 1975.

[SR-BSE-75-2]

BOSTON STOCK EXCHANGE

Order Approving Proposed Rule Change

The Boston Stock Exchange ("BSE"), 53 State Street, Boston Massachusetts 02109, submitted on September 17, 1975 a proposed rule change under Rule 19b-4 to conform the anti-manipulative rules of the BSE with those of other participants in the consolidated transaction reporting system.

Publication of the submission was made in the FEDERAL REGISTER on October 3, 1975 (40 FR 45880) [1] and interested persons were invited to submit written data, views and arguments concerning the submission by November 3, 1975. No comments have been received concerning the BSE's rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to national securities exchanges, and in particular the requirements of section 6 of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[SR-CSE-75-2]

CINCINNATI STOCK EXCHANGE

Order Approving Proposed Rule Change

The Cincinnati Stock Exchange ("CSE"), 205 Dixie Terminal Building, Cincinnati, Ohio 45202, submitted on September 22, 1975, a proposed rule change under Rule 19b-4 to conform the anti-manipulative rules of the CSE with those of other participants in the consolidated transaction reporting system.[1]

Publication of the submission was made in the FEDERAL REGISTER on October 3, 1975 (40 FR 45881) [2] and interested persons were invited to submit written data, views and arguments concerning the submission by November 3, 1975. No comments have been received concerning the CSE's rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to national securities exchanges, and in particular the requirements of section 6 of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

MIDWEST SECURITIES TRUST CO.

Proposed Rule Change; Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 30, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

A Custodian agreement is signed between the Midwest Securities Trust Company (MSTC) and the Transfer Agent Custodian. To transfer stock into a TAC position, MSTC prepares an Offsite Inventory Box Update form. This computer input is keypunched, verified and computer edited for accuracy. The Offsite Inventory Box Update generates a computer stock pull instruction. The MSTC book inventory is reduced, and the TAC offsite inventory position is increased by the same amount. The new balances and locations are printed each day on our security inventory control sheets, and the stock is counted to insure that the stock was pulled.

The stock certificates are checked for good deliverable form and made nonnegotiable by stamping them "for transfer only per the instructions of the Midwest Securities Trust Company" before sending them to the TAC. The stock is sent to the agent with a three ply log sheet. All certificates are microfilmed. The log sheet is used as a receipt and as a confirmation of the opening balance of shares at the TAC and a confirmation of the new balance. The log sheet contains the stock description, cusip number, transfer number and date, the transaction amount requested or delivered, and an authorizing signature on file with the TAC. One copy of the log stays in an open file at the Midwest Securities Trust Company. The stock and two plys of the TAC log are received by the transfer agent. The log is signed by the TAC, returned to MSTC, and matched with MSTC's open copy. Any discrepancies are reported to the Controls Department for immediate reconciliation with the TAC.

Stock for transfer is sent insured in non-negotiable form by local messenger, Brink's Air Courier, or mail. Under no circumstances will the dollar amounts of shipments of securities to transfer agent custodians exceed MSTC's insurance coverage. The transfer agent cancels the certificates from MSTC and changes our balance by cancelling a balance order certificate in the name of Kray & Co., MSTC's nominee. This certificate is held for us by the agent as custodian.

In addition to the balance confirmation with each transaction, our audit department confirms the TAC balance with the agent once a month. The stock balance held by the TAC can be withdrawn to fill customer transfers or withdrawn in MSTC's nominee name of Kray & Co. for MSTC change-making needs after written instruction by an authorized signer for MSTC.

The withdrawing of TAC stock has the same safeguards as the deposit. The Midwest Securities Trust Company initiates the request by creating an Offsite Inventory Box Update, a TAC log sheet, and a transfer instruction. The log is signed by an authorized MSTC signer and sent in two play with the transfer instruction to the agent. The box update form and a copy of the log are held in an open file by MSTC. When the agent completes the transfer, he returns the stock with the copy of the log and instructions. This log is signed by the transfer agent and confirms the opening balance, the transaction, and the new balance. MSTC matches this with our log copy and box update. Any discrepancies are turned over to our controls group for immediate reconciliation with the Transfer Agent Custodian. All paperwork and certificates are microfilmed.

The box update is batch controlled and entered into MSTC's computer which deducts from the offsite location and adds to MSTC's inventory. The stock is put into MSTC's box, and the updated computer inventory and the physical certificates are counted against each other that same afternoon as a double check that the system is in balance. Any customer stock returned is taken off our open transfer file with an entry to the computer sent out. A weekly listing to the broker, the daily activity notation, and a monthly audit assure the corrections of these entries.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The Transfer Agent Custodian Program aids the transfer process by serving to further immobilize certificate movement between the depository and the Transfer Agent. The Transfer Agent Custodian Program permits the depository to retain only a working supply of certificates while depositing the remainder with the Transfer Agent bank to be held in a depository balance certificate in the name of the depository nominee. The Transfer Agent bank is a custodian of the depository balance certificate. When issuances are required, the depository sends only a properly signed authorization and stock power to the Transfer Agent who immediately issues the stock required by reducing the certificate in his possession. The transaction is handled quickly by both the depository and the Transfer Agent because no stock is withdrawn from the depository's vault and accordingly none must be processed by the Transfer Agent. This timeliness is of great benefit to the depository, especially as record dates approach. Since the registration of the certificate with the Transfer Agent is the same as the stock held in the depository, dividends and proxies are not affected by the process.

As mentioned above, stock transfers are handled quickly by both the depository and the Transfer Agent because no stock is withdrawn from the depository's vault and according none must be processed by the Transfer Agent. Depository certificate inventories are reduced to a working supply only, while moving excess certificates back to the Transfer Agent. The depository receives guaranteed speedy issuance of valid certificates when requested. Shares in depository balance certificates are valid because stop checks and screening is completed before shares from cancelled stock are credited to the certificate. Therefore, new issues debited from balance certificates can be issued without delay or unexpected stops. The depository also has the benefit of reduced vault space requirements and reduced clerical processing involvement. With only periodic deliveries of securities for custody from the depository, additional stability in stock transfer workload volume is achieved. The surge of debit postings just prior to record dates is reduced and in some cases eliminated. Reduced certificate handling by the Transfer Agent lowers his costs without substituting other costs since the system parallels existing stock transfer work flow and balance certificate procedures using only one simple form in the process. The customer benefits financially from the reduced transactions volume.

No comments have been received from members concerning the proposed rule change.

The TAC Program will enhance competition. Reduced certificate handling by the Transfer Agent lowers his costs without substituting other costs since the system parallels existing stock transfer work flow and balance certificate procedures, using only one simple form in the process. Also, the depository reduces the amount of clerical processing costs.

On or before December 17, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) By order approved such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 3, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 6, 1975.

[Release No. 34-11798; File No. SR-PSE-75-5]

PACIFIC STOCK EXCHANGE INC.

Proposed Rule Change; Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on November 3, 1975 the above-mentioned self-regulatory organization filed under the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Pursuant to the proposed change in section 2(h-a) of Rule XX of the rules of the Pacific Stock Exchange dealing with the timely delivery of listed and O.T.C. securities:

1. Any participant of the Pacific Clearing Corporation ("PCC") which has not received securities by settlement date may, on the first full business day following settlement date, demand immediate delivery of those securities by filing with PCC a notice of intention to buy-in. When PCC receives a notice to buy-in from a participant, it shall transmit the notice to all participants who, on the day of the notice, are short or failing to deliver the security called for in the notice. Such participants must thereupon close their positions by delivery of the security or bear their proportionate share of any resulting loss.

2. If delivery is not received within the time specified in the notice of intention to buy-in, which shall be no later than two full business days after delivery of the notice, the participant may then execute a buy-in in the best available market of those securities remaining undelivered on the date designated for execution. Prior to executing the buy-in the participant must accept and pay for any portion of the securities called for in the notice that is delivered to it.

3. There are designated procedures for guaranteeing deliveries of securities delayed in transfer or deliveries due from another clearing corporation. There are also procedures whereby the participant requesting the securities may obtain an extension of the execution of the buy-in under specified conditions.

4. PCC may of its own accord institute buy-in or sell-out procedures against participants due to reorganizations(tenders and exchanges), or due to the suspension, financial impairment, resigna-

V 40 219 NOV 12 75 XUM

tion or reorganization of a participant, and for other similar reasons.

5. When a notice of buy-in is presented and sufficient securities are not delivered by the execution date and subsequently the buy-in is not executed, PCC shall levy a charge against the participant who failed to execute the buy-in unless an extension is obtained. If a buy-in that has been extended has not been executed after an extension of seven (7) calendar days no further extension will be granted, the buy-in will expire, and the participant must present a new buy-in notice if it wishes to effect a buy-in of the securities covered in the original buy-in notice.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The proposed rule change establishes procedures whereby PCC participants which have not received listed or O.T.C. securities from PCC by the scheduled delivery date may demand delivery of those securities from PCC and then, if delivery does not occur within a specified time period, may execute a so-called "buy-in" in the best available market of those securities that remain undelivered on the date designated for execution. These procedures are intended to protect participants from losses arising out of transactions between them, PCC and other participants and to permit participants owed securities to take prompt and appropriate steps to eliminate or minimize any losses that might otherwise occur as a result of late delivery.

The proposed rule change, by establishing a method whereby participants which do not receive securities owed them by settlement date may demand delivery and then execute a buy-in for those securities noti delivered, provides fair procedures whereby participants owed securities may take steps to minimize any losses arising out of late delivery; serves to remove impediments to, and to facilitate, the prompt and accurate clearance and settlement of securities transactions; fosters cooperation and coordination with persons engaged in the clearance and settlement of securities transactions; and contributes to the protection of investors and the public interest.

The proposed change, by establishing procedures whereby PCC may institute buy-in or sell-out procedures against participants due to reorganizations, or due to the suspension, financial impairment, resignation or reorganization of a participant, provides protection to PCC and to other participants from losses that might otherwise occur, and thereby contributes to the protection of investors and the public interest. The proposed change also provides appropriate disciplinary action for violation of its provisions by imposing charges against participants who, having filed a notice of buy-in, subsequently fail to execute it.

The foregoing constitute the principal bases under the Act for the rule change. The other bases set forth in the "Information to be Included" section of the Instructions to the Rule are not applicable.

Comments on the proposed rule change have not been solicited from Exchange members or from PCC participants.

The proposed rule change would not impose any burden on competition.

On or before December 3, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 3, 1975.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 6, 1975.

[Release No. 34-11799; File No. SR-PSE-75-6]

PACIFIC STOCK EXCHANGE INC.

Proposed Rule Change; Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on November 3, 1975 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Pursuant to the proposed rule change in section 5 of Rule XX of the rules of the Pacific Stock Exchange dealing with certain operations of the Pacific Securities Depository Trust Company ("PSD") and the Pacific Clearing Corporation ("PCC"):

1. The operation of PSD shall be governed by rules adopted by it. The rules of PCC shall govern the responsibilities of PCC participants in connection with certain services which PCC will furnish to PSD as part of the interface between PCC and PSD. Instructions relating to PSD and issued to PCC or PSD by PCC participants for whom an account is maintained with PSD shall constitute a certification by said participant that it has and will maintain sufficient balances of securities in its PSD account to support all entries requested by any such instructions.

2. If a participant instructs PSD to withdraw or transfer shares from its PSD account, and such instructions are executed although the participant does not have sufficient share of the security involved to cover such withdrawal or transfer, PCC shall, upon PSD's request, attempt to collect said shares by debiting the participant's net settlement statement with PCC in the appropriate amount. The participant shall then be required to make payment to PCC for any amounts so debited and PCC shall be liable to PSD for all shares thereby collected. The participant in question shall, in any event, remain liable to PSD for the total number of shares in question until such time as settlement is made with PCC.

3. PSD will provide services to PCC to facilitate the stock loan activity of PCC and of PSD participants. When PCC requests that stock be loaned to it, PSD will attempt to identify a PSD participant from whose account such a loan can be made. When PSD has received authorization for the loan from a participant, PSD will effect the loan to PCC, either by physical delivery or by bookkeeping entry to PCC's account with PSD. PCC may at any time return any loaned securities to the participant who loaned them by notifying PSD. Likewise, any PSD participant which has loaned securities to PCC through PSD may request the return of such securities at any time. In either case PSD will effect the transfer of the securities to the participant in question, subject to the payment by the participant of any amounts owing PCC with respect to the return of the securities. When loans are terminated by PCC or by participants, notice of such termination shall be given and settlement of securities and cash obligations shall be made no later than the second business day following the day of the notice. If settlement is not made by such date, the party failing to effect settlement may be "bought-in" or "sold-out," as the case may be, by the other party, with any loss resulting from such "buy-in" or "sell-out" being charged to the party that fails to effect timely settlement.

4. PCC will furnish certain services to PSD in connection with distributions of cash and securities. When PSD charges back such a distribution against one of its participants, PSD may notify PCC that the distribution is being charged back against a particular participant. PCC will then effect such a charge by debiting the participant's net settlement statement in the appropriate amount and the participant will be required to make payment to PCC of any amounts so debited. PCC will make payment to PSD of any amounts received in accordance with the normal settlement procedures between the two parties.

5. If a PSD participant, owing securities and/or cash to both PSD and PCC, makes only a partial settlement of the total amount owed and defaults on the remaining obligation, PCC will make a prorata distribution of the securities and/or cash received in partial settlement from the participant between itself and PSD.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The proposed rule change is intended to affirm that the operation of PSD shall be governed by rules adopted by it. The proposed change also establishes that PCC's rules shall govern the responsibilities of PCC participants arising out of those services which PCC will furnish PSD as part of the interface between the two entities.

The proposed rule change is also intended to set forth some of the basic rights, duties and responsibilities of PCC and PSD in connection with certain services which each will furnish the other. These services include: procedures whereby PCC shall attempt to collect shares overdrawn by participants from their PSD accounts; procedures whereby PSD will facilitate the stock loan activity of PCC and PSD participants; and procedures whereby PCC will furnish certain services to PSD in connection with distributions of cash and securities.

There are several independent bases under the Act for the proposed rule change. These bases are set forth below. The other bases set forth in the "Information to be Included" section of the Instructions to the Rule are inapplicable.

The proposed rule change, by establishing a method whereby PCC will attempt to collect shares overdrawn by participants from their PSD accounts and by establishing for the prorata distribution of securities and/or cash between PSD and PCC when participants default upon obligations owing to both, provides protection against possible losses by PSD and PCC which might disrupt the operation of those entities and cause losses to other participants. In so doing, the rule change contributes to the safeguarding of securities and funds which are in the custody and control of the clearing agencies or for which they are responsible, and also contributes to the protection of investors and the public interest. The rule change, by facilitating stock loan activity by PCC and by participants, aids in the prompt and accurate clearance and settlement of securities transactions, and fosters cooperation and coordination among persons engaged in the clearance and settlement of securities transactions.

Comments on the proposed rule change have not been solicited from Exchange members or from PCC or PSD participants.

The proposed rule change would not impose any burden on competition.

On or before December 3, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By-order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 3, 1975.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 6, 1975.

[SR-PBWSE-75-1]

PBW STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change Relative to Fidelity Bonding Requirements for Members

On September 22, 1975, the PBW Stock Exchange, Inc. ("PBW"), 17th Street and Stock Exchange Place, Philadelphia, Pennsylvania 19103, submitted proposed changes to Rule 705 of the Rules of its Board of Governors, under Rule 19b-4 pursuant to section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s), as amended, Pub. L. No. 74-29 (June 4, 1975) (the "Act"). The rule changes were designed to impose higher fidelity bonding requirements in certain respects on member firms and organizations. In accordance with section 19(b) of the Act and Rule 19b-4 thereunder, the proposed rule change was published in the FEDERAL REGISTER (40 FR 45881, October 3, 1975), and the public was invited to submit comments until November 3, 1975. Notice of the filing and an invitation for comments also appeared in the SEC Docket on October 7, 1975 (Securities Exchange Act Release No. 11681).

As described in the item published in the FEDERAL REGISTER, the purpose of the proposed rule change is to impose higher fidelity bonding requirements on members in order to provide increased safeguards with respect to the financial responsibility and related practices of its members consistent with the standards set forth in new Rule 15b10-11 under the Act (the "SECO Bonding Rule" or "Rule 15b10-11") which establishes fidelity bonding requirements for registered brokers and dealers which are not members of a registered national securities association (SECO brokers and dealers). Members in good standing of the PBW, among other exchanges, by the terms of paragraph (b) of the SECO Bonding Rule, are exempt from the latter rule inasmuch as they are already subject to fidelity bonding requirements of the PBW which are comparable to those promulgated by the Commission.

The Commission believes that the subject revisions to the PBW Bonding Rule are necessary and appropriate in the public interest and for the protection of investors. Accordingly, it finds that the proposed rule change is consistent with the provisions of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the rule changes referenced above be, and hereby are, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-11806; File No. SR-NYSE-75-6]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securies Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 24, 1975, the above-menioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

A. *SCC Rule 4, Section 1, Paragraph 2.*

The Corporation may permit part of a Member's contribution to the Clearing Fund to be evidenced by an open account indebtedness secured by unmatured debt obligations in bearer or registered form, [bonds] which are direct obligations of, or obligations guaranteed as to principal and interest by, the United States or, if deemed acceptable by the Corporation in its sole discretion, which are issued by agencies of the United States, or unmatured bearer bonds which are general obligations of, or obligations guaranteed as to principal and interest by, a State or political subdivision there-

V 40 I 219 NOV 12 75 XUM

of which are in the first or second ratings of any nationally known statistical service or unmatured registered debt securities (other than securities which are convertible into other securities) issued by a corporation which are in the first rating of any nationally known statistical service ("qualifying bonds"), having and maintaining a maket value not less than the amount of such open account indebtedness. Such qualifying bonds shall be pledged to the Corporation on such terms and conditions as it shall require; *Provided, however*, That registered securities shall not be pledged to the Corporation otherwise than by book-entry through the facilities of a securities depository with which the Corporation maintains an appropriate account for such purpose. The Board of Directors may 10 business days after giving written notice thereof to all Members increase or decrease the amount of the Member's contributions required to be maintained in cash; provided that such requirement shall apply to all Members. The qualifying bonds pledged by a Member to secure its open account indebtedness shall be held by the Corporation or for its account by a bank or trust company (other than the Member) designated by the Member and acceptable to the Corporation.

B. *SCC Rule 9, Section 1, Paragraph 9.*

In case of any irregularity in an item, the receiving Member or Non-Member Bank may return such item to the delivering Member or Non-Member bank by putting such item in an envelope and delivering the envelope in the same manner as provided by this Section 1 for the delivery by Members and Non-Member Banks, except that the tickets in the envelope and the credit list accompanying the envelope, which are used in connection therewith, shall bear the legend "Reclamation". If such delivery of returned items is to be made through the Corporation it shall be made at Central Delivery Department on the day received or on [a subsequent] the next business day in accordance with the schedule specified by the Corporation; provided, however, that reclamations subject to the Rules of the Board of Directors of the Exchange shall be made within the time periods specified in said Rules. If the delivering Member or Non-Member Bank shall not have agreed with the receiving Member or Non-Member Bank to make the delivery otherwise than under this Rule, the receiving Member or Non-Member Bank shall not be entitled to reclaim the item due to the delivering Member's or Non-Member Bank's delivery of the item under this Rule.

C. *SCC Rule 19. Death, Expulsion or Suspension (other than for insolvency) of Sole Exchange Member.*

Section 1. If the sole reason a Clearing Member qualifies as such under Rule 2 is because the Clearing Member is a member organization of the Exchange, then. (a) If the sole Exchange member of a member firm which is a Clearing Member or the sole Exchange member who is an officer of a member corporation which is a Clearing Member, dies, or is expelled or suspended by the Exchange, other than for insolvency, the Corporation shall, upon receipt of notice thereof, cease to act for such Clearing Member, firm or corporation with respect to transactions generally, as provided in Rule 18, subject, however, to the provisions of the [next] paragraph (b) of this [Rule] *Section 1.*

(b) In the case of the death of the sole Exchange member of a member firm which is a Clearing Member or the sole Exchange member who is an officer of a member corporation which is a Clearing Member, the Corporation shall not cease to act for such firm or corporation if and for so long as such member firm or member corporation is permitted by the Board of Directors of the Exchange, pursuant to the provisions of Section 13 of Article IX of the Constitution of the Exchange, to have the status of a member firm or member corporation; subject, however, to the right of the Corporation to cease to act at any time as provided in Rule 18. The corporation shall so cease to act upon any termination of such status in the same manner and to the same extent as though the death of such sole Exchange member had occurred at the time when such termination becomes effective.

Section 2. If the sole reason a Clearing Member qualifies as such under Rule 2 is because the Clearing Member is a member organization of the American Stock Exchange, Inc. then. (a) If the sole American Stock Exchange, Inc. member of a[n Associate] Clearing Member firm or corporation dies or is expelled or suspended by the American Stock Exchange, Inc. other than for insolvency, the Corporation shall, upon receipt of notice thereof, cease to act for such [Associate] Clearing Member firm or corporation with respect to transactions generally, as provided in Rule 18 subject, however, to the provisions of the [next] paragraph (b) of this [Rule] *Section 2.*

(b) In the case of the death of the sole American Stock Exchange, Inc. member or a[n Associate] Clearing Member firm or corporation, the Corporation shall not cease to act for such firm or corporation if and for so long as such firm or corporation is permitted by the Board of Directors of the American Stock Exchange, Inc., pursuant to the provisions of Section 6 of Article IV of the Constitution of the American Stock Exchange, Inc. to have the status of a temporary member firm or member corporation; subject to the right of the Corporation to cease to act for such [Associate] Clearing Member at any time as provided in Rule 18. The Corporation shall so cease to act upon any termination of such status in the same manner and to the same extent as though the death of such sole [Regular Member] member had occurred at the time when such termination becomes effective.

Section 3. If the event specified in Section 1(a) and Section 2(a) shall occur simultaneously as to a Clearing Member, the Corporation may act for such Clearing Member under either Section 1(b) *or Section 2*(b)*:*

D. *SCC Procedure Manual (page 70).*

Other Distribution: 8:00 a.m.—day of payment.

[1] On day the item is received; the final reclamation time for a reclamation on the next business day after the item is received is 10 a.m.

(b) Not Applicable.
(c) Not Applicable.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

3. *Purpose of Proposed Rule Change.* The purposes of the proposed rule changes are as follows:

A. Rule 4, Section 1, Paragraph 2 is amended in order to expand the types of securities which Members may use in order to secure their open account indebtedness to the Clearing Fund. This amendment would authorize Members to secure their open account indebtedness with U.S. Government debt obligations and debt obligations of agencies of the U.S. Government or with unmatured registered debt securities (other than securities which are convertible into other securities) issued by a corporation, provided that registered debt securities (other than securities which are convertible into other securities) issued by a corporation, provided that registered securities shall not be pledged to the Corporation otherwise than by book-entry through the facilities of a securities depository with which the Corporation maintains an appropriate account for such purpose (Item 1(A) above).

B. Rule 9, Section 1, Paragraph 9 and Page 70 of the Procedure Manual are amended in order to reflect in the Rules and Procedures SCC's long-standing policy that reclamations must be made no later than 10 a.m. on the next business day after the delivery (Items 1 (B) and (D) above).

C. Rule 19 is amended to deal with the fact that Members of the American Stock Exchange, Inc. who are Members of SCC are Clearing Members rather than Associate Members, and to deal with the existence of dual memberships on the New York Stock Exchange, Inc. and the American Stock Exchange, Inc. (Item 1(C) above).

4. *Basis under the Act for adopting the proposed rule change.*

(a) Not applicable.

(b) The proposed rule changes relate to the Exchange's wholly-owned subsidiary, SCC. The amendment to Rule 4, Section 1, Paragraph 2 relates to assurances as to safeguarding of securities and funds which are in the custody or control of SCC and the protection of investors and the public interest in that it redefines the means by which the Clearing Fund, which provides safeguards for securities and protection to investors, may be funded. The amendment to Rule 9, Section 1, Paragraph 9 and Page 70 of the Procedure Manual relates to the prompt and accurate clearance and settlement of securities transactions in that it limits the time within which reclamations may be made. The amendment to Rule 19 relates to the fostering and cooperation and coordination with persons engaged with the clearance and settlement of securities transactions, in that it relates to the scheme of participation in SCC by members of the American Stock Exchange, Inc.

(c) Not applicable.

5. *Comments Received From Members, Participants or Others on Proposed Rule Changes.*

Comments were solicited by notice dated June 17, 1975. No comments have been received.

6. *Burden on Competition.*

None.

Within 15 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved. Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted within three weeks after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 6, 1975.

[Release No. 34-11805; File No. SR-PBWSE-75-5]

PBW STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed By-Law Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 20, 1975, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed By-Law change as follows:

Statement by PBW Stock Exchange, Inc. of the term of substance of the proposed By-Law change. The PBW Stock Exchange, Inc. ("PBW") proposes to amend Exchange By-Law 19-3(b) as stated below. (Brackets indicate words to be deleted and underscoring is used to indicate words to be added.)

Sec. 19-3. The minimum floor brokerage rates to options members on option contracts dealt in on the exchange shall be as follows:

* * * * *

(b) A registered options specialist shall charge as Floor rates for the execution of members' orders in options given him on the Floor of the Exchange personally by an options member, by an options member representative or by an employee of the Exchange, in writing and signed [the following commission based on the number of contracts and the price of the shares involved in each contract order] *sixty (60) per cent of the Floor rates described in Sec. 19-3(a) above.* These commissions shall apply only to transactions when the principal's name is given up at the time of such transactions.

Price per share	Rate per contract: 1st and 2d contract	3d through 10th contract	11th contract and over
[1/16ths of $1 and above, but under 3/16ths of $1	$0.04	$0.03	$0.02
3/16ths of $1 and above, but under 1/4 of $1	.25	.20	.15
1/4 of $1 and above, but under 1/2 of $1	.50	.40	.35
1/2 of $1 and above, but under $1	.80	.75	.65
$1 and above, but under $4	1.10	.90	.80
$4 and above, but under $8	1.95	1.55	1.40
$8 and above, but under $12	2.35	1.90	1.55
$12 and above, but under $16	2.55	2.10	1.90
$16 and above, but under $20	2.90	2.30	2.05
$20 and above, but under $30	3.05	2.50	2.20
$30 and above, but under $40	3.25	2.65	2.35
$40 and above, but under $50	3.50	2.80	2.50
$50 and above	3.70	2.95	2.65]

Notwithstanding the above [rates], when the amount involved in an order is less than $100, the commission shall be as mutually agreed.

When the amount involved in an order exceeds $300,000, the prescribed commission to be charged pursuant to this subsection 19-3(b) shall apply to the maximum number of contract transactions involving an aggregate amount not in excess of $300,000.

The minimum commission rates prescribed in this By-Law Section 19-3 shall expire on April 30, 1976.

Statement by PBW of basis and purpose. This By-Law has been proposed to reduce the commission received by an options specialist on limited orders which are left with the specialist by a floor broker.

The Exchange has determined that the proposed amendment to By-Law 19-3(b) described above does not improve any burden on competition.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all of written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 8, 1975.

For the Commission, by the Division of Marketing Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 6, 1975.

[Release No. 34-11804; File No. SR-PBWSE-75-6]

PBW STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 20, 1975, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement by PBW Stock Exchange, Inc. of the terms of substance of the proposed rule change. Pursuant to Rule 19b-4, the PBW Stock Exchange, Inc. ("PBW") proposes to increase the number of underlying securities from fifteen (15) to forty (40) for competitive reasons and to fulfill the business requirements of firms who have committed capital and expended money in the specialist and retail areas.

Statement by PBW of basis and purpose. On May 15, 1975, the SEC declared effective the PBW Plan regulating transactions in options on the PBW. Currently,

V 40 N 219 NOV 12 1975 XUM

the PBW has permission to trade options in fifteen (15) underlying securities. The addition of options trading in twenty-five (25) underlying securities does not materially alter the original plan as approved by the SEC. The PBW proposal does not hinder in any way the PBW's capacity to carry out the purposes of the Act and to comply and to enforce compliance by members and persons associated with our members. The PBW certifies that action will be taken to accommodate this expansion.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submission should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 8, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

FOURTH SECTION APPLICATIONS FOR RELIEF

NOVEMBER 7, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43070—*Soybeans from Illinois Central Gulf Railroad Company Stations in Illinois to Chicago, Illinois for Export.* Filed by Illinois Central Gulf Railroad Company, (No. 75-1), for interested rail carriers. Rates on soybeans, in carloads, as described in the application, for export, from Illinois Central Gulf Railroad Company stations in Illinois, to Chicago, Illinois, for export.

Grounds for relief—Market competition.

Tariff—Supplement 26 to Illinois Central Gulf Railroad Company tariff 602, I.C.C. No. 36. Rates are published to become effective on Decmeber 1, 1975.

FSA No. 43071—*Joint Rail-Water Container Rates—United States Lines, Inc.* Filed by United States Lines, Inc. (No. 11), for itself and interested rail carriers. Rates on general commodities, between rail terminals at U.S. Gulf seaports, and ports in the United Kingdom, Republic of Ireland, Baltic and Continental Europe.

Grounds for relief—Water competition.

Tariffs—United States Lines, Inc., tariffs F.T. Nos. 15 and 19, I.C.C. Nos. 15 and 19, F.M.C. Nos. 73 and 78, respectively. Rates are published to become effective on December 5, 1975.

FSA No. 43072—*Beet or Cane Sugar from Points in California on The Atchison, Topeka and Santa Fe Ry. Co., to Points in Ill., Iowa, Minn., Mo., Tex., and Wis.* Filed by Trans-Continental Freight Bureau, Agent (No. 496), for interested rail carriers. Rates on sugar, beet or cane, dry, in bulk, in carloads, as described in the application, from points in California on the AT&SF Ry. Co., to points in Illinois, Iowa, Minnesota, Missouri, Texas and Wisconsin; also returned shipments in the reverse direction.

Grounds for relief—Rate relationship; returned shipments.

Tariff—Supplement 11 to Trans-Continental Freight Bureau, Agent, tariff 2-M, I.C.C. No. 1914. Rates are published to become effective on December 6, 1975.

By the Commission.

[Notice No. 41]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

NOVEMBER 7, 1975.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules-Motor Carriers of Property, 1969 (49 CFR 1042.4(c)(11)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.4(c)(12)) at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of publication.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules-Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIERS OF PROPERTY

No. MC 647 (Deviation No. 4), EXHIBITORS SERVICE COMPANY, 85 Helen Street, McKees Rocks, Pa. 15136, filed October 29, 1975. Carrier's representative: Samuel P. Delisi, 604 Law & Finance Bldg., Pittsburgh, Pa. 15219. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certian exceptions, over a deviation route as follows: From Harrisville, Pa., over Pennsylvania Highway 8 to Franklin, Pa., thence over U.S. Highway 322 to Meadville, Pa., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Harrisville, Pa., over Pennsylvania Highway 58 to Mercer, Pa., thence over U.S. Highway 19 to Meadville, Pa., and return over the same route.

No. MC 22229 (Deviation No. 21), TERMINAL TRANSPORT COMPANY, INC., 248 Chester Ave., S.E., Atlanta, Ga. 30316, filed October 29, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From Nashville, Tenn., over U.S. Highway 41 to junction Interstate Highway 74, thence over Interstate Highway 74 to Rock Island, Ill., and (2) From Nashville, Tenn., over U.S. Highway 41 to junction Interstate Highway 74, thence over Interstate Highway 74 to junction U.S. Highway 51 near Bloomington, Ill., thence over U.S. Highway 51 to junction Interstate Highway 80 near LaSalle, Ill., thence over Interstate Highway 80 to junction Illinois Highway 88, thence over Illinois Highway 88 to Rock Falls, Ill., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Nashville, Tenn., over U.S. Highway 31E to junction Kentucky Highway 70, thence over Kentucky Highway 70 to Cave City, Ky., thence over U.S. Highway 31W to Sellersburg, Ind., thence over U.S. Highway 31 to Indianapolis, Ind., thence over U.S. Highway 52 to Montmorenci, Ind., thence over Indiana Highway 53 to junction U.S. Highway 6, thence over U.S. Highway 6 to Hammond, Ind., thence over U.S. Highway 41 to Chicago, Ill., thence over Alternate U.S. Highway 30 to Dixon, Ill., thence over unnumbered highway via Prairieville, Ill., to junction Illinois Highway 2, thence over Illinois Highway 2 to Rock Island, Ill., and return over the same route.

No. MC 33641 (Deviation No. 104), IML FREIGHT, INC., 2175 So. 3270 West, P.O. Box 2277, Salt Lake City, Utah 84110, filed October 29, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Salt Lake City, Utah, over Interstate Highway 80 (using portions of U.S. Highway 40 where Interstate Highway 80 is not completed) to Wells, Nev., thence over U.S. Highway 93 to junction U.S. Highway 30 near Filer, Idaho, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Salt Lake City, Utah, over U.S. Highway 91 to Brigham City, Utah, thence over U.S. Highway 30S to Burley, Idaho, thence over U.S. Highway 30 to junction U.S. Highway 93 near Filer, Idaho, and return over the same route.

No. MC 33641 (Deviation No. 105), IML FREIGHT, INC., 2175 So. 3270 West, P.O. Box 2277, Salt Lake City, Utah 84110, filed October 29, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From junction unnumbered highway (formerly U.S. Highway 25) and U.S. Highway 33, over U.S. Highway 33 to Ft. Wayne, Ind., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From junction U.S. Highway 33 and unnumbered highway (formerly U.S. Highway 25) over unnumbered highway to Lima, Ohio, thence over U.S. Highway 30S to junction U.S. Highway 30 near Delphos, Ohio, thence over U.S. Highway 30 to Ft. Wayne, Ind., and return over the same route. Restriction: Service at points on the routes described above is restricted to traffic which originates at or is destined to points east of Ohio or west of Illinois.

No. MC 55778 (Deviation No. 4), MOTOR DISPATCH, INC., 1020 Eighteenth Street, Detroit, Mich. 48216, filed October 29, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Gary, Ind., over Interstate Highway 65 to Indianapolis, Ind., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Gary, Ind., over U.S. Highway 20 to South Bend, Ind., thence over U.S. Highway 31 to Indianapolis, Ind., and return over the same route.

No. MC 76266 (Deviation No. 23), ADMIRAL-MERCHANTS MOTOR FREIGHT, INC., 215 S. 11th St. Minneapolis, Minn. 55403, filed October 16, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Beloit, Wis., over U.S. Highway 51 to junction Illinois Highway 38 at Rochelle, Ill., thence over Illinois Highway 38 to junction Illinois Highway 2 near Dixon, Ill., thence over Illinois Highway 2 to junction Interstate Highway 80 near E. Moline, Ill., thence over Interstate Highway 80 to junction Iowa Highway 149 near Williamsburg, Iowa, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Beloit, Wis., over Wisconsin Highway 81 to junction Wisconsin Highway 11, thence over Wisconsin Highway 11 to junction U.S. Highway 151, thence over U.S. Highway 151 to Cedar Rapids, Iowa, thence over Iowa Highway 149 to junction Interstate Highway 80 and return over the same route.

No. MC 111651 (Deviation No. 4), MIDDLEWEST FREIGHTWAYS, INC., 6810 Prescott Ave., St. Louis, Mo. 63147, filed October 31, 1975. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Louisville, Ky., over Interstate Highway 64 (using portions of Indiana Highway 64 and necessary connecting highways, until Interstate Highway 64 is complete) to St. Louis, Mo., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Louisville, Ky., over U.S. Highway 150 to junction U.S. Highway 50, thence over U.S. Highway 50 to St. Louis, Mo., and return over the same route.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Notice No. 89]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

NOVEMBER 7, 1975.

The following publications include motor carrier, water carrier, broker, freight forwarder and rail proceedings indexed as follows: (1) grants of authority requiring republication prior to certification; (2) notices of filing of petitions for modification of existing authorities; (3) new operating rights's applications directly related to and processed on a consolidated record with finance applications filed under Sections 5(2) and 212(b); (4) notices of filing of Sections 5(2) and 210a(b) finance applications; and (5) notices of filing of Section 212(b) transfer applications.

Each applicant (except as otherwise specifically noted) states that there will be no significant effect on the quality of the human environment resulting from approval of its application in compliance with the requirements of 49 CFR 1100.250.

Protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice (unless otherwise specified). Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest should comply with section 247(d) or section 240(c) as appropriate of the Commission's General Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and a detailed description of the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest (except for petitions and Finance Dockets under Rule 40 requiring the original and six (6) copies of the protest) shall be filed with the Commission, and a copy shall be served concurrently upon applicant's or petitioner's representative, or applicant or petitioner if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) or section 240(c)(4) of the special rules, and shall include the certification required therein.

No. MC 56679 (Sub-No. 76) (Republication), filed May 29, 1973, and published in the FEDERAL REGISTER issue of August 16, 1973, and republished this issue. Applicant: BROWN TRANSPORT CORP., 125 Milton Avenue SE., Atlanta, Ga. 30315. Applicant's representative: B. K. McClain (same address as applicant). An Order of the Commission, Division 1, Acting as an Appellate Division, dated October 22, 1975, and served October 30, 1975, finds that the present and future public convenience and necessity require operation by applicant in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, of *rugs, carpets, carpeting and tufted textile products*, from points in Georgia, except those south and east of a line beginning at the South Carolina-Georgia State Line and extending west along U.S. Highway 278 to junction Georgia Highway 20 at Conyers, Ga., and thence south along U.S. Highway 23 to junction Interstate Highway 75 at or near Bolingbroke, Ga., thence along Interstate Highway 75 to the Georgia-Florida State Line, to Omaha, Nebr.; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder.

The purpose of this republication is to indicate the extended grant of authority above to include transportation from that portion of Georgia which applicant presently utilizes as an origin territory in its existing authority. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 111625 (Sub-No. 19), (Republication), filed February 11, 1974, and published in the FEDERAL REGISTER issues of March 28, 1974 and October 22, 1975, and republished as corrected in part this issue. Applicant: BERMAN'S MOTOR EXPRESS, INC., Binghamton, N.Y. 13902. Applicant's representative: Norman Weiss, 2 West 45th Street, New York, N.Y. 10036. An Order of the Commission, Review Board Number 3, dated October 1, 1975, and served October 8, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, (6)(a) of *furniture* from Berkshire, N.Y. to points in Allegheny, Armstrong, Beaver, Blair, Butler, Cambria, Fayette, Green, Indiana, Lawrence, Lycoming, Somerset, Washington, and Westmoreland Counties, Pa. The purpose of this corrected republication is to indicate the correct grant of authority in (6)(a). The rest of the notice remains as previously published in the FEDERAL REGISTER issue of October 22, 1975.

Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 117644 (Sub-No. 34) (Republication), filed September 13, 1973, and published in the FEDERAL REGISTER issue of November 23, 1973, and republished this issue. Applicant: D & T TRUCKING CO., INC., P.O. Box 2611, New Brighton, Minn. 55112. Applicant's representative: William J. Boyd, 29 South La Salle Street, Chicago, Ill. 60603. An Order of the Commission, Division 1, Acting as an Appellate Division, dated October 9, 1975, and served October 22, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *contract carrier*, by motor vehicle, over irregular routes, of *meats, meat products, meat by-products, and articles distributed by meat-packing houses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the plant site of Madison Foods, Inc., located at Madison, Nebr., to points in Alabama, Connecticut, Delaware, Florida, Georgia, Indiana, Illinois, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and the District of Columbia, under a continuing contract or contracts with Armour & Company, will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements in the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate a grant of authority to the destination states of Ohio, Pennsylvania, and Rhode Island, which were inadvertently omitted from the November 23, 1973 FEDERAL REGISTER notice. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Permit in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding

setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 139777 (Sub-No. 2) (Republication), filed May 6, 1974, and published in the FEDERAL REGISTER issue of June 13, 1974, and republished this issue. Applicant: SIX STAR TRANSPORTATION, INC., 969A Conklin Street, Farmingdale, N.Y. 11735. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. An Order of the Commission, Review Board Number 2, dated October 8, 1975, and served October 15, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, (1) of *fertilizer and fertilizer ingredients*, (2) of *pesticides* in mixed loads with fertilized and fertilizer ingredients from the facilities of The Andersons, at or near Maumee, Ohio, to points in Connecticut, Delaware, Kentucky, Maryland, New Jersey, New York, Pennsylvania, Virginia, and West Virginia; and (3) of *fertilizer, fertilizer materials, and fertilizer ingredients* from the facilities of Plant Products, Inc., at or near Blue Point, N.Y., to points in Pennsylvania, Ohio, Indiana, Michigan, Illinois, Connecticut, Delaware, Kentucky, Maryland, New Jersey, New York, Virginia, and West Virginia, restricted in (1), (2), and (3) above against the transportation of commodities in bulk, in tank vehicles; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the substantially broadened destination territory granted with respect to part (3) above, and pleadings should be limited with respect thereto. Because it is possible that other parties who have relied upon the notice of the application as published may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a Certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

MOTOR CARRIERS OF PROPERTY

APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATION UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE

No. MC 1783 (Sub-No. 17), filed August 1, 1975. Applicant: BLUE LINE EXPRESS, INC., 260 D. W. Highway, Nashua, N.H. 03060. Applicant's representative: Mary E. Kelley, 11 Riverside Avenue, Medford, Mass. 02155. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), between points in Connecticut.

NOTE.—The purpose of this application is to convert a Certificate of Registration applicant is seeking to acquire to a Certificate of Public Convenience and Necessity. Applicant states that it intends to tack the requested authority with its existing authority on (1) *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment).

(a) At points in Connecticut east of Connecticut Highway 32, to provide service between Boston, Mass. and points in Massachusetts within 25 miles of Boston, on the one hand, and, on the other, points in Connecticut; (b) at points within 25 miles of Boston tacked with (a) above to provide service between points in Massachusetts and Connecticut; (c) at Springfield or points within 15 miles of Springfield tacked with (b) above between points in Massachusetts and again at points within 25 miles of Boston area, service could be provided between points in Connecticut and Bennington, Vt., Albany, N.Y. and points within 10 miles of Albany; and (d) at points in Massachusetts within 50 miles of Brattleboro, Vt. tacked with (b) authority between points in Massachusetts and tacked with (a) at points within 25 miles of Boston area, service could be provided between points in Connecticut and points in New Hampshire and Vermont within 50 miles of Brattleboro, Vt.

(2) *Textile mill products, textile mill supplies, and equipment* used or useful in the manufacture of such products, (a) at Boston and 10 miles of Boston or specifically named points within 25 miles of Boston, in providing service between Connecticut points and authorized points or areas in Vermont and New Hampshire; and (b) at points in Connecticut on and east of Connecticut Highway 8, to provide service between Augusta and Auburn, Maine, Westerly, Woonsocket, Providence, and North Smithfield, R.I. Wauregan, Conn.; Nashua, N.H. and points in that part of Massachusetts on and east of U.S. Highway 5, on the one hand, and, on the other, points in Connecticut. Applicant has filed concurrently with this application a gateway elimination application in MC 1783 (Sub-No. 18) published below. This is a matter directly related to a Section 5(2) proceeding in MC-F-12566 published in the FEDERAL REGISTER issue of August 13, 1975. If a hearing is deemed necessary, applicant requests it be held at either Boston, Mass. or Hartford, Conn.

No. MC 1783 (Sub-No. 18), filed August 1, 1975. Applicant: BLUE LINE EXPRESS, INC., 260 D.W. Highway, Nashua, N.H. 03060. Applicant's representative: Mary E. Kelley, 11 Riverside Avenue, Medford, Mass. 02155. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), (a) between Boston, Mass. and points in Massachusetts within 25 miles of Boston, on the one hand, and, on the other, points in Connecticut. The purpose of this filing is to eliminate a gateway at points in Connecticut east of Connecticut Highway 32.

(b) Between points in Massachusetts and Connecticut. The purpose of this filing is to eliminate a gateway at points within 25 miles of Boston, Mass.

(c) Between points in Connecticut; Bennington, Vt.; and Albany, N.Y. and points within 10 miles thereof. The purpose of this filing is to eliminate gateways at Springfield, Mass., points within 25 miles of Boston, Mass. and points in Massachusetts.

(d) Between points in Connecticut, and points in New Hampshire and Vermont within 50 miles of Brattleboro, Vt. The purpose of this filing is to eliminate gateways at points in Massachusetts within 50 miles of Brattleboro, Vt., those in Massachusetts within 25 miles of Boston, Mass. and points in Massachusetts.

(2) *Textile mill products, textile mill supplies, and equipment* used or useful in the manufacture of such products, (a) between points in Connecticut and Pittsfield, N.H., Hartford and Wilder, Vt., and points in that part of New Hampshire on and west of a line beginning at the Massachusetts-New Hampshire State Boundary line and extending north along New Hampshire Highway 28 to Manchester, N.H., thence along U.S. Highway 3 via Franklin, N.H., to intersection New Hampshire Highway 11, thence along New Hampshire Highway 11 to intersection U.S. Highway 4, and thence along U.S. Highway 4 to the New Hampshire-Vermont State Boundary line, and that part of Vermont on and east of a line beginning at the Vermont-New Hampshire State Boundary line at a point near Bellows Falls, Vt., including Bellows Falls, Vt., and extending north along U.S. Highway 5 to intersection Vermont Highway 103, thence along Vermont Highway 103 to Ludlow, Vt., thence along Vermont Highway 100 to Plymouth Union, Vt., thence along Vermont Highway 100 to intersection U.S. Highway 4 and thence along U.S. Highway 4 to the Vermont-New Hampshire State Boun-

V 40 N 219 NOV 12 75 XUM

lary line, including points on the indicated portions of the highways specified. The purpose of this filing is to eliminate a gateway at points in Boston, Mass. and 10 miles thereof, or specifically named points within 25 miles of Boston, Mass.

(b) Between Augusta and Auburn, Maine, Westerly Woonsocket, Providence, and North Smithfield, R.I., Wauregan, Conn., Nashua, N.H., and points in that part of Massachusetts on and east of U.S. Highway 5, on the one hand, and, on the other, points in Connecticut. The purpose of this filing is to eliminate a gateway of points in Connecticut on and east of Connecticut Highway 8.

NOTE.—This is a gateway elimination request for authority sought in MC 1783 (Sub-No. 17) published above, and is a matter directly related to a Section 5(2) proceeding in MC–F–12566 published in the FEDERAL REGISTER issue of August 13, 1975. If a hearing is deemed necessary, applicant requests it be held at either Boston, Mass. or Hartford, Conn.

No. MC 53321 (Sub-No. 11), filed October 20, 1975. Applicant: RAU CARTAGE, INC., 1107 East Noble Ave., Monroe, Mich. 48161. Applicant's representative: William B. Elmer, 21635 East Nine Mile, St. Clair Shores, Mich. 48080. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paper and paper products*, from Monroe, Mich., to points in that part of Pennsylvania on and west of U.S. Highway 19 and (2) *raw materials* used for the manufacture of paper and paper products, from points in that part of Pennsylvania on and west of U.S. Highway 19, to Monroe, Mich., restricted to traffic moving to or from the plant sites of Consolidated Packaging Corporation at Monroe, Mich., Union Camp Corporation at Monroe, Mich., Time Container Corporation at Monroe, Mich., and Cleveland Partition Company at Donora, Pa. and (3) *paper and paper products*, between Donora, Pa., on the one hand, and, on the other, points in Michigan, Ohio, and Indiana, restricted to traffic to or from the plant sites of Union Camp Corporation and Cleveland Partition Corporation. This is a matter directly related to a Section 5(2) proceeding in MC–F–12661 published in the FEDERAL REGISTER issue of November 5, 1975. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich., Lansing, Mich. or Chicago, Ill.

No. MC 95876 (Sub-No. 179) (Partial Correction) filed August 25, 1975 published in the FEDERAL REGISTER issue of October 22, 1975, and republished, as corrected in part, this issue. Applicant: ANDERSON TRUCKING SERVICE, INC., 203 Cooper Avenue North, St. Cloud, Minn. 56301. Applicant's representative: Val M. Higgins, 1000 First National Bank Building, Minneapolis, Minn. 55402. (14) *Lumber*, when moving as equipment, materials and supplies used in the quarrying, fabricating, and installation of granite, marble, slate, and stone, (a) from points in Bonner and Kootenai Counties, Idaho, and Pend Oreille, Spokane, and Stevens Counties, Wash., to points in Nebraska on and east of U.S. Highway 281, points in Kansas on and east of U.S. Highway 281 points in Oklahoma on and east of U.S. Highway 281 from the Kansas-Oklahoma State Boundary line, southerly along U.S. Highway 281 to its intersection with U.S. Highway 64, thence westerly along U.S. Highway 64 to its intersection with Oklahoma Highway 34, thence south on Oklahoma Highway 34 to its intersection with U.S. Highway 283 near Willow, thence southerly along U.S. Highway 283 to the Oklahoma-Texas State Boundary line, points in Texas on, east, and south of U.S. Highway 283 from the Oklahoma-Texas State Boundary line, southerly to intersection with U.S. Highway 87, thence southerly along U.S. Highway 87 to intersection with U.S. Highway 377, thence southerly along U.S. Highway 377 to the International Boundary line between Texas and the Republic of Mexico, and points in States east of North Dakota, Nebraska, Kansas, Oklahoma, and Texas; and (b) from points in Bonner and Kootenai Counties, Idaho, and Pend Oreille, Spokane, and Stevens Counties, Wash., to points in Nebraska, Kansas, Oklahoma, and Texas west of the above described area, points in North Dakota and all points in the states west of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas. The purpose of this filing is to eliminate the gateway of points in Minnesota.

(22) *Lumber*, when moving as contractors' and construction equipment and materials and as wood fencing, wood posts, wood rails and *accessories* used in the installation of the abovementioned commodities; (a) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Iowa on and east of Interstate Highway 35 from the Minnesota State Boundary line to Des Moines, Iowa, thence along U.S. Highway 65 to the Missouri State Boundary line, points in Missouri on and east of Missouri Highway 5, points in Arkansas on, south, and east of Arkansas Highway 5 from the Missouri State Boundary line to intersection with U.S. Highway 62, thence west along U.S. Highway 62 to intersection with U.S. Highway 65 near Bellefonte, thence along U.S. Highway 65 to Little Rock, thence U.S. Highway 167 to the Louisiana State Boundary Line, points in Louisiana on and east of U.S. Highway 167 from the Arkansas State Boundary line to intersection with Louisiana Highway 333, thence along Louisiana Highway 333 to the Gulf of Mexico, points in Wisconsin, Illinois, Michigan, Indiana, Ohio, Pennsylvania, New York, Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New Jersey, Maryland, Delaware, District of Columbia, West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, and Florida; and (b) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Iowa, Missouri, Arkansas, and Louisiana that are west of the above described areas, and points in North Dakota, Nebraska, Kansas, Oklahoma, Texas, New Mexico, Colorado, Wyoming, and Montana. The purpose of this filing is to eliminate the gateways of points in South Dakota and Beltrami County, Minn.

(26) *Lumber, poles and pilings* when moving as contractors' and construction equipment and materials, (a) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Illinois, Indiana, Kentucky, Ohio, Pennsylvania, Michigan, New York, points in Iowa on and east of U.S. Highway 218 from the Minnesota State Boundary line to Waterloo, thence along Iowa Highway 21 to intersection with Iowa Highway 92, thence along Iowa Highway 92 to its intersection with Iowa Highway 149, thence along Iowa Highway 149 southerly to its intersection with U.S. Highway 63, thence along U.S. Highway 63 to its intersection with Iowa Highway 2, thence along Iowa Highway 2 to its intersection with Iowa Highway 15, thence along Iowa Highway 15 to the Missouri State Boundary line, points in Minnesota on and east of Minnesota Highway 15 from the Iowa State Boundary line southerly to its intersection with U.S. Highway 54, thence along U.S. Highway 54 to its intersection with U.S. Highway 63, thence along U.S. Highway 63 to the Arkansas State Boundary line, and points in Minnesota on and east of U.S. Highway 53 from International Falls southerly to its intersection with Minnesota Highway 73, thence along Minnesota Highway 73 to its intersection with U.S. Highway 61, thence along U.S. Highway 61 to its intersection with Minnesota Highway 23, thence along Minnesota Highway 23 to its intersection with Minnesota Highway 65, thence along Minnesota Highway 65 to intersection with Interstate Highway 35, thence along Interstate Highway 35 to its intersection with U.S. Highway 218, thence along U.S. Highway 218 to the Iowa State Boundary line; and (b) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Minnesota, Missouri, and Iowa west of the above described area and points in Kansas, Nebraska, and North Dakota. The purpose of this filing is to eliminate the gateways of points in South Dakota, Minnesota, and Superior, Wis.

(28) *Lumber*, when moving as contractors' and construction equipment and materials and as wallboard, pulpboard, and hardboard, (a) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Connecticut, Delaware, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and the District of Columbia and points in Arkansas on and east of U.S. Highway 63 from the Missouri State Boundary line to its intersection with U.S. Highway 167 near Hardy, thence along U.S. 167 to the Louisiana State Boundary line; and (b) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Arkansas west of the above described area and points in Oklahoma and Texas. The purpose of this filing is to eliminate the gateways of points in South Dakota and Cloquet, Minn.

(30) *Lumber*, when moving as equipment, materials and supplies used in the quarrying, fabricating, manufacturing, and installation of granite, marble, slate, and stone (except commodities which because of size or weight require the special equipment and commodities in bulk), (a) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Delaware, Maryland, District of Columbia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Kentucky, West Virginia, Ohio, Indiana, Michigan, Illinois, Louisiana, Arkansas, Missouri, Iowa, Nebraska points on and east of U.S. Highway 281, points in Oklahoma on and east of U.S. Highway 281 from the Kansas State Boundary line to its intersection with U.S. Highway 183, thence along U.S. Highway 183 to its intersection with Interstate Highway 40, thence westerly along Interstate Highway 40 to intersection with Oklahoma Highway 44, thence southerly along Oklahoma Highway 44 to intersection with U.S. Highway 283, thence along U.S. Highway 283 to the Texas State Boundary line, points in Texas on and east of U.S. Highway 283 from the Oklahoma State Boundary line to its intersection with U.S. Highway 87, thence along Texas Highway 87 to intersection with U.S. Highway 377, thence along Highway 377 to the intersection with Texas Highway 27, and Interstate Highway 10, thence along Texas Highway 27 and Interstate Highway 10 to intersection with Texas Highway 16, thence along Texas Highway 16 to the International Boundary line between Texas and the Republic of Mexico and; (b) from points in Flathead, Lake, Lincoln, Mineral, Missoula, Ravalli, and Sanders Counties, Mont., to points in Texas, Oklahoma, Kansas, Nebraska west of the above described areas and points in North Dakota, Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Idaho, Nevada, California, Oregon, and Washington. The purpose of this filing is to eliminate gateway of points in Codington County, S. Dak.

NOTE.—The purpose of this partial republication is to correct the authority stated above previously published in error. Common control may be involved. This is a gateway elimination request and is a matter directly related to a Section 5(2) proceeding in MC–F–2623 published in the FEDERAL REGISTER issue of September 10, 1975. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC–F–12648. Authority sought for control by FOUR WINDS ENTERPRISES, INC., 7035 Convoy Court, P.O. Box No. 80771, San Diego, CA 92138, of MOVERS PORT SERVICE INCORPORATED, also of the San Diego, CA 92138 address, and for acquisition by RICHARD W. ARENDSEE, also of the San Diego, CA 92138 address, of control of MOVERS PORT SERVICE INCORPORATED, through the acquisition by FOUR WINDS ENTERPRISES, INC. Applicants' attorney: Robert J. Gallagher, 1776 Broadway, N.Y., NY 10019. Operating rights sought to be controlled: *Household goods* as a *common carrier* over irregular routes between points in Los Angeles, Orange, Riverside, Imperial, Kern, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, and Ventura Counties, Calif., Cochise, Maricopa, Pima, Pinal, and Yuma Counties, Ariz., and Hidalgo County, N. Mex. FOUR WINDS ENTERPRISES, INC., holds no authority from this Commission. However, it is affiliated with FOUR WINDS VAN LINES, INCORPORATED which holds authority under No. MC 15643 to operate as a *common carrier* in Alabama, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, and Wisconsin. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–12663. Authority sought for merger by EASTERN EXPRESS, INC., 1450 Wabash Ave., Terre Haute, IN 47808, of the operating rights and properties of R. C. MOTOR LINES, INC., also of Terre Haute, IN 47808, and for acquisition by AMERICAN EXPORT INDUSTRIES, INC., 26 Broadway, New York, NY 10004, and ISBRANDTSEN COMPANY, INC., P.O. Box 123, Bowling Green Station, New York, NY 10004, of control of such rights and properties through the transaction. Applicants' attorney: William Q. Keenan, 277 Park Ave., New York, NY 10017. Operating rights sought to be merged: *General commodities*, with certain specified exceptions, and numerous other specified commodities, as a *common carrier*, over regular and irregular routes, from, to, and between specified points in the States of Georgia, South Carolina, North Carolina, Florida, Maryland, Pennsylvania, Massachusetts, Connecticut, Virginia, Alabama, Delaware, and New Jersey, serving various intermediate and offroute points, as more specifically described in Docket No. MC 75651 and Subnumbers thereunder. This notice does not purport to be a complete description of all of the operating rights of the carrier involved. The foregoing summary is believed to be sufficient for purposes of public notice regarding the nature and extent of this carrier's operating rights, without stating, in full, the entirety, thereof. EASTERN EXPRESS, INC., is authorized to operate as a *common carrier* in Pennsylvania, Missouri, New Jersey, Indiana, New York, Ohio, Illinois, West Virginia, Michigan, Kentucky, Massachusetts, Connecticut, Rhode Island, Iowa, Wisconsin, Kansas, Colorado, and Delaware. Application has not been filed for temporary authority under section 210a(b).

NOTE.—Pursuant to Report and Order dated December 26, 1974, and served January 22, 1975, in No. MC–F–10813, transferee acquired control of transferor.

No. MC–F–12664. Authority sought for control by UNITED TRANSPORTS, INC., P.O. Box 717 Downtown Station, Omaha, NE 68101, of SIMANEK, INC., 150 W. 7th St., Wahoo, NE 68066, and for acquisition by DONALD F. SWERCZEK, also of Omaha, NE 68101, and DONALD W. WYNNE, 2222 North 11th St., Omaha, NE 68110, of control of SIMANEK, INC., through the acquisition by UNITED TRANSPORTS, INC. Applicants' attorney: Patrick E. Quinn, P.O. Box 82028, Lincoln, NE 68501. Operating rights sought to be controlled: *Certain specified commodities*, as a *common carrier* over irregular routes, from, to, and between specified points in the States of Kansas, Nebraska, Iowa, Wisconsin, Minnesota, Missouri, Illinois, Indiana, Michigan, Colorado, South Dakota, North Dakota, Wyoming, Montana, and Oklahoma, with certain restrictions, as more specifically described in Docket No. MC 119400 and Sub-numbers thereunder. This notice does not purport to be a complete description of all of the operating rights of the carrier involved. The foregoing summary is believed to be sufficient for purposes of public notice regarding the nature and extent of this carrier's operating rights, without stating, in full, the entirety, thereof. UNITED TRANSPORTS, INC., holds no authority from this Commission. However, it is affiliated with WYNNE TRANSPORT SERVICE, INC., 2222 N. 11th St., Omaha, NE 68110, No. MC 114725, which is authorized to operate as a *common carrier* in Nebraska, Iowa, Kansas, Missouri, Illinois, Minnesota Montana, North Dakota, South Dakota, Colorado, Wyoming, Wisconsin, Kentucky, Michigan, Oklahoma, California, and Arizona. Application has been filed for temporary authority under section 210a(b).

No. MC–F–12665. Authority sought for control by GROSS & HECHT TRUCKING CORP., P.O. Box 514, Edison, NJ 08817, of KEYSTONE TRUCKING CORP., 811 S. Washington Ave., Scranton, PA 18505, and for acquisition by TRANSCO GROUP, INC., 130 Davidson Ave., Somerset, NJ, and in turn, by ARTHUR M. BOLDBERG, also of Edison, NJ 08317, of control of KEYSTONE TRUCKING CORP., through the acquisition by GROSS & HECHT TRUCKING CORP. Applicants' attorney: A. David Millner, 744 Broad St., Newark, NJ 07102. Operating rights sought to be controlled: Such merchandise as is dealt in by retail chain grocery and food business houses (except commodities in bulk, and, in connection therewith, equipment, material and supplies

V 40 N 219 NOV 12 75 XUM

(except commodities in bulk, used in the conduct of such business, as a contract carrier over irregular routes, between New York, N.Y., points in New Jersey, Broome, Chemung, Delaware, Nassau, Orange, Rockland, Steuben, Suffolk, Sullivan, Tioga, Tompkins, Ulster, and Westchester Counties, N.Y., and Berks, Bradford, Bucks, Carbon, Chester, Columbia, Dauphin, Delaware, Juniata, Lackawanna, Lancaster, Lebanon, Lehigh, Luzerne, Lycoming, Monroe, Montgomery, Montuor, Northampton, Northumberland, Perry, Philadelphia, Pike, Schuylkill, Snyder, Sullivan, Susquehanna, Wayne, Wyoming, Tioga, and Union Counties, Pa. Certificate not yet issued. GROSS & HECHT TRUCKING CORP., is authorized to operate as a *contract carrier* in New York, New Jersey, Pennsylvania, Connecticut, and Maryland. Application has not been filed for temporary authority under section 210a(b).

NOTICE

ST. LOUIS-SAN FRANCISCO RAILWAY COMPANY, 906 Olive Street, St. Louis, Missouri 63101, represented by Mr. J. S. Bowie, Assistant General Counsel, St. Louis-San Francisco Railway Company, Suite 1023 Frisco Building, 906 Olive Street, St. Louis, Missouri 63101, hereby gives notice that, on the 30th day of October, 1975, it filed with the Interstate Commerce Commission at Washington, D.C., an application under Section 5(2) of the Interstate Commerce Act for an order approving and authorizing the acquisition of trackage rights over The Kansas City Southern Railway Company between Mile Post 119.3 near Mulberry, Crawford County, Kansas, and Mile Post 129.7 near Pittsburg, Crawford County, Kansas, a distance of approximately 10.4 miles, which application was assigned Finance Docket No. 28032.

In the opinion of the applicant, the authority sought will have no significant effect upon the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 C.F.R. 1100.250) in Ex Parte No. 55 (Sub-No. 4), *Implementation—Nat'l Environmental Policy Act, 1969*, 340 I.C.C. 431 (1972), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall include information relating to the relevant factors set forth in Ex Parte No. 55 (Sub-No. 4), *supra*, Part (b)(1)–(5), 340 I.C.C. 431, 461.

The proceeding will be handled without public hearings unless protests are received which contain information indicating a need for such hearings. Any protests submitted shall be filed with the Commission no later than December 12, 1975.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.75-30509 Filed 11-11-75;8:45 am]

MOTOR CARRIER INTRASTATE APPLICATIONS

Filing

NOVEMBER 7, 1975.

The following applications for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962. These applications are governed by Special Rule 1.245 of the Commission's Rules of Practice, published in the FEDERAL REGISTER, issue of April 11, 1963, page 3533, which provides, among other things that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

Texas Docket No. 4403, filed October 21, 1975. Applicant: OBIE NATIONS, doing business as, TYLER BUS LINES, 2315 Lingner, Tyler, Texas 75701. Applicant's representative: Paul D. Angenend, P.O. Box 2207, Austin, Texas 78767. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Mail, Newspapers, Parcels and Express Packages* in intrastate, interstate and foreign commerce: From Tyler over Texs Highway 155 to Palestine, thence over U.S. Highway 79 to Hearne, and return over the same route, serving all intermediate points. The above authority is subject to the following restrictions: (1) Applicant is hereby prohibited from transporting any high explosives, acids, inflammable liquids, loaded guns, inflammable or combustible motion picture films, or other articles which will endanger the life or limb of the passengers being transported in the motor bus. (2) Applicant is hereby prohibited from transporting any mail, newspapers, parcels and express packages which interfere with the convenience and reasonable comfort or safety of the passengers being transported in the motor bus. (3) The authority to transport mail, newspapers, parcels and express packages in the same vehicle transporting passengers shall be coextensive with the certificates and operating rights authorizing the transportation of passengers, and the applicant is hereby prohibited from transferring by assignment, sale, lease, or otherwise, the authority to transport passengers unless the authority to tranport mail, newspapers, parcels and express packages shall be transferred simultaneously, and/or vice versa. If operations under this motor bus certificate are abandoned or suspended, the authority to transport mail, newspapers, parcels and express packages will be abandoned or suspended accordingly.

(4) Applicant is hereby prohibited from engaging in pickup and delivery service and the services that it will render hereunder will be only from terminal to terminal. (5) The Railroad Commission of Texas hereby retains jurisdiction over this grant of authority to the end that it may at any time, after notice and hearing, restrict applicant's transportation of mail, newspapers, parcels and express packages so as to prevent it from becoming a primary truck service instead of a truck service incident to the primary motor bus service, and, further, the Railroad Commission of Texas hereby retains jurisdiction to regulate the size and weight of packages so as to prevent the applicant from engaging in the transportation of property as a primary operation. (6) Applicant is hereby authorized to only transport mail newspapers, parcels and express shipments on motor buses transporting passengers, and applicant is hereby prohibited from using separate vehicles in the transportation of these commodities. (7) The Railroad Commission of Texas hereby restricts the transportation of these commodities—mail, newspapers, parcels and express packages—so that applicant is prohibited from utilizing the interior of the bus where seats are located for the comfort and convenience of the bus passengers for the transportation of parcels and express packages. The applicant will utilize below-floor luggage compartments or luggage compartments in the rear of the bus that is separated from the passenger carrying interior, or racks on the top of bus, for the transportation of parcels and express packages; and further, the Railroad Commission of Texas retains jurisdiction to enforce this restriction.

(8) The holder of this certificate is hereby restricted from transporting film (flammable or inflammable) where the consignor or consignee thereof is a motion picture film exchange or a motion picture film theatre and the proposed movement is between points in Texas served in film common carrier motor carrier service as of December 15, 1956, by a common carrier film carrier and/or carriers authorized by the Railroad Commission of Texas pursuant to certificates of public convenience and necessity issued to such film carriers; and such points are as reflected by the Commission's records and a tabulation filed in this proceeding on or about January 21, 1957, to all of which reference is made for purposes of this restriction.

NOTE.—Applicant proposes to tack and coordinate the proposed additional services with all service authorized in intrastate commerce under Common Carrier Certificate No. 4403 and with all services now authorized in interstate and foreign commerce under authority granted in Docket No. MC 139629.

HEARING: Date, time and place will be scheduled approximately 30 days after publication in the FEDERAL REGISTER. Requests for procedural information should be addressed to Railroad Commission of Texas, Capitol Station—P.O. Drawer 12967, Austin, Tex. 78711 and should not be directed to the Interstate Commerce Commission.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Rule 19, Ex Parte No. 241, 8th Rev. Exemption No. 10]

ATLANTA AND SAINT ANDREWS BAY RAILWAY CO. ET AL.

Exemption Under Provision of Mandatory Car Service Rules

It appearing, that the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C. R.E.R. No. 397, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44 ft. 6 in. or less and equipped with doors less than 9 ft. wide and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

Atlanta and Saint Andrews Bay Railway Company Reporting Marks: ASAB.
[1] The Baltimore and Ohio Railroad Company, Reporting Marks: BO.
[1] Bangor and Aroostook Railroad Company, Reporting Marks: BAR.
The Central Railroad Company of New Jersey, Robert D. Timpany, Trustee, Reporting Marks: CNJ.
[1] The Chesapeake and Ohio Railway Company, Reporting Marks: CO.
Chicago, West Pullman & Southern Railroad Company, Reporting Marks: CWP.
The Denver and Rio Grande Western Railroad Company, Reporting Marks: DRGW.
[1] Missouri-Kansas-Texas Railroad Company, Reporting Marks: MKT.
[1] Penn Central Transportation Company, Robert W. Blanchette, Richard C. Bond and John H. McArthur, Trustees, Reporting Marks: NH–NYC–PAE–PC–P&E–PRR.
[1] Soo Line Railroad Company, Reporting Marks: SOO.
[1] Union Pacific Railroad Company, Reporting Marks: UP.
[1] Western Maryland Railway Company, Reporting Marks: WM.

Effective 11:59 p.m., October 31, 1975, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., October 29, 1975.

INTERSTATE COMMERCE COMMISSION,
[SEAL] R. D. PFAHLER, *Agent.*

NOTE.—Exemption No. 89 also applicable to 40-ft. plain boxcars will be allowed to expire on October 31, 1975.

[FR Doc.75-30511 Filed 11-11-75;8:45 am]

[1] Addition.

[Rule 19, Ex Parte No. 241; 13th Rev. Exemption No. 99]

BURLINGTON NORTHERN INC. ET AL.

Exemption Under Provision of Mandatory Car Service Rules

It appearing, that the U.S. railroads own numerous plain gondolas less than 61 ft.; that under present conditions, there are substantial surpluses of these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain gondolas, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, plain gondola cars described in the Official Railway Equipment Register, I.C.C. R.E.R. No. 397, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "GA", "GB", "GD", "GH", "GS", and "GW", which are less than 61 ft. 0 in. long, and which bear the reporting marks assigned to United States Railroads, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b). (See exceptions 1, 2 and 3)

Exception 1: This exemption does not supersede United States customs regulations applicable to cars owned by Canadian or Mexican railroads.

Exception 2: This exemption shall not apply to cars subject to service orders issued by the Interstate Commerce Commission or to directives issued by the Car Service Division of the Association of American Railroads, restricting the use of designated cars.

Exception 3: This exemption shall not apply to plain gondola cars owned by the railroads named below:

Burlington Northern Inc., Reporting Marks: BN–CBQ–GN–NP–SPS.
The Central Railroad Company of New Jersey, Robert D. Timpany, Trustee, Reporting Marks: CNJ.
Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Reporting Marks: MILW.
The Denver and Rio Grande Western Railroad Company, Reporting Marks: DRGW.

[AB 7 (Sub-No. 16)]

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD CO.

Abandonment Between Cannon Falls and Red Wing, in Goodhue County, Minnesota

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing, that no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq.; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Goodhue County, Minn., on or before November 21, 1975 and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this finding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy of the notice to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to interested persons.

Dated at Washington, D.C., this 29th day of October, 1975.

By the Commission, Commissioner Brown.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[AB 7 (Sub-No. 16)]

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD COMPANY ABANDONMENT BETWEEN CANNON FALLS AND RED WING, IN GOODHUE COUNTY, MINNESOTA

The Interstate Commerce Commission hereby gives notice that by order dated October 29, 1975, it has been determined that the proposed abandonment of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company of operation of a line of railroad between Cannon Falls and Red Wing, Minn., a distance of 21.60 miles plus abandonment of 1.66 miles of side tracks in Cannon Falls, Minn., if approved by the Commission, does not constitute a major Federal action signifi-

V 40 I 219 NOV 12 75 XUM

cantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. § 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed action are considered insignificant because the applicant proposed to abandon service only over its jointly-owned line of rail, and the Chicago and North Western Transportation Company, co-owners of the instant line, will continue to supply local service between Cannon Falls and Red Wing. Abandonment of the side tracks will divert prior rail traffic to motor carriers. Adequate highways exist in the area and, due to the minimal traffic involved, the resulting air pollution, intrusive noise, fuel consumption, and safety hazard impacts would be minimal. There are no historic or archaeological sites involved in the proposed action.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commision, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-7966.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before December 8, 1975.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.75-30513 Filed 11-11-75;8:45 am]

[AB 107]

KALAMAZOO, ALLEGAN AND GRAND RAPIDS RAILROAD CO.

Abandonment between Parchment and Plainwell, also between Byron Center and Wentworth, all in Kalamazoo, Allegan, and Kent Counties, Michigan

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing that no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq.; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Kalamazoo, Allegan, and Kent Counties, Mich., on or before November 25, 1975 and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this finding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy, of the notice to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to interested persons.

Dated at Washington, D.C., this 31st day of October 1975.

By the Commission, Commissioner Brown.

[SEAL] ROBERT L. OSWALD,
Secretary.

[AB 107]

KALAMAZOO, ALLEGAN AND GRAND RAPIDS RAILROAD COMPANY ABANDONMENT BETWEEN PARCHMENT AND PLAINWELL, ALSO BETWEEN BYRON CENTER AND WENTWORTH, ALL IN KALAMAZOO, ALLEGAN, AND KENT COUNTIES, MICHIGAN

The Interstate Commerce Commission hereby gives notice that by order dated October 31, 1975, it has been determined that the proposed abandonment of the Kalamazoo, Allegan, and Grand Rapids Railroad Company of the following two portions of the Kalamazoo branch line: (1) Between Parchment and Plainwell, for a distance of 7.26 miles in Kalamazoo and Allegan Counties, Mich., and (2) between Byron Center and Wentworth, for a distance of 7.03 miles in Kent County, Mich., if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed action are considered insignificant because there has been no traffic over either portion of the line since 1973, and there would be no major ecological, historical, or public safety impacts resulting from the abandonment. There are no clearly defined land use or finalized comprehensive plans with which the abandonment would conflict. There is potential for public recreational use of both portions of the branch line, due to the proximity of the lines to the Kalamazoo and Grand Rapids metropolitan areas.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-7966.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C., 20423, on or before December 10, 1975.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

[SEAL] ROBERT L. OSWALD,
Secretary.

WEDNESDAY, NOVEMBER 12, 1975

PART II:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

HUMAN BLOOD

Registration of Blood Products, Product Establishments, and Listing of Blood and Blood Products

V 40 219 NOV 12 75 XUM

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—DRUGS; GENERAL

SUBCHAPTER F—BIOLOGICS

[Docket No. 75N-0299]

REGISTRATION OF HUMAN BLOOD AND BLOOD PRODUCT ESTABLISHMENTS AND LISTING OF BLOOD AND BLOOD PRODUCTS

The Commissioner of Food and Drugs is reestablishing administrative responsibility in the Bureau of Biologics for (1) registration of all blood and blood product establishments (blood banks and other firms collecting, manufacturing, preparing or processing human blood and blood products) and (2) listing of blood and blood products. In addition, the Commissioner is announcing that a new Form FD–2830 (Blood Establishment Registration and Product Listing) has been developed specifically for use by blood and blood product establishments for registration and listing. All future correspondence and submissions regarding registration of blood and blood product establishments and listing of blood and blood products should be directed to the Bureau of Biologics. This regulation is effective November 15, 1975.

Since blood and blood products are drugs, the Drug Listing Act of 1972 requires owners and operators of blood and blood product establishments to register and list their blood products. Consequently, in the FEDERAL REGISTER of January 31, 1973 (38 FR 2965), the Commissioner amended 21 CFR 207.65 (b) of the drug regulations (formerly 21 CFR 132.51(b)) and added a new section, 21 CFR 601.11 to the biologics regulations (formerly 21 CFR 273.237) to require that all blood and blood product establishments must register with the Food and Drug Administration, Bureau of Biologics, pursuant to section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360). As a result, approximately 6,000 blood and blood product establishments registered for the first time with the Food and Drug Administration. Subsequently, the Commissioner temporarily transferred the administrative responsibility for registration of blood and blood product establishments to the Bureau of Drugs. This change was reflected in § 601.11 (b) and (c) of the recodified regulations published in the FEDERAL REGISTER of November 20, 1973 (38 FR 32048).

The Commissioner has determined that responsibility for registration of blood and blood product establishments should be reassigned to the Bureau of Biologics, and this duty is therefore being returned to that Bureau. Since the Bureau of Biologics has the primary regulatory responsibility for blood and blood products, the Commissioner is also transferring administrative responsibility for the listing of blood and blood products from the Bureau of Drugs to the Bureau of Biologics. In addition, because the manufacture of human blood and blood products is significantly different from all other drugs, a new registration and listing Form FD–2830 has been designed specifically for use by blood and blood product establishments for registration and listing. The new Form FD–2830 will be used by blood and blood product establishments in lieu of Form FD–2656 (Registration of Drug Establishment) and Form FD–2657 (Drug Product Listing) which are required by Part 207 (21 CFR Part 207) for use by all other drug establishments, for registration and listing, respectively. A new Form FD–2831 (Blood Establishment Resource Summary) is also available for use in lieu of Form FD–2656A (Optional Distribution Data).

Since Form FD–2830 has been specifically designed for use by blood and blood product establishments for registration and listing, the Commissioner has determined that owners and operators of blood and blood product establishments, who also manufacture or process other drug products at the same establishment, shall register with both the Bureau of Biologics and the Bureau of Drugs. Blood and blood products shall be listed with the Bureau of Biologics, and other drug products shall be listed with the Bureau of Drugs. Although these owners and operators are required to register with both bureaus, a common reigstration number will be assigned to each establishment.

In vitro diagnostic blood products and reagents exempted under § 607.65 do not include products that are subject to licensing under section 351 of the Public Health Service Act (42 U.S.C. 262).

Accordingly, the Commissioner is (1) amending Part 207 of the drug regulations by adding a new § 207.7 to require that all blood and blood product establishments register and list their products with the Bureau of Biologics pursuant to Part 6607 (21 CFR Part 607), which is being established, (2) revising § 601.11 and redesignating it as § 607.7, and (3) establishing a new Part 607 in the biologics regulations to prescribe procedures for blood and blood product establishment registration and product listing. The Commissioner concludes that the blood and blood product establishment registration and product listing requirements prescribed in new Part 607 are substantively the same as those requirements prescribed in Part 207 for other drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201, 510, 701, 52 Stat. 1040–1042 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948, 76 Stat. 794 as amended by 84 Stat. 1282 (21 U.S.C. 321, 360, 371)), the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)), and (5 U.S.C. 553, 702, 703, 704) and under authority delegated to the Commissioner (21 CFR 2.120), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

PART 207—REGISTRATION OF PRODUCERS OF DRUGS AND LISTING OF DRUGS IN COMMERCIAL DISTRIBUTION

1. In Part 207:

a. By revising the heading for Subpart A to read as follows:

Subpart A—General Provisions

b. By adding a new § 207.7 to read as follows:

§ 207.7 Establishment registration and product listing for human blood and blood products.

(a) Owners and operators of all human blood and blood product establishments are required to register and list their products on Form FD–2830 as prescribed in Part 607 of this chapter.

(b) Owners and operators of all human blood and blood product establishments, who also manufacture or process other drug products at the same establishment, shall register with both the Bureau of Biologics and the Bureau of Drugs. Human blood and blood products shall be listed with the Bureau of Biologics, Food and Drug Administration, pursuant to the provisions of Part 607 of this chapter, and other drug products shall be listed with the Bureau of Drugs, Food and Drug Administration, pursuant to the provisions of this part.

PART 601—LICENSING

§ 601.11 [Deleted]

2. In Part 601 by deleting § 601.11 *Registration of blood banks and other firms collecting, manufacturing, preparing, or processing human blood or blood products.*

3. By establishing a new Part 607 to read as follows:

PART 607—ESTABLISHMENT REGISTRATION AND PRODUCT LISTING FOR MANUFACTURERS OF HUMAN BLOOD AND BLOOD PRODUCTS

Subpart A—General Provisions

Sec.
607.3 Definitions.
607.7 Establishment registration and product listing of blood banks and other firms manufacturing human blood and blood products.

Subpart B—Procedures for Domestic Human Blood and Blood Product Establishments

607.20 Who must register and submit a blood product list.
607.21 Times for establishment registration and blood product listing.
607.22 How and where to register establishments and list blood products.
607.25 Information required for establishment registration and blood product listing.
607.26 Amendments to establishment registration.
607.30 Updating blood product listing information.
607.31 Additional blood product listing information.
607.35 Notification of registrant; blood product establishment registration number and NDC Labeler Code.

Sec.
607.37 Inspection of establishment registrations and blood product listings.
607.39 Misbranding by reference to establishment registration or to registration number.

Subpart C—Procedures for Foreign Blood Product Establishments

607.40 Blood product listing requirements for foreign blood product establishments.

Subpart D—Exemptions

607.65 Exemptions for domestic blood product establishments.

AUTHORITY: Secs. 201, 510, 701, Pub. L. 717, 52 Stat. 1040–1042 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948, 76 Stat. 794 as amended by 84 Stat. 1282 (21 U.S.C. 321, 360, 371); sec. 351, Pub. L. 410, 58 Stat. 702, as amended (42 U.S.C. 262); and (5 U.S.C. 553, 702, 703, 704)

Subpart A—General Provisions

§ 607.3 Definitions.

(a) The term "act" means the Federal Food, Drug, and Cosmetic Act approved June 25, 1938 (52 Stat. 1040 et seq., as amended, 21 U.S.C. 301–392).

(b) "Blood and blood product" means a drug which consists of human whole blood, plasma, or serum or any product derived from human whole blood, plasma or serum, hereinafter referred to as "blood product."

(c) "Establishment" means a place of business under one management at one general physical location. The term includes, among others, human blood and plasma donor centers, blood banks, transfusion services, other blood product manufacturers and independent laboratories that engage in quality control and testing for registered blood product establishments.

(d) "Manufacture" means the collection, preparation, processing or compatibility testing by chemical, physical, biological, or other procedures of any blood product which meets the definition of a drug as defined in section 201(g) of the act, and including manipulation, sampling, testing, or control procedures applied to the final product or to any part of the process. The term includes packaging, labeling, repackaging or otherwise changing the container, wrapper, or labeling of any blood product package in furtherance of the distribution of the blood product from the original place of manufacture to the person who makes final delivery or sale to the ultimate consumer.

(e) "Commercial distribution" means any distribution of a blood product except pursuant to the investigational use provisions of § 312.1 of this chapter, but does not include internal or interplant transfer of a bulk product substance between registered domestic establishments within the same parent, subsidiary, and/or affiliate company.

(f) "Any material change" includes but is not limited to any change in the name of the blood product, in the quantity or identity of the active ingredient(s) or in the quantity or identity of the inactive ingredient(s) where quantitative listing of all ingredients is required pursuant to § 607.31(a)(2) and any significant change in the labeling of a blood product. Changes that are not significant include changes in arrangement or printing or changes of an editorial nature.

(g) "Bulk product substance" means any substance that is represented for use in a blood product and when used in the manufacturing of a blood product becomes an active ingredient or a finished dosage form of such product.

(h) "Advertising" and "labeling" include the promotional material described in § 202.1(1) (1) and (2) of this chapter, respectively.

(i) The definitions and interpretations contained in sections 201 and 510 of the act shall be applicable to such terms when used in this Part 607.

§ 607.7 Establishment registration and product listing of blood banks and other firms manufacturing human blood and blood products.

(a) All owners or operators of establishments that engage in the manufacturing of blood products are required to register, pursuant to section 510 of the Federal Food, Drug, and Cosmetic Act. Registration and listing of blood products shall comply with this part. Registration does not permit any blood bank or similar establishment to ship blood products in interstate commerce.

(b) Forms for registration of an establishment are obtainable on request from the Bureau of Biologics (HFB–14), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20014, or at any of the Food and Drug Administration district offices.

(c) The completed form should be mailed to the Bureau of Biologics (HFB–14), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20014.

Subpart B—Procedures for Domestic Blood Product Establishments

§ 607.20 Who must register and submit a blood product list.

(a) Owners or operators of all establishments, not exempt under section 510 (g) of the act or Subpart D of this Part 607, that engage in the manufacture of blood products are required to register and to submit a list of every blood product in commercial distribution (except that listing information may be submitted by the parent, subsidiary, and/or affiliate company for all establishments when operations are conducted at more than one establishment and there exists joint ownership and control among all the establishments), whether or not the output of such blood product establishment or any particular blood product so listed enters interstate commerce.

(b) Preparatory to engaging in the manufacture of blood products, owners or operators of establishments who are submitting an establishment license application to manufacture blood products are required to register before the establishment license application is approved.

(c) No registration fee is required. Establishment registration and blood product listing do not constitute an admission or agreement or determination that a blood product is a "drug" within the meaning of section 201(g) of the act.

§ 607.21 Times for establishment registration and blood product listing.

The owner or operator of an establishment entering into an operation defined in § 607.3(d) shall register such establishment within 5 days after the beginning of such operation and submit a list of every blood product in commercial distribution at that time. If the owner or operator of the establishment has not previously entered into such operation (defined in § 607.3(d)) for which a license is required, registration shall follow within 5 days after the submission of an establishment and product license application in order to manufacture blood products. Owners or operators of all establishments so engaged shall register annually between November 15 and December 31 and shall update their blood product listing information every June and December.

§ 607.22 How and where to register establishments and list blood products.

(a) The first registration of an establishment shall be on Form FD–2830 (Blood Establishment Registration and Product Listing) obtainable on request from the Department of Health, Education, and Welfare, Food and Drug Administration, Bureau of Biologics (HFB–14), 8800 Rockville Pike, Bethesda, MD 20014, or from Food and Drug Administration district offices. Subsequent annual registration shall also be accomplished on Form FD–2830 which will be furnished by the Food and Drug Administration before November 15 of each year to establishments whose product registration for that year was validated pursuant to § 607.35. The completed form shall be mailed to the above address before December 31 of that year.

(b) The first list of blood products and subsequent June and December updatings shall be on Form FD–2830, obtainable upon request as described in paragraph (a) of this section. In lieu of Form FD–2830, tapes for computer input may be submitted if equivalent in all elements of information as specified in Form FD–2830. All formats proposed for such use will require initial review and approval by the Bureau of Biologics, Food and Drug Administration.

§ 607.25 Information required for establishment registration and blood product listing.

(a) Form FD–2830 (Blood Establishment Registration and Product Listing) requires furnishing or confirming registration information required by the act. This information includes the name and street address of the establishment, including post office ZIP code; all trade names used by the establishment; the kind of ownership or operation (that is, individually owned, partnership, or corporation); and the name of the owner or operator of such establishment. The term "name of the owner or operator" shall include in the case of a partnership the name of each partner, and in the case of a corporation the name and title

V 40 N 219 NOV 12 75 XUM

of each corporate officer and director and the name of the State of incorporation. The information required shall be given separately for each establishment, as defined in § 607.3(c).

(b) Form FD–2830 also requires furnishing blood product listing information required by the act as follows:

(1) A list of blood products, including bulk product substances as well as finished dosage forms, by established name as defined in section 502(e) of the act and by proprietary name, which are being manufactured for commercial distribution and which have not been included in any list previously submitted on Form FD–2830 (Blood Establishment Registration and Product Listing) or Form FD–2250 (National Drug Code Directory Input).

(2) For each blood product so listed which is subject to section 351 of the Public Health Service Act, the license number of the manufacturer issued by the Bureau of Biologics, Food and Drug Administration.

(3) For each blood product listed, the registration number of every blood product establishment within the parent company at which it is manufactured.

§ 607.26 Amendments to establishment registration.

Changes in individual ownership, corporate or partnership structure location or blood-product-handling activity, shall be submitted on Form FD–2830 (Blood Establishment Registration and Product Listing) as amendment to registration within 5 days of such changes. Changes in the names of officers and directors of the corporations do not require such amendment but must be shown at time of annual registration.

§ 607.30 Updating blood product listing information.

(a) After submission of the initial blood product listing information, every person who is required to list blood products pursuant to § 607.20 shall submit on Form FD–2830 (Blood Establishment Registration and Product Listing) during each subsequent June and December, or at the discretion of the registrant at the time the change occurs, the following information:

(1) A list of each blood product introduced by the registrant for commercial distribution which has not been included in any list previously submitted. All of the information required by § 607.25(b) shall be provided for each such blood product.

(2) A list of each blood product formerly listed pursuant to § 607.25(b) for which commercial distribution has been discontinued, including for each blood product so listed the identity by established name and proprietary name, and date of discontinuance. It is requested but not required that the reason for discontinuance of distribution be included with this information.

(3) A list of each blood product for which a notice of discontinuance was submitted pursuant to paragraph (a)(2) of this section and for which commercial distribution has been resumed, including for each blood product so listed the identity by established name as defined in section 502(e) of the act and by any proprietary name, the date of resumption, and any other information required by § 607.25(b) not previously submitted.

(4) Any material change in any information previously submitted.

(b) When no changes have occurred since the previously submitted list, no listing information is required.

§ 607.31 Additional blood product listing information.

(a) In addition to the information routinely required by §§ 607.25 and 607.30, the Commissioner may require submission of the following information by letter or by FEDERAL REGISTER notice:

(1) For a particular blood product so listed, upon request made by the Commissioner for good cause, a copy of all advertisements.

(2) For a particular blood product so listed, upon a finding by the Commissioner that it is necessary to carry out the purposes of the act, a quantitative listing of all ingredients.

(3) For each registrant, upon a finding by the Commissioner that it is necessary to carry out the purposes of the act, a list of each listed blood product containing a particular ingredient.

(b) It is requested but not required that information concerning the quantity of blood product distributed be submitted in conjunction with the annual registration in the format prescribed in a section of Form FD–2831 (Blood Establishment Resource Summary), for each blood product currently listed.

§ 607.35 Notification of registrant; blood product establishment registration number and NDC Labeler Code.

(a) The Commissioner will provide to the registrant a validated copy of Form FD–2830 (Blood Establishment Registration and Product Listing) as evidence of registration. This validated copy will be sent only to the location shown for the registering establishment. A permanent registration number will be assigned to each blood product establishment registered in accordance with these regulations.

(b) Owners and operators of blood product establishments, who also manufacture or process other drug products at the same establishment, shall register with both the Bureau of Biologics and the Bureau of Drugs. Blood products shall be listed with the Bureau of Biologics, Food and Drug Administration, pursuant to the provisions of this part, and other drug products shall be listed with the Bureau of Drugs, Food and Drug Administration, pursuant to the provisions of Part 207 of this chapter.

(c) If a registered blood product establishment has not previously participated in the National Drug Code system, or in the National Health Related Items Code system, the National Drug Code (NDC) numbering system shall be used in assigning the first five numeric characters, otherwise known as the Labeler Code, of the 10-character NDC Code. The Labeler Code identifies the manufacturer.

(d) Although establishment registration and blood product listing are required as described in § 607.20, validation of registration and the assignment of a NDC Labeler Code do not, in themselves, establish that the holder of the registration is legally qualified to deal in such products.

§ 607.37 Inspection of establishment registrations and blood product listings.

(a) A copy of the Form FD–2830 (Blood Establishment Registration and Product Listing) filed by the registrant will be available for inspection pursuant to section 510(f) of the act, at the Department of Health, Education, and Welfare, Food and Drug Administration, Bureau of Biologics (HFB–14), 8800 Rockville Pike, Bethesda, MD 20014. In addition, there will be available for inspection at each of the Food and Drug Administration district offices the same information for firms within the geographical area of such district office. Upon request and receipt of a self-addressed stamped envelope, verification of registration number, or location of a registered establishment will be provided. The following information submitted pursuant to the blood product listing requirements is illustrative of the type of information that will be available for public disclosure when it is compiled:

(1) A list of all blood products.

(2) A list of all blood products manufactured by each establishment.

(3) A list of blood products discontinued.

(4) All data or information that has already become a matter of public knowledge.

(b) Requests for information regarding blood establishment registrations and blood product listings should be directed to the Department of Health, Education, and Welfare, Food and Drug Administration, Bureau of Biologics (HFB–14) 8800 Rockville Pike, Bethesda, MD 20014.

§ 607.39 Misbranding by reference to establishment registration or to registration number.

Registration of an establishment or assignment of a registration number or assignment of a NDC number does not in any way denote approval of the firm or its products. Any representation that creates an impression of official approval because of establishment registration or possession of registration number or NDC number is misleading and constitutes misbranding.

Subpart C—Procedures for Foreign Blood Product Establishments

§ 607.40 Blood product listing requirements for foreign blood product establishments.

(a) Every foreign establishment shall comply with the blood product listing requirements contained in Subpart B of this part, unless exempt under Subpart D of this part, whether or not it is also registered.

(b) No blood product may be imported from a foreign establishment into the United States except a blood product imported or offered for import pursuant to the investigational use provisions of § 312.1 of this chapter, unless it is first the subject of a blood product listing as required in Subpart B of this part. The blood product listing information shall be in the English language.

(c) Foreign establishments shall submit, as part of the blood product listing, the name and address of the establishment and the name of the individual responsible for submitting blood product listing information. Any changes in this information shall be reported to the Food and Drug Administration at the intervals specified for updating blood product listing information in § 607.30(a).

Subpart D—Exemptions

§ 607.65 Exemptions for blood product establishments.

The following classes of persons are exempt from registration and blood product listing in accordance with this Part 607 under the provisions of section 510(g) (1), (2), and (3) of the act, or because the Commissioner has found, under section 510(g)(4), that such registration is not necessary for the protection of the public health.

(a) Pharmacies that are operating under applicable local laws regulating dispensing of prescription drugs and that are not manufacturing blood products for sale other than in the regular course of the practice of the profession of pharmacy including the business of dispensing and selling blood products at retail. The supplying by such pharmacies of blood products to a practitioner licensed to administer such blood products for his use in the course of his professional practice or to other pharmacies to meet temporary inventory shortages are not acts which require such pharmacies to register.

(b) Practitioners who are licensed by law to prescribe or administer drugs and who manufacture blood products solely for use in the course of their professional practice.

(c) Persons who manufacture blood products which are not for sale, rather, are solely for use in research, teaching, or analysis, including laboratory samples.

(d) Carriers, by reason of their receipt, carriage, holding, or delivery of blood products in the usual course of business as carriers.

(e) Persons who engage solely in the manufacture of in vitro diagnostic blood products and reagents not subject to licensing under section 351 of the Public Health Service Act (42 U.S.C. 262).

Pursuant to the Administrative Procedure Act (5 U.S.C. 553 (b) and (d)), the Commissioner concludes that notice, public procedure, and delayed effective date are unnecessary for the promulgation of this regulation inasmuch as the required use of Form FD–2830 and the transfer of administrative responsibility constitute an internal administrative designation of responsibility to consolidate procedures for registration and listing.

Effective date. This regulation is effective on November 15, 1975.

(Secs. 201, 510, 701, Pub. L. 717, 52 Stat. 1040–1042 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948, 76 Stat. 794, as amended by 84 Stat. 1282 (21 U.S.C. 321, 360, 371); (sec. 351, Pub. L. 410, 58 Stat. 702, as amended (42 U.S.C. 262); and (5 U.S.C. 553, 702, 703, 704).))

Dated: November 5, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

PART III:

FEDERAL ELECTION COMMISSION

Advisory Opinions and Requests

V 40 219 NOV 12 75 XUM

FEDERAL ELECTION COMMISSION

[Notice 1975–74]

ADVISORY OPINIONS

The Federal Election Commission announces the publication today of Advisory Opinions 1975–21, 1975–52, 1975–62, 1975–64 and 1975–67. The Commission's opinions are in response to questions raised by individuals holding Federal office, candidates for Federal office and political committees, with respect to whether any specific transaction or activity by such individual, candidate, or political committee would constitute a violation of the Federal Election Campaign Act of 1971, as amended, of Chapter 95 or Chapter 96 of Title 26 United States Code, or of Sections 608, 610, 611, 613, 614, 615, 616, or 617 of Title 18 United States Code.

The Commission points out that these advisory opinions should be regarded as interim rulings which are subject to modification by future Commission regulations of general applicability. In the event that a holding in either opinion is altered by the Commission's regulations, the persons to whom the opinions were issued will be notified.

ADVISORY OPINION 1975–21

CORPORATE CONTRIBUTIONS TO POLITICAL COMMITTEES SUPPORTING STATE AND FEDERAL CANDIDATES

This is an advisory opinion in response to a request from the Republican Central Committee of San Diego County (hereinafter Central Committee). This request was published in the FEDERAL REGISTER on July 29, 1975, at 40 FR 31877. Interested parties were given an opportunity to submit written comments relating to the request and six comment letters were received.

The request indicates that the Central Committee has established a separate account for corporate contributions, permitted under State law, and that funds from this account "are used only for State candidates, not Federal * * *" The funds in this account will hereafter be referred to as restricted; funds in other accounts will be referred to as unrestricted. The first question presented is whether restricted funds may be used for administrative expenses (office rent, utilities, secretarial salaries, office supplies, etc.) of the Central Committee which contributes to and makes expenditure on behalf of Federal, State and local candidates.

18 U.S.C. 610 provides that it is unlawful for any corporation or labor organization to make a contribution or expenditure in connection with any Federal Election. "Contribution or expenditure" is defined in section 610 to include "any direct or indirect payment, distribution, loan, advance, deposit, or gift of money, or any services, or anything of value * * * to any candidate, campaign committee or political party or organization, in connection with any election to any of the offices referred in this section. * * *" Further, section 610 provides that it is unlawful for any political committee or other person (as defined in 18 U.S.C. § 591(g)) to accept or receive any such prohibited contributions.

Since § 610 prohibits the making and receiving of corporate contributions in connection with any election to Federal office and since the Central Committee's operations are directly related, at least in part, to Federal candidates, the Commission concludes that an allocable portion of the administrative expenses must be paid from unrestricted funds.

Political parties perform numerous functions not directly related to any particular candidate or election. However, since some of these functions have an indirect effect on particular elections, and since monies contributed to fulfill these functions free other monies to be used for contributions or expenditures in connection with Federal elections, it is appropriate to ascribe a certain portion of the administrative functions of a party organization to Federal elections during time periods in which Federal elections are held.

This allocable "Federal portion" of the administrative expenses is determined by the ratio of (1) the total amount which the Central Committee directly contributes to and expends on behalf of Federal candidates, to (2) the total of all direct contributions to and expenditures on behalf of all candidates—Federal, State, and local. For example, if the total of direct contributions to and expenditures for all candidates in one reporting period is $10,000 and the amount going directly to or for Federal candidate purposes is $1,500 then 15 percent of the administrative expenses during such period must be paid from unrestricted funds. The allocation should be made only on each annual report filed with the Commission.

If the Central Committee elects to establish a separate Federal candidate's committee then that committee must comply with Federal law and could not receive or expend restricted funds. The Commission notes its authority to audit the Central Committee to determine that the allocable Federal share of administrative expenses is based upon the formula set forth above and to assure that there has been no commingling of restricted and unrestricted funds.

The second issue is whether the Central Committee may use corporate contributions to finance a Republican registration drive.

As discussed above a corporate contribution permitted under State law may be made to and received by the Central Committee if it is placed in the restricted funds account. A voter registration drive has a relation to Federal elections as well as State and local. Therefore, corporate contributions may be made and received for that purpose only to the extent that the drive relates to State and local candidates. That extent may be determined on the basis of the allocation formula described above and applied on an annual basis. For example, if the Central Committee makes $100,000 in direct contributions to and expenditures on behalf of all candidates in a given year and $15,000 relating directly to Federal candidates in such year, then 15 percent of the expenses of a voter registration drive conducted in that year would have to be paid from unrestricted funds.

This advisory opinion is issued on an interim basis pending final promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–52

ASSISTANCE BY A MULTICANDIDATE COMMITTEE TO PAY OFF A CANDIDATE'S PAST CAMPAIGN DEBT

This advisory opinion is rendered in accordance with 2 U.S.C. § 437f, pursuant to a request submitted by the Maine Republican State Committee (hereinafter State Committee) and published on September 3, 1975 (40 FR 40678). Interested parties were given an opportunity to submit written comments relating to the request, but no comments were received.

The request concerns the extent to which the State Committee may assist a successful candidate for Congress to pay off a debt incurred with respect to the 1974 election without impairing the limitations (18 U.S.C. § 608) on the amount of money it may contribute to that Member of Congress, if he or she becomes a candidate for re-election in 1976.

In Advisory Opinion 1975–6 (40 FR 31316, July 25, 1975), the Commission stated the conditions under which contributions might be made to extinguish a debt incurred with respect to an election held during the period of January 1, 1973 through December 31, 1974 without reducing the amount a contributor might contribute to a candidate in connection with an election held subsequent to January 1, 1975. The Commission held "that the contribution and expenditure limitations prescribed by 18 U.S.C. 608(b) for individuals and multicandidate committees are inapplicable with respect to election campaigns which occurred prior to January 1, 1975."

The Commission also stated in Advisory Opinion 1975–6, and in its Policy Statement regarding pre-1975 debts (40 FR 32952, August 5, 1975), that in order to assure compliance with the Act, all solicitations for contributions to be used for extinguishing such past debts should include clear notice of that purpose and that persons making such contributions exceeding $100 must expressly restrict them in writing for application to past debts. The Commission further required, and continues to require, that contributions to retire campaign debts incurred with respect to election campaigns held prior to January 1, 1975 must be received by the debtor (candidate or political committee) no later than December 31, 1975, in order to avoid the possibility that such contributions will be charged against contribution limits under 18 U.S.C. § 608(b).

Accordingly the State Committee may assist the Member of Congress by making a contribution to retire a pre-January 1, 1975, campaign debt in any amount so long as (1) the use of the contribution is limited by writing to such purpose, (2) the contribution does not exceed the amount necessary to retire the debt and (3) the contribution is made by December 31, 1975.

This advisory opinion is issued on an interim basis only pending the promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–62

PAYMENT BY CONTRIBUTORS OF EXPENSES OF FUND-RAISING DINNER

This advisory opinion is rendered under 2 U.S.C. § 437f in response to a request submitted on behalf of Abe Hirschfeld, a candidate for the Senate.

The request was published in the September 18, 1975, FEDERAL REGISTER (40 FR 43167). Interested parties were given an opportunity to submit comments relating to the request. No comments were received.

The requesting party seeks as advisory opinion indicating whether a contributor would exceed the $1,000 per candidate per election contribution limit if he or she pays $1,250 for a ticket to a fund-raising dinner with the understanding that $1,000 of this amount is to be considered a contribution and $250 is to defray the costs of the dinner. In essence, the question posed is whether the payment of fund-raising costs by a contributor constitutes a contribution.

The Commission's opinion is that such a transaction would be a contribution and that the $1,250 payment would exceed the contribution limits of the donor under 18 U.S.C. 608(b). See AO 1975–15, 40 FR 44040. 18 U.S.C. 591(e)(1) defines the term "contribution", for the purposes of the expenditure limitations, as "* * * a gift, subscription, loan, advance, or deposit of money or anything of value * * * made for the purpose of influencing the nomination for election or election of any person to Federal office.* * *" Clearly, the payment of fund-raising costs would be for this purpose. Moreover, 18 U.S.C. 591(f)(4)(H) allows candidates to expend up to 20 percent in excess of their expenditure limitations for the purpose of raising funds. To permit contributors to pay these expenses without limitation would, in effect, nullify both the contribution and expenditure limits in 18 U.S.C. 608.

This advisory opinion is issued on an interim basis pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–64

SOLICITATIONS FOR FUNDRAISING EVENT TO RETIRE 1972 CAMPAIGN DEBT AND 1973–74 DEFICIT IN OFFICE EXPENSE ACCOUNT

This advisory opinion is rendered under 2 U.S.C. 437f in response to a request for an advisory opinion submitted by Congressman Charles Wilson, from Texas, and published in the September 18, 1975 FEDERAL REGISTER (40 FR 43167). Interested parties were given an opportunity to submit written comments relating to the request. No comments were received.

The quesion raised in Congressman Wilson's request is whether or not he may retire a 1972 campaign deficit and a 1973–74 deficit for office expenses with a single fund-raiser, and if so, should the solicitation for the fund-raiser clearly indicate that the funds contributed will be used to defray both the campaign and office expense deficits.

The Commission has previously issued Advisory Opinions 1975–5 and 1975–6 (40 FR 31316, July 25, 1975), an Interim Guideline on the Reporting of Debts and Obligations (40 FR 32950, August 5, 1975) and a Policy Statement on Pre-1975 Campaign Debts (40 FR 32952, August 5, 1975). These publications point out generally that the limits in 18 U.S.C. 608 do not apply to contributions and expenditures related only to retiring past campaign debts. However, solicitations for such restricted contributions must disclose the purpose for whch the contribution is to be used and must inform the donor of the need to earmark the contribution in writing, as by notation on the check, restricting its use to retiring past (pre-1975) campaign debts. The restricted contributions are required to be made before December 31, 1975, to avoid their possible attribution to, and charge against, the contribution limits applicable to elections held after January 1, 1975. Contributions made solely to retire the 1972 campaign debt and expenditures made solely for that purpose are required to be reported separately from contributions and expenditures relating to an election occurring after January 1, 1975. To the extent that Congressman Wilson's fundraising activity relates to retiring a 1972 campaign deficit, it must conform to the foregoing requirements.

Under 2 U.S.C. 439a a holder of Federal office may accept contributions for the purpose of defraying "any ordinary and necessary expenses incurred by him in connection with his duties as a holder of Federal office * * *" The receipt and expenditure of such funds is to be reported in accordance with rules which the Commission will promulgate in the future. Accurate records should be maintained for this purpose. In view of 2 U.S.C. 439a the Commission concludes that Congressman Wilson may concurrently raise funds to retire a 1972 campaign debt and "a 1973–74 deficit for office expenses which were not reimbursed." The Commission understands the quoted language to mean that the office expenses in question were previously paid from the Congressman's personal funds and that the amounts paid were not subsequently reimbursed to the Congressman from appropriated funds, campaign funds, or any other source.

However, all solicitations for the dual fundraising effort should identify both purposes and indicate that contributions are to be restricted to only those purposes to avoid the possible application of 18 U.S.C. 608. Any funds received in excess of the amounts needed to retire the two deficits would have to be returned to the donors to avoid application of the limits in 18 U.S.C. 608.

This advisory opinion is issued on an interim basis pending promulgation by the Commission of rules and regulations or policy statements of general applicability.

ADVISORY OPINION 1975–67

USE OF NAME OF CAMPAIGN COMMITTEE CHAIRMAN AND TREASURER ON BILLBOARD SIGNS

This advisory opinion is rendered under 2 U.S.C. 437f in response to a request for an advisory opinion submitted by Thomas A. Walsh which was published as AOR 1975–67 in the September 22, 1975 FEDERAL REGISTER (40 FR 43,644). Interested parties were given an opportunity to submit written comments relating to the requests. No comments were received.

Mr. Walsh is a candidate seeking nomination for election to the United States House of Representatives. He inquired whether under the Federal Election Campaign Act of 1971, as amended, it is necessary to place the names of the campaign committee chairman and treasurer on billboard signs which would otherwise state: "VOTE DEMOCRATIC THOMAS A. WALSH U.S. CONGRESS". The request states that no solicitation of funds is intended or implied in such advertising.

It is the opinion of the Commission that neither 2 U.S.C. 435(b) nor any other provision within the Commission's purview would require placing the names of the committee chairman and treasurer on such billboard signs. However, the Commission notes that 18 U.S.C. 612 provides in pertinent part as follows:

Whoever willfully publishes or distributes or causes to be published or distributed * * * or * * * knowingly transports or causes to be transported in interstate commerce any card, pamphlet, circular, poster, dodger, advertisement, writing, or other statement relating to or concerning any person who has publicly declared his intentions to seek the office of * * * Representative in * * * Congress, in a primary * * * election * * * which does not contain the names of persons, associations, committees, or corporations responsible for the publication or distribution of the same, and the names of the officers of each such association, committee, or corporation, shall be fined not more than $1,000 or imprisoned not more than 1 year, or both.

The Federal Election Act of 1971, as amended, does not give the Commission the power to formulate general policy or to render advisory opinions with respect to 18 U.S.C. § 612. See 2 U.S.C. 437d(a)(9), and 437f(a). Rather, that statute is administered by the Department of Justice. See *United States* v. *Insco*, 365 F. Supp. 1308 (D.C. Fla. 1973). The Commission therefore reaches no conclusion as to whether the billboard signs of a candidate are required by 18 U.S.C. 612 to state the names of the chairman and treasurer of the committee purchasing such advertising.

V 40 I 219 NOV 12 75 XUM

The Commission further notes that State laws might pertain to such activity. Inquiry as to the application of such laws should be addressed to the appropriate State official.

Dated: November 6, 1975.

THOMAS B. CURTIS,
Chairman for the
Federal Election Commission.

[FR Doc.75-30528 Filed 11-11-75;8:45 am]

[Notice 1975-75, AOR 1975-98, etc.]

ADVISORY OPINION REQUESTS

In accordance with the procedures set forth in the Commission's Notice 1975-4, published on June 24, 1975 (40 FR 26660), Advisory Opinion Request 1975-98 and Advisory Opinion Requests 1975-100 through 1975-106 are published today.

Interested persons wishing to comment on the subject matter of any Advisory Opinion Request may submit written views with respect to such requests on or before November 24, 1975. Such submission should be sent to the Federal Election Commission, Office of General Counsel, Advisory Opinion Section, 1325 K Street, NW., Washington, D.C. 20463. Persons requiring additional time in which to respond to any Advisory Opinion Request will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered by the Commission before it issues an advisory opinion. The Commission recommends that comments on pending Advisory Opinion Requests refer to specific AOR number of the Request commented upon and that statutory references be to the United States Code citations, rather than to the Public Law Citations.

AOR 1975-98: Payment For Flights To District and Program Advertisements by Wylie For Congress Committee (Request Edited by the Commission).

Dear [Mr. CURTIS]: In discussions with the Treasurer of the Wylie for Congress Committee, Mr. Everett H. Krueger, Jr., the question has come up as to whether airplane trips between Columbus and Washington may be paid for from the Wylie for Congress Committee account.

The second question which has arisen is whether an ad in a football program, an ad in the *Jewish Chronicle* celebrating the Jewish New Year, or one in a high school play program can legally be paid for from the Wylie for Congress Committee account.

An advisory opinion indicating what can legally be done in these two respects would be appreciated.

CHALMERS P. WYLIE.

AOR 1975-100: Volunteer Internships in Member's Home Office (Request Edited by the Commission).

GENTLEMEN: The University of Utah has initiated a learning project known as the Hinckley Institute of Politics, which allows political science students to obtain credit while serving as volunteer interns in political offices.

Pursuant to [2 U.S.C. § 437f] • • • an advisory opinion is requested as to whether such activity on the part of such students would constitute a contribution in kind if I allow these students to function in various office positions within my home office in Utah performing general office and clerical work.

AOR 1975-101: Revenues and Disbursements of a Private Foundation Managed by a Candidate (Request Edited by the Commission).

[GENTLEMEN]: We request you provide us with an opinion whether or not the contributions in the two instances, hereafter described, will be charged to campaign limitations in the event that Senator Pell determines in the future to seek a Federal elective public office.

I. Claiborne Pell and Nuala Pell are settlors of a Trust under Agreement dated July 30, 1964, and said Claiborne Pell, said Nuala Pell and John L. Lewis, Trustees of said Trust. • • • [A copy of the Trust Agreement and of the 1974 Annual Report is available for inspection at the Commission]

Practically all of the property placed in trust has been contributed by Claiborne Pell, and represents, for the most part, honorariums paid to Senator Pell in connection with speaking engagements. Trust funds have generally been expended for the purpose of making small contributions to a number of charitable and public organizations located in the State of Rhode Island and also have been used for the purpose of purchasing the "Herbert and Claiborne Pell Medal", so called, which is annually awarded to outstanding students of American History in most of the high schools and colleges located in the State of Rhode Island.

• • • • • •

II. Recently, Senator Pell's contribution, in the amount of two hundred and fifty dollars ($250.00), to the School Department, City of Newport, for the purpose of purchasing books to be used at the Herbert C. Pell Elementary School, Bellevue Avenue, Newport, Rhode Island, and to be identified as books contributed by Senator and Mrs. Claiborne Pell.

• • • It has been Senator Pell's custom, from time to time, to make contributions to the School's library in his own name or in memory of his father. The most recent gift made by Senator Pell, was announced in the local newspaper, The Newport Daily News, although the announcement was not initiated by, or on behalf of Senator Pell, but was made by school authorities.

AOR 1975—102: Declaration of Bankruptcy by Former Candidate—Effect Upon Committee Debts and Reporting Obligations (Request Edited by the Commission).

Dear Mr. CURTIS: [I request an advisory opinion] on the following matters.

The Monahan for Congress Committee has debts of $20,000. In addition, Mr. Monahan has personal liabilities of $15,000. Due to the extreme financial pressure, Mr. Monahan has decided to file for bankruptcy. Most of the debts owed by the Monahan for Congress Committee are guaranteed by Mr. Monahan, as the companies required the candidate to sign a personal note of obligation for these debts.

Thus the two obvious questions are:

1. Once bankruptcy has been declared, what is the responsibility of the Committee for the bills, as they were personally guaranteed by Mr. Monahan?

2. How long a period of time does the Committee continue to exist, after it becomes obvious that it is impossible for the Committee to raise money to pay off the debt?

Mr. Monahan has no intention of running in the future for an elective office.

AOR 1975-103: Republican Party of Texas Local Committees; Debts; Separate Federal Account; Overhead Costs; Allocation of Contributions and Filing (Request Edited by the Commission).

COMMISSIONERS: In reading various opinions issued by the Commission, as they relate to party committees, the Republican Party of Texas • • • requests clarification of AO 1975-2 and AO 1975-6, and additionally requests rulings by the Commission on other specific questions.

• • • • • •

It appears to us that local committees in Texas would not constitute subordinate branches of the state party organization since (1) they maintain independent statutory authority to conduct elections, (2) that their members and their chairmen are elected directly by a vote of the public under Texas Election Code rather than under party bylaws, (3) that the governing body of the Republican Party of Texas, the State Republican Executive Committee, is elected by state convention rather than through local committees, (4) the campaign reporting and disclosure laws of the State of Texas require local committees to file reports separately as independent entities, and (5) local committees are "governed" by the state party organization only insofar as they voluntarily submit to the rules and regulations of the state party—and even then there are no practical or legal means to discipline local committees for infraction of party rules. What is the Commission's interpretation of the applicability of the term "subordinate" as it relates to the Texas party?

• • • • • •

Although party committees qualify for reporting to the Federal Election Commission, their nature, composition and responsibilities differ greatly from the majority of political committees reporting federally in that party committees support party organizational activities, local candidates, state candidates and in some instances federal candidates. Most of the other political committees reporting federally are organized to support federal campaigns only. Additionally, • • • party committees reported all contributions, all expenditures, and all debts regardless of their applicability to federal campaigns; such is the case of the Republican Party of Texas.

In 1973 and early 1974, the Republican Party of Texas borrowed more than $115,000 to continue its normal party activities and its state headquarters operations; none of the money was used to assist any federal campaign. In the Commission's opinion, (a) must such debts, which are unrelated to federal campaigns, be reported, and (b) must party committees be restricted to the December 31, 1975, deadline called for in AO 1975-6?

Additional Questions for Rulings

1. The Republican Party of Texas currently files three separate reports with the Federal Election Commission: (a) the Texas Republican Congressional Committee, (b) the Texas Republican Campaign Committee (which is for support of state candidates only), and (c) the State Republican Executive Committee. If the Republican Party of Texas uses the Texas Republican Congressional Committee as its separate account for federal elections, may we discontinue the reporting of the other committees?

2. • • • [A]t this point there seems to be no clear indication of how a party committee is to allocate staff costs and other overhead costs in conjunction with its separate federal campaign account. Obviously, staff time is tied up in handling bank deposits, writing checks and completing FEC required reports: are these to be counted as expenditures, or are they considered normal party routine and therefore excluded from reporting? The same question applies to such items as office rent, equipment usage, telephones, etc.

3. In fundraising—whether by direct mail or through an event (reception, dinner, etc.)—can the party take the net proceeds and distribute them to various accounts, or must we take specific contributions from individuals and deposit their moneys into specific accounts? Example: If a direct mail letter, designed as a general solicitation calling for contributions to the party to help fulfill its obligations to all its candidates, produces $10,000 can the party simply allocate say 20 percent to the federal campaign account, 50 percent to state campaign account and 30 percent to operating account (and concurrently attributing the same percentage costs to each account)? Or must the party take a specific number of returns from the direct mail and deposit them as individual contributions in each account and then figure how much each contribution cost to raise and list that as the expenditure for each account?

4. When it comes time to spend the excess amounts allowed state and national party committees over the specified limitations ($10,000 per U.S. Representative campaign and formula amount for U.S. Senate campaign), does it then necessitate the state party filing with the Clerk of the House and the Secretary of the Senate as well as with the FEC, or does filing with the Commission satisfy all reporting requirements?

• • • • • •

AOR 1975-104: Partnership Agreement Allocating Contributions Equally Among Partners (Request Edited by the Commission).

[This request for an advisory opinion pursuant to 2 U.S.C. § 437f was submitted by Senator Claiborne Pell; the text of the request is from a letter of the firm of Wilkinson, Cragun & Barker, which accompanied the Senator's request.]

[Gentlemen]: • • • the firm is a partnership organized to engage, through its partners and associates duly admitted to the bar of relevant courts, in the practice of law. The firm maintains an office in the District of Columbia, and presently has 11 general partners; these are the only partners entitled under the partnership agreement to a distributive share of profits, and who are required to share in losses.

The firm for many years has made political contributions. If the disclosure of internal partnership arrangements (which are now confidential) is required in every instance when the firm makes a political contribution, political contributions will no longer be made. • • •

The firm plans to make further "contributions" within the meaning of 18 U.S.C. § 591. Section 608 of Title 18, United States Code, limits the contributions which a person may make to any candidate with respect to any election for Federal office. The Commission in Campaign Advisory Opinion 1975-17 has held:

The Commission further concludes that when a partnership makes a contribution to a candidate to Federal office it counts against each individual partner's limitation under 18 U.S.C. § 608(b)(1) *in direct* proportion to each partner's share of partnership profits.

• • •

• • • When a contribution is made in the partnership name without accompanying information as to each partner's proportionate share thereof, the candidate must obtain a written statement providing the requisite information within 30 days after receiving the contribution.

• • • • • •

The firm intends to amend its partnership agreement to provide:

Where the firm makes a contribution to a candidate for federal office, the contribution will be allocated equally among partners, and not in accordance with their partnership interests.

The effect of such a provision will be to cause the contribution to be charged equally, per capita, among the partners, and to thereby reduce each partner's profit or increase each partner's loss equally.

• • • [For the purposes of 18 U.S.C. § 608, would the contribution be chargeable equally to each partner? Would sufficient information be provided were the firm to provide the candidate or political committee receiving a contribution from the firm the names of the partners who are charged equally with the contribution, and a statement that the contribution is charged to each equally?]

AOR 1975-105: Pre-primary Nominating Convention (Request Edited and Paraphrased by the Commission).

Dear Chairman CURTIS: The New Mexico Legislature amended the State Election Code during the first quarter, 1975, to provide for a pre-primary nominating convention.

Section [of the Election Code] • • • provide the sole method, other than write-in provisions, for candidates to be placed on the primary election ballot. Essentially, all candidates seeking appearance on the primary ballot, other than write-in candidates, must seek their party's convention designation.

[Since the New Mexico pre-primary convention designation is mandatory for all New Mexico candidates for election to the United States Senate and House of Representatives is it therefore a separate election as defined in 18 U.S.C. § 591 (1b) and 18 U.S.C. § 608?]

[Do the limitations on expenditures and contributions for the aforementioned New Mexico candidates therefore apply as provided in 18 U.S.C. § 608 to this separate election?]

• • • • • •

JACK STAHL.

AOR 1975-106: Whether Repayment of 1974 Debts Are Attributable to Limits in 1980 Election (Request Edited by the Commission).

[GENTLEMEN]: [This is a request for an advisory opinion] with regard to a $10,000 debt due and owing by Citizens for Senator Alan Cranston (the Senator's duly authorized campaign committee for his 1974 re-election effort) which was incurred in December 1974. We would like to pay off that debt by raising money within the next few months from individual contributors • • • in California and in other states. • • •

First of all, will this be considered a debt of the 1974 campaign? If so, does that mean it will not count against the Senator's spending limitations for his expected re-election effort in 1979 and 1980? Further, if it is attributable to the 1974 campaign, do any of the restrictions or contribution limitations involved in the 1974 Federal Election Campaign Act apply?

WEDNESDAY, NOVEMBER 12, 1975

PART IV:

PRIVACY ACT OF 1974

VARIOUS AGENCIES

V 40 219 NOV 12 75 XUM

Title 41—Public Contracts and Property Management

CHAPTER 105—GENERAL SERVICES ADMINISTRATION

[ADM 7900.4]

PART 105–64—REGULATIONS IMPLEMENTING THE PRIVACY ACT OF 1974

On August 27, 1975, a document was published in the FEDERAL REGISTER (40 FR 39440) proposing to add a new Part 105–64 to Chapter 105 of Title 41 of the Code of Federal Regulations relating to the implementation of the provisions of the Privacy Act of 1974 (Pub. L. 93–579; 88 Stat. 1896).

The proposed regulations contained procedures for determining whether or not an individual is the subject of a record in a system of records maintained by the agency; set forth the time, place(s), and requirements for identification of individuals making requests for notification, access, correction, or amendment of records; and permitted appeals of initial adverse determinations by the agency with respect to the amendment or correction of records. The proposed rules also established fees for providing copies of records in certain circumstances and set forth rules for exempting some systems of records from certain provisions of the act.

Interested persons were given until September 26, 1975, to submit written data, views, suggestions, and arguments concerning the proposed rules. No public comments were received; hence, the amendments are adopted without change, as set forth below.

Effective date. These regulations became effective September 27, 1975.

Dated: October 29, 1975.

DWIGHT A. INK,
Acting Administrator of General Services.

41 CFR Chapter 105 is amended by adding a new Part 105–64, reading as follows:

Sec.

105–64.000 Scope of part.
105–64.001 Purpose.
105–64.002 Definitions.

Subpart 105–64.1—General Policy

105–64.101 Maintenance of records.
105–64.101–1 Collection and use.
105–64.101–2 Standards of accuracy.
105–64.101–3 Rules of conduct.
105–64.101–4 Safeguarding systems of records.
105–64.101–5 Inconsistent issuances of GSA superseded.
105–64.102 Records of other agencies.
105–64.103 Subpoena and other legal demands.

Subpart 105–64.2—Disclosure of Records

105–64.201 Conditions of disclosure.
105–64.202 Accounting of disclosures.

Subpart 105–64.3—Individual Access to Records

105–64.301 Access procedures.
105–64.301–1 Form of requests.
105–64.301–2 Special requirements for medical records.
105–64.301–3 Granting access.
105–64.301–4 Denials of access.
105–64.302 Fees.
105–64.302–1 Records available at a fee.
105–64.302–2 Additional copies.
105–64.302–3 Waiver of fee.
105–64.302–4 Prepayment of fees over $25.
105–64.302–5 Form of payment.
105–64.302–6 Reproduction fee schedule.

Subpart 105–64.4—Requests To Amend Records

105–64.401 Submission of requests to amend records.
105–64.402 Review of requests to amend records.
105–64.403 Approval of requests to amend.
105–64.404 Denial of requests to amend.
105–64.405 Agreement to alternative amendments.
105–64.406 Appeal of denial of request to amend a record.
105–64.407 Statements of disagreement.
105–64.408 Judicial review.

Subpart 105–64.5—Report on New Systems and Alteration of Existing Systems

105–64.501 Reporting requirement.
105–64.502 FEDERAL REGISTER notice of establishment of new system or alteration of existing system.
105–64.503 Effective date of new systems of records or alteration of an existing system of records.

Subpart 105–64.6—Exemptions

105–64.601 General exemptions.
105–64.602 Specific exemptions.
105–64.602–1 General investigative files.
105–64.602–2 Testing files.

AUTHORITY: Sec. 205(c) Federal Property and Administrative Services Act of 1949, as amended (63 Stat. 390; (40 U.S.C. 486(c))); Privacy Act of 1974 (88 Stat. 1899; (5 U.S.C. 552a))

§ 105–64.000 Scope of part.

This part sets forth policies and procedures concerning the collection, use, and dissemination of records maintained by GSA which are subject to the provisions of 5 U.S.C. 552a. These policies and procedures govern only those records as defined in § 105–64.002. Policies and procedures governing the disclosure and availability of records in general are in Parts 105–60 and 61 of this chapter. This part also covers exemptions from disclosure of personal information; procedures for the guidance of subject individuals in obtaining information and inspecting and disagreeing with the content of records; accounting for disclosures of information; special requirements for medical records; and fees.

§ 105–64.001 Purpose.

This part implements the provisions of 5 U.S.C. 552a (Pub. L. 93–579), popularly known as the "Privacy Act of 1974" (hereinafter referred to as the Act). This part prescribes procedures for notifying an individual of a GSA system of records containing a record pertaining to him, procedures for gaining access and contesting the contents of records, and other procedures for carrying out the provisions of the Act.

§ 105–64.002 Definitions.

For the purposes of this Part 105–64:

(a) The term "agency" means agency as defined in 5 U.S.C. 552(e);

(b) The term "individual" means a citizen of the United States or an alien lawfully admitted for permanent residence;

(c) The term "maintain" includes maintain, collect, use, and disseminate;

(d) The term "record" means any item, collection, or grouping of information about an individual that is maintained by an agency, including, but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name or an identifying number, symbol, or other identifying particular assigned to the individual, such as a finger-print, voiceprint, or photograph;

(e) The term "system of records" means a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifiers assigned to that individual;

(f) The term "statistical record" means a record in a system of records maintained for statistical research or reporting purposes only and not used in whole or in part in making any determination about an identifiable individual, except as provided by section 8 of Title 13 U.S.C.;

(g) The term "routine use" means, with respect to the disclosure of a record, the use of that record for a purpose which is compatible with the purpose for which it was collected; and

(h) The term "system manager" means the employee of GSA who is responsible for the maintenance of a system of records and for the collection, use, and dissemination of information therein.

Subpart 105–64.1—General Policy

§ 105–64.101 Maintenance of records.

§ 105–64.101–1 Collection and use.

Any information used in whole or in part in making a determination about an individual's rights, benefits, or privileges under GSA programs will be collected directly from the subject individual to the extent practicable. System managers shall ensure that at the time information is collected, the individual is informed of the authority for collecting that information, whether providing the information is mandatory or voluntary, the purposes for which the information will be used, the routine uses of the information, and the effects on the individual, if any, of not providing the information. The system manager also shall ensure that information collected is used only for the intended purpose and that any additional use is first proposed in a rule published in the FEDERAL REGISTER or that permission for such additional use is obtained in writing from the subject individual.

§ 105–64.101–2 Standards of accuracy.

The system manager shall ensure that all records which are used by the agency to make determinations about any individual are maintained with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to ensure fairness to the individual.

§ 105–64.101–3 Rules of conduct.

Any officer or employee of GSA involved in the design, development, operation, or maintenance of any system of records, or in maintaining any record, shall review the provisions of 5 U.S.C. 552a and the regulations in this part, and shall conduct himself in accordance with the rules of conduct concerning the protection of personal information in 41 CFR 105–735, Standards of Conduct.

§ 105–64.101–4 Safeguarding systems of records.

The system manager shall ensure that appropriate administrative, technical, and physical safeguards are established to ensure the security and confidentiality of records and to protect against any anticipated threats or hazards to their security or integrity which could result in substantial harm, embarrassment, inconvenience, or unfairness to any individual on whom information is maintained. Personnel information contained in both manual and automated systems of records shall be protected by implementing the following safeguards:

(a) All personnel records in paper files, including but not limited to the original and copies of records in the Official Personnel Folder, shall be stored in a lockable metal filing cabinet when not in use by an authorized person. A system manager may employ an alternative storage system: *Provided*, That it furnishes an equivalent or greater degree of physical security than storage in a locked file cabinet.

(b) A system manager shall establish administrative, technical, physical, and security safeguards adequate to prevent unauthorized disclosure or destruction of identifiable personnel data in an automated system of records, and in reports and outputs from such systems which contain identifiable personnel data. Input and output documents, punched cards, and magnetic tapes or disks containing identifiable personnel data shall be stored in a lockable metal file cabinet when not in use by an authorized person. A system manager may employ an alternative storage system provided that it furnishes an equivalent or greater degree of physical security than storage in a locked file cabinet.

(c) A system manager shall permit access to and use of automated or manual personnel records only to persons whose official duties require such access, or to a subject individual or his representative as provided by this part.

§ 105–64.101–5 Inconsistent issuances of GSA superseded.

Any policies and procedures in any GSA issuance which are inconsistent with the policies and procedures in this Part 105–64 are superseded to the extent of that inconsistency.

§ 105–64.102 Records of other agencies.

(a) *Other agencies' records managed and administered by GSA.* Rules governing the maintenance of systems of records of agencies other than GSA which are located in the National Archives of the United States and Federal Records Centers are in Part 105–61 (Public use of records, donated historical materials, and facilities in the National Archives and Records Service).

(b) *Current records of other agencies.* If GSA receives a request for access to records which are the primary responsibility of another agency, but which are maintained by or in the temporary possession of GSA on behalf of that agency, GSA will refer the request to the agency concerned for appropriate action. GSA will advise the requester that the request has been forwarded to the responsible agency. Records in the custody of GSA which are the primary responsibility of the U.S. Civil Service Commission are governed by the rules of the Commission promulgated pursuant to the Privacy Act.

§ 105–64.103 Subpoena and other legal demands.

Access to systems of records by subpoena or other legal process shall be in accordance with the provisions of Subpart 105–60.6 of this chapter.

Subpart 105–64.2—Disclosure of Records

§ 105–64.201 Conditions of disclosure.

No official or employee of GSA shall disclose any record to any person or to another agency without the express written consent of the subject individual unless the disclosure is:

(a) To officers or employees of GSA who have a need for the information in the official performance of their duties;

(b) Pursuant to the provisions of the Freedom of Information Act;

(c) For a routine use as published in the annual notice in the FEDERAL REGISTER;

(d) To the Bureau of the Census for uses pursuant to Title 13, United States Code;

(e) To a recipient who has provided the agency with advance adequate written assurance that the record will be used solely as a statistical research or reporting record. (The record shall be transferred in a form that is not individually identifiable. The written statement should include as a minimum:

(1) A statement of the purpose for requesting the records; and

(2) Certification that the records will be used only for statistical purposes.

These written statements should be maintained as records. In addition to deleting personal identifying information from records released for statistical purposes, the system manager shall ensure that the identity of the individual cannot reasonably be deduced by combining various statistical records.);

(f) To the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Administrator of General Services or his designee to determine whether the record has such value;

(g) To another agency or instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity, if the activity is authorized by law, and if the head of the agency or instrumentality or his designated representative has made a written request to the General Services Administration specifying the particular portion desired and the law enforcement activity for which the record is sought;

(h) To a person showing compelling circumstances affecting the health and safety of an individual, not necessarily the individual to whom the record pertains (Upon such disclosure, a notification must be sent to the last known address of the subject individual.);

(i) To either House of Congress or to a subcommittee or committee (joint or of either House, to the extent that the subject matter falls within their jurisdiction);

(j) To the Comptroller General or any of his authorized representatives in the course of the performance of the duties of the General Accounting Office; or

(k) Pursuant to the order of a court of competent jurisdiction.

§ 105–64.202 Accounting of disclosures.

(a) Except for disclosures made pursuant to § 105–64.201 (a) and (b), an accurate accounting of each disclosure shall be made and retained for 5 years after the disclosure or for the life of the record, whichever is longer. The accounting shall include the date, nature, and purpose of each disclosure, and the name and address of the person or agency to whom the disclosure is made.

(b) The system manager also shall maintain in conjunction with the accounting of disclosures:

(1) A full statement of the justification for the disclosure;

(2) All documentation surrounding disclosure of a record for statistical or law enforcement purposes; and

(3) Evidence of written consent to a disclosure given by the subject individual.

(c) Except for the accounting of disclosures made to agencies or instrumentalities in law enforcement activities in accordance with § 105–64.201(g) or of disclosures made from exempt systems (see Subpart 105–64.6), the accounting of disclosures shall be made available to the individual upon request. Procedures for requesting access to the accounting are in Subpart 105–64.3 of this part.

Subpart 105–64.3—Individual Access to Records

§ 105–64.301 Access procedures.

§ 105–64.301–1 Form of requests.

(a) An individual who seeks access to his record or to any information pertaining to him which is contained in a system of records should notify the system manager or applicable individual at the address indicated in the FEDERAL REGISTER notice describing the pertinent system of records.

(b) The request, delivered either by mail or in person, shall be in writing. The request should bear the legend "Privacy Act Request" both on the request

V 40 219 NOV 12 75 XUM

letter and on the envelope. The request letter should contain the complete name and identifying number of the system as published in the FEDERAL REGISTER; the full name and address of the subject individual; a brief description of the nature, time, place, and circumstances of the individual's association with GSA; and any other information which the individual believes would help the system manager to determine whether the personal information about the individual is included in the system of records. The system manager or applicable individual shall answer or acknowledge the request within 10 workdays of its receipt by GSA.

§ 105–64.301–2 Special requirements for medical records.

(a) A system manager who receives a request from an individual for access to medical information concerning the requester shall refer the pertinent system of records to a Federal medical officer for review and determination in accordance with this section. If no Federal medical officer is available to make the determination required by this section, the system manager shall refer the request and the medical certificates or other medical reports concerned to the U.S. Civil Service Commission for determination.

(b) If, in the opinion of a Federal medical officer, medical information requested by the subject individual indicates the existence of a malignancy, a mental condition, or another condition about which a prudent physician would hesitate to inform a person suffering from such a condition of its exact nature and probable outcome, the system manager shall not release the medical information to the subject individual or to any person other than a physician designated by the subject individual (or by his guardian or conservator) in writing.

(c) If, in the opinion of a Federal medical officer, the medical information does not indicate the presence of any condition which would cause a prudent physician to hesitate to inform a person suffering from such a condition of its exact nature and probable outcome, the system manager shall release it to the subject individual or to any person, firm, or organization which the individual authorizes in writing to receive it.

§ 105–64.301–3 Granting access.

(a) Upon receipt of a request for access to non-exempt records, the system manager shall make these records available to the subject individual or shall acknowledge the request within 10 workdays of its receipt by GSA. The acknowledgment shall indicate when the system manager will make the records available.

(b) If the system manager anticipates more than a 10 day delay in making a record available, he also shall include in the acknowledgment specific reasons for the delay.

(c) If a subject individual's request for access does not contain sufficient information to permit the system manager to locate the records, the system manager shall request additional information from the individual and shall have 10 workdays following receipt of the additional information in which to make the records available or to acknowledge receipt of the request and indicate when the records will be available.

(d) Records will be available for authorized access during normal business hours at the offices where the records are located. A requester should be prepared to identify himself with a driver's license, student or employee identification card, or other identification acceptable to the system manager. When the disclosure of records to the wrong individual would result in substantial harm, embarrassment, inconvenience, or unfairness to the subject individual, the system manager may require a notarized statement of identity. The system manager shall ensure that times, places, and requirements for identification are not excessive and do not restrict individual access unduly.

(e) Upon request, a system manager shall permit an individual to examine the original of a non-exempt record, shall provide the individual with a copy of the record, or both. Fees shall be charged only for copies requested by the individual and not for copies provided to the individual for the convenience of the agency.

(f) An individual may request to pick up a record in person or to receive it by mail, directed to the name and address provided by the individual in his request. A system manager shall not make a record available to a third party for delivery to the subject individual, except for medical records as outlined in § 105–64.301–2.

(g) An individual who wishes to have a person of his choosing accompany him in reviewing a record must sign a statement authorizing the disclosure of his record in the presence of the other person. The system manager shall maintain this statement with the accounting of disclosures required in paragraph (h) of this subsection.

(h) The system manager shall maintain an accounting of disclosures to the subject individual documenting GSA's compliance with the request in the manner prescribed in § 105–64.202.

(i) The procedure for access to an accounting of disclosures is identical to the procedure for access to a record as set forth in this section.

§ 105–64.301–4 Denials of access.

(a) A system manager may deny an individual access to his record only on the grounds that GSA has published rules in the FEDERAL REGISTER exempting the pertinent system of records from the access requirement. These systems of records are described in Subpart 105–64.6 of this part.

(b) Upon receipt of a request for access to a record which the system manager believes is contained within an exempt system of records, he shall forward the request to the appropriate official listed below through normal supervisory channels:

(1) Central Office:
The Administrator.
The Deputy Administrator.
The Assistant Administrator.
The Associate Administrator for Federal Management Policy.
Director of Civil Rights.
Chairman, GSA Board of Contract Appeals.
Director of Audits.
Special Assistant to the Administrator for Stockpile Disposal.
Special Assistant to the Administrator for Coordination of John F. Kennedy Library.
Special Assistant to the Administrator for Presidential Materials.
Director, Federal Preparedness Agency.
Assistant Administrator for Administration.
General Counsel.
Commissioner, Public Buildings Service.
Commissioner, Federal Supply Service.
Commissioner, Automated Data and Telecommunications Service.
Archivist of the United States.

(2) Regional offices: Regional Administrator.

The system manager shall append to the request an explanation of his determination that the requested record is contained within an exempt system of records and a recommendation that the request be denied or granted.

(c) In the event that the system manager serves in one of the positions listed in paragraph (b) of this section, he shall retain the responsibility for denying or granting the request.

(d) The appropriate official listed in paragraph (b) of this section shall, in consultation with legal counsel and such other officials as he deems appropriate, determine if the requested record is in fact contained within an exempt system of records and:

(1) If the record is not contained within an exempt system of records, he shall notify the system manager to grant the request in accordance with § 105–64.301–3; or

(2) If the record is contained within an exempt system, he shall:

(i) Notify the requester that the request is denied, including a statement justifying the denial and advising the requester of his right to judicial review of that decision as provided in § 105–64.408; or

(ii) Notify the system manager to make the record available to the requester in accordance with § 105–64.301–3, notwithstanding the record's inclusion within an exempt system.

(e) The appropriate official listed in paragraph (b) of this section shall provide the Director of Information with a copy of any denial of a requested access.

(f) A denial by an appropriate official listed in paragraph (b) of this section is the final agency determination on the question of access.

§ 105–64.302 Fees.

§ 105–64.302–1 Records available at a fee.

The system manager shall provide one copy of a record to a requester at a fee prescribed in § 105–64.302–6.

§ 105–64.302–2 Additional copies.

A reasonable number of additional copies shall be provided for the applicable fee to a requester who indicates that he has no access to commercial reproduction services.

§ 105–64.302–3 Waiver of fee.

The system manager shall make one copy of a record available without charge to a requester who is an employee of GSA and may waive the fee requirement for one copy of a record for any other requester if the cost of collecting the fee is an unduly large part of, or greater than, the fee, or when furnishing the record without charge confirms to generally established business custom or is in the public interest.

§ 105–64.302–4 Prepayment of fees over $25.

If the system manager determines that the anticipated total fee is likely to exceed $25, he shall notify the individual that he must prepay the anticipated fee prior to GSA's making the records available. GSA will remit the excess paid by the individual or bill the individual for an additional amount if there is a variation between the final fee charged and the amount prepaid.

§ 105–64.302–5 Form of payment.

Payment shall be by check or money order payable to the General Services Administration and shall be addressed to the system manager.

§ 105–64.302–6 Reproduction fee schedule.

(a) The fee for reproducing a copy of a GSA record (by routine electrostatic copying) up to and including material 8½ x 14 inches shall be $0.10 per page.

(b) The fee for reproducing a copy of a GSA record over 8½ x 14 inches or whose physical characteristics do not permit reproduction by routine electrostatic copying shall be the direct cost of reproducing the records through Government or commercial sources.

Subpart 105–64.4—Requests To Amend Records

§ 105–64.401 Submission of requests to amend records.

An individual who desires to amend any record containing personal information about him should direct a written request to the system manager specified in the pertinent FEDERAL REGISTER notice concerning GSA's systems of records. A current GSA employee who desires to amend personnel records should submit a written request to the General Services Administration, Director of Personnel (BP), Washington, DC 20405. Each request should include evidence of and justification for the need to amend the pertinent record. Each request should bear the legend "Privacy Act—Request To Amend Record" prominently marked on both the face of the request letter and the envelope.

§ 105–64.402 Review of requests to amend records.

(a) The system manager shall acknowledge his receipt of a request to amend a record within 10 workdays. If possible, the acknowledgment shall include the system manager's determination either to amend the record or to deny the request to amend as provided in § 105–64.404.

(b) When reviewing a record in response to a request to amend, the system manager shall assess the accuracy, relevance, timeliness, and completeness of the existing record in light of the proposed amendment. He shall determine whether the request for the amendment is justified. With respect to a request to delete information, the system manager also shall review the request and the existing record to determine whether the information is relevant and necessary to accomplish an agency purpose required to be accomplished by statute or Executive Order.

§ 105–64.403 Approval of requests to amend.

If the system manager determines that amendment of a record is proper in accordance with the request to amend, he promptly shall make the necessary corrections to the record and shall send a copy of the corrected record to the individual. Where an accounting of disclosure has been maintained, he shall advise all previous recipients of the record of the fact that a correction has been made and the substance of the correction. Where practicable, the system manager shall send a copy of the corrected record to previous recipients. The system manager shall advise the Director of Information that a request to amend has been approved.

§ 105–64.404 Denial of requests to amend.

(a) If the system manager determines that an amendment of a record is improper or that the record should be amended in a manner other than that requested by an individual, he shall refer the request to amend and his determinations and recommendations to the appropriate official listed in § 105–64.301–4(b) through normal supervisory channels.

(b) If the official listed in § 105–64.301–4(b), after reviewing the request to amend a record, determines to amend the record in accordance with the request, he promptly shall return the request to the system manager with instructions to make the requested amendments in accordance with § 105–64.403.

(c) If the appropriate official listed in § 105–64.301–4(b), after reviewing the request to amend a record, determines not to amend the record in accordance with the request, he promptly shall advise the requester in writing of the determination. The refusal letter (1) shall state the reasons for the denial of the request to amend; (2) shall include proposed alternative amendments, if appropriate; (3) shall state the requester's right to appeal the denial of the request to amend; and (4) shall state the procedures for appealing.

(d) The appropriate official listed in § 105–64.301–4(b) shall furnish the Director of Information a copy of each initial denial of a request to amend a record.

§ 105–64.405 Agreement to alternative amendments.

If the denial of a request to amend a record includes proposed alternative amendments, and if the requester agrees to accept them, he must notify the official who signed the denial. That official immediately shall instruct the system manager to make the necessary amendments in accordance with § 105–64.403.

§ 105–64.406 Appeal of denial of request to amend a record.

(a) A requester who disagrees with a denial of a request to amend a record may file an administrative appeal of that denial. The requester should address the appeal to the General Services Administration, Director of Information (ALVP), Washington, DC 20405. If the requester is an employee of GSA and the denial to amend involves a record maintained in the employee's Official Personnel Folder, as described in Chapter 293 of the Federal Personnel Manual, the appeal should be addressed to the Director, Bureau of Manpower Information Systems, United States Civil Service Commission, Washington, DC 20415.

(b) Each appeal to the GSA Director of Information shall be in writing and must be received by him no later than 30 calendar days from the requester's receipt of a denial of a request to amend a record. The appeal should bear the legend "Privacy Act—Appeal," both on the face of the letter and the envelope.

(c) Upon receipt of an appeal, the Director of Information shall consult with the system manager, the official who made the denial, legal counsel, and such other officials as may be appropriate. If the Director of Information, in consultation with these officials, determines that the record should be amended as requested, he immediately shall instruct the system manager to amend the record in accordance with § 105–64.403 and shall notify the requester of that action.

(d) If the Director of Information, in consultation with the officials specified in paragraph (c) of this section, determines that the appeal should be rejected, he shall submit the file on the request and appeal, including his findings and recommendations, to the Deputy Administrator for a final administrative determination.

(e) If the Deputy Administrator determines that the record should be amended as requested, he immediately shall instruct the system manager in writing to amend the record in accordance with § 105–64.403. The Deputy Administrator shall send a copy of his instructions to the Director of Information, who shall notify the requester of that action.

(f) If the Deputy Administrator determines to reject the appeal, he immediately shall notify the requester in writing of that determination. This action shall constitute the final administrative determination on the request to amend the record and shall include:

V 40 N 219 NOV 12 75 XUM

(1) The reasons for the rejection of the appeal;

(2) Proposed alternative amendments, if appropriate, which the requester subsequently may accept in accordance with § 105–64.405;

(3) Notice of the requester's right to file a Statement of Disagreement for distribution in accordance with § 105–64.407; and

(4) Notice of the requester's right to seek judicial review of the final administrative determination, as provided in § 105–64.408.

(g) The final agency determination must be made no later than 30 workdays from the date on which the appeal is received by the Director of Information. In extraordinary circumstances, the Administrator may extend this time limit by notifying the requester in writing before the expiration of the 30 workdays. The Administrator's notification will include a justification for the extension.

§ 105–64.407 Statements of disagreement.

Upon receipt of a final administrative determination denying a request to amend a record, the requester may file a Statement of Disagreement with the appropriate system manager. The Statement of Disagreement should include an explanation of why the requester believes the record to be inaccurate, irrelevant, untimely, or incomplete. The system manager shall maintain the Statement of Disagreement in conjunction with the pertinent record, and shall include a copy of the Statement of Disagreement in any disclosure of the pertinent record. The system manager shall provide a copy of the Statement of Disagreement to any person or agency to whom the record has been disclosed only if the disclosure was subject to the accounting requirements of § 105–64.202.

§ 105–64.408 Judicial review.

Within 2 years of receipt of a final administrative determination as provided in § 105–64.301–4 or § 105–64.406, a requester may seek judicial review of that determination. A civil action must be filed in the Federal District Court in which the requester resides or has his principal place of business or in which the agency records are situated, or in the District of Columbia.

Subpart 105–64.5—Report on New Systems and Alteration of Existing Systems

§ 105–64.501 Reporting requirement.

(a) No later than 90 calendar days prior to the establishment of a new system of records, the prospective system manager shall notify the Assistant Administrator for Administration of the proposed new system: The prospective system manager shall include with the notification a completed GSA Form 3294, System of Records Covered by the Privacy Act of 1974, and a justification for each system of records he proposes to establish. If the Assistant Administrator for Administration determines that the establishment of the proposed system is in the best interest of the Government, he shall submit, no later than 60 calendar days prior to the establishment of that system of records, a report of the proposal to the President of the Senate, the Speaker of the House of Representatives, and the Director of the Office of Management and Budget for their evaluation of the probable or potential effect of that proposal on the privacy and other personal or property rights of individuals.

(b) No later than 90 calendar days prior to the alteration of a system of records, the system manager responsible for the maintenance of that system of records shall notify the Assistant Administrator for Administration of the proposed alteration. The system manager shall include with the notification a completed GSA Form 3294, System of Records Covered by the Privacy Act of 1974, and a justification for each system of records he proposes to alter. If the Assistant Administrator for Administration determines that the proposed alteration is in the best interest of the Government, he shall submit, no later than 60 calendar days prior to the establishment of that alteration, a report of the proposal to the President of the Senate, the Speaker of the House of Representatives, and the Director of the Office of Management and Budget for their evaluation of the probable or potential effect of that proposal on the privacy and other personal or property rights of individuals.

(c) The reports required by this regulation are exempt from reports control.

§ 105–64.502 Federal Register notice of establishment of new system or alteration of existing system.

The Assistant Administrator for Administration shall publish in the FEDERAL REGISTER a notice of the proposed establishment or alteration of a system of records when:

(a) He receives notice that the Senate, the House of Representatives, and the Office of Management and Budget do not object to the establishment of a new system of records or to the alteration of an existing system of records, or

(b) No fewer than 30 calendar days elapse from the date of submission of the proposal to the Senate, the House of Representatives, and the Office of Management and Budget without receipt by the Assistant Administrator for Administration of an objection to the proposal.

The notice shall include all of the information required to be provided in GSA Form 3294, System of Records Covered by the Privacy Act of 1974, and such other information as the Assistant Administrator for Administration deems necessary.

§ 105–64.503 Effective date of new systems of records or alteration of an existing system of records.

Systems of records proposed to be established or altered in accordance with the provisions of this subpart shall be effective no sooner than 30 calendar days from the publication of the notice required by § 105–64.502.

Subpart 105–64.6—Exemptions

§ 105–64.601 General exemptions.

The following system of records shall be exempt from all provisions of the Privacy Act of 1974 with the exception of subsections (b); (c)(1) and (2); (e)(4)(A) through (F); (e)(6), (7), (9), (10), and (11); and (i) of the Act;

Incident Reporting Systems
GSA/PBS 3

This system is exempt to the extent that information in the system pertains to the enforcement of criminal laws, including police efforts to prevent, control, or reduce crime or to apprehend criminals; to the activities of prosecutors, courts, and correctional, probation, pardon, or parole authorities; and to (a) information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting only of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status; (b) information compiled for the purpose of a criminal investigation, including reports of informants and investigators, that is associated with an identifiable individual; or (c) reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws, from arrest or indictment through release from supervision. This system is exempted to maintain the efficacy and integrity of the Federal Protective Service's law enforcement function.

§ 105–64.602 Specific exemptions.

§ 105–64.602–1 General investigative files.

The following system of records shall be exempt from subsections (c)(3); (d); (e)(1); (e)(4)(G), (H), and (I); and (f) of the Privacy Act of 1974:

Investigation and Personnel Security Case Files
GSA/OAD 25

This system is exempt (a) to the extent that the system consists of investigatory material compiled for law enforcement purposes, other than material within the scope of § 105–64.601: *Provided, however,* That if any individual is denied any right, privilege, or benefit to which he would otherwise be entitled by Federal law, or for which he would otherwise be eligible, as a result of the maintenance of such material, such material shall be provided to such individual, except to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence and (b) to the extent the system consists of investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence. This system has been exempted to maintain the efficacy and integrity of lawful investigations conducted pursuant to the GSA Office of Investigation law enforcement responsibilities and its responsibilities in the areas of Federal employment, Government contracts, and access to security classified information.

§ 105–64.602–2 Testing files.

The following system of records shall be exempt from subsections (c)(3); (d); (e)(1); (e)(4)(G), (H), and (I); and (f) of the Privacy Act of 1974:

Test Material
GSA/OAD 21

This system is exempt to the extent that the system consists of testing or examination material used solely to determine individual qualifications for appointment or promoton in the Federal service, the disclosure of which would compromise the objectivity or fairness of the testing or examination process. This system has been exempted to maintain the efficacy and integrity of materials used in examining or testing persons to determine their qualifications for a Federal appointment or promotion.

V 40 N 219 NOV 12 75 XUM

FEDERAL MARITIME COMMISSION

PRIVACY ACT OF 1974

Systems of Records

Pursuant to the Privacy Act of 1974 (Pub. L. 93–579, 5 U.S.C. 552a(e)(4) and (11)), the Federal Maritime Commission on October 6, 1975, published in the FEDERAL REGISTER (40 FR 46289) additional proposed notices of systems of records maintained by the Commission.

Interested parties were afforded the opportunity to submit comments on the routine use portion of each notice. No comments were received.

Therefore, it is ordered, That pursuant to the Privacy Act of 1974 (Pub. L. 93–579, 5 U.S.C. 552a(e)(4) and (11)), the notices of systems of records are adopted without change.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[FR Doc.75-3053 Filed 11-11-75;8:45 am]

FEDERAL POWER COMMISSION

PRIVACY ACT OF 1974

New or Intended Routine Uses of Information in Existing Systems of Records

The Privacy Act of 1974, Pub. L. No. 93–579 (88 Stat. 1896), requires that each agency publish at least annually a notice of the existence and character of each "system of records" as defined in 5 U.S.C. 552a(a)(5), which the agency maintains, 5 U.S.C. 552a(e)(4). The Federal Power Commission has published such Notice in the FEDERAL REGISTER at 40 FR 39353 (Aug. 27, 1975), 40 FR 41984 (Sept. 9, 1975), and 40 FR 45118 (Sept. 30, 1975).

Pursuant to 5 U.S.C. 552a(e)(11), section 309 of the Federal Power Act, as amended (49 Stat. 858–859; 16 U.S.C. 825h), and section 16 of the Natural Gas Act, as amended (52 Stat. 830; 15 U.S.C. 717o), notice is hereby given that the Federal Power Commission proposes the adoption of new or intended uses of information in existing record systems which have been published in the FEDERAL REGISTER cited hereinabove. Corrections of typographical errors in the original publication of these record systems are included in the present Notice in order to avoid confusion in the discussion of the proposed new routines uses of information. These corrections have been included even though they do not have to be published 30 days prior to their effectiveness pursuant to section 552a(e)(11) of the Privacy Act.

5 U.S.C. 552a(b)(9) provides for disclosures of records by an agency without the written consent of the individual in response to a request from "* * * either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee therefor, any joint committee of Congress or subcommittee of any such joint committee * * *" The Privacy Act is silent on how agencies shall treat requests from individual Congressmen for information relating to individuals falling under the scope of the Act. Reference to the general principles followed by the Congress in the statute indicates that the consent of the individual involved can be deemed to have been given in any instance in which the individual makes a written request to a member of Congress who, in turn, forwards the request to a Government agency. Accordingly, we hereby give notice of the addition of a new routine use in certain of the FPC systems of records hereinafter specified to accommodate a request for personal information by an individual Congressman.

A. In FPC–1, "Appeals, Grievances and Complaints Records—FPC" (40 FR 39354 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purposes of such uses:", delete paragraph i. and insert the following new paragraph i.:

i. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in this system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39354 (Aug. 27, 1975).

B. In FPC–7, "Claims by Employees for Losses of Personal Property—FPC" (40 FR 39354 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purposes of such uses:", the following changes are proposed:

1. Redesignate the present paragraph as paragraph "a" and add a phrase at the end of the sentence to read as follows:

a. The system is used by the staff of the Commission whose official duties require access in determining the validity of the personal property claim and for financial settlement of the claim.

2. Insert new paragraph "b" to read as follows:

b. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in this system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39357 (Aug. 27, 1975).

C. In FPC–9, "Computer Usage Production Statistics for the Office of Regulatory Information Systems—FPC" (40 FR 39358 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purposes of such uses:", redesignate the present paragraph as paragraph "a" and add a new paragraph "b" to read as follows:

b. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in this system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39358 (Aug. 27, 1975).

D. In FPC–15, "Employee Conduct Records—FPC" (40 FR 39360 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purposes of such uses:", the following changes are proposed:

1. Delete paragraph "b" and redesignate paragraphs "c" through "g" as paragraphs "b" through "f".

2. In newly designated paragraph "c", line 3, delete the phrase "such as current licenses,".

3. In newly designated paragraph "d", line 3, substitute the word "issuance" for the word "issuing".

4. Add a new paragraph "g" to read as follows:

g. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in this system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39361 (Aug. 27, 1975).

E. In FPC–21, "Pay and Pay-Related Records (Payroll, Travel, Attendance, Leave)—FPC" (40 FR 39363 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purpose of such uses:", the following changes are proposed:

1. The addition of a phrase to the first sentence to read as follows:

These records are used by the staff of the FPC and/or by a contractor whose official duties require access in order * * *

2. Insert a new paragraph "j" to read as follows:

j. To report to unemployment compensation agencies or boards gross wages and separation information for unemployment compensation.

3. Insert a new paragraph "k" to read as follows:

k. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in the system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39363 (Aug. 27, 1975).

F. In FPC–22 "Personal Investigations Records (Security and Suitability)—FPC" (40 FR 39364 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purposes

of such uses:", the following changes are proposed:

1. Delete paragraph "b" and redesignate paragraphs "c" through "i" as paragraphs "b" through "h".

2. In newly designated paragraph "e", line 3, delete the phrase "such as current licenses,".

3. In newly designated paragraph "f", line 3, substitute the word "issuance" for the word "issuing".

4. Add a new paragraph "i" to read as follows:

i. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in the system and the authority authorizing the maintenance of the information contained in the system are set forth as 40 FR 39364 (Aug. 27, 1975).

G. In FPC–23, "Personnel Records (General)—FPC" (40 FR 39366 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purposes of such uses:", the following changes are proposed:

1. Delete paragraph "b" and redesignate paragraphs "c" through "k" as paragraphs "b" through "j".

2. Add a phrase to newly designated "b" to read as follows:

"b" To provide necessary and relevant information to a prospective employer of a present or former Federal employee or to an organization at the request of the individual; or to obtain necessary and relevant information from a former employer concerning the hiring and retention of an employee or the issuance of a security clearance.

3. In newly designated paragraph "c", line 3, delete the phrase "such as current licenses,".

4. In newly designated paragraph "d", line 3, substitute the word "issuance" for the word "issuing".

5. In newly designated paragraph "j", delete the words "a computer and substitute therefore, the words "an FPC" so that the paragraph will read as follows:

"j." By an FPC contractor to prepare microform data records.

6. Add new paragraphs "k" through "g" to read as follows:

k. To disclose to the Office of Workers Compensation Program; Veterans Administration Pension Benefits Program; Social Security Old Age, Survivor and Disability Insurance and Medicare Programs; military retired pay programs; Federal civilian employee retirement programs other than the Civil Service Retirement System; or other national, state, county, municipal, or other publicly recognized charitable or social security administration agencies information needed to adjudicate a claim for benefits under ERIOH or the recipient's benefit program(s) or information needed to conduct an analytical study of benefits being paid under such programs.

l. To disclose to the Federal Employee's Group Life Insurance Office information necessary to support an individual's claim for life insurance benefits under the Federal Employees' Group Life Insurance Program.

m. To disclose to a health insurance carrier or plan participating in the Federal Employees' Health Benefits Program information necessary to support an individual's claim for health insurance benefits under the program.

n. To provide statistical reports to Congress, agencies, and the public on characteristics of the Federal work force.

o. To provide information to an educational institution for training purposes.

p. To provide information to officials of a foreign government for clearance prior to a duty assignment of an employee in a specific country.

q. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories or records maintained in the system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39366 (Aug. 27, 1975).

H. In FPC–24 "Recruiting, Examining, and Placement Records—FPC" (40 FR 39366 (Aug. 27, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purpose of such uses:", the following changes are proposed:

1. Delete paragraph "c" and redesignate paragraphs "d" through "k" as paragraphs "c" through "j".

2. In newly designated paragraph "d", line 5, substitute the word "of" for the word "or".

3. In newly designated "e", line 3, delete the phrase "such as current licenses,".

4. In newly designated paragraph "f", line 3, substitute the word "issuance" for the word "issuing".

5. Add a new paragraph "k" to read as follows:

k. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in the system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39367 (Aug. 27, 1975).

I. In FPC–25, "Time Distribution Reports—FPC" (40 FR 39368 (Aug. 27, 1975); 40 FR 41984, September 9, 1975)), in the section entitled "Routine uses of records maintained in the system, including categories of users and the purpose of such uses:", the following change is proposed:

1. Add a new paragraph "e" to read as follows:

e. Disclosure may be made to a Congressional office from the record of an individual in response to a written inquiry from the Congressional office which is accompanied by a written request of that individual.

The categories of records maintained in the system and the authority authorizing the maintenance of the information contained in the system are set forth at 40 FR 39369 (Aug. 27, 1975).

Any interested person may submit to the Federal Power Commission, Washington, D.C. 20426, not later than December 12, 1975, comments or suggestions in writing concerning all or part of the notice proposed herein. All such submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Washington, D.C. 20426, during regular business hours. The Commission will consider all such submittals before acting on the matters proposed herein. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submittals to the Commission should indicate the name and mailing address of the person filing the comments or suggestions.

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of Lear Siegler, Inc., a corporation.

Consent order requiring a Santa Monica, Calif., firm offering courses in computer programming and computer operations, among other things to cease misrepresenting aspects of their courses such as the significance or importance of their courses; the qualifications of students completing their courses to obtain employment in areas for which they have been trained; the demand for graduates of their courses; and employment services provided respondent's students. Further, respondent is required to contact past participants in their courses and provide them with a questionnaire to be returned to respondent and to make restitution to those prior students determined to be eligible under the provisions of the order.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

ORDER

I

It is ordered that Respondent, Lear Siegler, Inc., a corporation, its successors and assigns, and Respondent's officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the creating, advertising, promoting, offering for sale, sale or distribution of courses of study, training or instruction in the field of electronic data processing or any other course in any field in commerce or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, do forthwith cease and desist from:

1. Representing, orally, in writing, or in any other manner, directly or by implication, that:

(a) The training offered to students enrolled in any computer programming course or any similar course of instruction offered by Respondent is, by itself, sufficient to qualify a graduate thereof for the scientific application of computer programming; or misrepresenting, in any manner, the significance or importance of any course of instruction in qualifying any person for employment in a particular field of endeavor.

(b) The position of systems analyst is an entry level employment objective of any course of instruction offered by Respondent; or misrepresenting, in any manner, the nature or type of position for which a graduate of any course of instruction will be qualified or in which such a graduate will achieve employment.

(c) Any school, location or facility at which Respondent conducts business or offers any course of instruction has a stated placement rate, ratio or percentage, unless any such placement rate, ratio, or percentage is, in fact, the current and actual placement rate, ratio, or percentage at such school, location or facility, computed in the manner set forth in Paragraph 6(b) of Part I of this Order.

(d) Persons completing Respondent's courses in computer operations and computer programming will thereby have received the training and experience required to qualify them for employment at salaries earned by experienced operators and programmers; or representing, orally or in writing, that any amount of salary or other remuneration will or may be earned by any person completing any course offered by Respondent, unless Respondent in each and every instance has in good faith conducted a statistically valid survey which establishes the validity of any such claim at all times and in all locations where the representation is made.

(e) All or substantially all graduates of any course of instruction offered by Respondent will upon graduation, obtain jobs in the positions for which they have been trained; or misrepresenting, in any manner, the ease with which graduates of any course will attain employment, or the effectiveness of any course of training or instruction in preparing or qualifying any graduate for employment.

(f) Inquiries are solicited for the purpose of offering employment to qualified applicants; or misrepresenting, orally or in writing, that employment is being held out or made available in any respect.

(g) (1) There is a substantial demand, or a demand of any size or proportion, for persons completing any of the courses offered by Respondent in the areas of computer programming, computer operations or computer technology, or any other course in any field, (2) or otherwise representing that opportunities for employment, or opportunities of any type or number are available to such persons, except as hereinafter provided in Paragraph 6(b) of this Order. *Provided, however,* that Respondent shall cease and

[1] Copies of the Complaint, Appendices, Decision and Order, filed with the original document.

V 40 N 220 NOV 13 75 XUM

desist making such representations unless the Respondent in each and every instance:

(a) Until the passage of a base period to be determined pursuant to paragraph 6(b) of Part I of this Order, after the establishment of a new school location by Respondent in any metropolitan area or county, whichever is larger, where it did not previously operate a school, and after the introduction by Respondent of any new course of instruction at any school or location, shall: (i) have in good faith conducted a statistically valid survey which establishes the validity of any such representation at all times when the representation is made, and (ii) have disclosed in immediate and conspicuous conjunction with any such representation, that:

All representations of potential employment demand or opportunities for graduates of this school (course) are merely estimates. This school (course) has not been in operation long enough to indicate what, if any, actual employment may result upon graduation.

(b) After the passage of a base period to be determined pursuant to Paragraph 6(b) of Part I of this Order, and until two years after the establishment of a new school location by Respondent in any metropolitan area or county, whichever is larger, where it did not previously operate a school, and after the introduction by Respondent of any new course of instruction at any school or location, shall: (i) make any such representations in the form and manner provided in Paragraph 6(b) of Part I of this Order, and (ii) disclose in immediate and conspicuous conjunction with any such representation, that:

This school (course) has not been in operation long enough to indicate what, if any, actual employment may result upon graduation.

2. Using, orally, in writing or in any other manner, at any time statistical data or numerical estimates, derived from any source whatsoever, respecting present or future occupational demand or the growth of employment or the salaries earned in the field of electronic data processing, or in any other field or misrepresenting in any manner the meaning, application, relevancy or import of any statistical data or statistical projections of any type from any source.

3. Representing, orally, in writing or in any other manner, directly or by implication, that:

(a) Any school, location or facility operated by Respondent maintains a full-time placement office unless in each and every instance such placement office is staffed with personnel whose function is to furnish placement assistance and requests for placement assistance are handled without referral to employment agencies or other third parties.

(b) Graduates of any course of instruction offered by Respondent are not required to actively seek employment opportunities through sources other than Respondent's placement office; or misrepresenting in any manner the requirements, duties, obligations or responsibilities imposed upon any person who seeks placement assistance; or misrepresenting in any manner the capabilities or functions of any placement office, referral service or any other type of assistance in obtaining employment for persons completing any said course.

(c) The placement assistance furnished by Respondent is free or without cost; or misrepresenting in any manner the cost of any placement assistance or service.

(d) Graduates of any course of instruction offered by Respondent in the field of electronic data processing will be regarded as equivalent to experienced job applicants as a result of the computer training received during the course of their enrollment; or misrepresenting in any manner the value, benefit, advantages or seniority which accrues to any graduate of any course of instruction offered by Respondent.

4. Failing to keep adequate records which may be inspected by the Commission staff members upon reasonable notice:

(a) Which disclose the facts upon which any placement percentages or claims, or other representations of the type described in Paragraphs 1 and 6 of this Order are based; and

(b) From which the validity of any placement percentages or claims, or other representations of the type described in Paragraphs 1 and 6 of this Order can be determined.

5. Representing, orally, in writing or in any other manner, directly or by implication that any person engaged in connection with the promotion, offering for sale, sale, distribution or other solicitation of any course of instruction offered by Respondent is a trained vocational counselor; or misrepresenting in any manner the training, experience, title, qualifications or status of any person engaged in connection with the promotion, offering for sale, sale, distribution or other solicitation of any course of instruction, or the import or meaning of any advice given by or any other statement made by any such person; or misrepresenting the nature of any encounter between Respondent's employees and prospective students for Respondent's courses of instruction.

6. Failing to send by certified mail, return receipt requested, to each person who shall contract with Respondent for the purchase of any vocational school course of instruction, a written notice printed in at least ten (10) point type which shall disclose in substantially the same form as provided in Appendix A the following information and none other:

(a) The title "IMPORTANT INFORMATION" printed in bold face type across the top of the form;

(b) Paragraphs reciting the following information to be computed in the manner and form set forth below for the applicable base period as hereinafter defined in subparagraph (6):

(1) For each different course of instruction offered by Respondent for each school, location or facility at which Respondent offers said courses of instruction;

The dates of the "base period" as computer in (b)(6);

The total number of students who graduated during such base period;

The numbers and percentages of total graduates who attained employment in the fields for which such graduates were trained. Such information must include an accurate description of each position in which such graduates attained employment.

(2) As to the same graduates used to compute the placement and employment statistics in (b)(1) above, a list of all employers which hired any such graduates during the base period, the number of such graduates hired by each firm or employer and the positions in which said graduates were hired.

(3) As to the same graduates used to compute the statistics in (b)(1) and (b)(2) above, the annual salary or income of said graduates. Such salary or income shall be classified by number of graduates attaining employment in each position described in (b)(1) at starting salaries expressed in consecutive categories of one thousand dollar amounts, in the form described in Appendix A.

(4) In compiling the foregoing information Respondent shall not include any such graduates who Respondent knows have not retained such positions for more than one month from the initial date of employment. Respondent may use information supplied to it by graduates, employers, or other sources and shall not be required to obtain such information independently.

(5) For each course of instruction for which Respondent is required to disclose information pursuant to subparagraphs (b)(1) through (b)(4), the total number of students who enrolled in said course and were scheduled to graduate during the base period and the number and percentage of the enrollees in said course who failed to complete the course of instruction. The term, "failure to complete", shall encompass those enrollees who:

(A) Withdrew;

(B) Failed the course (*i.e.*, were academically terminated);

(C) Did not complete the course within the base period in which they were scheduled to graduate and must take (a) make-up exam(s) in order to graduate;

(D) Completed the course but did not receive a graduation certificate due to their failure to pay the balance of the tuition; or

(E) For any other reason, did not successfully complete the course within the base period in which they were scheduled to graduate.

(6) "Base Period" shall mean a six (6) month period beginning eight (8) months before and ending two (2) months before the date on which Respondent must begin to disseminate the necessary statistics with respect to the base period.

There shall be a one month period immediately following the close of a base period during which Respondent shall gather the necessary statistics with respect to said base period. These statistics will relate to those graduates who successfully completed the particular course of instruction during the base period and who obtained employment during the base period or the one month period thereafter. Respondent may not include in the computation of the statistics for the base period any persons who graduate during the month after the base period and who find jobs during said one month period. Such persons will be included in statistics for the base period during which they graduate.

At the end of the first month period immediately following the close of a base period, Respondent shall be allowed a second one-month period to calculate and prepare for distribution the necessary statistics with respect to said base period.

On the first of each month, Respondent shall begin to distribute statistics relating to the base period for the period beginning eight (8) months before and ending two (2) months before the first day of each month. Respondent shall continue to distribute said statistics until the first day of the next month and not thereafter.

For any six (6) month period during which Respondent has no graduates for a particular course of instruction, Respondent may continue to distribute the statistics with respect to the prior base period for said course of instruction until such time as Respondent has graduates of said course of instruction and has had one month in which to gather statistics with respect to those graduates and a second month during which to calculate and prepare for distribution the necessary statistics.

Appendix B contains a sample base period calculation.

Provided, however, that subparagraph (b)(1) through (b)(6) above shall be inapplicable to any newly established school that Respondent may establish in any metropolitan area or county, whichever is larger, where it did not previously operate a school, or to any course newly introduced by Respondent, until such time as the new school or course has been in operation for the base period defined in subparagraph (b)(6) above. The following statement shall be included in such notice during such period:

All representations of potential employment or salaries are merely estimates. This school (course) has not been in operation (offered) long enough to indicate what, if any, actual employment or salary may result upon graduation from this school (course).

After such time as the new school or course has been in operation for the base period (subparagraph (b)(6) above), and until two years after the establishment of a new school location in any metropolitan area or county, whichever is larger, where they did not previously operate a school, or after the introduction of any new course by Respondent, the following statement shall be included in such notice:

This school (course) has not been in operation (offered) long enough to indicate what, if any, actual employment or salary you may expect to achieve upon graduation from this school (course).

7. Contracting for any sale of any course of instruction in the form of a sales contract or other agreement which shall become binding prior to the purchaser affirming the enrollment contract by signing and returning to Respondent the Affirmation Form specified in Paragraph 8, within ten (10) days of his receipt of that form. If the purchaser fails to affirm the enrollment contract within the ten (10) day period, Respondent shall consider the contract null and void and within ten (10) business days of the expiration of the affirmation period shall refund all monies paid by the purchaser and cancel and return to the purchaser any evidence of indebtedness.

8. Failing to send by certified mail, return receipt requested, to each person who shall contract with Respondent for the purchase of any course of instruction, a one page form, in duplicate that contains the following unsigned Affirmation statement printed in bold face type of at least ten (10) points:

NOTICE TO THE PURCHASER

THE ENROLLMENT CONTRACT THAT YOU SIGNED WITH (NAME OF SCHOOL) ON (DATE) TO ENROLL IN (NAME OF COURSE) IS NOT EFFECTIVE OR VALID UNLESS YOU FIRST SIGN THIS STATEMENT AND RETURN IT TO THE ABOVE-NAMED SCHOOL WITHIN TEN (10) DAYS FROM THE TIME THAT YOU RECEIVED THIS STATEMENT. YOU ARE FREE TO CANCEL YOUR ENROLLMENT AND RECEIVE A FULL REFUND OF ANY MONIES YOU HAVE PAID TO THE SCHOOL BY NOT SIGNING OR MAILING THIS STATEMENT WITHIN TEN (10) DAYS. AT THE EXPIRATION OF THIS TEN (10) DAY PERIOD THE SCHOOL HAS TEN (10) BUSINESS DAYS TO SEND YOU YOUR REFUND (IF ANY) AND TO CANCEL AND RETURN TO YOU ANY EVIDENCE OF INDEBTEDNESS THAT YOU SIGNED. HOWEVER, IF YOU DO WANT TO ENROLL IN THE ABOVE-NAMED SCHOOL, YOU SHOULD SIGN YOUR NAME BELOW AND MAIL THIS STATEMENT TO THE SCHOOL WITHIN TEN (10) DAYS. KEEP THE DUPLICATE COPY FOR YOUR OWN RECORDS.

DATE ---------- SIGNATURE ----------

THE AFFIRMATION FORM SHALL NOT CONTAIN ANY INFORMATION OR REPRESENTATION OTHER THAN THE INFORMATION SPECIFIED IN THIS PARAGRAPH, AND THE FORM SHALL BE MAILED IN THE SAME ENVELOPE THAT IS USED TO MAIL PLACEMENT INFORMATION AS REQUIRED BY PARAGRAPH 6. THE AFFIRMATION FORM AND SAID PLACEMENT INFORMATION SHALL BE SENT BY RESPONDENT NO LATER THAN THE NEXT DAY AFTER THE PERSON SHALL HAVE CONTRACTED FOR THE PURCHASE OF ANY COURSE OF INSTRUCTION. DURING SUCH PERIOD PROVIDED FOR IN THIS PARAGRAPH, RESPONDENT SHALL NOT INITIATE CONTACT WITH SUCH PERSON OTHER THAN THAT REQUIRED BY THIS PARAGRAPH.

9. Making any representations of any kind whatsoever in connection with the creating, advertising, promoting, offering for sale, sale or distribution of courses of study, training or instruction in the field of electronic data processing or any other course offered to the public in any filed in commerce, for which Respondent has no reasonable basis prior to the making or dissemination thereof.

10. Using course names and descriptions which either directly or by implication indicate that Respondent's courses are designed to prepare students for certain entry-level positions when in fact a substantial number of graduates of such courses do not achieve such entry-level positions.

II

1. It is further ordered that: (a) Respondent herein deliver, by registered mail, a copy of this Decision and Order to each of its present and future employees, salesmen, agents, solicitors, independent contractors or to any other person or entity which promotes, offers for sale, sells or distributes any course of instruction included within the scope of this Order;

(b) Respondent herein provides each person or entity so described in subparagraph (a) above with a form returnable to Respondent clearly stating his or her intention to be bound by and to conform his business practices to the requirements of this Order; retain said statement during the period said person or entity is so engaged; and make said statement available to the Commission's staff for inspection and copying upon request;

(c) Respondent herein informs each person or entity so described in subparagraph (a) above that Respondent will not use or engage or will terminate the use or engagement of any such party, unless such party agrees to and does file notice with Respondent that he or she will be bound by the provisions contained in this Order;

(d) If such party as described in subparagraph (a) above will not agree to so file the notice set forth in subparagraph (b) above with Respondent and be bound by the provisions of the Order, Respondent shall not use or engage or continue the use or engagement of, such party to promote, offer for sale, sell or distribute any course of instruction included in this Order;

(e) Respondent herein informs the persons or entities described in subparagraph (a) above that Respondent is obligated by this Order to discontinue dealing with or to terminate the use or engagement of persons or entities who continue on their own the deceptive acts or practices prohibited by this Order.

(f) Respondent herein institutes a program of continuing surveillance adequate to reveal whether the business practices of each said person or entity described in subparagraph (a) above conform to the requirements of this Order;

(g) Respondent herein discontinues dealing or terminates the use or engagement of any person or entity described in subparagraph (a) above, as revealed by the aforesaid program of surveillance, who continues on his own or her own any act or practice prohibited by this Order;

2. It is further ordered that Respondent herein present to each interested applicant or prospective student immediately prior to the commencement of

V 40 N 220 NOV 13 75 XUM

any interview or sales presentation during which the purchase of or enrollment in any course of instruction offered by Respondent herein is discussed or solicited, a 5" x 7" card containing only the following language:

"YOU WILL BE TALKING TO A SALESPERSON"

3. It is further ordered that the Respondent, Lear Siegler, Inc., shall forthwith distribute a copy of this Order to each of its domestic operating divisions.

4. It is further ordered that Respondent, Lear Siegler, Inc. shall notify the Commission at least thirty (30) days prior to any proposed change in the Respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, or any other change in Respondent which may affect compliance obligations arising out of this Order.

III

It is further ordered that: 1. Respondent shall submit to the Commission, within five (5) days after the date this Order is served on Respondent (hereinafter "date of service"), a notarized affidavit, executed by Respondent's Corporate Manager or Regulatory Agency Relations, to the effect that Respondent has made or has caused to be made a good faith search of documents that pertain to purchasers of Respondent's computer courses of instruction, and that Respondent, to the best of his knowledge, has previously or simultaneously with said affidavit submitted to the Commission the names of all computer course purchasers covered by this Agreement.

2. Respondent or its designee shall make an inquiry in writing on the one hundred and twentieth (120th) day after the date of service, in the language, manner and form shown in Appendices C and D, via certified mail with return receipt requested and with a self-addressed, postage prepaid envelope, to the home address of each former purchaser of one of Respondent's computer courses who appears on a list of such purchasers to be supplied to Respondent by the Commission within sixty (60) days after the date of service.

3. With respect to each purchaser whose mailed inquiry is returned undelivered or whose aforesaid return receipt card is not returned, Respondent or its designee shall have a duty to mail on the one hundred and forty-fifth (145th) day after the date of service the same inquiry via first class mail to such purchaser's business address that is included in the aforesaid list of purchasers supplied to Respondent by the Commission.

4. On the two hundred and seventieth (270th) day after the date of service, Respondent shall pay a refund, by check or otherwise, in an amount derived in accordance with Part III of this Order, to each "eligible class member" determined in accordance with Part III of this Order.

5. "Eligible class member" means only those persons who:

(a) Enrolled during the period of time from July 1, 1970 to December 31, 1973 in Respondent's computer programming or computer operations courses; and

(b) Did not have his or her course tuition paid in full by a state or local department or division of vocational rehabilitation; and

(c) Completed all of the data processing classes of the computer course for which he or she enrolled; and

(d) (1) Sought employment in the position for which he or she was trained, or

(2) For reasons related to the sufficiency or quality of the training, or job demand, elected not to seek employment in the position for which he or she was trained; and

(e) (1) After completion of Respondent's computer programming classes, did not attain employment as a systems analyst, computer programmer, or combination computer programmer and operator; or instructor of systems analysis, computer programming, combination computer programming and operations; or a manager or supervisor of persons engaged in computer programming; or in a position whose duties were or are equivalent to a systems analyst, computer programmer, or combination computer programmer and operator; or

(2) After completion of Respondent's computer operations classes, did not attain employment as a systems analyst, computer programmer, combination computer programmer and operator, or computer operator; or instructor of systems analysis, computer programming, combination computer programming and operations, or computer operations; or a manager or supervisor of persons engaged in computer programming or operations; or in a position whose duties were or are equivalent to a systems analyst, computer programmer, or combination computer programmer and operator, or computer operator; or

(3) Attained one of the employment positions for which he or she was trained as listed in subsection (e) (1) and (2) only after receiving further training in computer programming or computer operations at a college or another vocational school, which training was not paid for in full by his or her employer.

6. Each refund shall be accompanied by a letter in the language, manner and form shown in Appendix E; and a notice in the language, manner and form shown in Appendix F shall be sent via first class mail, with the sender's return address on the face of the envelope, to the last known home address of all persons whose returned questionnaire show them to be ineligible for a refund under Part III of this Order.

7. Respondent shall make pro rata refund payments to each eligible class member based upon the proportion that total tuitions paid by or for all such members bear to the total amount available for refunds as provided in Part III of this Order, except that members whose tuition was paid in part by a state or local department or division of vocational rehabilitation shall receive a prorata refund based only on that amount of their tuition not paid by a state or local department or division of vocational rehabilitation. In no event shall any member receive an amount greater than the tuition paid by or for such member.

8. Respondent shall ultimately provide a sum of no greater than Seven Hundred Fifty Thousand Dollars ($750,000.00) solely to carry out its obligations to provide refunds and pay administrative costs under Part III of this Order. Of this sum, Five Thousand Dollars ($5,000.00) shall be set aside for payment of administrative costs incurred by Respondent or its designee in complying with Part III of this Order. Any unused administrative funds shall remain the property of Respondent.

9. It is agreed that Respondent shall file, within one hundred and eighty (180) days after the date of service, under Rule 3.61(d) of the Commission's Rules of Practice, a written request for advice as to whether its determination of who is an eligible class member complies with the terms of this Order provision; and that Respondent shall submit simultaneously with its request all Appendix D questionnaires it has received as of the date said request for advice is filed. Respondent shall also, at this time, present any challenges to the factual accuracy of any questionnaire together with substantiating material; such challenges and substantiating material shall be presented solely as a means of assisting the Commission in affording Respondent an advisory opinion pursuant to said Rule 3.61(d): *provided*, that the Commission shall render its advice to Respondent and return all Appendix D questionnaires to Respondent within two hundred and forty (240) days after the date of service.

10. Respondent or its designee shall contact and deliver a refund check to each eligible class member or his legal representative. For such purpose, Respondent shall, among other things, request the last known address of the eligible class member from the Postal Service, telephone the eligible class member or request the assistance of the Social Security Administration; *provided*, that should the administrative fund referred to in Paragraph 8 be exhausted, each eligible class member shall have deducted from the total refund amount due him all additional costs incurred by Respondent or its designee under this paragraph.

11. Respondent shall, on the two hundred and eightieth (280) day after the date of service, file with the Commission a report in writing setting forth the manner and form in which it has complied with Part III of this Order.

12. Respondent shall maintain records and documents for two (2) years after the date this Order is served on Respondent, which demonstrate that Respondent has complied with Part III of this Order.

13. It is agreed that should any duty required to be performed on a day certain under Part III of this Order fall upon a non-business day, the parties herein may perform such duties on the next following business day.

The Decision and Order was issued by the Commission October 6, 1975.

CHARLES A. TOBIN,
Secretary.

Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1845 Composition; 13.1845–70 Textile Fiber Products Identification Act; § 13.1852 Formal regulatory and statutory requirements; 13.1852–70 Textile Fiber Products Identification Act; 13.1852–75 Truth in Lending Act; § 13.1857 Instruments' sale to finance companies; § 13.1882 Prices; 13.1882–10 Additional prices unmentioned; § 13.1886 Quality, grade or type; § 13.1895 Scientific or other relevant facts; § 13.1905 Terms and conditions; 13.1905–60 Truth in Lending Act.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 82 Stat. 146, 147; 72 Stat. 1717; 15 U.S.C. 45, 1601 *et seq.*, 70)

In the Matter of James Neece, an individual, trading and doing business as Carpet Showcase.

Consent order requiring a Beaumont, Tex., distributor and installer of carpeting and floor coverings, among other things to cease using false and deceptive advertisements and sales techniques; failing to disclose the quantity or cost per unit of carpeting or floor coverings; intimidating customers into accepting defective merchandise; in connection with the extension of consumer credit, violating the Truth in Lending Act by failing to disclose to consumers such information as required by Regulation Z of said Act; misbranding textile fiber products and failing to maintain proper records of the fiber content of such products. Further, the order requires respondent to provide a 3-day cooling off period to every customer; to notify each advertising medium used by respondent that the Federal Trade Commission has found that he engages in unfair and deceptive acts; and to refund money to any customer where investigation reveals the transaction involved violations of the order.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

ORDER

It is ordered, That respondent James Neece, individually and trading and doing business as Carpet Showcase, or under any other name or names, his successors and assigns, and respondent's agents, representatives and employees, directly or through any corporation, subsidiary, division or other device in connection with the advertising, offering for sale, sale, distribution or installation of carpeting and floor coverings, or any other article of merchandise, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Using, in any manner, a sales plan, scheme or device wherein false, misleading, or deceptive statements or representations are made in order to obtain leads or prospects for the sale of carpeting or other merchandise or services.

2. Making representations by any means purporting to offer merchandise for sale when the purpose of the representations is not to sell the offered merchandise but to obtain leads or prospects for the sale of other merchandise at a higher price or of a grade or quality different than that contracted for by prospective customers.

3. Representing by any means that any merchandise or services are offered for sale when such offer is not a bona fide offer to sell such merchandise or services.

4. Using the words "15% OFF", "SPECIAL" or any other word or words of similar import or meaning not set forth specifically herein unless the price of such merchandise being offered for sale constitutes a reduction, in an amount not so insignificant as to be meaningless, from the actual bona fide price at which such merchandise was sold or offered for sale to the public on a regular basis by respondent for a reasonably substantial period of time in the recent regular course of his business.

5. Representing by any means that any merchandise or service is furnished "free" or at no cost to the purchaser.

6. Representing by any means quantities of carpet or floor coverings in a unit of measurement not usually and customarily employed in the retail advertising, offering for sale or sale of carpeting or floor coverings.

7. Using the terms "We finance—no money down", "Use our revolving charge account . . . easy budget plan", or any other terms of similar import or meaning not set forth specifically herein, or representing by any means that credit is extended to customers without regard to their financial status or ability to pay or that respondent extends credit to his customers rather than arranging for the extension of credit through financial institutions including finance companies and banks.

8. Contracting for any sale whether in the form of credit acceptance, conditional sales contract, promissory note or otherwise which shall become binding on the customer prior to midnight of the third day, excluding Sundays and legal holidays, after the date of execution.

9. Failing to make the following disclosures in connection with the sale or offering for sale of carpet, floor coverings or similar products on each instrument utilized by respondent that requires payment of any consideration, at any time, to respondent or any third parties, by respondent's clients. Said disclosures shall be in more conspicuous print than all other language in

[1] Copies of the Complaint, Decision and Order, filed with the original document.

V 40 N 220 NOV 13 75 XUM

said instrument, but in no case shall they be smaller than 12-point upper case type. *Provided*, that said disclosures and instrument shall be delivered to prospective customers at least three days, excluding Sundays and legal holidays, prior to the time prospective customers execute said instruments or pay any consideration to respondent. *Provided further*, that said disclosures shall be made on the contract or other binding instrument to be executed by prospective customers. The disclosures shall contain the following information in the sequence set forth and be set off from the text of the instrument by a black border and immediately above the line for the prospective customers' signatures:

A. The number of square yards of each style of carpeting or floor covering to be purchased by the customer.

B. The price per square yard of each style of carpeting or floor coverings to be purchased by the customer; excluding the cost of padding and the cost of installation.

C. The cost of installing one square yard of such carpeting or floor coverings.

D. The cost of padding for one square yard of carpeting or floor coverings.

E. The cost of installing each style of carpet or floor covering, such figure to be obtained by multiplying the number of square yards as disclosed in sub-paragraph A above by the cost per square yard as disclosed in sub-paragraph C above.

F. The cost of padding to be furnished for the carpet or floor coverings, such cost to be obtained by multiplying the number of square yards as disclosed in sub-paragraph A above by the cost per square yard as disclosed in sub-paragraph D.

G. The total price for each style of carpeting or floor coverings which shall be obtained by multiplying the number of square yards as disclosed in sub-paragraph A above by the cost per square yard as disclosed in sub-paragraph B above and to this amount adding the sum of the cost of padding as disclosed in sub-paragraph F and the cost of installation, as disclosed in sub-paragraph E.

H. A notice in the following form:

NOTICE

IF YOU ARE OBTAINING CREDIT IN CONNECTION WITH THIS PURCHASE, YOU WILL BE REQUIRED TO SIGN A PROMISSORY NOTE, A SALES CONTRACT OR OTHER INSTRUMENT OF INDEBTEDNESS WHICH MAY BE PURCHASED FROM THE SELLER BY A BANK, FINANCE COMPANY OR ANY OTHER THIRD PARTY. IF SUCH IS THE CASE, YOU WILL BE REQUIRED TO MAKE YOUR PAYMENTS TO SOMEONE OTHER THAN THE SELLER. YOU SHOULD BE AWARE THAT IF THIS HAPPENS YOU MAY HAVE TO PAY THE NOTE, CONTRACT OR OTHER INSTRUMENT OF INDEBTEDNESS IN FULL TO ITS NEW OWNER EVEN IF YOUR PURCHASE CONTRACT IS NOT FULFILLED.

10. Representing by any means that persons executing contracts or other binding instruments with respondent may be or are liable to pay a penalty of thirty percent of the amount of the contract or any other liquidated sum upon cancellation of said contracts or other binding instruments; *provided*, that respondent may make such representations concerning a customer's liabilities as may be allowed by state law.

11. Utilizing any instrument including a completion certificate, or using coercion, threats, intimidations or any means which may lead a customer to accept merchandise which is of a price, grade or quality different than that contracted for, which is defective in some respect or which is improperly installed.

12. Failing, in all pamphlets, brochures and other promotional material to make the following disclosures in the manner and form provided for herein.

(a) At the time advertising is submitted to any advertising agency and newspaper or other printed publication, respondent shall provide a copy of the following notice to each such publication:

NOTICE

The Federal Trade Commission has found that

(Name of Respondent)

has engaged in unfair and deceptive acts and practices. A copy of the Commission's news release is available from

---

(Name of Respondent)

upon request.

(b) At the time advertising is submitted to any radio or television station, respondent shall provide a copy of the following notice to each such station:

NOTICE

The Federal Trade Commission has found that

(Name of Respondent)

has engaged in unfair and deceptive acts and practices. A copy of the Commission's news release is available from

---

(Name of Respondent)

upon request. Your attention is directed to an agreement between the Federal Trade Commission and the Federal Communications Commission dated April 27, 1972.

13. Failing to maintain for a period of three (3) years after any advertisements are disseminated, records disclosing:

(a) The date or dates each advertisement was published; and

(b) The name and address of the advertising agencies and the newspapers, other publications or broadcast media disseminating said advertisement.

14. Advertising, offering for sale, selling or distributing any carpeting or floor coverings using a unit of measurement which tends to exaggerate the size or quantity of carpet or floor coverings being offered by respondent.

15. Failing to maintain and produce for inspection and copying for a period of three (3) years following the date of execution of any contract or other binding instrument, the contract or other binding instrument and adequate records which disclose the facts upon which the cost of carpeting, installation and padding as set forth in paragraph 9 is based and from which the validity of such cost can be determined.

It is further ordered, That respondent forthwith cease and desist from:

(a) Including in any contract, binding instrument or other document any waiver, limitation or condition on the rights of customers or prospective customers under this order.

(b) Misrepresenting the rights of a customer or prospective customer under this order.

II

It is further ordered, That respondent James Neece, individually and trading and doing business as Carpet Showcase, or under any other trade name or names, his successors and assigns, and respondent's agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with any extension or arrangement for the extension of consumer credit or advertisement to aid, promote, or assist directly or indirectly any extension of consumer credit, as "consumer credit" and "advertisement" are defined in Regulation Z (12 CFR 226) of the Truth in Lending Act (Pub. L. 90–321, 15 U.S.C. 1601 *et seq.*), do forthwith cease and desist from:

1. Causing to be disseminated to the public in any manner whatsoever any advertisement to aid, promote or assist directly or indirectly any credit sale or other extension of consumer credit, other than open end credit, which advertisement represents, directly or by implication:

(a) That no downpayment is required, the amount of the downpayment or the amount of any installment payment, either in dollars or as a percentage, the dollar amount of any finance charge, the number of installments or the period of repayment, or that there is no charge for credit, unless all of the following items are clearly and conspicuously stated, in terminology prescribed under Section 226.8 of Regulation Z, as required by Section 226.10(d) (2) of Regulation Z:

(1) the cash price or the amount of the loan, as applicable;

(2) the amount of the downpayment required or that no downpayment is required, as applicable;

(3) the number, amount, and due dates or period of payments scheduled to repay the indebtedness if the credit is extended;

(4) the amount of the finance charge expressed as an annual percentage rate; and

(5) the deferred payment price or the total of payments, as applicable.

2. Representing in any advertisement, directly or by implication, that no downpayment or that a specified downpayment will be accepted in connection with any extension of credit, unless the creditor usually and customarily accepts or will accept downpayments in that amount as required by § 226.10(a) (2) of Regulation Z.

3. Failing, in any consumer credit transaction or advertisement, to make all disclosures, determined in accordance with Section 226.4 and Section 226.5 of Regulation Z, in the manner, form and amount required by Sections 226.6, 226.7, 226.8, 226.9 and 226.10 of Regulation Z.

4. Failing to preserve evidence of compliance with the requirements imposed under Regulation Z, other than advertising requirements under Section 226.10, for a period of not less than 2 years after the date each disclosure is required to be made and to make available all records and evidence of compliance regarding Regulation Z to the Federal Trade Commission or its staff on request.

III

It is further ordered, That respondent James Neece, individually and trading and doing business as Carpet Showcase, or under any other trade name or names, his successors and assigns, and respondent's agents, representatives, and employees, directly or through any corporate, subsidiary, division, or other device, in connection with the introduction, delivery for introduction, sale, advertising, and offering for sale in commerce and in the transportation or causing to be transported in commerce, of any textile fiber product including any carpeting and floor coverings; or in connection with the sale, offering for sale, advertising, delivery, transportation or causing to be transported, of any textile fiber product which has been advertised or offered for sale in commerce; or in connection with the sale, offering for sale, advertising, delivery, transportation or causing to be transported, after shipment in commerce, of any textile fiber product, whether in its original state or contained in other textile fiber products, as the terms "commerce" and "textile fiber product" are defined in the Textile Fiber Products Identification Act, do forthwith cease and desist from:

1. Misbranding such textile fiber products by failing to affix a stamp, tag, label or other means of identification to each such textile fiber product showing in a clear, legible and conspicuous manner each element of information required to be disclosed by Section 4(b) of the Textile Fiber Products Identification Act; or as an alternative to the foregoing, where properly labeled samples, switches, or specimens are used to effect the sale of articles of carpeting or floor covering or other household textile articles which are manufactured specifically for a particular customer after the sale is consummated, and such articles of carpeting or floor covering or other household textile articles are of the same fiber content as the samples, swatches or specimens from which the sale was effected, failing to provide an invoice or other paper to accompany them showing the information otherwise required to appear on the label, as allowed by Rule 21(b) of the Rules and Regulations promulgated under the Textile Fiber Products Identification Act, effective March 30, 1960, as amended.

2. Failing to maintain and preserve, as required by Section 6(b) of the Textile Fiber Products Identification Act and by Rule 39 of the Rules and Regulations promulgated thereunder, such records of the fiber content of textile fiber products as will show the information set forth on the stamps, tags, labels or other identification removed by respondent, together with the name or names of the person or persons from whom such textile fiber products were received, when substituting stamps, tags, labels or other identification pursuant to Section 5(b) of the Textile Fiber Products Identification Act.

It is further ordered, That respondent make no representations or engage in any course of conduct which is inconsistent with or detracts from the effectiveness of this order.

It is further ordered: 1. That respondent deliver, by hand, a copy of this order to each of his present or future salesmen, independent contractors, sales agents, employees or any other person who sells or promotes the sale of respondent's product or service.

2. That respondent provide each person so described in sub-paragraph 1 above with a form returnable to respondent, fully stating an intention to be bound by and conform their sales practices to the requirements of this order and retain such form for a period of three (3) years after it is executed by said persons;

3. That respondent inform each person described in subparagraph 1 above that respondent shall not use any such person, or the services of any such person, until such person agrees to and files notice with respondent to be bound by the provisions contained in this order;

4. That in the event such person will not agree to file such notice with respondent and be bound by the provisions of this order, respondent will not use such person, or the services of such person;

5. That respondent institute a program of continuing surveillance adequate to reveal whether the sales practices of each of said persons described in subparagraph 1 conform to the requirements of this order; and

6. That respondent discontinue dealing with any person described in sub-paragraph 1 of this order who engages in acts or practices prohibited by this order.

It is further ordered, That the respondent shall forthwith deliver a copy of this order to cease and desist to all present and future parties employed or utilized by respondent engaged in the arranging or consummation of any extension of consumer credit or in any aspect of the preparation, creation or placing of advertising and that respondent secure a signed statement from each such party that he has read and understands such order. Such statement shall be retained for at least three (3) years and made available to the Federal Trade Commission or its staff upon request.

It is further ordered, That respondent, upon receipt of a complaint from a customer alleging facts that indicate this order may have been violated refund all monies paid by such customer where respondent determines, after a good faith investigation, that one or more paragraphs of this order may have been violated in connection with such customer's transaction with respondent. This paragraph shall not apply to transactions prior to the date this order became final. Respondent shall not engage in any course of conduct which contravenes the refund rights of any customers provided by this order.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in his business organization such as dissolution, assignment or sale or transfer of all or a substantial part of the business or assets to any other person, partnership or corporation, or any other change in the business organization which may affect compliance obligations arising out of the order.

It is further ordered, That in the event the Federal Trade Commission promulgates a Trade Regulation Rule applicable to respondent that this order shall be deemed modified to the extent it contravenes said Rule.

It is further ordered, That the respondent named herein promptly notify the Commission of discontinuance of any business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further ordered, That the respondent herein shall within sixty (60) days after service upon him of this Order, file with the Commission a report, in writing, setting forth in detail the matter and form in which he has complied with this Order.

The Decision and Order was issued by the Commission October 3, 1975.

CHARLES A. TOBIN,
Secretary.

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES; ADMINISTRATION AND ENFORCEMENT REGULATIONS

PART 1512—REQUIREMENTS FOR BICYCLES

Bicycle Safety Regulations

The purpose of this document is to amend provisions of the bicycle safety regulations (16 CFR Part 1512) pertaining to sharp edges, protrusions, control cable abrasion, attachment hardware, brakes for bicycles and sidewalk bicycles, projections, tires, locking devices on wheels, frames, reflectors, toe clips, and toe clearance.

BACKGROUND

The bicycle regulations were proposed by the Commissioner of Food and Drugs in the FEDERAL REGISTER of May 10, 1973 (38 FR 12300), under provisions of the

V 40 N 220 NOV 13 75 XUM

Federal Hazardous Substances Act (15 U.S.C. 1261–74) and a delegation of authority from the Secretary of Health, Education, and Welfare (21 CFR 2.120).

On May 14, 1973, the authority to issue regulations under the Federal Hazardous Substances Act was transferred to the Consumer Product Safety Commission by section 30(a) of the Consumer Product Safety Act (86 Stat. 1231; 15 U.S.C. 2079(a)).

In the FEDERAL REGISTER of July 16, 1974 (39 FR 26100), the Commission promulgated 16 CFR Part 1512, a regulation prescribing safety requirements for bicycles, and 16 CFR 1500.18(a)(12), a regulation classifying certain bicycles as banned toys or articles intended for use by children. The promulgation of July 16, 1974, bore an effective date of January 1, 1975, which, as is explained below, was suspended on December 16, 1974.

Introduction or receipt in interstate commerce of any banned toy or article intended for use by children is prohibited by section 4 of the Federal Hazardous Substances Act (15 U.S.C. 1263). Section 6 of the act (15 U.S.C. 1265) authorizes seizure of any such toy or article introduced into interstate commerce, and section 15 of the act (15 U.S.C. 1274) and a regulation promulgated thereunder (16 CFR 1500.202) require repurchase of any banned toy or other article intended for use by children that is introduced into interstate commerce.

Also in the FEDERAL REGISTER of July 16, 1974 (39 FR 26113), the Commission proposed to add to the bicycle regulations a provision (§ 1512.19(d)) requiring bicycle compliance labeling as is explained in more detail below.

REACTION TO PROMULGATION

After promulgation of the bicycle regulations on July 16, 1974, the Commission received more than 50 written communications thereon. Several of these stated that the effective date would not allow adequate time for redesign, retooling, testing, and production of complying bicycles and requested extension of the effective date. Others objected to various provisions of the regulations and requested a public hearing under 16 CFR 1500.201. After consideration of these communications, the Commission concluded that 16 CFR 1500.201 was not applicable to the bicycle regulations and that it would treat these communications as petitions to amend the regulations. Although the Commission determined that a public hearing in accordance with 16 CFR 1500.201 was not required, it directed its staff to conduct a public meeting with all interested parties to receive information relevant to the petitions for amendment of the regulations.

After notice of the meeting was published in the FEDERAL REGISTER on September 3, 1974 (39 FR 31943), members of the Commission staff met with interested parties on September 9 and 10, 1974. Copies of all petitions concerning the bicycle regulations received after July 16, 1974, and a transcript of the presentations made at the public meeting are available for inspection in the Office of the Secretary, 10th Floor, 1750 K Street, NW., Washington, D.C.

EFFECTIVE DATE SUSPENSION; NEW PROPOSALS

In the FEDERAL REGISTER of December 16, 1974 (39 FR 43536), the Commission published an order suspending the effective date of the bicycle regulations until further notice. On January 7, 1975 (40 FR 1493), the Commission proposed a new effective date for the regulations and proposed amendments to § 1512.5 (c)(3), footbrake crank differential; § 1512.6(e), requirements for handlebar and clamps; § 1512.9(a), requirements for chain guard; § 1512.18(h)(1), handlebar stem-to-fork clamp test; and § 1512.19(e), instructions and labeling. Interested parties were invited to submit comments on the proposal by February 6, 1975. The proposed new effective date was May 1, 1975, or 120 days after publication in the FEDERAL REGISTER of a document acting on the proposal of January 7, 1975, whichever occured later.

On January 16 and 24, 1975, members of the Commission staff attended public meetings with manufacturers of bicycles and components, and other interested parties, to discuss various petitioned changes in the regulations that were not included in the proposal of January 7, 1975. Additional public meetings on the same subject were conducted on February 3 and 19, March 19, and April 22, 1975.

Published elsewhere in this issue of the FEDERAL REGISTER is a document that establishes May 11, 1976, except for §§ 1512.5(c)(3), 1512.9(a), 1512.18(e) and 1512.18(f) which become effective November 13, 1976, as the effective date for the bicycle banning and safety regulations as amended by that document and by this document and that announces the Commission's final action on amendments to Part 1512 that were proposed on July 16, 1974, and on January 7, 1975.

RESPONSE TO THE PROPOSAL OF JUNE 16, 1975

In the FEDERAL REGISTER of June 16, 1975 (40 FR 25480), the Commission published a notice to respond to petitions for amendment or interpretation of various sections of the regulations and to propose for comment certain provisions pertaining to sharp edges, protrusions, control cable abrasion, attachment hardware, brakes for bicycles and sidewalk bicycles, projections, tires, locking devices on wheels, frames, reflectors, toe clips, and toe clearance.

In response, the Commission received comments from seven bicycle manufacturers, five associations of bicycle manufacturers, nine manufacturers of bicycle components, an association of manufacturers of bicycle components, a chemical company, an individual consumer, a vehicle inspection association of a foreign government, a consumer group, a State government agency, and an international voluntary standard-setting organization. Some of the comments received raised issues relating to points previously settled and not proposed for comment in the proposal. Those comments are being noted but are not being responded to below. The principal issues raised by the balance of the comments and the Commission's decisions thereon are as follows:

I. *Sharp edges.* Proposed § 1512.4(b) requires that bicycles have no unfinished sheared metal edges or sharp parts that are, or may be, exposed to hands or legs and further requires that sheared metal edges that are not rolled be finished to remove "any feathering of edges, or any burrs or spurs caused during the shearing process." As promulgated on July 16, 1974, § 1512.4(b) included a reference to the word "beveling" in describing the type of "edges" it was intended to prohibit. This term was deleted from proposed § 1512.4(b) as being contradictory and unnecessary.

A bicycle manufacturer and a manufacturer of parts requests that the terms "unfinished sheared metal edges" and "sharp parts" be clearly defined to provide an objective criteria by which they can be guided. One suggests that sharp edges be defined in terms of condition and accessibility.

Similar comments were received previously and responded to by the Commission in the preamble of the proposal of June 16, 1975. The Commission again concludes that the terms "unfinished sheared metal edges" and "sharp parts" are sufficiently clear in meaning as used in the regulation. Accordingly, definitions have not been added.

II. *Protrusions.* A revision of § 1512.4 (e), which prohibits certain protrusions on bicycles, was proposed to remove a redundant exemption; to add an illustration of examples of some prohibited and some acceptable protrusions; and to extend application of § 1512.4(e) to capped exposed protrusions.

A. *Deleted language.* An association of bicycle manufacturers questions the Commission's action in deleting from the June 16, 1975 proposal the language which exempted from coverage "protrusions having ends within 25 mm (1.0 in) of an adjacent surface that do not project more than 7.9 mm (5/16 in) beyond the surface or that cannot come in contact with the surface of the cylinder specified * * *." It was their understanding that no danger was posed by having a protrusion within one inch of an adjacent surface, irrespective of the length of the protrusion.

The proposed deletion was explained in the preamble of June 16, 1975, document, but further explanation is needed. The "exposed protrusion test" set forth in proposed § 1512.18(b) requires the use of a cylinder of 83 mm (3¼ in) diameter and 254 mm (10 in) length to locate a protrusion. The dimensions and cylindrical configuration of this instrument will operate against a finding that a protrusion located within an inch of an adjacent surface is a prohibited "exposed protrusion." Thus, the language set forth above was removed from the regulation because it was considered redundant and deemed unnecessary. The Commission maintains this opinion and § 1512.4(e) remains unchanged.

B. *Figure 4.* A manufacturer of bicycle parts requests that proposed figure 4, entitled "Typical Protrusion Examples," be expanded to include additional examples of both acceptable and unacceptable protrusions.

Since there are an infinite number of protrusion examples that can be found, the Commission considers figure 4 an adequate illustration and declines to make the requested change.

C. *Set screws in sidewalk bicycles.* A manufacturer of bicycles requests that set screws of the type used in attaching handlebars and seats to sidewalk bicycles be exempted from § 1512.4(e), because such screws do not meet the "exposed protrusion test" of § 1512.18(b) but, at the same time, are not located in an area that would create a hazard to a rider of a sidewalk bicycle.

The Commission concludes that any protrusion that fails to meet the requirements of § 1512.18(b) and § 1512.4(e) poses an unreasonable risk of injury and should be prohibited. Accordingly, the regulation has not been changed to exempt the set screws.

III. *Excluded area.* Section 1512.4(g) prohibits the presence of any projections within a specified zone located between the handlebars and the seat. The proposed revision of § 1512.4(g) changes the boundaries of the zone where projections are prohibited, allows the presence of control cables and attaching clamps within this zone, and provides specifically for application of § 1512.4(g) to both male and female model bicycles.

A. *Boundary lines.* 1. A manufacturer of bicycle parts and an association of bicycle manufacturers state that the boundary line specified in proposed § 1512.4(g)(2), which is described as "a line tangent to the front tip of the seat and intersecting the seat mast at the top rear stay," imposes an unwarranted design restriction. They contend there is no safety reason to include in the "excluded area" any protrusions in the area directly beneath the seat—an area not exposed to the rider in the normal riding position. They suggest that the specified rear boundary be changed to a vertical line that is tangent to the front tip of the seat. At the very least, they suggest that the loop of the brake cable and the small ridge caused by the seat lug be exempted from the prohibition of protrusions in the excluded area.

The Commission finds that changing the boundary line to a vertical or perpendicular line tangent to the front tip of the seat as suggested would permit manufacturers to attach numerous kinds of hardware under the bicycle seat. This hardware, especially with the seat in a raised position, could contact the rider's buttocks while the rider straddled the bicycle in a standing position or during an accident. This potential injury hazard is intensified on femal-model and take-apart or folding bicycles. Further, it should be noted that seat lugs or cables located under the seat are not considered "exposed protrusions" under §§ 1512.4 (e) and (g) and 1512.18(b).

Accordingly, the Commission declines to make the change suggested by these commenters.

2. The same association questions the delineation of the "excluded area" for female bicycles in proposed § 1512.4(e). Specifically, the association questions specifying the down tube nearest the rider as one of the four boundaries, contending that since the rear brake on female model bicycles is customarily located at a height above that of the lower reach of the down tube, the control cable will inevitably pass through the proposed excluded area. In addition, the front sprocket and the chain guard on female bicycles with only one lower tube would always fall within the excluded area thereby possibly resulting, they argue, with a prohibited protrusion falling within the excluded area.

The association suggests that the demarcation of the excluded area for single down-tube female-model bicycles not be the entire down tube, but rather a line parallel to the ground and located at a point two-thirds of the distance from the ground to the uppermost portion of the seat in its lowest position. The association states that to do otherwise will discourage the manufacture and use of such models specifically designed for the convenience and safety of female riders who want to ride while wearing medium or longer length skirts.

A staff review of the available 1975 bicycle manufacturers' literature indicates that single down-tube female-model bicycles are no longer in use. Therefore, the Commission believes the comment is academic and there is no need to change the requirement.

B. *Cable clamps.* A manufacturer of bicycle parts states that to comply with the "sharp edges" requirement of § 1512.4 they have designed a cable clamp made from plastic rather than the metal which they have been using. The clamp is sturdy and without sharp edges, but had to be made 3.7 mm (0.15 in) thick to be of acceptable strength. Thus, the clamp exceeds the maximum thickness specification 1.6 mm (1/16 in) of proposed § 1512.4(g). The manufacturer requests that a separate thickness limit be added for plastic cable clamps.

The Commission concludes that a thicker clamp should be permitted and that it would not pose any additional risk of injury to the consumer. As promulgated below, § 1512.4(g) has been changed to permit use of cable clamps up to 4.8 mm (3/16 in) thick.

IV. *Screw length.* Section 1512.4(h) limits the length that a screw may extend beyond the nut or other threaded fastener to which it attaches. The proposed revision of § 1512.4(h) provides that adjusting-type screws otherwise complying with the exposed protrusion requirements of § 1512.4(e) and § 1512.18 (b) may be used on the bicycle where such screws are not exposed to the cyclist in normal riding position.

Two bicycle manufacturers and a manufacturer of bicycle parts note that the proposed provision makes special allowance for adjusting-type screws and request similar provision for any screws that have no threaded ends exposed to the cyclist's body in normal riding position.

One of the manufacturers requests such provision for brake arm fastening screws. Although these screws project beyond the allowable limits of the Regulation, they are located below the lower frame member and are hidden behind the brake arm and therefore, in their view, pose no hazard to the rider.

The Commission recognizes that there are other types of screws or usages of screws on the bicycle that would not injure the cyclist while riding or maintaining the bicycle. Accordingly, the revision of § 1512.4(h)(2) below also limits its coverage to those screws that fail the "exposed protrusion test" specified in § 1512.18(b) and fail to meet the "sharp edge" requirements of § 1512.4(b).

V. *Braking performance.* Sections 1512.5 (c)(1) and (d) and 1512.18 (d)(2)(vi) and (e)(3) require that the braking system of a bicycle be capable of stopping the bicycle within 4.57 mm (15 ft) when the bicycle is traveling at either 16 km/h (10 mph) or 24 km/h (15 mph), depending on the highest gear ratio available on the bicycle. The proposed revisions of §§ 1512.5 (c)(1) and (d) and 1512.18 (d)(2)(vi) and (e)(3) add a footnote to each which relates the concept of equivalent ground speed, as used in Part 1512 applicable to brake performance, to the concept of gear development in the proposed ISO bicycle standard. (ISO is the International Organization for Standardization, Geneva, Switzerland, an international voluntary standard-setting organization.)

On the subject of the test to be used to determine bicycle braking distance and on the prescribed distance itself, comments were received from three bicycle manufacturers, five associations of bicycle manufacturers, a manufacturer of bicycle parts, and the ISO.

They state that the Commission apparently ignored the numerous technical documents of analyses and test data previously submitted by them and by the ISO. Two officials of the ISO suggest that the Commission review again the ISO test data and reconsider the merits of the June 16, 1975, CPSC proposal regarding braking testing and distance.

On the subject of test procedure for determining the braking distance of a bicycle speed, equipment weight, brake for rider weight (at least 68.1 kg (150 lb); not changed in the proposal) as prescribed in § 1512.5 (b)(1), (c)(1), and (d) is not sufficient when performing the bicycle braking test. They state that additional allowances should be made for other variables such as rider skill, bicycle speed, equipment weight, brake synchronization, test track conditions, wind velocity, etc.

On the subject of the maximum allowable stopping distance, the commenters urge adoption of the ISO braking

V 40 N 220 NOV 13 75 XUM

specification of five test runs and a 5.5 m 18 ft) stopping distance, with various test instructions and correction factors. They state that these ISO specifications will result in a smooth, safe stop without the pitchover problems that they claim will occur with the shorter stopping distance proposed by the Commission.

Finally, several commenters question the results of the braking tests performed at the University of Iowa, which were heavily relied on by the Commission in deciding on a safe stopping distance for bicycles, in view of the variance of those results from the results of the tests performed by the ISO and its members.

The Commission observes that the analyses and test data submitted by the bicycle manufacturers and ISO have not been ignored. As was stated at the public meetings, the Commission has been reviewing all of the data, performing a detailed error analysis on braking, and performing additional bicycle braking tests of its own at the National Bureau of Standards (NBS) to supplement the University of Iowa tests. The final reports of the Commission's braking tests and the error analysis were not completed until very recently. A discussion of the results could therefore not be included in the June 16, 1975, proposal.

The Commission's error analysis on bicycle braking considered all variables, including those mentioned by the manufacturers. Comparisons were made of all test methods and data submitted by the manufacturers and the ISO with the Commission's test methods and data. The results of the error analysis show that:

1. The present rider weight allowance exceeds the recommended value by approximately 66 percent (this excess allowance can also be used to accommodate the necessary test equipment);

2. A smooth test surface free from protruding aggregate that will provide a coefficient of friction of less than 1.0 should be used;

3. Four test runs, two in each direction, should be required to cancel the effects of wind and pavement grading;

4. The results of the four test runs should be averaged to arrive at the required stopping distance;

5. The starting point for the measurement of stopping distance should be the point corresponding to the location of the bicycle at the instant the first brake-lever actuation begins;

6. The bicycle must be moving in a straight line at the start of brake application;

7. Velocity corrections at the initiation of braking should be made; and

8. The test run is invalid if front wheel lockup occurs.

Considering the above test conditions and corrections, Commission representatives tested 13 bicycles, in addition to the 9 tested at the University of Iowa, resulting in 80 percent of the bicycles meeting the 4.57 m (15 ft) stopping distance requirement.

Regarding the commenter's claim that a stopping distance of 4.57 m (15 ft) is unsafe and will cause the rider to be thrown over the front of the bicycle the Commission has convincing evidence to the contrary. In April 1970, the National Commission on Product Safety contracted the Cornell Aeronautical Laboratory to conduct a study on stability and performance of bicycles. The report of the study, entitled "An Evaluation of the Performance and Handling Qualities of Bicycles," states that in over 200 hard braking stops made during the test program, no instance of pitchover (or even lifting of the rear wheel) occurred when the rider remained seated throughout the braking period. Both conventional and high-rise bicycles were used in the tests. Also, the University of Iowa had no apparent pitchover problems during their testing.

In the approximately 90 test runs performed at NBS, the incidence of pitchover was less than 9 percent. These incidents, however, are attributable to the fact that bicycles with better than average brakes were tested on a surface with a coefficient of friction substantially greater than recommended, which is a coefficient of friction of less than 1.0. The Commission has prepared and will utilize a test procedure that shows the test methods, test equipment, corrections, and allowances used by NBS in performing the braking tests. Permissible corrections in addition to those used by NBS are also given. Manufacturers should be aware that other test methods, hardware, and equipment exist that could be used to perform the stopping distance tests and that they are free to use them. The corrections and allowances included in the test procedure, however, will be used by Commission staff.

The Commission concludes that the stopping distance of 4.57 m (15 ft) is safe and can be reasonably met by bicycle manufacturers utilizing the allowances for variables mentioned above. Accordingly, the suggested changes have not been made in the amendments of §§ 1512.5 and 1512.18 promulgated below. A revision of the performance test procedure in § 1512.18(d)(2)(v) has been added, however, to set forth the allowances for variables.

VI. *Handbrake grip dimension.* Section 1512.5(b)(3) precribes the maximum limit for the distance between the hand lever and the handlebars of bicycles equipped with handbrakes. The proposed revision of § 1512.5(b)(3) clarifies the measurement of points for determining compliance with such maximum grip dimension and adds a figure 5 to illustrate the measurements and the points of measurement.

An association of bicycle manufacturers and a manufacturer of bicycle parts object to the inclusion of auxiliary or extension hand levers by virtue of § 1512.5(b)(a) in the 89 mm (3½ in) maximum grip dimension requirement of § 1512.5(b)(3). In support of this comment they state that hand lever extensions are gripped differently than hand levers in that when gripping a hand lever extension (1) the rider normally is sitting more upright with less forward-leaning pressure than when gripping a hand lever and (2) the rider grips the handlebars with the thumb and not toward the center of the palm as is the case when gripping a hand lever. Thus, these factors combine to enable greater spread of the hand when gripping a hand lever extension—the spread is enlarged by at least 12.7 mm (½ in). Accordingly, they contend that a rider, whether a man, woman, or child, who can grip a primary hand lever with a 89 mm (3½ in) grip dimension can also comfortably grip a hand lever extension having a 102 mm (4 in) grip dimension.

The anthropometric data for women and children indicate that an 89 mm (3½ in) dimension is a reasonable grip for hand levers and hand lever extensions on bicycles equipped with hardware of this type. The Commission concludes that it is unreasonable to assume that all riders will grip a hand lever extension in a like manner and therefore it would be unsafe to require a greater grip dimension for extension levers than for primary hand levers.

VII. *Brake assembly attachment.* Section 1512.5(b)(4) prescribes that brake assemblies shall be securely attached to the frame of a bicycle "by means of a locking device such as a lock washer and locknut or equivalent." In the proposed revision of § 1512.5(b)(4), the above-quoted provision reads "by means of fasteners with locking devices such as a lock washer, locknut, or equivalent" and thereby drops the requirement that both a washer and locknut or equivalent be used to secure the brake assemblies to the frame of the bicycle.

A bicycle manufacturer states that this provision is still unclear as to whether locknuts or washers are required on the brake lever attaching brackets or are required only on the caliper assemblies that attach directly to the frame.

The Commission concludes that the term "brake assemblies" as used in proposed § 1512.5(b)(4) is sufficiently clear and includes all brake components such as brake lever attaching brackets and caliper assemblies. Accordingly, § 1512.5(b)(4) is adopted below as proposed.

VIII. *Tires.* Section 1512.10 specifies that the manufacturer's recommended inflation pressure shall be molded into or onto the sidewall of the tire and that the wheel-mounted tire shall be tested in accordance with § 1512.18(j). Tubular sew-up tires are exempt from § 1512.10 because they have sidewalls made of fabric precluding such molding and nonpneumatic tires are exempt because they cannot be inflated.

The proposed revision of § 1512.10 adds a requirement that the manufacturer mold the recommended inflation pressure into or onto the sidewall of the tire using the statement "INFLATE TO _____ PSI".

Ten comments were received on this proposed revision. A tire manufacturer supports the revision. Three bicycle

manufacturers, two associations of bicycle manufacturers, two tire manufacturers, an association of tire manufacturers, and a foreign government's vehicle inspection agency agree with the idea of labeling tires with recommended tire pressure but oppose requiring specific language in such labeling. The general contention is that requiring such specific language is not safety-related and, in view of the expense involved, is unreasonable. They prefer to be allowed to choose their own wording for such labeling.

The Commission has carefully considered these comments and although it prefers that a standard, intelligible form of labeling be used it concludes that some latitude should be given to manufacturers in selecting their own labeling, within reason. Accordingly, as promulgated below, § 1512.10 allows the use of any intelligible labeling provided that it is written in the English language and utilizes Arabic numbers. The regulation sets forth the labeling statement "INFLATE TO _____ PSI" as the preferred but not mandatory method of labeling.

IX. *Wheel hub locking devices.* Section 1512.12(a) specifies that each wheel of a bicycle shall be secured to the frame with a positive locking device and that locking nuts on threaded axles shall require rotation of at least 180° from finger-tight condition to full tightness.

To make the regulation more specific and to allow for design variations as to axle-thread pitch, frames, hubs, and other components, the proposed revision of § 1512.12(a) requires locking nuts on threaded axles to be tightened to the manufacturer's specifications; specifies that the rear axle shall be pulled with a force of 1,780 N (400 lbf) in the direction of rear wheel removal without any relative motion between the axle and the frame; and specifies that the front-wheel locking device shall withstand applications of a torque in the direction of removal of 17 N-m (12.5 ft-lb).

A. Two bicycle manufacturers and two associations of bicycle manufacturers state that the front-wheel removal torque requirement of proposed § 1512.12(a)(2) is unnecessary and unreasonable in that it is not safety-related. One manufacturer states that in its experience nut loosening has never been a problem with respect to front wheels.

The Commission's Hazard Analysis for Bicycles, dated July 1973, lists several cases where a bicycle's front wheel separated from the front fork causing severe injuries to the rider. There are more such cases in the 1,060 NEISS in-depth investigation reports. The Commission considers the cases cited above ample justification to require that front-wheel fasteners, except for quick-release devices, be torqued. Accordingly, the torque requirement is adopted below as proposed.

B. The same four commenters state that the high removal torque requirement of proposed § 1512.12(a)(2) cannot be met using existing technology and may even create problems by causing the front axle to become overstressed and document that proposed the subject revisions, the Commission observed (40 FR thereby cause axle failure. Limited supportive test data were submitted. They request that the proposed removal torque requirement be changed from 17 N-m (12.5 ft-lb) to 10 N-m (7.38 ft-lb).

The Commission has reviewed the submitted test data and conducted additional tests on 10 different bicycles. The tests were performed on each bicycle at least four times and the results were consistent. The tightening torque ranged from 20.4 to 25 N-m (15 to 18 ft-lb), while the removal torque remained at 17.7 N-m (13 ft-lb). Several axles were torqued until the threads were stripped, and the lowest torque that caused the threads to strip was 30 N-m (22 ft-lb). The axles with the stripped threads were examined further and found to be of similar average Rockwell B hardness and tensile strength.

The Commission therefore concludes that the proposed torque requirement, 17 N-m (12.5 ft-lb), which is adopted below, is necessary to provide a sufficient safety margin against stripping axle threads or other damage and for maintaining wheel retention integrity.

C. One of the manufacturers and one of the associations state that proposed § 1512.12(a)(2) and promulgated § 1512.12(c) are redundant because the latter requires a positive retention feature to insure that when the locking devices are released the wheel will not separate from the fork.

The Commission agrees that positive retention devices do provide some protection against the front wheel coming off of the axle; however, these devices are usually at right angles to the frame and the retention component of some of the devices is sometimes short in length. Thus, the rider has little advance warning that the bicycle wheel is loose.

Accordingly, the Commission declines to eliminate either requirement.

4. A manufacturer of bicycle parts questions the reasonableness of requiring the front-wheel locking device to withstand a tightening torque twice as great as that required of the rear-wheel locking device. The manufacturer requests that the less stringent torque specified in proposed § 1512.12(a)(1) be substituted for the more stringent requirement specified in proposed § 1512.12(a)(2).

The Commission concludes that a front wheel is far more likely to accidentally come off than a rear wheel and that the potential cyclist injury therefrom is more serious. Accordingly, the requested change has not been made.

X. *Frame strength.* Section 1512.14 requires the bicycle fork and frame to be tested for strength in accordance with the frame test prescribed by § 1512.18(k)(2). For consistency with § 1512.18(k)(2) and to insure the ductility characteristics of the fork tubes, the proposed revision of § 1512.14 changes the test requirements from "at least 39.5 J (350 in-lb) of energy" to "a load of 890 N (200 lbf) or at least 39.5 J (350 in-lb) of energy, whichever results in the greater force,".

In the preamble of the June 16, 1975, 25484) that §§ 1512.14 and 1512.18(k)(2) did not specify the manner by which the frame is to be held during the frame test. The Commission concluded that any type of rigidly constructed fixture would be suitable for holding the frame during the frame test. Such a fixture could be adjustable to accommodate frames of various sizes and should support the bicycle frame at the front axle and at the intersection of the rear frame and axle. The load is applied in a direction opposite to the fork rake and measurements are taken of the loads and the deflections. Accordingly, the Commission proposed a revision to § 1512.18(k)(2) to specify the way that the frame should be supported during the test.

A manufacturer suggests that since this section calls for the use of a fork and frame assembly to be tested as a unit, the titles for § 1512.14 and § 1512.18(k)(2) should be changed to read accordingly.

The Commission agrees and the titles of those regulations as promulgated below have been so changed.

XI. *Requirements for front and rear reflectors.* Section 1512.16 requires that a bicycle be equipped with a front reflector, a rear reflector, reflectors on both the front and rear pedal surfaces, and either side reflectors or retroreflective tires.

The proposed revision of the introductory text of § 1512.16 permits the use of combinations of reflectors off of the center plane of the bicycle if each reflector meets the requirements of § 1512.16 and §§ 1512.18 (m) and (n) and the combination of reflectors has a clear field of view of ±10° vertically and ±50° horizontally.

The proposed revision 1512.16 (c) and (d) specifies that front and rear reflectors, or the mounts for those reflectors, shall incorporate a distinct, preferred assembly method that shall insure those reflectors meet the optical requirements, respectively, of § 1512.16 (c) and (d) when attached to the bicycle. The proposed revision of § 1512.16 (c) and (d) deletes the manner of applying the force specified to assure reflector alignment and prescribes that the front and rear reflectors shall be tested in accordance with the "reflector mount and alignment test" of § 1512.18(m).

A. A reflector manufacturer requests that the proposed introductory text of § 1512.16 that permits use of a combination of reflectors only when each reflector meets the requirements of §§ 1512.16 and 1512.18 (m) and (n) and the combination has a clear field of view of ±10° vertically and ±50° horizontally be changed by removing the requirement for the specified clear field of view and by adding a provision that each reflector shall meet the requirements of §§ 1512.16 and 1512.18 (m) and (n) when mounted on the bicycle.

The Commission finds that reflectors could be located on a bicycle in such a way that each individual reflector while meeting the requirements of §§ 1512.16 and 1512.18 (m) and (n) could still become obscured by parts of the bicycle when viewed by a motorist.

V 40 220 NOV 13 75 XUM

The Commission concludes that a combination of reflectors cannot provide adequate visibility unless each reflector in that combination is positioned in such a manner that it is not covered or obscured by any other part of the bicycle. Accordingly, the requested change has not been made.

B. Another reflector manufacturer states that previous correspondence with the Commission indicated that the intent of §§ 1512.16 (c) and (d) is to provide for a continuous uninterrupted signal from the front and rear reflectors. The manufacturer requests that paragraphs (c) and (d) be changed to specifically express this intent.

The Commission's desired objective in proposing §§ 1512.16 (c) and (d) is to provide as nearly a continuous flow of illumination as is physically possible. The Commission concludes that it is realistically meeting this objective by specifying the orientation of the optical axis and the photometric requirements and not the physical implementation of the reflector. In the Commission's judgment the ±5° requirement does not prohibit the use of fixed reflectors that are mounted on the bicycle at various angles.

Accordingly, the requested change has not been made. The revisions of § 1512.16 are promulgated below as proposed.

XII. *Footbrake force test.* Section 1512.18(e)(2) prescribes a footbrake force test requiring that the brake be capable of producing a brake force that is linearly proportional (within 20 percent) when a force ranging from 89 N to 310 N (20 to 70 lbf) is gradually applied to the pedal and requiring that the brake force be not less than 180 N (41 lbf) when 310 N (70 lbf) is applied to the brake pedal.

The proposed revision of § 1512.18(e)(2) clarifies the test by specifying that the measurement of braking force shall be taken after completion of one-half revolution and before completion of one revolution of the wheel instead of after one-half to one revolution of the wheel.

A. A brake manufacturer contends there is confusion concerning methods used to perform the brake force test and suggests certain changes in proposed § 1512.18(e)(2) to provide specific test method and equipment requirements.

Proposed § 1512.18(e)(2) contains a typical general methods for performing the force test. The Commission concludes that § 1512.18(e)(2) should provide brake performance guidelines to be met without limiting manufacturers to a detailed test procedure. Accordingly, the suggested changes have not been made.

B. The same manufacturer suggests requiring the brake force and the crank differential tests to be performed after six to ten braking and driving applications so as to obtain the most realistic results, since changes occur in the braking device after use.

The Commission notes that when a consumer purchases a bicycle, it is received in the "as delivered" condition, namely, without any break-in period for the brakes. Therefore, in order for the Commission to assure that the bicycle brakes are safely operable at the time of sale, they must be tested before a break-in period occurs. Since the present requirements of § 1512.18(e)(2) most nearly simulate the brakes at time of sale, the Commission declines to make the suggested amendment.

C. Another brake manufacturer states that a coaster brake, because of its design, cannot achieve a steady brake force within one-half to one revolution of the rear wheel but could do so at within one to one and one-half revolutions.

The Commission disagrees and concludes that the requirements of proposed § 1512.18(e)(2) in this respect are readily achievable. Accordingly, the requirement has not been modified for coaster brakes.

D. The same manufacturer suggests changing proposed § 1512.18(e) to permit the pedal or crank to be raised 5 degrees and released to simulate the dynamic force in normal application of the brakes.

The Commission finds that this suggestion coupled with that of item C above would require a tolerance increase from ±20 to ±30 percent. Available test data indicate that this suggested change would reduce the reproducibility of the test. Also, the tolerance increase would diminish the stringency of the brake requirements, which could reduce unacceptably the intended level of safety of bicycles.

Accordingly, the suggested change has not been made and the revision of § 1512.18(e)(2) and (3) is promulgated below as proposed.

XIII. *Reflector mount and alignment test.* Section 1512.18(m) specifies in subparagraph (1) the test procedure for reflector alignment and defines in subparagraph (2) the criteria under which a reflector's optical axis is considered to be aligned. The proposed revision of § 1512.18(m)(2) clarifies the criteria.

A. A foreign vehicle inspection association suggests that since § 1512.18(m) applies only to front and rear deflectors, the paragraph heading be changed by adding the words "front and rear."

The Commission acknowledges that presently § 1512.18(m) applies only to front and rear reflector mounts, but to facilitate possible future extension of its application to other reflectors the Commission declines to make the suggested change.

B. A reflector manufacturer suggests that proposed § 1512.18(m) be changed to provide for spring back of the mounting bracket after removal of the test force because some reflector brackets may bend slightly when the force is applied and then return to their original position when it is removed. An association of bicycle manufacturers agrees and adds that manufacturing tolerances for reflector mounting brackets are around 5 degrees, which is considered the bare minimum which can be adhered to under reasonable manufacturing procedures. Unduly heavy reflector mounts would be required to resist movement beyond 5 degrees while under the test load.

The Commission agrees that heavier reflector mounting brackets could result if the 5 degrees requirement is applied during application of the test load. The intent of the regulation is to require a durable reflector and mount that will withstand normal wear and tear and still provide sufficient reflective illumination when encountering the headlights of automotive vehicles under low-light conditions. The Commission concludes that § 1512.18(m)(2) should be changed, in addition to the proposed clarification, to specify two types of performance criteria: one criteria that applies during the test and another that applies after removal of the test load. A 15-degree alignment criteria is specified during the test and the 5-degree alignment criteria for the post-test condition. This should permit sufficient manufacturing tolerances while providing a reflector mounting bracket that does not permanently deform or deflect from normal handling and use.

XIV. *Reflector performance test.* Section 1512.18(n) prescribes the photometric performance test and acceptance criteria for reflectors. Thereafter, the Commission found that the definition of "entrance angle" in § 1512.18(n)(2)(ii) did not wholly correspond with the illustration in figure 3 and in addition, that §§ 1512.18(n)(2) (iv) and (vii) were in need of clarification.

As reproposed on June 16, 1975, the Commission revised § 1512.18(n)(2) (iv) and (vii) and figure 3 to eliminate the contradiction between the definition of "entrance angle" and the illustration thereof in figure 3 and clarified the reflector performance test.

A. *Figure 3.* A vehicle inspection association notes that figure 3 is inconsistent with § 1512.18(n)(2) (i) and (ii) by its labeling of the entrance angle as "negative" and "positive" and suggests that the entrance angle should be changed to "left" and "right" with the left and right of the entrance angle being normal to the direction of the observation angle.

The Commission agrees and figure 3 as promulgated below has been changed. Also, a clarifying revision of § 1512.18(n)(2)(ii) has been added that changes "a line normal to the center of the reflector" in the second sentence to "the optical axis of the reflector" and that adds to the end of the third sentence "when the plane of the observation angle is vertical and the receiver is above the source."

B. Spoke reflectors. A manufacturer of reflective material for bicycle tires, commenting on the requirements of § 1512.18(n)(2)(v), notes that spoke reflectors are included parenthetically within this section. This manufacturer goes on to state that laboratory and field evaluations of several types of presently marketed spoke reflectors meeting the current photometric requirements indicate that the spoke reflectors reveal serious design discrepancies as they rotate with the wheel and are viewed at various entrance angles. Several of these spoke reflectors reflected little or no light in a variety of attitudes.

The manufacturers states that it may be crucial for a slow-moving or stopped bicycle to be seen at intersections or entrances to a roadway and therefore some minimum reflective brightness should be required for spoke reflectors at all rotational positions.

The Commission is aware that the up-down and left-right requirements in tables 1 and 2 for side reflectors do not provide ideal wide-angle spoke reflector performance characteristics. The reflective performance from side reflectors on a slow-moving bicycle is borderline; however, the lack of good reflective performance requirements for side reflectors on a stationary bicycle is a valid issue and will be investigated.

C. *Definition of color section.* 1. A manufacturer suggests that the Commission accept the Society for Automotive Engineers (SAE) and the National Highway Traffic Safety Administration (NHTSA) standards for signal colors rather than establish another set of color standards as proposed in § 1512.18(n)(2)(vii).

The Commission notes that the color boundaries set forth in proposed § 1512.18(n)(2)(vii) are presently being considered by the SAE as new requirements. These color boundary requirements are included in § 1512.18(n)(2)(vii) as promulgated below in anticipation of the proposed SAE change.

2. A vehicle inspection association points out that X and Y coordinate designation in § 1512.18(n)(2)(vii) should be in small letters rather than capital letters since each style conveys an entirely different meaning.

The Commission agrees and § 1512.18(n)(2)(vii) as promulgated below has been so changed.

XV. *Retroreflective tire test.* Section 1512.18(o) specifies the procedures and criteria for testing the retroreflective tire sidewalls allowable in lieu of spoke-mounted reflectors by § 1512.16(h). The proposed revision of § 1512.18(o)(1) and (2)(iii) corrects certain errors therein and changes the last sentence of § 1512.18(o)(2)(iii) to specify that the minimum value of "A" shall be greater than that listed in table 3. The proposed revision of § 1512.18(o)(2)(iv) expresses the criteria in terms of the ratio "A" rather than a reflectance factor "P" or "R".

A. *Paragraph heading.* A vehicle inspection association and a reflector manufacturer suggest that the word "tire" be aded to the heading of paragraph (o) of § 1512.18, making it read "*Retroreflective tire test.*"

This inadvertent omission in the proposal has been restored in the promulgation below.

B. *Apparatus.* A vehicle inspection association suggests deleting from § 1512.18(o)(1) the sentence "Distances shall be measured from the plane of the wheel and the center of the hub," because the next sentence states that for the tests, the distance *D* between the projector and the center of the wheel and distance *d* between the center of the wheel and the receiver shall each be at least 15 m (50 ft).

The Commission finds that the sentence, although somewhat unnecessary, helps to give necessary clarity to § 1512.18(o)(1). Accordingly, it has not been deleted from the promulgation below.

C. *Measurement.* The proposed revision of § 1512.18(o)(1) specifies that arrangements for the reflective intensity measurement shall be as shown in figure 3 of Part 1512. Also, in accordance with the proposed revision of § 1512.18(o)(2)(iii), a negative entrance angle (figure 3 of Part 1512) is specified when the entrance angle is small because the location of the receiver with respect to the direction of illumination becomes important for distinguishing between ordinary mirror-like reflection and retroreflection. The entrance angle θ and the observation angle ϕ shall be in the same plane.

An inspection association states that when the entrance angle is −4° ordinary mirror-like reflection of the reflective surface is reflected at an angle of 8° twice the entrance angle and 40 times as large as the observation angle, which is 0.2°. The association suggests that this is not a good reason for requiring the entrance angle and the observation angle to be in the same plane. The association further states that under actual circumstances, the entrance angle and the observation angle are not in the same plane and that the directions of the two angles should be normal to each other.

The inspection association provided a table of values showing a comparison of the apparent reflective areas between the procedure in proposed § 1512.18(o)(2)(iii) and their recommended procedure. In the light of these values of the area, the requirement that the entrance angle and the observation angle shall be in the same plane has an inconsistency in itself. They therefore request that the procedure be amended so that measurement is made with the directions of ϕ and θ not being in the same direction, but being normal to each other.

The Commission agrees. Accordingly, the schematic diagram depicting arrangements for the test in figure 3 has been revised as promulgated below.

The entrance angle and the observation angle are defined as being in the same plane for convenience. Reflective sheeting manufacturers in the United States were originally set up for making highway signs. Since U.S. sheeting manufacturers generally still measure this way and little error is involved, the entrance and observation angles are defined in the same plane. (See Illuminating Engineering Society-Lighting Standard LS 300–A).

Although it is true that mirror reflections from a reflector at the center of the wheel would be deviated by 8° as the association suggests, the same does not apply to reflections from the tire, which is at a relatively large distance from the center of the wheel. The choice of −4° observation angle was made to minimize the chance of objectionable mirror reflections.

The association's comparison of reflective areas denotes differences of one or two percent between the reduction rate of apparent reflective area of entrance and observation angles. These percentage differences are rather insignificant and, in fact, a one-percent difference is trying the state of the art.

The Commission considers it possible that the sequence of sentences in proposed § 1512.18(o)(2)(iii) has caused some of the confusion. Accordingly, as promulgated below the sixth and seventh sentences of that regulation have been reversed in sequence.

D. *Criteria.* 1. In a letter to the Commission dated September 3, 1974, a tire manufacturer recommended that § 1512.18(o)(2)(iv), including the formula, be deleted. Despite the proposed revision of § 1512.18(o), including partial correction of the formula, the manufacturer continues to urge its deletion, contending that it is superfluous and confusing. The manufacturer states that the formula for the ratio in § 1512.18(o)(2)(iii) adequately establishes the regulated limits and criteria for this property. He further states that § 1512.18(o)(2)(iv) is superfluous and adds nothing to the regulation because the formula for the ratio *A* would apply to entrance angles and observation angles that are not specified in the regulation and do not need to be checked.

The Commission concludes that the requirements of proposed § 1512.18(o)(2)(iv) are necessary to provide a means to define retroreflectance in the case of retroreflective tires. Therefore, in this regard, the Commission considers it to be necessary and declines to make the deletion requested in this comment.

2. Three tire manufacturers state that the equation in proposed § 1512.18(o)(2)(iv) is incorrect in that the symbol in the denominator should be "ϕ" instead of "θ". One manufacturer also states that the lower case "m" should be defined. The Commission agrees and both changes are reflected in § 1512.18(o)(2)(iv) promulgated below.

Miscellaneous Changes

Minor amendments correcting inadvertent errors are set forth below involving §§ 1512.5(c), 1512.8, and 1512.18(j)(3)(i).

Metric Conversion

For purposes of compliance with Part 1512 as amended, where the metric and English units are not equivalent due to the conversion process the less stringent requirement will prevail. This provision is added below to § 1512.3.

Conclusion and Promulgation

Having considered the proposal of June 16, 1975, the comments responding thereto, and other relevant material, the Commission concludes that the bicycle regulations should be amended as set forth below.

Therefore, pursuant to provisions of the Federal Hazardous Substances Act (secs. 2(f)(1)(D), (q)(1)(A), (s), 3(e)(1), 74 Stat. 372, 374, 375, as amended 80 Stat. 1304–05, 83 Stat. 187–89; 15 U.S.C. 1261, 1262) and under authority

V 40 N 220 NOV 13 75 XUM

vested in the Commission by the Consumer Product Safety Act (sec. 30(a), Pub. L. 92–573, 86 Stat. 1231; 15 U.S.C. 2079(a)), 16 CFR Part 1512 is amended as follows:

1. In § 1512.4, paragraphs (b), (d), (e), (g), (h), and (j) are revised to read as follows:

§ 1512.4 Mechanical requirements.

. . . . . .

(b) *Sharp edges.* There shall be no unfinished sheared metal edges or other sharp parts on bicycles that are, or may be, exposed to hands or legs; sheared metal edges that are not rolled shall be finished so as to remove any feathering of edges, or any burrs or spurs caused during the shearing process.

. . . . . .

(d) *Attachment hardware.* All screws, bolts, or nuts used to attach or secure components shall not fracture, loosen, or otherwise fail their intended function during the tests required in this part. All threaded hardware shall be of sufficient quality to allow adjustments and maintenance. Recommended quality thread form is specified in Handbook H28, "Screw Thread Standards for Federal Services,"[1] issued by the National Bureau of Standards, Department of Commerce; recommended mechanical properties are specified in ISO Recommendation R898, "Mechanical Properties of Fasteners," and in ISO Recommendations 68, 262, and 263, "General Purpose Screw Threads."[2]

(e) *Protrusions.* The assembled bicycle shall be tested for exposed protrusions in accordance with the exposed protrusion test, § 1512.18(b). There shall be no exposed protrusions that do not have:

(1) The minor end dimension greater than 3.2 mm (⅛ in); and

(2) The major end dimension greater than 12.7 mm (½ in) with radii greater than 6.3 mm (¼ in).

(See figure 4 of this Part 1512 for examples of typical protrusions.) Capped exposed protrusions shall meet the requirements of this paragraph (e).

. . . . . .

(g) *Excluded area.* There shall be no protrusions located within the area bounded by (1) a line 89 mm (3½ in) to the rear of and parallel to the handlebar stem; (2) a line tangent to the front tip of the seat and intersecting the seat mast at the top rear stay; (3) the top surface of the top tube; and (4) a line connecting the front of the seat (when adjusted to its highest position) to the junction where the handlebar is attached to the handlebar stem. The top tube on a female bicycle model shall be the seat mast and the down tube or tubes that are nearest the rider in the normal riding position. Control cables no greater than 6.4 mm (¼ in) in diameter and cable clamps made from material no thicker than 4.8 mm ($\frac{3}{16}$ in) may be attached to the top tube.

(h) *Screw length.* Screw lengths shall be such that the threads of the internally threaded fastener are fully engaged by the screw (or the threads of the internally threaded fastener are engaged for a length of more than one screw diameter). Screw lengths that can come in contact with the test cylinder in § 1512.18 (b) shall be limited to a maximum length of one major diameter of the screw beyond the internally threaded mating member and shall meet the requirements in § 1512.4(b). Screws that are exposed to any part of a rider's body in a normal riding position, however, shall be limited to a 3.2 mm (⅛ in) extension beyond the internally threaded mating member. Adjusting-type screws that meet the exposed protrusion requirements in § 1512.4(e) and that have no threaded ends exposed to a rider's body in the normal riding position are not required to be limited in length to one major diameter.

. . . . . .

(j) *Control cable abrasion.* Control cables shall not abrade over fixed parts and shall enter and exit cable sheaths in a direction in line with the sheath entrance and exist so as to prevent abrading.

2. In § 1512.5, paragraphs (b) (3), (4), and (8), (c) (1) and (2) and (d) are revised to read as follows:

§ 1512.5 Requirements for braking system.

. . . . . .

(b) *Handbrakes.* * * *

(3) *Grip dimension.* The grip dimension (maximum outside dimension between the brake hand lever and the handlebars in the plane containing the centerlines of the handgrip and the hand brake lever) shall not exceed 89 mm (3½ in) at any point between the pivot point of the lever and lever midpoint; the grip dimension for sidewalk bicycles shall not exceed 76 mm (3 in). The grip dimension may increase toward the open end of the lever but shall not increase by more than 12.7 mm (½ in) except for the last 12.7 mm (½ in) of the lever. (See figure 5 of this Part 1512.)

. . . . . .

(4) *Attachment.* Brake assemblies shall be securely attached to the frame by means of fasteners with locking devices such as a lock washer, locknut, or equivalent and shall not loosen during the rocking test, § 1512.18(d)(2)(iii). The cable anchor bolt shall not cut any of the cable strands.

. . . . . .

(8) *Hand lever location.* The rear brake shall be actuated by a control located on the right handlebar and the front brake shall be actuated by a control located on the left handlebar. The left-hand/right-hand locations may be reversed in accordance with an individual customer order. If a single hand lever is used to actuate both front and rear brakes, it shall meet all applicable requirements for hand levers and shall be located on either the right or left handlebar in accordance with the customer's preference.

. . . . . .

(c) *Footbrakes.* * * *

(1) *Stopping distance.* Bicycles equipped with footbrakes (except sidewalk bicycles) shall be tested in accordance with the performance test, § 1512.18 (c)(3), by a rider of at least 68.1 kg (150 lb) weight and shall have a stopping distance of no greater than 4.57 m (15 ft) from an actual test speed of at least 16 km/h (15 mph) (in its highest gear ratio brake only and the equivalent ground speed of the bicycle is in excess of 24 km/h (15 mph) (in its highest gear ratio at a pedal crank rate of 60 revolutions per minute),[3] the stopping distance shall be 4.57 m (15 ft) from an actual test speed of 24 km/h (15 mph) or greater.

(2) *Operating force.* Footbrakes shall be actuated by a force applied to the pedal in a direction opposite to that of the drive force, except where brakes are separate from the drive pedals and the applied force is in the same direction as the drive force.

. . . . . .

(d) *Footbrakes and handbrakes in combination.* Bicycles equipped with footbrakes and handbrakes shall meet all the requirements for footbrakes in § 1512.5(c), including the tests specified. In addition, if the equivalent ground speed of the bicycle is 24 km/h (15 mph) or greater (in its highest gear ratio at a pedal crank rate of 60 revolutions per minute),[3] the actual test speed specified in § 1512.18(e)(3) shall be increased to 24 km/h (15 mph) and both braking systems may be actuated to achieve the required stopping distance of 4.57 m (15 ft).

. . . . . .

3. Also in § 1512.5, the first sentence of paragraph (c) is amended by changing "311 N (70 lbf)" to "310 N (70 lbf)."

4. Section 1512.7(b) is revised to read as follows:

§ 1512.7 Requirements for pedals.

. . . . . .

(b) *Toe clips.* Pedals intended to be used only with toe clips shall have toe clips securely attached to them and need not have tread surfaces. Pedals designed for optional use of toe clips shall have tread surfaces.

. . . . . .

§ 1512.8 [Amended]

5. Section 1512.8 *Requirements for drive chain* is corrected by changing "(1,800 lb)" and "(1,400 lb)" to read "(1,800 lbf)" and "(1,400 lbf)".

[1] Copies may be obtained from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

[2] Copies may be obtained from: American National Standards Institute, 1430 Broadway, New York, New York 10018.

[3] This is proportional to a gear development greater than 6.57 m (21.9 ft) in the bicycle's highest gear ratio. Gear development is the distance the bicycle travels in meters, in one crank revolution.

6. Section 1512.10 is revised to read as follows:

§ 1512.10 Requirements for tires.

The manufacturer's recommended inflation pressure shall be molded into or onto the sidewall of the tire in lettering no less than 3.2 mm (⅛ in.) in height. The statement of recommended inflation pressure shall be in the English language utilizing Arabic numerals. (The following language is suggested to indicate recommended inflation pressure: "Inflate to ___ PSI.") After inflation to 110 percent of the recommended inflation pressure, the tire shall remain intact on the rim, including while being tested under a load of 2,000 N (450 lbf) in accordance with the rim test, § 1512.18(j). Tubular sew-up tires, nonpneumatic tires, and nonmolded wired-on tires are exempt from this section.

7. Section 1512.12(a) is revised to read as follows (although unchanged, the section's introductory text is included for context):

§ 1512.12 Requirements for wheel hubs.

All bicycles (other than sidewalk bicycles) shall meet the following requirements:

(a) *Locking devices.* Wheels shall be secured to the bicycle frame with a positive lock device. Locking devices on threaded axles shall be tightened to the manufacturer's specifications.

(1) *Rear wheels.* There shall be no relative motion between the axle and the frame when a force of 1,780 N (400 lbf) is applied symmetrically to the axle for a period of 30 seconds in the direction of wheel removal.

(2) *Front wheels.* Locking devices, except quick-release devices, shall withstand application of a torque in the direction of removal of 17 N-m (12.5 ft-lb).

. . . . . .

8. In § 1512.14, the section heading and introductory paragraph are revised to read as follows:

§ 1512.14 Requirements for fork and frame assembly.

The fork and frame assembly shall be tested for strength by application of a load of 890 N (200 lbf) or at least 39.5 J (350 in-lb) of energy, whichever results in the greater force, in accordance with the frame test, § 1512.18(k)(2), without visible evidence of fracture or frame deformation that significantly limits the steering angle over which the wheel can be turned. Sidewalk bicycles are exempt from this section.

. . . . . .

9. In § 1512.16, the introductory paragraph and paragraphs (c) and (d) are revised to read as follows:

§ 1512.16 Requirements for reflectors.

Bicycles shall be equipped with reflective devices to permit recognition and identification under illumination from motor vehicle headlamps. The use of reflector combinations off the center plane of the bicycle (defined in § 1512.18(m)(2)) is acceptable if each reflector meets the requirements of this section and of § 1512.18(m) and (n) and the combination of reflectors has a clear field of view of ±10° vertically and ±50° horizontally. Sidewalk bicycles are not required to have reflectors.

. . . . . .

(c) *Front reflector.* The reflector or mount shall not contact the ground plane when the bicycle is resting on that plane in any orientation. The optical axis of the reflector shall be directed forward within 5° of the horizontal-vertical alignment of the bicycle when the wheels are tracking in a straight line, as defined in § 1512.18(m)(2). The reflectors and/or mounts shall incorporate a distinct, preferred assembly method that shall insure that the reflector meets the optical requirements of this paragraph (c) when the reflector is attached to the bicycle. The front reflector shall be tested in accordance with the reflector mount and alignment test, § 1512.18(m).

(d) *Rear reflector.* The reflector or mount shall not contact the ground plane when the bicycle is resting on that plane in any orientation. The reflector shall be mounted such that it is to the rear of the seat mast with the top of the reflector at least 76 mm (3.0 in) below the point on the seat surface that is intersected by the line of the seat post. The optical axis of the reflector shall be directed rearward within 5° of the horizontal-vertical alignment of the bicycle when the wheels are traveling in a straight line, as defined in § 1512.18(m)(2). The reflectors and/or mounts shall incorporate a distinct, preferred assembly method that shall insure that the reflector meets the optical requirements of this paragraph (d) when the reflector is attached to the bicycle. The rear reflector shall be tested in accordance with the reflector mount and alignment test, § 1512.18(m).

. . . . . .

10. Section 1512.17(d) is revised to read as follows:

§ 1512.17 Other requirements.

. . . . . .

(d) *Toe clearance.* Bicycles not equipped with positive foot-retaining devices (such as toe clips) shall have at least 89 mm (3½ in) clearance between the pedal and the front tire or fender (when turned to any position). The clearance shall be measured forward and parallel to the longitudinal axis of the bicycle from the center of either pedal to the arc swept by the tire or fender, whichever results in the least clearance. (See figure 6 of this Part 1512.)

11. In § 1512.18, paragraphs (b), (d)(2)(i), (iii), (v), and (vi), (e)(2), and (3), (k)(1)(i) and (2)(i), (m)(2), (n)(2)(ii), (iv), and (vii), and (o)(1) and (2)(iii) and (iv) are revised to read as follows:

§ 1512.18 Test and test procedures.

. . . . . .

(b) *Exposed protrusion test.* (Ref. § 1512.4(e))

(1) *Apparatus.* A cylinder of 83 mm (3¼ in) diameter and 254 mm (10 in) length.

(2) *Procedure.* All protrusions greater than 7.9 mm ($\frac{5}{16}$ in) in length shall be located and tested with the test apparatus to determine whether the protrusions can be brought into contact with the surface of the cylinder. Any protrusion of the dimensions specified that can be brought into contact with the cylinder is an exposed protrusion.

. . . . . .

(d) *Handbrake loading and performance test.* (Ref. § 1512.5(b))

. . . . . .

(2) *Procedure.* * * *

(i) *Loading test procedure.* The hand levers shall be actuated with a force applied at a point no more than 25 mm (1.0 in) from the open end of the lever. If the hand lever contacts the handlebar (bottoms) before a force of 445 N (100 lbf) is reached, the loading may be stopped at that point, otherwise the loading shall be increased to at least 445 N (100 lbf).[4] Application of the loading force shall be repeated for a total of 10 times and all brake components shall be inspected.

. . . . . .

(iii) *Rocking test procedure.* A weight of at least 68.1 kg (150 lb) shall be placed on the seat; the force required for the hand levers to contact the handlebars or 445 N (100 lbf), as determined in § 1512.18(d)(2), shall be applied to the hand levers;[4] and the bicycle shall be rocked forward and backward over a dry, clean, level, paved surface at least six times and for a distance of at least 76 mm (3 in) in each direction.

. . . . . .

(v) *Performance test procedure.* The following test conditions, unless otherwise specified in this Part 1512, shall be followed:

(1) The bicycle shall be ridden over a dry, clean, smooth paved test course free from protruding aggregate. The test course shall provide a coefficient of friction of less than 1.0 and shall have a slope of less than 1 percent.

(2) The wind velocity shall be less than 11 km/h (7 mph).

(3) Only the brake system under test shall be actuated.

(4) The bicycle shall attain the specified ground speed while the rider is in the normal riding position.

(5) The rider shall remain in the normal riding position throughout the test.

[4] For hand lever extensions, the loading shall be continued until a force of 445 N (100 lbf) is reached or the hand lever extension is in the same plane as the upper surface of the handlebars or the extension lever contacts the handlebars.

V 40 N 220 NOV 13 75 XUM

(6) The bicycle must be moving in a straight line at the start of brake application.

(7) Corrections for velocity at the initiation of braking may be made. The corrected braking distance shall be computed as follows:

$$S_c = \left(\frac{V_s}{V_m}\right)^2 S_m$$

where:

S_c = Corrected braking distance,
V_s = Specified test velocity,
V_m = Measured test velocity,
S_m = Measured braking distance.

The test run is invalid of at the commencement of the test, the measured test speed of the bicycle is no less than nor greater than the test speed required by this Part 1512 by 1.5 km/h (0.9 mph).

(8) Four test runs are required. The stopping distance shall be determined by averaging the results of the four test runs.

(9) The stopping distances specified are based on a rider weight of at least 68.1 g (150 lb) and a maximum rider and weight combination of 91 kg (200 lb). Greater stopping distances are allowable for heavier riders and test equipment weights at the rate of 0.30 m per 4.5 kg (1.0 ft per 10 lb).

(10) A test run is invalid if front-wheel lockup occurs.

(vi) *Performance test criteria.* The stopping force applied to the hand lever at a point no closer than 25 mm (1.0 in) from the open end shall not exceed 178 N (40 lbf). Bicycles with an equivalent ground speed in excess of 24 km/h (15 mph) in its highest gear ratio at a pedal crank rate of 60 revolutions per minute) [1] shall stop from an actual test speed of 24 km/h (15 mph) or greater within a distance of 4.57 m (15 ft); when the equivalent ground speed is less than 24 km/h (15 mph) under the same conditions, the bicycle shall stop from an actual test speed of 16 km/h (10 mph) or greater within a distance of 4.57 m (15 ft).

(e) *Footbrake force and performance test.* (Ref. § 1512.5(c) (1) and (2))

* * * * *

(2) *Force test.* The braking force shall be measured as the wheel is rotated in a direction of forward motion, and the braking force is measured in a direction tangential to the tire during a steady pull after the wheel completes one-half revolution but before the wheel completes one revolution. The brake shall be capable of producing a linearly proportional brake force for a gradually applied pedal force from 89 N to 310 N (20 to 70 lbf) and shall not be less than 178 N (40 lbf) for an applied pedal force of 310 N (70 lbf). All data points must fall within plus or minus 20 percent of the brake force, based on the measured brake load using the least square method of obtaining the best straight line curve.

(3) *Performance test.* The procedure of § 1512.18(d)(2)(v) shall be followed to test the footbrake performance. The stopping distance shall be less than 4.57 m (15 ft) from an actual test speed of 16 km/h (10 mph). In addition, if the equivalent ground speed of the bicycle is in excess of 24 km/h (15 mph) (in its highest gear ratio at a pedal crank rate of 60 revolutions per minute),[1] the stopping distance shall be 4.57 m (15 ft) from an actual test speed of 24 km/h (15 mph) or greater.

NOTE.—No allowance shall be made for rider weight. See § 1512.5(d) for additional requirements for bicycles with both handbrakes and footbrakes.

* * * * *

(k) *Fork and frame test.* (Ref. §§ 1512.13 and 1512.14)

(1) *Fork test*—(i) *Procedure.* With the fork stem supported in a 76 mm (3.0 in) vee block and secured by the method illustrated in figure 1 of this Part 1512, a load shall be applied at the axle attachment in a direction perpendicular to the centerline of the stem and against the direction of the rake. Load and deflection readings shall be recorded and plotted at the point of loading. The load shall be increased until a deflection of 64 mm (2½ in) is reached.

* * * * *

(2) *Fork and frame assembly test*—(i) *Procedure.* The fork, or one identical to that tested in accordance with the fork test, § 1512.18(k)(1), shall be replaced on the bicycle in accordance with the manufacturer's instructions; and a load of 890 N (200 lbf), or an energy of at least 39.5 J (350 in-lb), whichever results in the greater force, shall be applied to the fork at the axle attachment point against the direction of the rake in line with the rear wheel axle. The test load shall be counteracted by a force applied at the location of the rear axle during this test.

* * * * *

(m) *Reflector mount and alignment test.* (Ref. § 1512.16 (c) and (d))

* * * * *

(2) *Criteria.* (i) During test: The optical axis of the reflector shall remain parallel within 15° to the line or intersection of the ground plane and the center plane of the bicycle defined as a plane containing both wheels and the centerlines of the down tube and seat mast.

(ii) Post test: The optical axis of the reflector shall remain parallel within 5° to the line or intersection of the ground plane and the center plane of the bicycle defined as a plane containing both wheels and the centerlines of the down tube and seat mast.

(n) *Reflector test.* (Ref. § 1512.16(g))

* * * * *

(2) *Reflector performance test.* * * *

(ii) The observation angle is the angle formed by a line from the point of observation to the center of the reflector with a second line from the center of the reflector to the source of illumination. The entrance angle is the angle between the optical axis of the reflector and a line from the center of the reflector to the source of illumination. The entrance angle shall be designated left, right, up, and down in accordance with the position of the source of illumination with respect to the axis of the reflector as viewed from behind the reflector when the plane of the observation angle is vertical and the receiver is above the source.

* * * * *

(iv) For visual measurements a comparison lamp, emitting light similar in spectral quality to the reflector, shall be located adjacent to the reflector (at an angle not to exceed ½°) and arranged so that the candlepower can be varied from 0.01 to 0.25 to make the intensity duplicate that of the reflector under test. The candlepower of the source of the illumination of the reflector under test shall be known or determined for this test. Means shall be provided to change the intensity of the source of illumination without changing the filament color temperature. The comparison lamp shall be designed to avoid reflection from the source of illumination back in the direction of the observer. It shall be of such size and so diffused that when viewed by the observer (through a 2½× reducing monocular), the candlepower can be readily compared and adjusted to that of the reflector. The observer shall have at least 10 minutes of dark adaption before making observations. For photoelectric measurements, the opening to the photocell shall not be more than ½ inch vertical by 1 inch horizontal.

* * * * *

(vii) A recommended coordinate system for definition of color is the "Internationale de l'Eclairage (CIE 1931)" system in the *IES Lighting Handbook*,[2] fifth edition, 1972. In the coordinate system and when illuminated by the source defined in table 4 of this Part 1512, a reflector will be considered to be red if its color falls within the region bounded by the red spectrum locus and the lines $y=0.980 - x$ and $y=0.335$; a reflector will be considered to be amber if its color falls within the region bounded by the yellow spectrum locus and the lines $y=0.382$, $y=0.790-0.667x$ and $y=x-0.120$.

(o) *Retroreflective tire test.* (Ref. § 1512.16(h))

(1) *Apparatus.* Arrangements for the reflective intensity measurement shall be as shown in figure 3 of this Part 1512. A light projector (having a maximum effective lens diameter of D/500, where D is the distance from the source to the sidewall being measured) capable of projecting light of uniform intensity shall be used to illuminate the sample. The light falling on the sample shall have a color temperature of 2856K±10% (equivalent to a tungsten filament lamp operated at a color temperature of 2856K±10% having approximately the relative energy distribution given in table 4 of this Part 1512). The light reflected from the test surface shall be measured

See footnote [2] on p. 52823.

[2] Copies may be obtained from Illuminating Engineering Society, 345 East 47th Street, New York, N.Y. 10017.

with a photoelectric receiver, the response of which has been corrected for the spectral sensitivity of the average photopic human eye. The dimensions of the active area of the receiver shall be such that no point on the perimeter of the receiver is more than $d/1000$ from its center (where d is the distance from the receiver to the sidewall). Tires to be tested shall be mounted on a wheel, the rim and spokes of which have been masked in flat black so that when measured without the tire they indicate no appreciable reflectance. The tire shall be mounted and fully inflated. Distances shall be measured from the plane of the wheel and the center of the hub. For the tests, the distance D between the projector and the center of the wheel and distance d between the center of the wheel and the receiver shall each be at least 15 m (50 ft).

(2) *Procedure.* * * *

(iii) *Measurement.* Measure the distance d from the receiver to the center of the wheel and the minimum distance r from the axis of rotation of the wheel to the unmasked portion of the reflective strip. Measure the illumination incident on the reflective strip at uniform intervals of no more than 45° around the wheel, with the receiver oriented in the direction of the incident radiation. The average of such readings will be the mean illumination of the sample E. If any one of such readings differs by more than 10 percent from the mean illumination, then a more uniform source must be obtained. Measure the illumination of the receiver due to reflection from the sidewall for each entrance angle and each observation angle given in table 3 of this Part 1512. The entrance angle and the observation angle shall be in the same plane. A negative entrance angle (figure 3 of this Part 1512) is specified when the entrance angle is small because the location of the receiver with respect to the direction of illumination becomes important for distinguishing between ordinary mirror-like reflection and retroreflection. The illumination incident on the test surface and the receiver shall be measured in the same units on a linear scale. Compute the ratio A for each combination of entrance angle and observation angle listed in table 3 as follows:

$$A = \frac{E_r}{E_s} \times \frac{d^2}{r}$$

Where:

A = Ratio in meters,
E_r = Illumination incident upon the receiver,
E_s = Illumination incident upon a plane perpendicular to the incident ray at the specimen position (see instructions above in this paragraph (o)(2)(iii) for averaging), measured in the same units as E_r,
d = The distance in meters from the receiver to the center of the wheel,
r = The minimum radius in meters of the boundary circles of the retroreflective strip.

The minimum value of A shall be that listed in table 3 of this Part 1512 for each combination of entrance angle and observation angle. The plane containing the entrance angle and the plane containing the observation angle shall coincide. In table 3, a positive entrance angle corresponds to the case in which the line of sight to the receiver lies between the line of incidence and the optic axis of the reflector, and a negative entrance angle corresponds to the case in which the line of incidence lies between the line of sight of the receiver and the optic axis of the reflector.

(iv) *Criteria.* The ratio A as defined in § 1512.18(o)(2)(iii) shall not be less than:

$$A = \frac{4\cos^2\theta}{1+\left(\frac{\phi}{0.225}\right)^{1/3}}$$

where A is ratio in meters, θ is the entrance angle, and ϕ is the observation angle in degrees. The criterion applies only for entrance angles from 0° to 40° and observation angles from 0.2° to 1.5°, and performance is not specified beyond this range. The values of A in table 3 are obtained from the above formula by rounding up to two significant figures. Except in cases in which the performance of the reflector is seriously questionable, a reflector with A at least the value given in table 3 at each of the six combinations of entrance and observation angle will be considered to satisfy this criteria.

* * * * *

12. Section 1512.18(j)(3)(i) is corrected by changing "11.2N (25 lbf)" to "112N (25 lbf)".

13. Section 1512.3 is revised to read as follows:

§ 1512.3 Requirements in general.

Any bicycle subject to the regulations in this part shall meet the requirements of this part in the condition to which it is offered for sale to consumers; any bicycle offered for sale to consumers in a disassembled or partially assembled condition shall meet these requirements after assembly according to the manufacturer's instructions. For the purpose of compliance with this part, where the metric and English units are not equal due to the conversion process the less stringent requirement will prevail.

Effective date. The subject regulations, 16 CFR Part 1512, promulgated July 16, 1974 (39 FR 26100), and suspended December 16, 1974 (39 FR 43536), shall, as amended above in this document and as amended by another document also in this issue of the FEDERAL REGISTER, become effective May 11, 1976, except for §§ 1512.5(c)(3), 1512.9(a), 1512.18(e) and 1512.18(f) which become effective November 13, 1976.

(Secs. 2(f)(1)(D), (q)(1)(A), (s), 3(e)(1), 74 Stat. 372, 374, 375, as amended 80 Stat. 1304–05, 83 Stat. 187–89 (15 U.S.C. 1261, 1262)).

Although the Consumer Product Safety Commission does not consider Executive Order 11821 to apply to public safety regulations of this nature, the economic and inflationary impact of the regulation has been studied and is on file at the Commission.

The Commission has considered the possible environmental effects of the bicycle regulations and has determined that the environmental impact of the regulations as issued and amended is negligible. On the basis of this assessment, the Commission believes that no environmental impact statement is necessary. A copy of the environmental assessment is on file at the Commission.

Dated: November 7, 1975.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES; ADMINISTRATION AND ENFORCEMENT REGULATIONS

PART 1512—REQUIREMENTS FOR BICYCLES

Bicycle Banning and Safety Regulations; Adoption of Amendments and New Effective Date

The purpose of this document is (1) to amend the bicycle banning and safety regulations (16 CFR 1500.18(a) (12) and Part 1512) by acting on the proposals of July 16, 1974 (39 FR 26113), and January 7, 1975 (40 FR 1493), and (2) to establish an effective date for these regulations as amended by this document and by another document also published in this issue of the FEDERAL REGISTER that acts on the proposal of June 16, 1975 (40 FR 25480). The effective date established herein, for these bicycle regulations is May 11, 1976 (except for chain, guards and certain footbrake requirements which become effective November 13, 1976.

The amendments adopted by this document concern a temporary label of compliance, the maximum angle between the crank's drive and brake positions for footbrake-equipped bicycles, the handlebar stem-to-fork clamp, chain guards, and bicycle markings for identifying the manufacturer or private labeler and month and year of manufacture.

BACKGROUND

The bicycle banning and safety regulations were proposed by the Commissioner of Food and Drugs in the FEDERAL REGISTER of May 10, 1973 (38 FR 12300), under provisions of the Federal Hazardous Substances Act (15 U.S.C. 1261–74) and a delegation of authority from the Secretary of Health, Education, and Welfare (21 CFR 2.120).

On May 14, 1973, the authority to issue regulations under the Federal Hazardous Substances Act was transferred to the Consumer Product Safety Commission by section 30(a) of the Consumer Product Safety Act (86 Stat. 1231; 15 U.S.C. 2079(a)).

In the FEDERAL REGISTER of July 16, 1974 (39 FR 26100), the Commission promulgated 16 CFR Part 1512, a regulation prescribing safety requirements for bicycles, and 16 CFR 1500.18(a) (12), a regulation classifying certain bicycles as banned toys or articles intended for use by children. The promulgation of July 16, 1974, bore an effective date of January 1, 1975, which, as is explained below, was suspended on December 16, 1974.

Introduction or receipt in interstate commerce of any banned toy or article intended for use by children is prohibited by section 4 of the Federal Hazardous Substances Act (15 U.S.C. 1263). Section 6 of the act (15 U.S.C. 1265) authorizes seizure of any such toy or article introduced into interstate commerce, and section 15 of the act (15 U.S.C. 1274) and a regulation promulgated thereunder (16 CFR 1500.202) require repurchase of any banned toy or other article intended for use by children that is introduced into interstate commerce.

Also in the FEDERAL REGISTER of July 16, 1974 (39 FR 26113), the Commission proposed to add to the bicycle regulations a provision (§ 1512.19(d)) requiring bicycle compliance labeling as is explained in more detail below.

REACTION TO PROMULGATION

After promulgation of the bicycle regulations on July 16, 1974, the Commission received more than 50 written communications thereon. Several of these stated that the effective date would not allow adequate time for redesign, retooling, testing, and production of complying bicycles and requested extension of the effective date. Others objected to various provisions of the regulations and requested a public hearing under 16 CFR 1500.201. After consideration of these communications, the Commission concluded that 16 CFR 1500.201 was not applicable to the bicycle regulations and that it would treat these communications as petitions to amend the regulations. Although the Commission determined that a public hearing in accordance with 16 CFR 1500.201 was not required, it directed its staff to conduct a public meeting with all interested parties to receive information relevant to the petitions for amendment of the regulations.

After notice of the meeting was published in the FEDERAL REGISTER on September 3, 1974 (39 FR 31943), members of the Commission staff met with interested parties on September 9 and 10, 1974. Copies of all petitions concerning the bicycle regulations received after July 16, 1974, and a transcript of the presentations made at the public meeting are available for inspection in the Office of the Secretary, 10th Floor, 1750 K Street, NW., Washington, D.C.

EFFECTIVE DATE SUSPENSION; NEW PROPOSALS

In the FEDERAL REGISTER of December 16, 1974 (39 FR 43536), the Commission published an order suspending the effective date of the bicycle regulations until further notice. On January 7, 1975 (40 FR 1493), the Commission proposed a new effective date for the regulations and proposed amendments to § 1512.5(c)(3), footbrake crank differential; § 1512.6(e), requirements for handlebar and clamps; § 1512.9(a), requirements for chain guard; § 1512.18(h)(1), handlebar stem-to-fork clamp test; and § 1512.19(e), instructions and labeling. Interested parties were invited to submit comments on the proposal by February 6, 1975. The proposed new effective date was May 1, 1975, or 120 days after publication in the FEDERAL REGISTER of a document acting on the proposal of January 7, 1975, whichever occurred later.

On January 16 and 24, 1975, members of the Commission staff attended public meetings with manufacturers of bicycles and components, and other interested parties, to discuss various petitioned changes in the regulations that were not included in the proposal of January 7, 1975. Additional public meetings on the same subject were conducted on February 3 and 19, March 19, and April 22, 1975.

In the FEDERAL REGISTER of June 16, 1975 (40 FR 25480), the Commission published a notice to respond to petitions for amendment or interpretation of various sections of the regulations, and to propose amendments pertaining to sharp edges, protrusions, control cable abrasion, attachment hardware, brakes for bicycles and sidewalk bicycles, pedals, tires, locking devices on wheels, frames, and reflectors. A document setting forth the Commission's action on the proposal of June 16, 1975, is also being published in this issue of the FEDERAL REGISTER.

RESPONSE TO THE PROPOSAL OF JULY 16, 1974—COMPLIANCE LABELING

As mentioned above, in the FEDERAL REGISTER of July 16, 1974 (39 FR 26113), the Commission proposed to add to the bicycle regulations a provision (§ 1512.19(d)) requiring that every bicycle subject to Part 1512 that is introduced into interstate commerce on or after the effective date of Part 1512 be labeled with the statement "Meets U.S. Consumer Product Safety Commission Regulations for Bicycles." Proposed § 1512.19(d)(1) specifies that every such bicycle offered for sale to consumers in a fully assembled condition must bear a label (such as a hang tag) at least 6.4 cm (2.5 in) by 17.8 cm (7 in) with the required statement printed in letters at least 0.6 cm (0.25 in) high. Proposed § 1512.19(d)(2) provides that the retail cartons of such bicycles offered for sale in a partially assembled or unassembled condition must be labeled with the required statement in letters at least 1.3 cm (0.5 in) high.

Interested parties were invited to submit written comments on the proposal by August 15, 1974. The period for comments was extended to August 29, 1974, by a notice published August 19, 1974 (39 FR 29950), and was reopened from January 7 through February 6, 1975, by a notice published on January 7, 1975 (40 FR 1493 at 1494).

In response to the proposal, comments were received from three consumers, two consumer associations, two U.S. bicycle manufacturers, two foreign bicycle manufacturers, two retailers, an association of retailers, a manufacturer of labeling materials, an engineer, a police department, a county department of consumer protection, the American Academy of Pediatrics, and the American National Metric Council. The principal issues raised by these comments and the Commission's decisions thereon are as follows:

I. *Conflict with other legislation.* A bicycle manufacturer urges the Commission not to promulgate proposed § 1512.19(d) because its provisions may conflict with provisions of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act (P.L. 93–637; 88 Stat. 2183; 15 U.S.C. 2301–12), a law that became effective July 4, 1975, and that provides for the establishment of minimum standards for written warranties made for consumer products. The manufacturer asserts that the labeling statement required by proposed § 1512.19(d) would be an express "written warranty" as that term is used in said act and that sections 103 and 104 of that act (15 U.S.C. 2303, 2304) establish requirements for such warranties that conflict with the provisions of proposed § 1512.19(d).

Section 101(6)(A) of the Magnuson-Moss Warranty Act (15 U.S.C. 2301(6)(A)) defines the term "written warranty" as "any written affirmation of fact or written promise made in connection with the sale of a consumer product by a supplier to a buyer which relates to the nature of the material or workmanship and affirms or promises that such material or workmanship is defect free or will meet a specified level of performance over a specified period of time."

The proposed amendment requires each bicycle subject to Part 1512 to be labeled with a statement that it complies with the applicable regulations of the Consumer Product Safety Commission. The proposed amendment does not require a statement that the bicycle is free from all defects or that it will meet the requirements of the regulations for any particular period of time.

For this reason, the Commission concludes that adopting proposed § 1512.19(d) would not establish a requirement conflicting with the Magnuson-Moss Warranty Act.

II. *Necessity for label.* A. The same manufacturer states that proposed § 1512.19(d) will be unnecessary if the Commission adopts an amendment it proposed on January 7, 1975 (40 FR 1493), which would add § 1512.19(e) requiring a permanent label on each bicycle to indicate the name of the manufacturer or private labeler and the month and year of manufacture.

The Commission disagrees. The purpose of the § 1512.19(d) labeling statement is to enable consumers to identify those bicycles that are subject to and comply with Part 1512 when such bicycles are offered for sale together with noncomplying bicycles manufactured before the effective date of Part 1512. The purpose of the § 1512.19(e) permanent marking is to enable CPSC personnel to determine which Part 1512 requirements any given bicycle must meet in the event Part 1512 is amended substantively after its effective date. Proposed § 1512.19(e) provides for the date of manufacture to be marked in a code that could be read by the manufacturer and CPSC personnel, but not necessarily by consumers.

B. Another bicycle manufacturer states that if all bicycles are required to be labeled in accordance with proposed § 1512.19(d), the presence of a label will not be a distinguishing feature on a bicycle.

As stated in the proposal's preamble, the Commission anticipates that for some time after Part 1512 becomes effective, bicycles manufactured before it became effective, and therefore not subject to its requirements, will continue to be offered for sale to consumers in retail establishments. The purpose of proposed § 1512.19(d) is to enable consumers to distinguish bicycles manufactured to comply with Part 1512 from those that were not.

For this reason, the Commission proposed to limit the requirements of proposed § 1512.19(d) to a period of two years. The Commission anticipates that by the end of that period few, if any, bicycles manufactured before the effective date of Part 1512 will be offered for sale to consumers.

III. *Text of label.* A. A consumer requests that proposed § 1512.19(d) be changed to eliminate the labeling statement provision and to require instead that each bicycle manufactured to comply with Part 1512 bear a Commission-approved symbol to indicate such compliance. The commenter suggests that the significance of the symbol could be explained to consumers on a separate card. The commenter objects to the proposed labeling requirements for aesthetic reasons and states that the symbol could be so attractively designed that both children and adults would be eager to display it on bicycles and other articles that comply with CPSC regulations and standards.

The purpose of proposed § 1512.19(d) is to provide a means whereby consumers can quickly and easily distinguish bicycles that comply with Part 1512 from those that do not. As this comment indicates, if a symbol were used to indicate compliance, a separate card would be necessary to explain the symbol's meaning. The necessity for a separate card would not only detract from the consumer's ability to recognize a complying bicycle quickly, but would also increase the expense of manufacturing the label. As to the proposed labeling being unattractive, it is intended to be nonpermanent and of use to a consumer only while making a purchasing decision. For these reasons, the Commission declines to adopt these suggestions.

B. The American Academy of Pediatrics and an association of consumers request that proposed § 1512.19(d) be changed to require bicycles that do not comply with Part 1512 to be labeled to indicate that fact.

The bicycle banning and safety regulations are applicable only to bicycles introduced into interstate commerce on or after the effective date of the regulations. If instead the regulations applied to all bicycles in channels of commerce as of said effective date, the sale of any noncomplying bicycle introduced into interstate commerce before the effective date would be illegal after that date. Also, all noncomplying bicycles, including those manufactured before the effective date, would be subject to repurchase under provisions of section 15 of the Federal Hazardous Substances Act (15 U.S.C. 1274) and a regulation issued thereunder (16 CFR 1500.202).

Because the bicycle regulations are applicable only to bicycles introduced into interstate commerce on or after the regulations' effective date, no provision of the regulations could require bicycles in the hands of retailers on such effective date to be labeled with a statement indicating that they do not comply with the regulations. The only noncomplying bicycles the Commission could require to be so labeled would be those introduced into interstate commerce on or after the regulations' effective date. The regulations, however, prohibit the introduction of any noncomplying bicycle into interstate commerce after their effective date. Accordingly, the requested change has not been made.

The association of consumers suggests that if a requirement for labeling of noncomplying bicycles is not practicable, proposed § 1512.19(d) should be changed to require retail dealers to separate complying from noncomplying bicycles, to prohibit intermingling of complying and noncomplying bicycles, and to identify displays of complying and noncomplying bicycles by clear and conspicuous signs. The association observes that similar measures are required by CPSC's enforcement regulations for children's sleepwear (16 CFR 302.19 and 302.21).

Proposed § 1512.19(d) requires complying bicycles to be identified by a labeling statement printed in letters at least

V 40 N 220 NOV 13 75 XUM

0.6 cm (0.25 in) high, which must appear on a label at least 6.4 cm (2.5 in) by 17.8 cm (7 in) on a fully assembled bicycle, or conspicuously and legibly on the retail carton of an unassembled or partially assembled bicycle in letters at least 1.3 cm (0.5 in) high. The Commission concludes that because of the large size specified for the label and its lettering, consumers will be able to recognize complying bicycles easily, and that consumers would derive little or no benefit for additional measures to distinguish complying from noncomplying bicycles, such as physical segregation or posting of signs in retail stores.

C. The association of consumers also suggests a revision of the required labeling statement to indicate that the bicycle complies with the requirements of the regulations as issued on a specific date, contending that if the regulations are substantively amended after the initial effective date, bicycles meeting the original requirements may be offered for sale at the same time as bicycles meeting the amended requirements. The association states that if the regulations are amended after the effective date, consumers should be given a means to determine which set of requirements any given bicycle meets.

The bicycle regulations shall become effective on the date specified at the end of this document. If the regulations are amended thereafter at any time while the requirement for compliance labeling is in effect, the labeling requirement can be changed at that time to enable consumers to determine which set of requirements any particular bicycle meets. Accordingly, the Commission has not adopted the requested change.

IV. *Additional requirements.* A. A police department suggests adding to proposed § 1512.19(d) a requirement that a uniform registration card specifying the make, model, and serial number of the bicycle and the name and address of the purchaser accompany each bicycle sold to a consumer. The purchaser could file a copy of the card with the local police department to facilitate recovery of the bicycle if stolen. The comment states that a national system of bicycle registration is needed to curb the rising incidence of bicycle thefts.

While the Commission supports the purpose of the suggestion, it does not have authority under the Federal Hazardous Substances Act to add to the bicycle regulations a requirement not intended to reduce safety hazards but rather intended to assist law enforcement agencies. The Commission therefore has not adopted the suggested change.

B. An engineer suggests that proposed § 1512.19(d) be changed to require bicycles to have a permanent label indicating the serial number. The purpose would be to facilitate recall of noncomplying bicycles. As indicated above, on January 7, 1975, the Commission proposed § 1512.19(e) requiring bicycles subject to Part 1512 to be manufactured with a permanent label indicating the name of the manufacturer or private labeler and the month and year of manufacture. The Commission's action on that proposal is announced below in this preamble. The Commission concludes that the requirements of § 1512.19(e), as issued below, will be adequate to identify bicycles subject to recall. Accordingly, the engineer's suggested change has not been adopted.

V. *Label size.* Proposed § 1512.19(d) specifies that the label to be attached to fully assembled bicycles shall be at least 6.4 cm (2.5 in) by 17.8 cm (7 in). The American National Metric Council comments that the minimum dimensions for the label, although stated in both centimeters and inches, were obviously formulated with reference to inches rather than centimeters. The Council requests that the label dimensions be formulated with reference to centimeters instead and suggests that 6.5 cm by 18 cm would result in a label approximately the same size as that specified in the Commission's proposal.

Throughout Part 1512 various dimensions, weights, forces, and other values are expressed in the metric system followed in parentheses by the equivalent values expressed in the English system. Most of these were formulated with reference to the English system of measurement. For this reason, the Commission concludes that the requested change would not improve proposed § 1512.19(d).

VI. *Effective date.* A. A retailer states that proposed § 1512.19(d) would prohibit a retailer from attaching a label indicating compliance with Part 1512 to any bicycle introduced into interstate commerce before the regulations' effective date. The Commission disagrees. Although the proposal's purpose is to require attachment of the labeling statement to every complying bicycle introduced into interstate commerce on or after such effective date, the Commission concludes that § 1512.19(d) would not prohibit use of the labeling statement on bicycles meeting the requirements of Part 1512 and introduced into interstate commerce before the effective date.

The American Academy of Pediatrics comments that retailers should be encouraged to place the label required by proposed § 1512.19(d) on complying bicycles offered for sale before the effective date of Part 1512. The Commission agrees, but cautions retailers to be certain that any bicycle introduced into interstate commerce before such effective date that is so labeled does in fact meet all of the Part 1512 requirements.

B. A consumer urges the Commission to establish an effective date for proposed § 1512.19(d) that is earlier than the effective date of § 1500.18(a)(12) and the rest of Part 1512. A manufacturer suggests that the effective date of proposed § 1512.19(d) be no earlier than that of those regulations.

A manufacturer, two retailers, and an association of retailers urge that proposed § 1512.19(d) take effect 6 months after the effective date of the rest of the bicycle regulations. Two other manufacturers urge that the effective date of proposed § 1512.19(d) be delayed for a "reasonable" period of time after the effective date of such regulations. These comments contend that if complying bicycles introduced into interstate commerce on or after the effective date of the regulations are required to be labeled to indicate compliance therewith, noncomplying bicycles manufactured before the effective date that are in dealers' inventories and are not so labeled will be difficult to sell unless they are drastically reduced in price. Several commenters state that retailers would suffer severe economic injury if proposed § 1512.19(d) takes effect on the same date as the rest of the bicycle regulations, although none give any estimate of the losses retailers might sustain.

A county consumer protection department comments that the benefit of the regulations would be diluted if consumers are unable to distinguish complying from noncomplying bicycles after the regulations become effective.

The Commission concludes that § 1512.19(d), promulgated below, should become effective on the same date as § 1500.18(a)(12) and the rest of Part 1512. The Commission finds giving an earlier effective date to § 1512.19(d) impracticable because the Commission anticipates that most manufacturers will not begin to introduce fully complying bicycles into interstate commerce before the general effective date.

The Commission is aware that the value of noncomplying bicycles in retailers' and wholesalers' inventories on the effective date of the regulations may be decreased, but observes that the effective date established for the regulations, including the labeling requirement of § 1512.19(d), is far enough in the future to allow all parties in the chain of distribution to make plans that will minimize any unfavorable economic effect. The Commission concludes that the need of consumers for a means to distinguish complying from noncomplying bicycles after the effective date outweighs any such economic harm that may result.

VII. *Duration of labeling requirement.* Proposed § 1512.19(d) limits the requirement for a compliance label to a period of two years after the effective date of the regulations. An association of consumers suggests adding to § 1512.19(d) a statement that the labeling requirement may be extended for a period of more than two years if the Commission finds that a substantial number of noncomplying bicycles are being offered for sale two years after such effective date.

Information available to the Commission from manufacturers and other parties in the chain of distribution suggests that few if any noncomplying bicycles will be offered for sale two years after such effective date. If this information proves to be incorrect, the Commission can extend the duration of the subject requirement without expressly reserving the right to do so in § 1512.19(d). Accordingly, the Commission declines to adopt the suggestion.

RESPONSE TO THE PROPOSAL OF JANUARY 7, 1975

In response to the afore-described proposal published January 7, 1975, concerning a new effective date and amendment of §§ 1512.5(c)(3), 1512.6(e), 1512.9(a), 1512.18(h)(1), and 1512.19(e), the Commission received comments from five United States bicycle manufacturers, three foreign bicycle manufacturers, an association of U.S. bicycle manufacturers, an association of French bicycle manufacturers, three manufacturers of bicycle components, an importer, two retailers, three individuals, and an association of consumers. The principal issues raised by these comments and the Commission's decisions thereon are as follows:

I. *Effective date—A. Timing of proposal.* Two foreign bicycle manufacturers, two U.S. bicycle manufacturers, an association of U.S. bicycle manufacturers, and two component manufacturers request the Commission to publish the regulations in final form before proposing an effective date. These respondents state that until they know the requirements of the regulations after final action by the Commission on the two amendment proceedings, they cannot make any meaningful comment on an appropriate effective date.

The Commission disagrees with the statement that no meaningful comment on a proposed effective date can be made until all requirements of the regulations are finalized. As stated above, the regulations were published on July 16, 1974. The amendment proceedings of January 7 and June 16, 1975, were undertaken by the Commission in response to suggestions and objections made by consumers and various segments of the bicycle industry in reaction to the regulations as promulgated on July 16, 1974. The majority of the substantive requirements of the regulations promulgated July 16, 1974, are unaffected by the two amendment proceedings. In most instances, the amendments proposed January 7 and July 16, 1975, (1) modify provisions of the regulations as requested by responses received after promulgation of the regulations on July 16, 1974; (2) relax certain requirements of those promulgated regulations; or (3) provide opportunity for comment on certain provisions of those promulgated regulations which were claimed by respondents to be substantive changes from the regulations proposed by the Commissioner of Food and Drugs on May 10, 1973.

Additionally, as indicated in the discussion above of the events leading to publication of this document, CPSC staff have met frequently with manufacturers, importers, distributors, and other interested parties to discuss the proposed amendments. During these meetings the participants have had opportunity to discuss with CPSC staff the purpose and effect of the proposed amendments and to make oral and written presentations of pertinent data, views, and opinions.

Thus, the Commission concludes that most of the requirements of the regulations that will be implemented by action on the proposed amendments are known to the bicycle industry.

Additionally, the Commission observes that five of the respondents who state that they cannot meaningfully comment on an appropriate effective date have in fact submitted comments on the proposed effective date on the basis of general experience.

B. *Establishment of effective date.* 1. As promulgated on July 16, 1974, § 1500.18(a)(12) provides that the requirements of 16 CFR Part 1512 are applicable to all bicycles "introduced into interstate commerce on or after January 1, 1975." On December 16, 1974, the Commission suspended the effective date of the regulations and, on January 7, 1975, proposed that the regulations be made applicable to all bicycles introduced into interstate commerce on or after May 1, 1975, or a date 120 days after publication of a document in the FEDERAL REGISTER acting on the proposal of January 7, 1975, whichever occurred later.

An importer requests that § 1500.18(a)(12) be changed to provide that the regulations shall be applicable to bicycles "manufactured" on or after a date that is 180 days after publication in the FEDERAL REGISTER of a document acting on the proposal of January 7, 1975. An association of U.S. bicycle manufacturers suggests that the regulations should apply to bicycles manufactured one year after such publication.

The importer states that if the regulations were applicable to bicycles manufactured on or after a specified date, enforcement would be facilitated by promulgation of proposed § 1512.18(e), which would add a requirement for a marking on the bicycle to indicate the month and year of manufacture. The importer adds that if the regulations were applicable to bicycles "manufactured" on or after a specified date, foreign manufacturers would be given the same lead time before the regulations take effect as domestic manufacturers; however, if the regulations apply to all bicycles "introduced into interstate commerce" on or after a specified date, the lead time for foreign manufacturers will be less than that for domestic manufacturers because of the time required for shipment from the place of manufacture to this country.

An English bicycle manufacturer estimates that 8 weeks are required for transportation of bicycles from England to the United States by ship and requests an effective date provision that will give foreign manufacturers a grace period of 8 weeks to compensate for shipment time.

An association of bicycle manufacturers states that some manufacturers have large inventories of furnished bicycles that were not manufactured to meet the requirements of Part 1512. The association requests revision of § 1500.18(a)(12) to make the regulations applicable to bicycles manufactured after a specified date so that manufacturers may legally sell noncomplying bicycles that are in their inventories after the regulations take effect.

The Commission anticipates that if § 1500.18(a)(12) were revised so that the requirements of Part 1512 are applicable to bicycles "manufactured" on or after a specified date, some manufacturers and distributors might be encouraged to stockpile noncomplying bicycles and compile self-serving records establishing that the manufacture of noncomplying bicycles was completed before the effective date of the regulations. Such a problem would not be overcome by amending Part 1512 to require a marking on bicycles to show the month and year of manufacture because such a requirement would be applicable only to bicycles manufactured after the effective date of the regulations.

The Commission concludes that the date of "introduction into interstate commerce" can be objectively documented more easily than the date of manufacture. While the lead time for foreign manufacturers is reduced by the time required for shipment if the effective date is established with reference to introduction into interstate commerce, the Commission concludes that the effective date can be sufficiently delayed to allow foreign manufacturers to manufacture and ship complying bicycles and domestic manufacturers to dispose of noncomplying bicycles in their inventories. For these reasons, the Commission declines to make the requested changes.

2. A manufacturer of reflectors states that several firms have completed retooling to produce reflectors complying with §§ 1512.16 and 1512.18(m) and (n) in anticipation of an effective date of January 1, 1975, and suggests establishment of an earlier effective date for those sections than for the remainder Part 1512 so that the public could obtain sooner the protection of the reflector requirements.

An association of U.S. bicycle manufacturers states that if various requirements of Part 1512 are given different effective dates, enforcement of the regulations would become "an administrative nightmare" and consumers could be confused.

The Commission agrees that enforcement of Part 1512 would be considerably more complicated if various provisions have different effective dates. The Commission also forsees a greater problem of identifying complying bicycles for consumers if the reflector requirements are made effective before the rest of Part 1512. The Commission concludes that the disadvantages outweigh the advantages of giving the reflector requirements an earlier effective date. Accordingly, a single effective date is established below, except for chain guard and certain footbrake requirements, which are discussed in 3 below.

3. An association of consumers urges the Commission to establish an effective date that is 60 days after publication in the FEDERAL REGISTER of a document acting on the proposal of January 7, 1975.

A foreign manufacturer states that an effective date that is 120 days after publication of a document acting on the proposal of January 7, 1975, would allow adequate lead time for some, but not all, of the requirements of Part 1512.

Two U.S. bicycle manufacturers request establishment of an effective date that is 180 days after publication of a document acting on the proposal of Jan-

V 40 N 220 NOV 13 75 XUM

uary 7, 1975. An importer, a component manufacturer, a retailer, a foreign bicycle manufacturer, two brake manufacturers and an association of French bicycle manufacturers suggest effective dates varying from 240 to 340 days after such publication. The majority of foreign and domestic bicycle manufacturers and associations request the effective date for "chain guard" requirements be set at one year after the date of publication of a document acting on the proposed amendments. Some of these submitted schedules indicating the time needed for such activities as redesigning, retooling, manufacturing, testing, and shipping bicycles meeting the requirements. Some state that the effective dates requested will allow time for depletion of inventories of finished bicycles and components that do not comply with Part 1512 and time for production of complying bicycles.

The Commission appreciates that almost all manufacturers will be required to make some modifications of their current production to comply with Part 1512. The Commission also appreciates that if a manufacturer were making a modification of his product on his own initiative, he might allow approximately one year to change over to production of a new model. The Commission observes, however, that the purpose of the bicycle banning and safety regulations is to reduce risks of injury associated with bicycles, and that to the extent modification of current production is required to comply with the regulations, a greater urgency exists for such modification than in the case of a routine model change initiated by a manufacturer.

As indicated above, a substantial portion of Part 1512 as promulgated on July 16, 1974, is unchanged by the amendments proposed on January 7 and June 16, 1975. In many cases the proposed amendments relax or clarify requirements of Part 1512. Almost all of the proposed amendments result from requests submitted after the regulations were promulgated.

In May, 1975, CPSC staff inspected production facilities of five U.S. bicycle manufacturers. Information resulting therefrom indicates that most current bicycle models would require only a few modifications to comply with Part 1512 and, with the exception of those changes needed for compliance with the chain guard and certain foot brake requirements, that the modifications could be accomplished and production of fully complying bicycles could begin within 120 days after publication of this document in the FEDERAL REGISTER. Accordingly, the amendment of § 1500.18(a)(12) below provides that the requirements of Part 1512 shall be applicable to bicycles introduced into interstate commerce on or after May 11, 1976, except for §§ 1512.5(c)(3), 1512.9(a), 1512.18(c) and 1512.18(f) which become effective November 13, 1976.

II. *Footbrake crank differential.* When the bicycle regulations were proposed by the Commissioner of Food and Drugs on May 10, 1973, the provisions applicable to bicycles equipped with footbrakes included a requirement that the differential angle between the drive position and the brake position of the crank could not exceed 45 degrees. The proposal of May 10, 1973, did not specify the torque, if any, to be applied to the crank when measuring the differential angle.

As promulgated July 16, 1974, Part 1512 established 60 degrees as the maximum differential angle between the drive and brake positions of a bicycle equipped with footbrakes, and specified that a torque of 13.6 N-m (10 ft-lb) shall be applied to the crank in both the drive and brake positions when measuring the crank differential.

Many responses object to the addition of the requirement for the application of the specified torque when measuring the crank differential, stating that no opportunity had been provided to comment on this additional requirement.

On January 7, 1975, the Commission proposed a revision of § 1512.5(c)(3) specifying that the differential angle between the drive and brake positions of the crank shall not exceed 60 degrees and shall be measured with the crank held against each position under a torque of 13.6 N-m (10 ft-lb). This requirement is the same as that of § 1512.5(c)(3) promulgated on July 16, 1974, and was proposed to provide opportunity for comment by interested parties.

A manufacturer of coaster brakes requests the Commission to modify proposed § 1512.5(c)(3) by establishing the maximum differential angle at 75 degrees and by specifying that an 18.5-pound pedal force shall be applied to a bicycle, and a 13.2-pound pedal force to a sidewalk bicycle, when measuring the crank differential.

The manufacturer states that at the present time the same type of coaster brake is used for all sizes of bicycles, including sidewalk bicycles, and that if § 1512.5(c)(3) is adopted as proposed on January 7, 1975, manufacturers will not be able to use the same brake for sidewalk bicycles that is used for bicycles with wheel diameters of 20 inches and greater. The manufacturer states that if coaster brakes for sidewalk bicycles must be redesigned to meet the requirements of proposed § 1512.5(c)(3), those brakes will require application of a greater amount of force to the pedal and may reduce, rather than improve, the brake performance of sidewalk bicycles.

The manufacturer contends that no evidence is available to establish that a crank differential of 60 degrees would reduce risks of injury below those that would be present if the maximum angle were established at 75 degrees. He adds that if proposed § 1512.5(c)(3) were modified as requested, the same coaster brake could be used for both sidewalk bicycles and bicycles with wheel diameters of 20 inches and greater and that the force required to actuate the footbrake on a sidewalk bicycle would not be increased.

Two U.S. bicycle manufacturers state that they do not produce their own coaster brakes and therefore defer to the views of any brake manufacturer who may comment on proposed § 1512.5(c)(3).

The Commission observes that most of the requirements of Part 1512, including § 1512.5(c)(3), as promulgated July 16, 1974, and proposed on January 7, 1975, are intended to reflect levels of performance that can be achieved by bicycles currently offered for sale. Available information indicates that several bicycle models, including sidewalk bicycles, will be available with coaster brakes that can meet the requirements of proposed § 1512.5(c)(3) for a crank differential of 60 degrees or less when measured with a torque of at least 13.2 N-m (10 ft-lb) applied to the crank in both the drive and pedal positions.

The Commission concludes that a limitation of 60 degrees on the differential angle between the drive and brake positions of a bicycle equipped with a footbrake is necessary to restrict the distance that the crank must be turned back and the time required to actuate the footbrake. The Commission also concludes that a relaxation of the maximum angle of crank differential from 60 degrees to 75 degrees could increase risks of injury to bicyclists in emergencies when rapid application of the footbrake is required.

Accordingly, the Commission declines to make the requested changes.

III. *Steering system.* On January 7, 1975, the Commission proposed to amend § 1512.6(e), which prescribes requirements for the handlebars and clamps, and § 1512.18(h)(1), which prescribes the procedure and criteria for testing the handlebar stem-to-fork clamp. As promulgated July 16, 1974, §§ 1512.6(e) and 1512.18(h)(1) required that the bicycle handlebar stem-to-fork clamp be capable of withstanding a torque of 67.5 N-m (50 ft-lb) and that the sidewalk bicycle handlebar stem-to-fork clamp be capable of withstanding a torque of 47.2 N-m (35 ft-lb), without movement of the handlebars relative to the front fork.

The revisions of §§ 1512.6(e) and 1512.18(h)(1) proposed on January 7, 1975, would require that a bicycle handlebar stem-to-fork clamp be able to withstand a torque of 47.2 N-m (35 ft-lb) and the sidewalk bicycle handlebar stem-to-fork clamp be able to withstand a torque of 20.4 N-m (15 ft-lb), without movement of the handlebars relative to the front fork.

Additionally, proposed § 1512.6(e) contains a requirement for instructions to warn against the danger of overtightening the stem bolt that was not in the promulgation of July 16, 1974.

A. *Assembly instructions.* 1. A manufacturer states that by stressing the danger of overtightening the stem bolt, while not warnnig against undertightening, proposed § 1512.6(e), if adopted, may cause the consumer to undertighten the stem bolt and create a loose stem-to-fork assembly more dangerous than an overtightened stem bolt.

The danger from overtightening is well documented and is stressed because its effects are not readily apparent to the consumer. The effects of undertightening the stem bolt will be obvious to a consumer because an undertightened handlebar will give under the normal pressure the consumer will exert in setting it, thereby alerting the consumer to the need for additional tightening. Accordingly, the Commission concludes that an additional requirement for instructions to warn against undertightening the stem bolt is unnecessary.

2. Another manufacturer states that proposed § 1512.6(e) is design restrictive regarding clamping devices because devices other than stem bolts, such as clamping collars or set screws, could meet the performance requirements.

The Commission agrees. Therefore, the words "or other clamping device" have been added after "stem bolt" in § 1512.6(e) promulgated below.

B. *Test procedure.* 1. Proposed § 1512.18(h)(1)(i) states that the handlebar and handlebar stem "shall be assembled in accordance with the manufacturer's instructions" and prescribes application of a torque about the axis of the stem of the handlebar assembly. A manufacturer suggests that this could be misinterpreted as requiring the handlebar and handlebar stem to be subjected to the torque test as individual components.

The Commission agrees that a literal reading of proposed § 1512.18(h)(1)(i) could result in this unintended interpretation. Accordingly, the pertinent portion of the first sentence of § 1512.18(h)(1)(i) promulgated below has been changed to read "shall be assembled to the bicycle in accordance with the manufacturer's instructions."

2. Proposed § 1512.18(h)(1)(i) provides that after the handlebar stem-to-fork clamp is subjected to the specified torque, it shall be disassembled and examined for "signs of structural damage including cracking, splitting, excessive galling, gouging, scoring, bulging of the stem and fork structures, stripping of threads, and bearing damage." Two manufacturers and an association of manufacturers object to the enumeration of various types of "structural damage" because "galling", "gouging", or "scoring" may be caused by the assembly and disassembly process independently of the "torque test."

One manufacturer and the association also object to the word "excessive" in "excessive galling" because it is inherently subjective.

Another manufacturer states that signs of gouging or scoring may occur during assembly and disassembly because the use of a set screw arrangement as a clamping device requires metal-to-metal contact between the set screw and the handlebar stem. This set screw is used extensively in the manufacture of sidewalk bicycles. The manufacturer requests exemption of sidewalk bicycles from the requirements of proposed § 1512.18(h)(1)(i).

Enumerating the structural damage was done to give the consumer a sense of confidence in the overall integrity of the steering system by enumerating some of the types of structural damage that may occur as a result of a faulty system.

The Commission agrees that the use of set screws as a clamping device may cause some galling, gouging, or scoring marks on the handlebar-fork components during normal assembly and disassembly operations. The Commission also agrees that the word "excessive" preceding "galling" is inappropriate.

Accordingly, § 1512.18(h)(1)(i) promulgated below has been changed to permit the use of set screws and/or other clamping devices used for sidewalk bicycles that may cause some visible signs of galling, gouging, or scoring during assembly and disassembly, but that do not structurally degrade the steering system. Also, the term "excessive" has been deleted.

C. *Test criteria.* 1. In the proposal of January 7, 1975, the Commission intended to propose a revision of the handlebar stem-to-fork test in § 1512.18(h)(1)(ii) to specify that a torque no less than 47.2 N-m (35 ft-lb) and no greater than 49.91 N-m (37 ft-lb) shall be applied to the handlebar stem of a bicycle and no less than 20.4 N-m (15 ft-lb) and no greater than 23.11 N-m (17 ft-lb) to the handlebar stem of a sidewalk bicycle. A manufacturer notes that the first sentence of proposed § 1512.18(h)(1)(ii) contains typographical errors in the specification of the torque levels to be applied to bicycles and sidewalk bicycles.

In addition to eliminating the typographical errors noted by the comment, the Commission has rounded the torque value to 47 N-m (35 ft-lb) for a bicycle and 20 N-m (15 ft-lb) for a sidewalk bicycle and rounded the upper limit of the tolerance to 3 N-m (2 ft-lb) in § 1512.18(h)(2)(ii) promulgated below.

2. A manufacturer objects to the requirement of proposed § 1512.18(h)(1)(ii) prohibiting any "visible movement" between the stem and fork when the specified torque is applied, contending that it is design restrictive. The manufacturer states that future design might employ the use of a key or other device that will allow a limited amount of rotational movement of the handlebar stem to the fork stem without sacrificing any steering security, and requests that an allowable limit of rotational movement, not to exceed five degrees, be added to § 1512.18(h)(1)(ii).

While the Commission does not intend to stifle technological advances in design and safety, it concludes that an allowance for any degree of rotational movement between the stem and the fork would not be in the interest of public safety. Accordingly, the requested change has not been made.

3. An association of foreign manufacturers claims that the torque specified in proposed § 1512.18(h)(1)(ii) is far in excess of a safe level, is unjustified, and will add unnecessary expense and weight to the bicycle.

As indicated above, the torque levels specified in proposed § 1512.18(h)(1)(ii) have been reduced from 67.5 N-m (50 ft-lb) specified for bicycles and from 47.2 N-m (35 ft-lb) for sidewalk bicycles in that regulation as originally promulgated July 16, 1974.

The Commission declines to make any further reductions. This decision is based on an examination of injury data and on engineering tests performed by the Commission's staff on an appropriate means to reduce risks of injury presented by the slippage of the handlebar stem-to-fork assembly.

IV. *Protective chain guard.* As promulgated July 16, 1974, § 1512.9(a) requires bicycles that are not capable of being free-wheeled in a direction opposite to the drive direction to have a chain guard that would cover the point where the chain engages the sprocket. The regulation further describes performance requirements for such a chain guard.

The revision of § 1512.9(a) proposed on January 7, 1975, requires that the top strand of the chain and at least 50 percent of the perimeter where the drive chain contacts the drive sprocket be covered by a guard. The proposed revision also changes application of the chain guard requirement from bicycles "having a single sprocket ratio that cannot be free-wheeled in a direction opposite to the drive direction" to simply bicycles "having a single front sprocket." (As adopted below, this has been expanded to bicycles "having a single front sprocket and a single rear sprocket.") The other requirements of proposed § 1512.9(a) are the same as promulgated July 16, 1974.

A. *Coverage.* 1. A manufacturer states that a meeting with CPSC staff on February 3, 1975, gave him the impression that proposed § 1512.9(a) is intended to be applicable only to bicycles with coaster brakes. No such limitation was intended by the Commission regarding proposed § 1512.9(a), and no such limitation is intended regarding its promulgation below. The Commission intends that § 1512.9(a) shall apply to all bicycles except those specifically excluded therein.

2. An importer, a foreign manufacturer, and a U.S. manufacturer state that bicycles having a single front sprocket, specifically, 5-speed models, are equipped with a rear derailleur or tensioning device that will relieve chain tension if clothing becomes entrapped between the drive chain and sprocket, thereby obviating the need for a guard to cover the top strand of the chain.

The Commission agrees. Accordingly, § 1512.9(a) promulgated below excludes bicycles with a chain-tensioning device from its coverage.

B. *Size of chain guard.* Several commenters question whether any safety justification exists for the requirement that the chain guard must cover the top strand of the chain and at least 50 percent of the perimeter where the drive chain contacts the drive sprocket. An association of manufacturers and three manufacturers question the need for a guard to cover the entire top strand of the chain and contend that a potential hazard exists only at the point where the drive chain contacts the drive sprocket.

V 40 N 220 NOV 13 75 XUM

They state that they are unaware of any injuries that have occurred because the drive chain carried clothing forward into the junction of the chain and drive sprocket.

One manufacturer suggests changing proposed § 1512.9(a) to require that the chain guard cover "those areas of the drive chain which would be contactable by the clothing of a rider."

A study by CPSC staff of in-depth accident investigations compiled by CPSC's National Electronic Injury Surveillance System indicates that 36 injuries were caused by chain-sprocket-guard interfaces. Three of these injuries involved clothing that had become entangled with the chain because of inadequate protection of the chain and resulted when the rider could not remove the clothing entangled in a tight chain in time to avoid an accident. In the judgment of the Commission, these accidents could have been avoided if a guard covering the top strand of the chain had been present on the bicycle.

This study did not reveal any injuries resulting from entanglement of clothing in the area above and forward of the bicycle's rear sprocket. As promulgated below, therefore, § 1512.9(a) makes allowance for manufacturers' fabrication and assembly tolerances and permits the chain to be unguarded a maximum distance of 8 cm (3.2 in) forward of the centerline of the rear axle. It also allows the top surface of the chain guard to be partially unguarded in the area near the rear wheel.

Bicycles are generally designed with a centerline of the drive sprocket somewhat lower than the centerline of the rear sprocket. Because of this design practice, the requirement in proposed § 1512.9(a) that the chain guard must cover at least 50 percent of the perimeter where the chain contacts the drive sprocket could require the chain guard to cover slightly more than 90 degrees of the sprocket teeth. When the Commission proposed § 1512.9(a), it did not intend to require that more than 90 degrees of the drive sprocket be covered by the chain guard. Accordingly, § 1512.9(a) as promulgated below has been changed to reflect that intent and assure a uniform requirement.

The Commission finds that the requirement of proposed § 1512.9(a) for coverage of the perimeter of the drive sprocket is necessary to prevent injuries caused by entanglement of clothing. The requirement is therefore included in § 1512.9(a) and figure 7 promulgated below.

V. *Identification labeling.* Proposed § 1512.19(e) requires that bicycles subject to Part 1512 bear a permanent marking on the frame from which the manufacturer can identify the month and year of manufacture or the private labeler can identify the manufacturer and the month and year of manufacture. The date of manufacture is defined as the completion by the manufacturer of those construction and assembly operations that are performed by the manufacturer before the bicycle is shipped for sale to distributors, retailers, or consumers.

A. Four manufacturers, a retailer, and a foreign association of bicycle manufacturers request clarification of "permanent marking on the bike frame." Several ask whether the provision would permit use of permanent pressure-sensitive labels or decals, silk-screen printing, and similar markings on the frame. Two manufacturers and the foreign association suggest that proposed § 1512.19(e) be changed to allow the use of a permanent marking securely affixed to the bicycle frame, such as a metal plate or a metal identification ring.

The purpose of proposed § 1512.19(e) is (1) to provide the Commission with a means to determine which requirements any given bicycle must meet in the event Part 1512 is substantively amended after its effective date and (2) to facilitate identification of bicycles subject to recall that may be in channels of distribution or in the hands of consumers. To achieve this end, the Commission agrees that proposed § 1512.19(e) should be modified to permit the use of permanent labels, decals, metal plates, and other marking devices that are attached or applied to the frame of the bicycle.

Accordingly, § 1512.19(e) promulgated below prescribes that the required information shall be securely affixed on or to the frame of the bicycle by means of a marking or label that cannot be removed without being defaced or destroyed.

B. An association of bicycle dealers asks that, at a minimum, the name and address of the original manufacturer be required as part of the labeling requirements of proposed § 1512.19(e) in order to facilitate efficient, safe service of bicycles subject to Part 1512.

Although the requested change might reduce the risks of injury caused by repairs utilizing improperly fitted parts, its principal purpose is to assist persons who repair and service bicycles rather than to enhance the safety of bicycles. The Commission observes that § 1512.19(a)(3) requires the bicycle to be accompanied by an instruction manual that shall include instructions for proper maintenance of brakes, control cables, bearings, wheels, reflectors, tires, handlebars, seat, etc., or, if such maintenance is beyond the capability of the consumer, locations where such maintenance service can be obtained.

The Commission concludes that the provisions of § 1512.19 as amended below are adequate and therefore decline to make the requested change.

Conclusion and Promulgation

Having considered the proposals of July 16, 1974, and January 7, 1975, the comments responding thereto, and other relevant material, the Commission concludes that the bicycle regulations should be amended as set forth below and that a new effective date for the regulations as amended should be established as specified below.

Therefore, pursuant to provisions of the Federal Hazardous Substances Act (secs. 2(f)(1)(D), (q)(1)(A), (s), 3(e)(1), 74 Stat. 372, 374, 375, as amended 80 Stat. 1304–05, 83 Stat. 187–89; 15 U.S.C. 1261, 1262) and under authority vested in the Commission by the Consumer Product Safety Act (sec. 30(a), Pub. L. 92–573, 86 Stat. 1231; 15 U.S.C. 2079(a)):

1. A new effective date is established for 16 CFR 1500.18(a)(12) and 16 CFR Part 1512 as amended in this document and in another document also published in this issue of the Federal Register. The effective date of these regulations was suspended by an order published December 16, 1974 (39 FR 43536). The new effective date is specified at the end of this document.

2. Section 1500.18(a)(12) is revised to read as follows (although unchanged, the introductory text of § 1500.18(a) is included below for context):

§ 1500.18 Banned toys and other banned articles intended for use by children.

(a) *Toys and other children's articles presenting mechanical hazards.* Under the authority of section 2(f)(1)(D) of the act and pursuant to provisions of section 3(e) of the act, the Commission has determined that the following types of toys or other articles intended for use by children present a mechanical hazard within the meaning of section 2(s) of the act because in normal use, or when subjected to reasonably foreseeable damage or abuse, the design or manufacture presents an unreasonable risk of personal injury or illness:

* * * * *

(12) Any bicycle as defined in § 1512.2(a) of this chapter (except a bicycle that is a "track bicycle" or a "one-of-a-kind bicycle" as defined in § 1512.2(d) and (e) of this chapter) that is introduced into interstate commerce on or after May 11, 1976, and that does not comply with the requirements of Part 1512 of this chapter, except for §§ 1512.5(c)(3), 1512.9(a), 1512.18(e) and 1512.18(f) which become effective November 13, 1976.

* * * * *

3. Section 1512.5(c)(3) is revised to read as follows:

§ 1512.5 Requirements for braking system.

* * * * *

(c) *Footbrakes.* * * *

(3) *Crank differential.* The differential between the drive and brake positions of the crank shall be not more than 60° with the crank held against each position under a torque of no less than 13.6 N-m (10 ft-lb).

* * * * *

4. Section 1512.6(e) is revised to rend as follows:

§ 1512.6 Requirements for steering system.

* * * * *

(e) *Handlebar and clamps.* The handlebar and clamps shall be tested in accordance with the handlebar test, § 1512.18(h). Directions for assembly of the bicycle required in the instruction manual by § 1512.19(a)(2) shall include an explicit warning about the danger of damaging the stem-to-fork assembly and the risk of injury to the rider that can result from overtightening the stem bolt or other clamping device. The directions for assembly shall also contain a simple, clear, and precise statement of the procedure to be followed to avoid damaging the stem-to-fork assembly when tightening the stem bolt or other clamping device.

* * * * *

5. Section 1512.9(a) is revised to read as follows and a new figure 7 is added:

§ 1512.9 Requirements for protective guards.

* * * * *

(a) *Chain guard.* Bicycles having a single front sprocket and a single rear sprocket shall have a chain guard that shall cover the top strand of the chain and at least 90° of the perimeter where the drive chain contacts the drive sprocket as shown in figure 7. The chain guard shall extend rearward to a point at least 8 cm (3.2 in) forward of the centerline of the rear axle. The minimum width of the top area of the chain guard shall be twice the width of the chain in that portion forward of the rear wheel rim. The rear part of the top area may be tapered. The minimum width at the rear of the guard shall be one-half the chain width. Such chain guard shall prevent a rod of 9.4 mm (⅜ in) diameter and 76 mm (3.0 in) length from entrapment between the upper junction of the chain and the sprocket when introduced from the chain side of the bicycle in any direction within 45° from a line normal to the sprocket.

* * * * *

6. Section 1512.18(h)(1) is revised to read as follows:

§ 1512.18 Test and test procedures.

* * * * *

(h) *Handlebar test.* (Ref. § 1512.6(e))

(1) *Stem-to-fork clamp test*—(i) *Procedure.* The handlebar and handlebar stem shall be assembled to the bicycle in accordance with the manufacturer's instructions. The handlebar-fork assembly shall be subjected to a torque applied about the axis of the stem, and shall then be disassembled and examined for signs of structural damage including cracking, splitting, stripping of threads, bearing damage, and bulging of the stem and fork structures. The handlebar and handlebar stem components shall be inspected for visible signs of galling, gouging, and scoring not due to normal assembly and disassembly operations.

(ii) *Criteria.* There shall be no visible movement between the stem and fork when a torque of 47+3, 0 N-m (35+2, −0 ft-lb) for bicycles and 20+3, −0 N-m (15+2, −0 ft-lb) for sidewalk bicycles is applied to the handlebar about the stem-to-fork axis. There shall be no visible signs of damage to the stem-fork assembly or any component part thereof.

* * * * *

7. Section 1512.19 is amended by adding paragraphs (d) and (e) as follows:

§ 1512.19 Instructions and labeling.

* * * * *

(d) Every bicycle subject to the requirements of this Part 1512 and introduced into interstate commerce on or after May 11, 1976 through May 11, 1978, shall be labeled with the statement "Meets U.S. Consumer Product Safety Commission Regulations for Bicycles."

(1) Every such bicycle, displayed or offered for sale to consumers in a fully assembled condition, shall bear a label (such as a hang tag) at least 6.4 cm (2.5 in) by 17.8 cm (7 in) setting forth the required labeling statement legibly and conspicuously in capital letters at least 0.6 cm (0.25 in) high. No other words or symbols may appear on the label.

(2) The required labeling statement shall appear legibly and conspicuously in capital letters at least 1.3 cm (0.5 in) high on the retail carton of every such bicycle offered for sale to consumers in an unassembled or partially assembled condition.

(e) Every bicycle subject to the requirements of this Part 1512 shall bear a marking or label that is securely affixed on or to the frame of the bicycle in such a manner that the marking or label cannot be removed without being defaced or destroyed. The marking or label shall identify the name of the manufacturer or private labeler and shall also bear some form of marking from which the manufacturer can identify the month and year of manufacture or from which the private labeler can identify the manufacturer and the month and year of manufacture. For purposes of this paragraph, the term "manufacture" means the completion by the manufacturer of a bicycle of those construction or assembly operations that are performed by the manufacturer before the bicycle is shipped from the manufacturer's place of production for sale to distributors, retailers, or consumers.

* * * * *

Effective date. The bicycle banning and safety regulations, 16 CFR 1500.18(a)(12) and Part 1512, promulgated July 16, 1974 (39 FR 26100), and suspended December 16, 1974 (39 FR 43536), shall, as amended above in this document and as amended by another document also in this issue of the Federal Register, become effective May 11, 1976, except for §§ 1512.5(c)(3), 1512.9(a), 1512.18(e) and 1512.18(f) which become effective November 13, 1976.

(Secs. 2(f)(1)(D), (q)(1)(A), (s), 3(e)(1), 74 Stat. 372, 374, 375, as amended 80 Stat. 1304–05, 83 Stat. 187–89 (15 U.S.C. 1261, 1262))

Although the Consumer Product Safety Commission does not consider Executive Order 11821 to apply to public safety regulations of this nature, the economic and inflationary impact of the regulation has been studied and is on file at the Commission.

The Commission has considered the possible environmental effects of the bicycle regulation and has determined that the environmental impact of the regulations as issued and amended is negligible. On the basis of this assessment, the Commission believes that no environmental impact statement is necessary. A copy of the environmental assessment is on file at the Commission.

Dated: November 7, 1975.

Sadye E. Dunn,
Secretary, Consumer Product Safety Commission.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 971—LETTUCE GROWN IN LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

Expenses and Rate of Assessment

This document authorizes the South Texas Lettuce Committee to spend $20,200 for its operations during the fiscal period ending July 31, 1976, and to collect one cent ($0.01) per carton on assessable lettuce handled by first handler's to defray such expenses.

The committee is the administrative agency established under Marketing Agreement No. 144 and Order No. 971 (7 CFR Part 971), regulating the handling of lettuce grown in the Lower Rio Grande Valley in South Texas. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

Notice was published in the October 24 FEDERAL REGISTER (40 FR 49791) regarding the proposals. It afforded interested persons an opportunity to file written comments not later than November 6, 1975. None was filed.

After consideration of all relevant matters, including the proposals set forth in the notice, it is found that the following expenses and rate of assessment should be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular fiscal period shall apply to all assessable lettuce from the beginning of such period.

Section 971.215 is added as follows:

§ 971.215 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending July 31, 1976, by the South Texas Lettuce Committee for its maintenance and functioning and for such other purposes as the Secretary may determine to be appropriate will amount to $20,200.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be one cent ($0.01) per carton of assessable lettuce handled by him as the first handler during the fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve to the extent authorized in § 971.43(a)(2).

(d) Terms used in this section have the same meaning as when used in the marketing agreement and this part.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: November 7, 1975.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.75-30574 Filed 11-12-75;8:45 am]

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

[FmHA Instruction 444.5]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Rural Area

Section 1822.83(j) of Subpart D of Part 1822, Title 7, Code of Federal Regulations (40 FR 4278) is revised to implement changes made in the Rural Housing loan program by Public Law 93–383, Housing and Community Development Act of 1974, which allows Rural Rental Housing loans in communities of up to 20,000 population in certain cases. It is the general policy of the Department of Agriculture to allow time for interested parties to take part in the rulemaking process; however, inasmuch as this revision implements the Housing and Community Development Act of 1974, it is being published without notice of proposed rulemaking because such notice would delay provision of needed rental housing to communities and would be contrary to the public interest.

In accordance with the spirit of that policy, interested parties may submit written comments, suggestions, data or arguments to the office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250, on or before December 15, 1975. Material thus submitted will be evaluated and acted upon in the same manner as if this document were a proposal. However, this section of Subpart D of Part 1822, as revised, will remain effective until it is further amended.

As revised § 1822.83(j) reads as follows:

§ 1822.83 Definitions.

* * * * * *

(j) "Rural area" is open country or rural places as defined in § 1822.3(c).

* * * * * *

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Asst. Secretary for Rural Development, 7 CFR 2.70.)

Effective date. This revision shall become effective November 13, 1975.

Date: November 5, 1975.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A–107.

JOSEPH R. HANSON,
Acting Administrator, Farmers Home Administration.

[FR Doc.75-30577 Filed 11-12-75;8:45 am]

[FmHA Instruction 444.8]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Rural Area

Section 1822.263(c) of Subpart G of Part 1822, Title 7, Code of Federal Regulations (35 FR 10687) is revised to implement changes made in the Rural Housing loan program by Public Law 93–383, an amendment to the Housing and Community Development Act of 1974, which allows Rural Housing site loans in communities of up to 20,000 population in certain cases.

It is the general policy of the Department of Agriculture to allow time for interested parties to take part in the rulemaking process; however, inasmuch as this revision implements the Housing and Community Development Act of 1974, it is being published without notice of proposed rulemaking because such notice would delay provision of needed housing to communities and would be contrary to the public interest.

In accordance with the spirit of that policy, interested parties may submit written comments, suggestions, data or arguments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, United States Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250, on or before December 15, 1975. Material thus submitted will be evaluated and acted upon in the same manner as if this document were a proposal. However, this section of Subpart G of Part 1822, as revised, will remain effective until it is further amended.

As revised, § 1822.263(c) reads as follows:

§ 1822.263 Definitions.

* * * * * *

(c) "Rural area" is open country or rural places as defined in § 1822.3(c).

* * * * * *

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Asst. Secretary for Rural Development, 7 CFR 2.70.)

Effective date. This revision shall become effective November 13, 1975.

Date: November 5, 1975.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A–107.

JOSEPH R. HANSON,
Acting Administrator, Farmers Home Administration.

[FR Doc.75-30576 Filed 11-12-75;8:45 am]

[FmHA Instruction 444.10]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Rural Area

Section 1822.323(c) of Subpart I of Part 1822, Title 7, Code of Federal Regulations (35 FR 11226) is revised to implement changes made in the Rural Housing loan program by Public Law 93–383, an amendment to the Housing and Community Development Act of 1974, which allows Technical Assistance funds to finance programs of technical and supervisory assistance for self-help housing to be built in communities of up to 20,000 population in certain cases.

It is the general policy of the Department of Agriculture to allow time for interested parties to take part in the rulemaking process; however, inasmuch as this revision implements the Housing and Community Development Act of 1974, it is being published without notice of proposed rulemaking because such notice would delay provision of needed rental housing to communities and would be contrary to the public interest.

In accordance with the spirit of that policy, interested parties may submit written comments, suggestions, data or arguments to the office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250, on or before December 15, 1975. Material thus submitted will be evaluated and acted upon in the same manner as if this document were a proposal. However, this section of Subpart I of Part 1822, as revised, will remain effective until it is further amended.

As revised, § 1822.323(c) reads as follows:

§ 1822.323 Definitions.

* * * * * *

(c) "Rural area" is open country or rural places as defined in § 1822.3(c).

* * * * * *

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Asst. Secretary for Rural Development, 7 CFR 2.70.)

Effective date. This revision shall become effective November 13, 1975.

Dated: November 5, 1975.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A–107.

JOSEPH R. HANSON,
Acting Administrator, Farmers Home Administration.

[FR Doc.75-30578 Filed 11-13-75;8:45 am]

PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

Size Tolerances for Undersized Prunes

On October 2, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 45443) regarding a proposal to amend the Administrative Rules and Regulations (7 CFR 993.101–993.174) to provide additional tolerances to those currently prescribed in paragraph (g) of § 993.150 for prunes disposed of by handlers as undersized prunes. The subpart is operative pursuant to the marketing agreement, as amended, and Order No. 993, as amended, regulating the handling of dried prunes produced in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Interested persons were given until October 17, 1975, to submit written data, views, or arguments with respect to the proposal. None were submitted.

Section 993.150(g)(3) currently contains tolerances for use whenever an undersized regulation prescribes openings of 23/32 of an inch for French prunes and 28/32 of an inch for non-French prunes. On September 15, 1975, an action was published in the FEDERAL REGISTER (40 FR 42530; 7 CFR 993.400) modifying the openings prescribed in § 993.49(c) to permit undersized regulations to prescribe openings of 24/32 of an inch for French prunes and 30/32 of an inch for non-French prunes. Thus, it is necessary to prescribe tolerances for use whenever an undersized regulation prescribes those larger openings.

Consistent with this, the Committee recommended the following tolerances: For any quantity of French prunes disposed of by a handler in compliance with § 993.50(g), the quantity shall not contain more than 12 percent by weight of prunes which do not pass freely through a round opening of $^{24}/_{32}$ of an inch in diameter; and for any quanity of non-French prunes so disposed of, the quantity shall not contain more than 12 percent by weight of prunes which do not pass freely through a round opening of $^{30}/_{32}$ of an inch in diameter.

After consideration of all relevant matter presented, including that in the notice, the recommendation of the Committee, and other available information, it is found that prunes disposed of as undersized prunes subject to the tolerances prescribed in this action are reasonably comparable in size to those prunes determined by the inspection service as undersized in the incoming evaluation, and that the additional tolerances prescribed herein should be established to accomplish the purposes of the act and the efficient administration of the order.

It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) This proposal was unanimously recommended by the Prune Administrative Committee, and

V 40 NO 220 NOV 13 75 XUM

handlers and producers are aware of this action; (2) prunes received by handlers are being size-graded resulting in the accumulation of undersized prunes; (3) handlers are preparing to dispose of those prunes, and this action should be made effective on the date provided at the end of this action to enable handlers to use the tolerances as soon as possible; (4) this action imposes no restrictions on handlers; and (5) no useful purpose would be served by postponing its effective time.

Therefore, paragraph (g)(3) of § 993.150 of Subpart—Administrative Rules and Regulations is revised to read as follows:

§ 993.150 Disposition of prunes by handlers.

* * * * *

(g) * * *

(3) *Tolerances permitting a deviation in prune sizes from applicable undersized openings.* (i) *Undersized French prunes.* Whenever an undersized regulation specifies an opening of $2^{3}/_{32}$ of an inch for French prunes, any quantity of French prunes disposed of by a handler in compliance with § 993.50(g) shall not contain more than 15 percent by weight of prunes which do not pass freely through a round opening $2^{1}/_{32}$ of an inch in diameter. Whenever an undersized regulation specifies an opening of $2^{1}/_{32}$ of an inch in diameter for French prunes, any quantity of French prunes disposed of by a handler in compliance with § 993.50(g) shall not contain more than 12 percent by weight of prunes which do not pass freely through a round opening $2^{0}/_{32}$ of an inch in diameter.

(ii) *Undersized non-French prunes.* Whenever an undersized regulation specifies an opening of $2^{3}/_{32}$ of an inch for non-French prunes, any quantity of non-French prunes disposed of by a a handler in compliance with § 993.50(g) shall not contain more than 10 percent by weight of prunes which do not pass freely through a round opening $2^{0}/_{32}$ of an inch in diameter. Whenever an undersized regulation specifies an opening of $2^{0}/_{32}$ of an inch in diameter for non-French prunes, any quantity of non-French prunes disposed of by a handler in compliance with § 993.50(g) shall not contain more than 12 percent by weight of prunes which do not pass freely through a round opening $2^{3}/_{32}$ of an inch in diameter.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: November 7, 1975, to become effective November 17, 1975.

CHARLES R. BRADER,
Deputy Director,
Fruit and Vegetable Division.

[FR Doc.75-30657 Filed 11-12-75;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 78—BRUCELLOSIS

Brucellosis Areas

The amendments delete the following areas from the list of Modified Certified Brucellosis Areas in § 78.21 and add such areas to the list designated as Noncertified Areas in § 78.22 because it has been determined that they no longer come within the definition of a Modified Certified Brucellosis Area in § 78.1(m): Macon County in Missouri; LeFlore and Pushmataha Counties in Oklahoma; McMullen, Robertson, and Starr Counties in Texas.

The amendments delete the following areas from the list of Noncertified Areas in § 78.22 and add such areas to the list designated as Modified Certified Brucellosis Areas in § 78.21 because it has been determined that they again come within the definition of a Modified Certified Brucellosis Area in § 78.1(m): Angelina, Chambers, Falls, Fannin, Galveston, Goliad, Hunt, Kleberg, Lavaca, Lubbock, McLennan, Morris, Orange, Red River, Runnels, Sabine, Shelby, Stephens, Taylor, Uvalde, Wichita, and Wilbarger Counties in Texas.

The amendments delete the following areas from the list of Certified Brucellosis-Free Areas in § 78.20 and add such areas to the list designated as Noncertified Areas in § 78.22 because it has been determined that they no longer come within the definition of a Brucellosis-Free Area in § 78.1(l): Corson County in South Dakota; Ector, Newton, and Reeves Counties in Texas.

The amendments delete the following areas from the list of Noncertified Areas in § 78.22 and add such areas to the list designated as Certified Brucellosis-Free Areas in § 78.20 because it has been determined that they again come within the definition of a Certified Brucellosis-Free Area in § 78.1(l): Big Horn, Cascade, Elaine, Fergus, Garfield, Glacier, Golden Valley, Judith Basin, Liberty, Musselshell, Pondera, Prairie, Roosevelt, Stillwater, and Yellowstone Counties in Montana; Brewster County in Texas.

The amendments delete the following areas from the list of Modified Certified Brucellosis Areas in § 78.21 and add such areas to the list designated as Certified Brucellosis-Free Areas in § 78.20 because it has been determined that they now come within the definition of a Certified Brucellosis-Free Area in § 87.1(l): Henry County in Illinois; Childress County in Texas.

Accordingly, §§ 78.20, 78.21, and 78.22 of Part 78, Title 9, Code of Federal Regulations, designating Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, and Noncertified Areas, respectively, are revised to read as follows:

§ 78.20 Certified brucellosis-free areas.

Wyoming. Albany, Big Horn, Campbell, Carbon, Converse, Crook, Fremont, Goshen, Hot Springs, Johnson, Laramie, Natrona, Niobrara, Park, Platte, Sheridan, Sublette, Sweetwater, Teton, Uinta, Washakie, Weston.

Puerto Rico. Adjuntas, Aguada, Aguadilla, Aguas Buenas, Aibonito, Anasco, Arroyo, Barceloneta, Barranquitas, Bayamon, Cabo Rojo, Caguas, Camuy, Canovanas (Loiza), Catano, Cayey, Ceiba, Ciales, Cidra, Coama, Comerio, Corozal, Culebra, Dorado, Fajardo, Guanica, Guayama, Guayanilla, Gurabo, Hormigueros, Humacao, Isabela, Jayuya, Juana Diaz, Lajas, Lares, Las Marias, Luquillo, Manati, Maricao, Maunabo, Mayaguez, Moca, Morovis, Naranjito, Orocovis, Patillas, Penuelas, Ponce, Quebradillas, Rincon, Rio Grande, Rio Pieddras, Sabana Grande, Salinas, San German, San Juan, San Lorenzo, San Sebastian, Santa Isabel, Toa Alta, Toa Baja, Trujillo Alto, Utuado, Vega Alta, Vega Baja, Vieques, Villalba, Yabucoa, Yauco.

The following States, or specified portions thereof, are hereby designated as Modified Certified Brucellosis Areas:

(a) *Entire States.* Alaska, Nebraska.

(b) *Specific counties within states.*

Alabama. Autauga, Baldwin, Bibb, Blount, Bullock, Butler, Calhoun, Chambers, Chilton, Choctaw, Clarke, Coffee, Colbert, Conecuh, Coosa, Covington, Crenshaw, Cullman, Dallas, De Kalb, Elmore, Escambia, Fayette, Franklin, Greene, Hale, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Limestone, Lowndes, Macon, Madison, Marengo, Marion, Marshall, Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Pike, Randolph, St. Clair, Shelby, Sumter, Talladega, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, Winston.

Arkansas. Arkansas, Chicot, Clark, Crawford, Crittenden, Cross, Desha, Faulkner, Franklin, Hempstead, Hot Spring, Howard, Independence, Izard, Jefferson, Lawrence, Lee, Lincoln, Little River, Logan, Lonoke, Miller, Mississippi, Nevada, Phillips, Poinsett, Pulaski, Randolph, Saline, Scott, St. Francis, Sebastian, Sevier, Van Buren, Washington, White.

Colorado. Baca, Kiowa, Morgan, Prowers, Pueblo, Yuma.

Florida. Alachua, Bradford, Broward, Charlotte, Citrus, Clay, Collier, Columbia, De Soto, Duval, Flagler, Gilchrist, Glades, Hardee, Hendry, Hernando, Highlands, Hillsborough, Indian River, Jefferson, Lafayette, Lake, Lee, Levy, Madison, Manatee, Marion, Martin, Nassau, Okeechobee, Osceola, Palm Beach, Pinellas, Polk, Putnam, St. Johns, St. Lucie, Sarasota, Suwanee, Union, Volusia.

Georgia. Baker, Baldwin, Bartow, Ben Hill, Berrien, Bibb, Bleckley, Brooks, Calhoun, Carroll, Catoosa, Chattooga, Cherokee, Clay, Clinch, Cobb, Coffee, Colquitt, Columbia, Coweta, Crisp, Dade, Decatur, Dodge, Dooly, Dougherty, Douglas, Early, Elbert, Emanuel, Fayette, Floyd, Forsyth, Fulton, Gilmer, Gordon, Grady, Gwinnett, Hall, Hancock, Haralson, Harris, Hart, Heard, Houston, Irwin, Jackson, Jasper, Jefferson, Jenkins, Lamar, Lee, Lincoln, Lowndes, Lumpkin, Macon, Marion, McDuffie, Meriwether, Miller, Mitchell, Montgomery, Morgan, Murray, Muscogee, Newton, Oconee, Oglethorpe, Paulding, Pickens, Pierce, Pike, Polk, Pulaski, Putnam, Quitman, Randolph, Seminole, Spalding, Stewart, Sumter, Talbot, Taliaferro, Tattnall, Terrell, Thomas, Tift, Troup, Turner, Union, Walker, Walton, Warren, Webster, Whitfield, Wilcox, Wilkes, Worth.

Idaho. Bingham, Bonneville, Franklin.

Illinois. Brown, Effingham, Fulton, Gallatin, Hardin, Mason, Pike, Pope, Wayne, Williamson, Woodford.

Iowa. Allamakee, Appanoose, Crawford, Davis, Decatur, Guthrie, Pottawattamie, Poweshiek, Ringgold, Warren, Wayne.

Kansas. Allen, Anderson, Atchison, Barber, Barton, Bourbon, Brown, Butler, Chase, Chautauqua, Cherokee, Cheyenne, Clark, Clay, Cloud, Coffey, Cowley, Crawford, Decatur, Dickinson, Douglas, Edwards, Elk, Ellis, Ellsworth, Finney, Franklin, Geary, Graham, Grant, Gray, Greeley, Greenwood, Hamilton, Harper, Harvey, Jackson, Jefferson, Jewell, Kearny, Kingman, Kiowa, Labette, Leavenworth, Lincoln, Linn, Logan, Lyon, Marion, McPherson, Meade, Miami, Mitchell, Montgomery, Morris, Morton, Nemaha, Neosho, Ness, Norton, Osage, Osborne, Ottawa, Pottawatomie, Pratt, Rawlins, Reno, Republic, Rice, Rooks, Rush, Russell, Saline, Sedgwick, Seward, Shawnee, Sheridan, Sherman, Smith, Stafford, Stanton, Stevens, Sumner, Thomas, Wabaunsee, Wallace, Wichita, Wilson, Woodson, Wyandotte.

Kentucky. Adair, Allen, Anderson, Ballard, Barren, Bath, Boone, Bourbon, Boyd, Boyle, Bracken, Breckenridge, Bullitt, Butler, Caldwell, Calloway, Carlisle, Carroll, Carter, Casey, Christian, Clark, Clinton, Crittenden, Cumberland, Daviess, Elliott, Estill, Fayette, Fleming, Franklin, Fulton, Gallatin, Garrard, Grant, Graves, Grayson, Green, Greenup, Hancock, Hardin, Harrison, Hart, Henderson, Henry, Hickman, Hopkins, Jefferson, Jessamine, Larue, Laurel, Lincoln, Livingston, Logan, Lyon, Madison, Marion, Marshall, Mason, McCracken, McLean, Meade, Mercer, Metcalfe, Monroe, Montgomery, Muhlenberg, Nelson, Nicholas, Ohio, Oldham, Owen, Powell, Pulaski, Rockcastle, Rowan, Russell, Scott, Shelby, Simpson, Spencer, Taylor, Todd, Trigg, Union, Warren, Washington, Wayne, Webster, Woodford.

Louisiana. Acadia, Allen, Ascension, Assumption, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Cameron, Catahoula, Claiborne, Concordia, East Baton Rouge, East Carroll, East Feliciana, Evangeline, Franklin, Grant, Iberia, Iberville, Jackson, Jefferson, Jefferson Davis, Lafayette, Lafourche, La Salle, Lincoln, Livingston, Madison, Morehouse, Natchitoches, Orleans, Ouachita, Plaquemines, Pointe Coupee, Rapides, Red River, Richland, Sabine, St. Bernard, St. Charles, St. Helena, St. James, St. John the Baptist, St. Landry, St. Martin, St. Mary, St. Tammany, Tangipahoa, Tensas, Terrebonne, Union, Vermilion, Vernon, Washington, Webster, West Baton Rouge, West Carroll, West Feliciana, Winn.

Mississippi. Adams, Amite, Attala, Benton, Bolivar, Calhoun, Carroll, Choctaw, Chickasaw, Claiborne, Clarke, Clay, Coahoma, Copiah, Covington, De Soto, Forrest, Franklin, George, Greene, Grenada, Hinds, Holmes, Humphreys, Issaquena, Itawamba, Jasper, Jefferson, Jefferson Davis, Jones, Kemper, Lafayette, Lamar, Lauderdale, Lawrence, Leake, Lee, LeFlore, Lincoln, Lowndes, Madison, Marion, Marshall, Monroe, Montgomery, Neshobs, Newton, Noxubee, Oktibbeha, Panola, Pearl River, Perry, Pike, Pontotoc, Prentiss, Quitman, Rankin, Scott, Sharkey, Simpson, Smith, Sunflower, Tallahatchie, Tate, Tippah, Tunica, Union, Walthall, Warren, Washington, Wayne, Webster, Wilkinson, Winston, Yalobusha, Yazoo.

Missouri. Adair, Andrew, Atchison, Barton, Bates, Benton, Bollinger, Boone, Buchanan, Butler, Caldwell, Callaway, Camden, Cape Girardeau, Carroll, Cass, Cedar, Chariton, Christian, Clark, Clay, Clinton, Cole, Cooper, Crawford, Dade, Daviess, De Kalb, Dent, Gentry, Greene, Grundy, Harrison, Henry, Holt, Howard, Howell, Jasper, Jefferson, Johnson, Knox, Lafayette, Lawrence, Lincoln, Linn, Livingston, Macon, Madison, Maries, McDonald, Mercer, Mississippi, Monroe, Morgan, New Madrid, Newton, Nodaway, Oregon,

V 40 N 220 NOV 13 75 XUM

Osage, Ozark, Pemiscot, Pettis, Phelps, Pike, Polk, Putnam, Ralls, Randolph, Ray, Reynolds, Ripley, St. Charles, St. Clair, St. Francois, St. Genevieve, Saline, Scotland, Scott, Shannon, Stoddard, Stone, Sullivan, Taney, Texas, Vernon, Warren, Washington, Wayne, Webster, Worth, Wright.

New Mexico. Chaves, Colfax, Curry, De Baca, Eddy, Guadalupe, Hidalgo, Lea, Mora, Quay, Rio Arriba, Roosevelt, San Miguel, Socorro, Torrance, Union, Valencia.

Oklahoma. Adair, Alfalfa, Atoka, Beaver, Beckham, Blaine, Bryan, Caddo, Canadian, Carter, Cherokee, Choctaw, Cimarron, Cleveland, Coal, Comanche, Cotton, Craig, Creek, Custer, Delaware, Dewey, Ellis, Garfield, Garvin, Grady, Grant, Greer, Harmon, Harper, Haskell, Hughes, Jackson, Jefferson, Johnston, Kay, Kingfisher, Kiowa, Lincoln, Logan, Love, McClain, McIntosh, Major, Marshall, Mayes, Murray, Muskogee, Noble, Nowata, Okfuskee, Oklahoma, Okmulgee, Osage, Ottawa, Pawnee, Payne, Pittsburg, Pontotoc, Pottawatomie, Roger Mills, Rogers, Seminole, Sequoyah, Stephens, Texas, Tillman, Tulsa, Wagoner, Washington, Washita, Woods, Woodward.

South Dakota. Brookings, Edmunds, Jones, Marshall, Stanley, Crow Creek Indian Reservation.

Tennessee. Bedford, Benton, Bradley, Cannon, Carroll, Chester, Clay, Cocke, Coffee, Crockett, Cumberland, DeKalb, Dyer, Fayette, Franklin, Gibson, Giles, Hamilton, Hardeman, Hawkins, Haywood, Henderson, Henry, Hickman, Humphreys, Lauderdale, Lawrence, Lewis, Loudon, Macon, Madison, Marion, Marshall, Maury, McMinn, McNairy, Montgomery, Moore, Obion, Overton, Perry, Pickett, Putman, Rhea, Sequatchie, Shelby, Smith, Stewart, Sumner, Tipton, Trousdale, Wayne, Weakley, Williamson, Wilson.

Texas. Anderson, Andrews, Angelina, Aransas, Archer, Armstrong, Atascosa, Austin, Bailey, Banders, Bastrop, Baylor, Bee, Bell, Bexar, Blanco, Borden, Bosque, Bowie, Brazoria, Brazos, Briscoe, Brooks, Brown, Burleson, Burnet, Caldwell, Calhoun, Callahan, Camp, Carson, Cass, Castro, Chambers, Cherokee, Clay, Coke, Coleman, Collin, Collingsworth, Colorado, Comanche, Concho, Cooke, Coryell, Cottle, Crockett, Crosby, Culberson, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, De Witt, Dickens, Dimmitt, Donley, Eastland, Edwards, Ellis, Erath, Falls, Fannin, Fayette, Fisher, Floyd, Foard, Fort Bend, Franklin, Freestone, Frio, Gaines, Galveston, Garza, Gillespie, Glassock, Goliad, Gonzales, Grayson, Gregg, Grimes, Guadalupe, Hale, Hall, Hamilton, Hardeman Hardin, Harrison, Hays, Henderson, Hill, Hockley, Hood, Hopkins, Houston, Howard, Hudspeth, Hunt, Hutchinson, Jack, Jackson, Jasper, Jim Hogg, Johnson, Jones, Kaufman, Kendall, Kenedy, Kent, King, Kinney, Kleberg, Knox, Lamar, Lamb, Lampasas, La Salle, Lavaca, Lee, Leon, Limestone, Lubbock, Lynn, McCulloch, McLennan, Madison, Marion, Martin, Mason, Matagorda, Maverick, Medina, Menard, Midland, Milam, Mills, Mitchell, Montague, Montgomery, Moore, Morris, Motley, Navarro, Nolan, Nueces, Ochiltree, Oldham, Orange, Palo Pinto, Panola, Parker, Parmer, Polk, Potter, Presidio, Rains, Randall, Real, Red River, Refugio, Rockwall, Runnels, Rusk, Sabine, San Augustine, San Jacinto, San Patricio, San Saba, Schleicher, Scurry, Shackelford, Shelby, Sherman, Smith, Somervell, Stephens, Stonewall, Sutton, Swisher, Tarrant, Taylor, Terry, Throckmorton, Titus, Tom Green, Travis, Trinity, Tyler, Upton, Uvalde, Van Zandt, Victoria, Walker, Waller, Washington, Webb, Wharton, Wheeler, Wichita, Wilbarger, Willacy, Williamson, Wilson, Wise, Wood, Yoakum, Young, Zapata, Zavala.

Utah. Box Elder, Cache.

Wyoming. Lincoln.

Puerto Rico. Arecibo, Carolina, Guaynabo, Hatillo, Juncos, Las Piedras, Naguabo.

§ 78.22 Noncertified areas.

Oklahoma. LeFlore, Pushmataha.

South Dakota. Beadle, Corson, Ziebach.

Texas. Cameron, Duval, Ector, Harris, Haskell, Hidalgo, Jefferson, Jim Wells, Karnes, Liberty, Live Oak, McMullen, Newton, Reeves, Robertson, Starr, and Upshur.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; sec. 3, 33 Stat. 1265, as amended; sec. 2, 65 Stat. 693; and secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 114a–1, 115, 117, 120, 121, 125, 134b, 134f; 37 FR 28464, 28477; 38 FR 19141, 9 CFR 78.16).

Effective date. The foregoing amendments shall become effective November 13, 1975.

The amendments impose certain restrictions necessary to prevent the spread of brucellosis in cattle and relieve certain restrictions presently imposed. They should be made effective promptly in order to accomplish their purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 7th day of November.

PIERRE A. CHALOUX,
Acting Deputy Administrator, Veterinary Services Animal and Plant Health Inspection Service.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

Advance Notice of Certain Shipments of Special Nuclear Material

On April 4, 1975, the Nuclear Regulatory Commission (NRC) published in the FEDERAL REGISTER (40 FR 15098) proposed amendments to its regulations in 10 CFR Part 73 to require that advance notice of shipments involving certain quantities of special nuclear material (SNM) be provided to the NRC, and that the NRC be notified upon arrival of such shipments. Interested persons were invited to submit comments and suggestions for consideration in connection with the proposed amendments within 30 days after publication in the FEDERAL REGISTER. Upon consideration of the comments received and other factors involved, the NRC has adopted the proposed amendments with certain modifications set forth below.

Significant differences from the amendments published for comment are: (1) the amount of information to be supplied in the advance shipping notice has been reduced; (2) in addition to notifying the NRC Inspection and Enforcement Regional Office by mail, the licensee is required to notify the Director of the appropriate Regional Office by telephone seven days in advance of the shipping date that an advance shipping notice had been sent by mail; (3) the requirement for advance shipping notice is not applicable to spent fuel shipments, and would also not be applicable to shipments or transfers of SNM by road with one way transit times of one hour or less in duration between installations of a licensee; (4) telephone *and* telegraph or teletype notifications are required when the shipment arrives at its destination in all cases; (5) and a definition of the appropriate NRC Regional Inspection and Enforcement Office to be notified of shipments has been added.

The following discussion pertains to items (1) through (5) respectively:

(1) The proposed rule specified that the advance notice of shipment contain information as specified in § 73.70(g). Comments on this requirement indicated that some of the information in proposed § 73.70(g) is not available seven days in advance of a shipment. Accordingly this provision has been revised to require only the following information in the advance shipping notice: shipper, receiver, carrier(s), estimated date and time of departure and arrival, transfer points, and modes of shipment.

(2) A telephone call to the Director of the appropriate NRC Inspection and Enforcement Regional Office assures that the Regional Office would be alerted to the fact that advance shipping information details were being sent by mail. Appropriate action could be taken if the information did not arrive as expected.

(3) Several commenters requested clarification on whether the advance shipping notice was required for spent fuel shipments. It was not intended that the advance shipping notice apply to spent fuel shipments. Accordingly, § 73.6 has been revised to except spent fuel shipments from the requirement for an advance shipping notice. Additionally, one commenter requested that inter-site shipments between closely spaced installations also be excluded from the requirement of an advance shipping notice. Section 73.72 has been accordingly revised to exclude the requirement of an advance shipping notice for "road shipments or transfers with one way transit times of one hour or less in duration between installations of a licensee."

(4) Paragraph 73.36(c)(3) of the proposed rule required the consignee to notify the shipper upon arrival of a shipment by telephone, telegraph or teletype. Paragraph 73.36(e) of the proposed rule required that the consignee inform the shipper and the appropriate Regional Office by telephone *and* telegraph or teletype. In order to make notification requirements upon arrival of a shipment consistent, paragraph 73.36(c)(3) has been revised to require that the consignee inform the shipper by telephone *and* telegraph or teletype.

(5) In order to be more definitive as to the "appropriate" NRC Inspection and Enforcement Regional Office to be informed of shipments a new definition has been added in paragraph 73.2(r). For domestic shipments the appropriate Regional Office is the office within whose region the licensee who is responsible for the physical protection arrangements of the shipment is located. For export and/or import shipments the appropriate Regional Office is the office within whose region the licensee who is responsible for the physical protection arrangements of the shipment is located and also the Regional Office for the region in which the last or first point of exit or entry from or into the U.S. is located, as appropriate.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, and sections 552 and 553 of title 5 of the United States Code, the following amendments of Title 10, Chapter I, Code of Federal Regulations, Part 73 are published as a document subject to codification.

1. A new paragraph (r) is added to § 73.2 to read as follows:

§ 73.2 Definitions.

. . . . . .

(r) "Appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in Appendix A" means:

(1) For domestic shipments—the Regional Office within whose region the licensee who is responsible for the physical protection arrangements of the shipment is located.

(2) For export shipments—the Regional Office within whose region the licensee who is responsible for the physical protection arrangements of the shipment is located, and the Regional Office for the region in which the last point of exit of the shipment from the U.S. is located.

(3) For import shipments—the Regional Office within whose region the licensee who is responsible for the physical protection arrangements of the shipment is located, and the Regional Office for the region in which the first point of entry of the shipment into the U.S. is located.

2. Section 73.6 is revised to read as follows:

§ 73.6 Exemptions for certain quantities and kinds of special nuclear material.

A licensee is exempt from the requirements of §§ 73.30 through 73.36, and of §§ 73.60, 73.70 and 73.72 of this part, with respect to the following special nuclear material:

(a) Uranium-235 contained in uranium enriched to less than 20 percent in the U–235 isotope:

(b) Special nuclear material which is not readily separable from other radioactive material and which has a total external radiation dose rate in excess of 100 rems per hour at a distance of 3 feet from any accessible surface without intervening shielding; and

(c) Special nuclear material in a quantity not exceeding 350 grams of uranium-235, uranium-233, plutonium, or a combination thereof, possessed in any analytical, research, quality control, metallurgical or electronic laboratory.

3. Paragraphs (c)(3) and (e) of § 73.36 are revised to read as follows:

§ 73.36 Miscellaneous requirements.

. . . . . .

(c)(3) Each licensee who delivers special nuclear material to a carrier for transport or releases special nuclear material f.o.b. at the point where it is delivered to a carrier for transport shall also make arrangements with the consignee to be notified immediately by telephone and telegraph or teletype, of the arrival of the shipment at its destination.

. . . . . .

(e) Each licensee who receives a shipment of special nuclear material shall immediately notify by telephone and telegraph or teletype, the person who delivered the material to a carrier for transport and the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in Appendix A of the arrival of the shipment at its destination. When an Energy Research and Development Administration (ERDA) license-exempt contractor is the consignee, the licensee who is the consignor shall notify by telephone and telegraph, or teletype, the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in Appendix A of the arrival of the shipment at its destination immediately upon being notified of the receipt of the shipment by the license-exempt contractor as arranged pursuant to paragraph (c)(3) of this section. In the event such a shipment fails to arrive at its destination at the estimated time, the consignee, if a licensee, or in the case of an export shipment, the licensee who exported the shipment, shall immediately notify by telephone and telegraph or teletype, the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in Appendix A of this part, and the licensee or other person who delivered the material to a carrier for transport. The licensee who made the physical protection arrangements shall also immediately notify by telephone and telegraph, or teletype, the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in Appendix A of the action being taken to trace the shipment.

4. A new § 73.72 is added to read as follows:

§ 73.72 Requirement for advance notice of shipment of special nuclear material.

Each licensee who plans to import, export, transport, deliver to a carrier for transport in a single shipment, or take delivery of a single shipment free on board at the point where it is delivered to a carrier quantities of special nuclear material as specified in § 73.1(b)(2) shall notify the Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office listed in Appendix A by U.S. Mail, postmarked at least seven days in advance of the shipping date. The following information shall be furnished in the advance notice: shipper, receiver, carrier(s), estimated date and time of departure and arrival, transfer point(s), and mode(s) of shipment. The Director of the appropriate Nuclear Regulatory Commission Inspection and Enforcement Regional Office shall also be notified by telephone seven days in advance of the shipping date that an advance shipping notice has been sent by mail, and of any changes to the shipment itinerary prior to the shipment date. Road shipments or transfers with one way transit times of one hour or less in duration between installations of a licensee are exempt from the requirements of this section.

Effective date: The foregoing amendments become effective on December 15, 1975.

(Sec. 161, Pub. L. 83–703, 68 Stat. 948; Sec. 201, Pub. L. 93–438, 88 Stat. 1243 (42 U.S.C. 2201, 5841))

Dated at Washington, D.C. this 7th day of November 1975.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.75-30596 Filed 11-12-75;8:45 am]

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 210—GENERAL ALLOCATION AND PRICE RULES

Extension of Stripper Well Lease Exemption Amendment

The Federal Energy Administration hereby adopts an amendment to extend for 90 days beginning November 30, 1975, the May 15, 1975 amendment to the stripper well lease exemption of 10 CFR 210.32, which became effective on June 3, 1975 and was subsequently extended for a period of 90 days beginning September 1, 1975, but which under the provisions of section 4(g)(2) of the Emergency Petroleum Allocation Act of 1973 ("EPAA", Pub. L. 93–159, as amended, Pub. L. 93–511, as further amended, Pub. L. 94–99) will expire on November 29, 1975. This extension of the May 15 amendment is also being submitted to Congress for its review pursuant to section 4(g)(2) of the EPAA. Unless disapproved by either House of Congress during the five-day period allowed for

V 40 N 220 NOV 13 75 XUM

legislative review, the May 15 amendment to the stripper well lease exemption will be extended for another 90 days, beginning November 30, 1975. This action is being taken at this time to ensure that the amendment will continue in its present form on November 30, should the EPAA be extended beyond November 15, 1975.

The May 15 amendment is designed to remove a disincentive to increased production from marginally-producing stripper well leases that existed under the previous regulation, and provides that once a property qualifies as a stripper well lease on the basis of its average daily production per well for any calendar year beginning after December 31, 1972, the property will continue to enjoy exempt status, regardless of any increased production in a subsequent year.

The amendment was adopted pursuant to the procedures of section 4(g)(2) of the EPAA, which provides:

> If at any time after the date of enactment of this Act the President finds that application of the regulation under subsection (a) to crude oil, residual fuel oil, or a refined petroleum product is not necessary to carry out this Act, that there is no shortage of such oil or product, and that exempting such oil or product from such regulation will not have an adverse impact on the supply of any other oil or refined petroleum products subject to this Act, he may prescribe an amendment to the regulation under subsection (a) exempting such oil or product from such regulation for a period of not more than ninety days. The President shall submit any such amendment and any such findings to the Congress. An amendment under this paragraph may not exempt more than one oil or one product. Such an amendment shall take effect on a date specified in the amendment, but in no case sooner than the close of the earliest period which begins after the submission of such amendment to the Congress and which includes at least five days during which the House was in session and at least five days during which the Senate was in session; except that such amendment shall not take effect if before the expiration of such period either House of Congress approves a resolution of that House stating in substance that such House disapproves such amendment.

The FEA originally submitted the stripper well lease amendment and accompanying findings to each House of Congress on May 15, 1975 (40 FR 22123, May 21, 1975) and the five day period for Congressional review began on May 16, 1975. The period beginning May 16, 1975 and ending June 2, 1975 included five days during which each House was in session, and during which neither House of Congress approved a resolution stating in substance that such House disapproved the amendment. Accordingly, the amendment became effective June 3, 1975 (40 FR 24517, June 9, 1975), and the last day of the 90-day period provided for by section 4(g)(2) of the EPAA was August 31, 1975.

Included with the May 15 submission to Congress were the following findings, required under section 4(g)(2) of the EPAA:

> It is clear from the legislative history, as well as from the language of the EPAA, that application of the allocation and price regulations to the first sale of crude oil produced from leases whose average daily production is 10 barrels or less per well was not deemed necessary to implement the overall congressional policy embodied in the Act.

The report of the House Interstate and Foreign Commerce Committee indicates that "pricing controls and forced allocation of [crude oil produced from stripper well leases] would unnecessarily inhibit production" since "pricing restrictions imposed under other federal authority have demonstrably had the effect of inhibiting production from such wells." The Committee clearly stated its intent "that a similar result should not be made possible by the Mandatory Petroleum Allocation Program called for [by the EPAA]."

Similarly, the legislative history of the Trans-Alaska Pipeline Authorization Act of 1973 (Pub. L. 93-153, enacted eleven days prior to the EPAA) contained a similar exemption for stripper wells, again indicating a clear congressional policy in favor of ensuring that price controls would not inhibit the continued production from these marginally-producing properties. The Senate Committee on Interior and Insular Affairs stated the purpose of the exemption as being "to insure that direct or indirect price ceilings do not have the effect of resulting in *any loss of domestic crude oil production from the premature shutdown of stripper wells for economic reasons.*" (Emphasis added.) Continuation of the existing regulation, however, would have effects contrary to those that Congress expressly sought to achieve.

The FEA finds that there is currently no shortage of crude oil available to refiners in the United States, and that this amendment will not have an adverse impact on other products covered by FEA regulations. These findings, however, although called for by the EPAA, are not necessarily material considerations in the adoption of this amendment, which is designed to encourage the increased domestic production of crude oil from marginally-producing stripper well leases, and thereby more adequately to carry out the intent of the congressionally-mandated stripper well lease exemption. The impact, therefore, of the amendment on crude oil and other products should be simply to displace with increased domestic production the crude oil that would otherwise need to be imported in order to maintain adequate and reliable supplies of petroleum products. Continuation of the regulation in its present form, on the other hand, would effectively eliminate this potential source of additional domestic crude oil, and would tend to accelerate the decline in production from marginally-producing properties. Accordingly, the FEA finds that the continued regulation of this narrow category of crude oil is unnecessary to carry out the purposes and objectives of the EPAA, and that the effect of the amendment will be to promote the increased production of domestic crude oil, thereby decreasing the Nation's dependence on foreign supplies.

This amendment is not intended to effect any change in the method of measuring the number of barrels of production from a property or in the method of counting the number of production wells for purposes of the stripper well lease exemption. These aspects of the stripper well lease exemption were specifically treated in Ruling 1974-29 and Ruling 1974-30, neither of which is altered in any way by the amendment adopted herein. The amendment is also intended to have no effect on the continued viability of Ruling 1974-28 (Inapplicability of the "Stripper Well Lease" Exemption of 10 CFR 210.32 to Gas Wells), which the FEA is currently reconsidering in a separate proceeding (40 FR 18004, April 24, 1975).

Insofar as the amendment might have the effect of releasing from the ceiling price some crude oil that is produced from properties that lost the stripper well lease exemption because of production levels in excess of ten barrels per well per day during calendar year 1974, the amendment will operate prospectively only. Therefore, for those properties in this narrow category, crude oil may be sold without regard to the ceiling price rule of 10 CFR 212.73, as of the effective date of the amendment. However, such producers may not retroactively increase the price of such crude oil for sales that occurred prior to the effective date of this amendment.

(40 FR 22123, 22124, May 21, 1975.)

The May 15 findings and amendment were adopted by FEA after a rulemaking and public hearing. After notice of the proposed amendment was given on February 28, 1975 (40 FR 10195, March 5, 1975), comments were received from thirty-three interested persons, and a public hearing was held on March 21, 1975, at which five interested persons presented oral testimony. Consideration of all the written and oral presentations led FEA to conclude that it had been correct in its preliminary analysis that the prior regulation provided a disincentive to increased production. Accordingly, the amendment was adopted for a 90-day period beginning June 3, 1975.

Prior to the expiration of that 90-day period on August 31, 1975, FEA gave notice of the adoption of an extension—for a second 90 days beginning September 1, 1975—of the May 15 amendment. On July 24, FEA reaffirmed its May 15 findings and afforded an opportunity for comment from interested persons to ensure that there had been no changes in circumstances such as would affect the validity of the May 15 findings. No comments were received. Inasmuch as neither House of Congress took any action disapproving the July 24 extension it became effective for a second 90-day period beginning September 1.

Prior to the expiration of that 90-day period on November 29, FEA gave notice of a further extension of the May 15 amendment, beginning November 30, 1975. Comments were again solicited from interested persons on the continued validity of the May 15 findings. Four timely comments were received in support of the proposed extension.

The May 15 findings, however, although called for by the EPAA, were not then (and are not now) deemed necessarily material considerations in the adoption of the amendment, the purpose of which is to encourage the increased domestic production of crude oil from marginally-producing stripper well leases, and thereby more adequately to carry out the intent of the congressionally-mandated stripper well lease exemption. (Section 4(e)(2)(A) of the EPAA.) The impact, therefore, of the amendment on crude oil and other products was seen as simply one of displacing with increased domestic production the crude oil that would otherwise need to be imported in order to maintain adequate and reliable supplies of petroleum products. Continuation of the regulation in its prior form, on the other hand, would effectively have eliminated this potential source of additional domestic crude oil, and would have tended to accelerate the decline in production from marginally-producing properties. Accordingly, the FEA found that the continued regulation of this narrow category of crude oil was unnecessary to carry out the EPAA, and that the effect of the amendment would be to promote the increased production of domestic crude oil, thereby decreasing the Nation's dependence on foreign supplies.

There is presently no justification to depart from the conclusions reached as a result of the rulemaking proceeding and contained in the findings submitted to Congress on May 15, 1975. Moreover, just as continuation of the regulation in its prior form would effectively have discouraged a potential source of additional domestic crude oil, reversion at this time to the disincentives of the prior regulation might have the effect of forcing the premature abandonment of many projects continued or begun in reliance upon the amendment. Indeed, the amendment itself, as well as the comments and testimony received in the rulemaking proceeding, reflect the premise that, to be effective, the stripper well lease amendment must continue in its present form on an indefinite basis, so long as there is a price differential between exempt stripper well lease oil and other domestic crude oil.

Therefore, FEA hereby reaffirms its May 15 findings and again finds that (1) the application of the Mandatory Petroleum Price Regulations to crude oil produced from leases whose average daily production is 10 barrels or less per well in any year since 1972 is not necessary to implement the overall Congressional policy embodied in the EPAA; (2) there is no shortage of crude oil available to refiners in the United States; and (3) this amendment will not have an adverse impact on other products covered by FEA regulations.

Pursuant to section 4(g)(2) this action extending the stripper well lease amendment will be sent to Congress for its review. If neither House takes any action disapproving this extension, it will become effective for a period of 90 days beginning November 30, 1975, provided the EPAA is extended beyond November 15, 1975.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511 and Pub. L. 94-99; Federal Energy Administration Act of 1974, Pub. L. 93-275; E.O. 11790 (39 FR 23185)).

In consideration of the foregoing, Part 210 of Chapter II, Title 10 of the Code of Federal Regulations, as amended May 15, 1975 (as set forth below), and originally effective June 3, 1975, is continued in effect for a period of 90 days or for such longer period as may be permitted under applicable law, effective November 30, 1975, unless this amendment or any portion thereof is disapproved by either House of Congress before that date.

Issued in Washington, D.C., November 7, 1975.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

The last paragraph of § 210.32(b) is continued in effect to read as follows:

§ 210.32 Stripper well leases.

* * * * * *

(b) * * *

"Stripper well lease" means a "property" whose average daily production of crude oil, including condensates, per well did not exceed 10 barrels per day during any preceding calendar year beginning after December 31, 1972.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

[Reg. F]

PART 206—SECURITIES OF MEMBER STATE BANKS

Correction

In FR Document 75-129093 appearing on page 50457 of the issue for Thursday, October 30, 1975, the following items should be added to Form F-5:

Item 8. Relationship with independent public accountants. If the solicitation is made on behalf of management of the bank and relates to an annual meeting of security holders at which directors are to be elected, or financial statements are included pursuant to Item 15, or relates to a meeting at which action is to be taken with respect to the selection or approval of auditors, furnish the following information describing the bank's relationship with its independent public accountants:

(a) The name of the principal accountant selected or being recommended to shareholders for election, approval or ratification for the current year. If no accountant has been selected or recommended, so state and briefly describe the reasons therefor.

(b) The name of the principal accountant for the fiscal year most recently completed if different from the accountant selected or recommended for the current year or if no accountant has yet been selected or recommended for the current year.

(c) If a change or changes in accountants have taken place since the date of the proxy statement for the most recent annual meeting of shareholders, and if in connection with such change(s) a disagreement between the accountant and bank has been reported on Form F-3 or in the accountant's letter filed as an exhibit thereto, the disagreement shall be described. Prior to submitting the preliminary proxy material to the Board which contains or amends such description, the bank shall furnish the description of the disagreement to any accountant with whom a disagreement has been reported. If that accountant believes that the description of the disagreement is incorrect or incomplete, he may include a brief statement, ordinarily expected not to exceed 200 words, in the proxy statement presenting his view of the disagreement. This statement shall be submitted to the bank within 10 business days of the date the accountant received the bank's description.

(d) The proxy statement shall indicate whether or not representatives of the principal accountants for the current year and for the most recently completed fiscal year are expected to be present at the stockholders' meeting with the opportunity to make a statement if they desire to do so and whether or not such representatives are expected to be available to respond to appropriate questions.

(e) If the bank has an audit or similar committee of the Board of Directors, state the names of the members of the committee. If the Board of Directors has no audit or similar committee, so state.

Item 10. Pension and retirement plans. If action is to be taken with respect to any pension or retirement plan, furnish the following information:

(a) Describe briefly the material features of the plan, identify each class of persons who will be entitled to participate therein, indicate the approximate number of persons in each such class, and state the basis of such participation.

(b) State (1) the approximate total amount necessary to fund the plan with respect to past services, the period over which such amount is to be paid, and the estimated annual payments necessary to pay the total amount over such period, (2) the estimated annual payment to be made with respect to current services, and (3) the amount of such annual payments to be made for the benefit of (i) directors and officers, and (ii) employees.

(c) State (1) the name and position with the bank of each person specified in Item 7 (a) who will be entitled to participate in the plan, (2) the amount which would have been paid or set aside by the bank and its subsidiaries for the benefit of such person for the last fiscal year of the bank if the plan had been in effect, and (3) the amount of the annual benefits estimated to be payable to such person in the event of retirement at normal retirement date.

(d) Furnish such information, in addition to that required by this item and Item 7, as may be necessary to describe adequately the provisions already made pursuant to all bonus, profit sharing, pension, retirement, stock option, stock purchase, deferred compensation, or other remuneration or incentive plans, now in effect or in effect within the past 5 years, for (1) each director or officer named in answer to Item 7(a) who may participate in the plan to be acted upon; (ii) all [present] directors and officers of the bank as a group, if any director or officer may participate in the plan, and (iii) all employees, if employees may participate in the plan.

(e) If the plan to be acted upon can be amended otherwise than by a vote of stockholders to increase the cost thereof to the bank or alter the allocation of the benefits as between the groups specified in (b)(3), state the nature of the amendments which can be so made.

(f) If action is to be taken with respect to the amendment or modification of an existing plan, this item shall be answered with respect to the plan as proposed to be amended or modified and shall indicate any material differences from the existing plan.

Instructions. 1. The information called for by paragraph (b)(3) of (c)(2) need not be given as to payments made on an actuarial basis pursuant to any group pension plan which provides for fixed benefits in the event of retirement at a specified age or after a specified number of years of service.

2. The instructions to Item 9 shall apply to this item.

V 40 N 220 NOV 13 75 XUM

Board of Governors of the Federal Reserve System, November 5, 1975.

[SEAL] GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

Title 21—Food and Drugs

CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 1303—QUOTAS

Definition of Inventory; Statement of Policy and Interpretation

In the case of determining an individual manufacturing quota for a manufacturer of a basic class of controlled substance in Schedule I or II, the Administrator of the Drug Enforcement Administration is delegated to perform the functions of the Attorney General as set forth in Section 826, Title 21, United States Code.

The definition of inventory found in § 1303.02(b), Title 21, Code of Federal Regulations is an integral part of the procedures governing application for an individual manufacturing quota and the actual fixing of an individual manufacturing quota pursuant to §§ 1303.22 and 1303.23 of Title 21, Code of Federal Regulations.

Therefore, in an effort to clarify recent questions which have arisen concerning the definition in § 1303.02(b), and in furtherance of the applicable statutory and regulatory requirements, and in accordance with Section 3(a), as amended, of the Administrative Procedure Act (5 U.S.C. 552 (a)(1)(D)), and under the authority vested in the Attorney General by 21 U.S.C. 826, and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28, Code of Federal Regulations, and further, having been duly designated as Acting Administrator by Order No. 607-75 of the Attorney General, dated May 30, 1975, in accordance with the authority delegated to the Acting Administrator by § 0.132(d) of Title 28, Code of Federal Regulations, the Acting Administrator hereby issues the following interpretation: As used in the definition of inventory in Title 21 Code of Federal Regulations, § 1303.02(b) the phrase "in finished form of a basic class of controlled substance" has always been and continues to be interpreted by the Drug Enforcement Administration as including all factory and branch stocks, which have reached that point in manufacturing as to be identifiable, whether in bulk form, in the process of manufacture, in finished form, or otherwise (e.g., damaged, defective, or impure substances awaiting disposal, substances held in quarantine, or substances maintained for extemporaneous compounding), as a basic class of controlled substances manufactured or otherwise acquired by a registrant, whether in containers, commercial containers, or contained in pharmaceutical preparations in the possession of the registrant (including stocks held by the registrant under separate registration as manufacturer, importer, exporter, or distributor).

[Interprets 21 U.S.C. 826]

Dated: November 6, 1975.

HENRY S. DOGIN,
Acting Administrator, Drug Enforcement Administration.

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT—FEDERAL HOUSING COMMISSIONER (FEDERAL HOUSING ADMINISTRATION)

[Docket No. R-75-359]

PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENTS FOR RENTAL PROJECTS

Admission Income Limits

The following amendment is being made to § 236.72 in order to reflect a change in the method of establishing income limits for Section 236 projects as provided by Section 212(5) of the Housing and Community Development Act of 1974. Section 212(5) provides that contracts for assistance payments may be entered into only with respect to tenants whose incomes do not exceed 80 per centum of the median family income for the area, as determined by the Secretary, with adjustments for smaller and larger families. Further, the Secretary may establish income ceilings higher or lower than 80 per centum of the median family income for the area when the Secretary finds that variations are necessary because of prevailing levels of construction costs, unusually high or low family incomes, or other factors. In accordance with the Housing and Community Development Act of 1974, the Secretary has determined that income ceilings may be increased above 80 percent of median area income for individual projects in certain cases where the rise in basic rents associated with increased operating cost has significantly reduced the number of potential tenants with incomes high enough to pay these rents but low enough to come within the income limits. It is contemplated that this authority will be used only where it is determined that the financial condition of the projects will be improved as a result of an increase in the income limits and that consideration will be given to the existence of collection, vacancy or rent-up problems in determining whether there has been a significant reduction in eligible applicants.

In order to provide for the above increases, project-by-project determinations must be made. At present, however, 24 CFR 236.72 provides only for

income limits established on a locality-wide basis. Accordingly, § 236.72 is being amended in a way that will permit income limits to be set for individual projects as well as on a locality basis.

Section 236.72 is being further amended to eliminate, for those projects utilizing income limitations in effect after August 22, 1974, certain preference provisions based on a requirement in prior law that was deleted by Section 212(5) of the Housing and Community Development Act of 1974.

The amendments are designed to ameliorate the financial difficulties facing many Section 236 projects. It will take some time, however, before the benefits of higher income limits will be felt by affected projects, and in view of the serious condition of many of these projects, it is therefore necessary that the amendments be implemented as soon as possible. Accordingly, the Assistant Secretary for Housing Management has determined that it is impracticable to provide for a public comment procedure and that good cause exists for making these amendments effective November 13, 1975.

The Department has determined that an environmental impact statement is not required with respect to this amendment. The finding of inapplicability prepared in connection with this amendment is on file with the Rules Docket Clerk, Office of General Counsel, Room 10245, 451 Seventh Street SW., Washington, D.C. 20410.

Accordingly, Part 236 is amended as follows:

Section 236.72 (a) and (b)(3) are revised and a new paragraph (d) is added reading respectively as follows:

§ 236.72 Guidelines for assisted admission.

(a) *Maximum income.* The adjusted income of an applicant shall not exceed the maximum income limits established by the Secretary.

(b) • • •

(3) The applicant is a qualified tenant on whose behalf the project owner will receive rent supplement payments under Part 215 of this title, or rental assistance payments under Part 236 and Part 426 of this title.

• • • • • •

(c) • • •

(d) *Projects utilizing income limitations in effect subsequent to August 22, 1974.* The preference provided for in paragraph (c) of this section is not applicable to projects utilizing income limitations in effect subsequent to August 22, 1974.

(Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)))

Effective date. This amendment is effective November 13, 1975.

It is hereby certified that the economic and inflationary impacts of this final rule have been carefully evaluated in accordance with OMB Circular A-107.

DAVID S. COOK,
Assistant Secretary for Housing Production and Mortgage Credit, FHA Commissioner.

[FR Doc.75-30582 Filed 11-12-75;8:45 am]

CHAPTER IV—OFFICE OF ASSISTANT SECRETARY FOR HOUSING MANAGEMENT, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-75-360]

PART 425—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENTS FOR RENTAL PROJECTS

Admission Income Limits

The following amendment is being made to § 425.22 in order to reflect a change in the method of establishing income limits for Section 236 projects as provided by Section 212(5) of the Housing and Community Development Act of 1974. Section 212(5) provides that contracts for assistance payments may be entered into only with respect to tenants whose incomes do not exceed 80 per centum of the median family income for the area, as determined by the Secretary, with adjustments for smaller and larger families. Further, the Secretary may establish income ceilings higher or lower than 80 per centum of the median family income for the area when the Secretary finds that variations are necessary because of prevailing levels of construction costs, unusually high or low family incomes, or other factors. In accordance with the Housing and Community Development Act of 1974, the Secretary has determined that income ceilings may be increased above 80 percent of median area income for individual projects in certain cases where the rise in basic rents associated with increased operating costs has significantly reduced the number of potential tenants with incomes high enough to pay these rents but low enough to come within the income limits. It is contemplated that this authority will be used only where it is determined that the financial condition of the projects will be improved as a result of an increase in the income limits and that consideration will be given to the existence of collection, vacancy or rent-up problems in determining whether there has been a significant reduction in eligible applicants.

In order to provide for the above increases, project-by-project determinations must be made. At present, however, 24 CFR 425.22 provides only for income limits established on a locality-wide basis. Accordingly, § 425.22 is being amended in a way that will permit income limits to be set for individual projects as well as on a locality basis.

Section 425.22 is being further amended to eliminate, for those projects utilizing income limitations in effect after August 22, 1974, certain preference provisions based on a requirement in prior law that was deleted by Section 212(5) of the Housing and Community Development Act of 1974.

The amendments are designed to ameliorate the financial difficulties facing many Section 236 projects. It will take some time, however, before the benefits of higher income limits will be felt by affected projects, and in view of the serious condition of many of these projects, it is therefore necessary that the amendments be implemented as soon as possible. Accordingly, the Assistant Secretary for Housing Management has determined that it is impracticable to provide for a public comment procedure and that good cause exists for making these amendments effective upon their publication in the FEDERAL REGISTER.

The Department has determined that an environmental impact statement is not required with respect to this amendment. The finding of inapplicability prepared in connection with this amendment is on file with the Rules Docket Clerk, Office of General Counsel, Room 10245, 451 Seventh Street SW., Washington, D.C. 20410.

Accordingly, Part 425 is amended as follows:

Section 425.22 (a) and (b)(3) are revised and a new paragraph (d) is added reading respectively as follows:

§ 425.22 Guidelines for assisted admission.

(a) *Maximum income.* The adjusted income of an applicant shall not exceed the maximum income limits established by the Secretary.

(b) • • •

(3) The applicant is a qualified tenant on whose behalf the project owner will receive rent supplement payments under Part 215 of this title, or rental assistance payments under Part 236 and Part 426 of this title.

• • • • • •

(c) • • •

(d) *Projects utilizing income limitations in effect subsequent to August 22, 1974.* The preference provided for in paragraph (c) of this section is not applicable to projects utilizing income limitations in effect subsequent to August 22, 1974.

(Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).)

Effective date. This amendment is effective November 13, 1975.

It is hereby certified that the economic and inflationary impacts of this final rule-have been carefully evaluated in accordance with OMB Circular A-107.

H. R. CRAWFORD,
Assistant Secretary for Housing Management.

Title 25—Indians

CHAPTER I—BUREAU OF INDIAN AFFAIRS, DEPARTMENT OF THE INTERIOR

PART 221—OPERATION AND MAINTENANCE CHARGES

Water Charges on the Ahtanum Indian Irrigation Project

NOVEMBER 6, 1975.

These final regulations are issued under the authority delegated to the Com-

V 40 N 220 NOV 13 75 XUM

missioner of Indian Affairs by the Secretary of the Interior in 230 DM 1 and redelegated by the Commissioner to the Area Directors in 10 BIAM 3. The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9).

On page 46114 of the October 6, 1975, FEDERAL REGISTER (40 FR 194), there was published a notice of intention to modify § 221.1 of Part 221, Subchapter T, Chapter I, Title 25 of the Code of Federal Regulations by changing the rate for annual operation and maintenance assessments on the Ahtanum Indian Irrigation Project for Calendar Year 1976 and subsequent years. This modification was proposed pursuant to the authority contained in the Act of August 1, 1914 (38 Stat. 583), and March 7, 1928 (45 Stat. 210).

Interested persons were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulations.

During this period no comments, suggestions, or objections were submitted. It has been determined that sufficient justification exists for modifying the rate for water charges for the Ahtanum Indian Irrigation Project as set forth below.

The modified § 221.1 shall become effective December 15, 1975.

§ 221.1 Charges.

Pursuant to the provisions of the Acts of August 1, 1914 and March 7, 1928 (38 Stat. 583 and 45 Stat. 210; 25 U.S.C. 385.387), the operation and maintenance charges on lands of the Ahtanum Indian Irrigation Project, Yakima Indian Reservation, Washington, for the Calendar Year 1976 and subsequent years until further notice, and hereby fixed at $4.65 per acre per annum for each irrigable acre of land to which water can be delivered from the project works.

(Acts of August 1, 1914 (38 Stat. 583), and March 7, 1928 (45 Stat. 210))

FRANCIS E. BRISCOE,
Area Director.

PART 221—OPERATION AND MAINTENANCE CHARGES

Water Charges on the Toppenish-Simcoe Indian Irrigation Project

NOVEMBER 6, 1975.

These final regulations are issued under the authority delegated to the Commissioner of Indian Affairs by the Secretary of the Interior in 230 DM 1 and redelegated by the Commissioner to the Area Directors in 10 BIAM 3. The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9).

Beginning on page 46114 of the October 6, 1975, FEDERAL REGISTER (40 FR 194), there was published a notice of intention to modify § 221.73 of Part 221, Subchapter T, Chapter I, Title 25 of the Code of Federal Regulations by changing the rate for annual operation and maintenance assessments on the Toppenish-Simcoe Indian Irrigation Project for Project for Calendar Year 1976 and subsequent years. This modification was proposed pursuant to the authority contained in the Acts of August 1, 1914 (38 Stat. 583) and March 7, 1928 (45 Stat. 210).

Interested persons were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulations.

During this period no comments, suggestions, or objections were submitted. It has been determined that sufficient justification exists for modifying the rate for water charges for the Toppenish-Simcoe Indian Irrigation Project as set forth below.

The modified § 221.73 shall become effective December 15, 1975.

§ 221.73 Charges.

Pursuant to the provisions of the Acts of August 1, 1914, and March 7, 1928 (38 Stat. 583 and 45 Stat. 210; 25 U.S.C. 385, 387), the operation and maintenance charges for the lands under the Toppenish-Simcoe Irrigation Project, Yakima Indian Reservation, Washington, for the Calendar Year 1976 and subsequent years until further notice, are hereby fixed as follows:

All lands for which application for water is made and approved by Project Engineer, per acre..... $4.85

(Acts of August 1, 1914 (38 Stat. 583) and March 7, 1928 (45 Stat. 210))

FRANCIS E. BRISCOE,
Area Director.

[FR Doc.75-30543 Filed 11-12-75;8:45 am]

PART 221—OPERATION AND MAINTENANCE CHARGES

Basic and Other Water Charges on the Wapato Indian Irrigation Project

NOVEMBER 6, 1975.

These final regulations are issued under the authority delegated by the Secretary of Interior to the Commissioner of Indian Affairs by 230 DM 1 and redelegated by the Commissioner to the Area Directors in 10 BIAM 3. The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9).

On page 46114 of the October 6, 1975, FEDERAL REGISTER (40 FR 194), there was published a notice of intention to modify § 221.86 of Part 221, Subchapter T, Chapter I, Title 25 of the Code of Federal Regulations by changing the basic rates for annual operation and maintenance assessments on the Wapato Indian Irrigation Project for Calendar Year 1976 and subsequent years. This modification was proposed pursuant to the authority contained in the Acts of August 1, 1914 (38 Stat. 583), and March 7, 1928 (45 Stat. 210).

Interested persons were given 30 days in which to submit written comments, suggestions, or objections regarding the proposed regulations.

During this period no comments, suggestions, or objections were submitted. It has been determined that sufficient justification exists for modifying the rate for basic and other water charges for the Wapato Indian Irrigation Project as set forth below.

The modified § 221.86 shall become effective December 15, 1975.

§ 221.83 Charges.

The operation and maintenance charges on assessable lands under the Wapato Indian Irrigation Project, Yakima Indian Reservation, Washington, are hereby fixed as follows:

(a) Pursuant to the provisions of the Acts of August 1, 1914, and March 7, 1928 (38 Stat. 583, 45 Stat. 210; 25 U.S.C. 385, 387), the basic operation and maintenance assessment rates for the Calendar Year 1976 and subsequent years until further notice are:

(1) Minimum charges for all tracts in noncontiguous single ownership—$13.30.

(2) Flat rate upon all farm units or tracts for each assessable acre except Additional Works lands—$13.30.

(3) Storage operation and maintenance. For all lands with a storage water right, known as "B" lands, in addition to other charges per acre—$1.20.

(4) Flat rate upon all farm units or tracts for each assessable acre of Additional Works lands—$14.10.

(b) Pursuant to the provisions of the Act of September 26, 1961 (75 Stat. 680), there shall be assessed and collected from all lands except Additional Works lands beginning with the Calendar Year 1967 and until further notice but not to exceed a period of 10 years, an annual per acre charge of $0.20 to defray the cost of replacing a wooden pipeline.

(Acts of August 1, 1914 (38 Stat. 583), and March 7, 1928 (45 Stat. 210))

FRANCIS E. BRISCOE,
Area Director.

Title 28—Judicial Administration

CHAPTER I—LAW ENFORCEMENT ASSISTANCE ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 20—CRIMINAL JUSTICE INFORMATION RECORDS

Collection, Storage, and Dissemination of Information

On May 20, 1975, the Law Enforcement Assistance Administration published in the FEDERAL REGISTER (40 FR 22114) regulations governing the collection, storage, and dissemination of criminal history record information. Due to the concerns raised by many individuals regarding the dissemination of criminal history records to noncriminal justice agencies, notice is hereby given that hearings will be held to consider comments from interested parties concerning the dissemination provisions in the regulations.

Pursuant to the authority vested in the Law Enforcement Assistance Administration by Section 501 and Section 524 of the Omnibus Crime Control and Safe Streets Act of 1968, as amended by the Crime Control Act of 1973, Pub. L. 93-83, 87 Stat. 197 (42 U.S.C. 3701 et seq.) (Aug. 6, 1973), LEAA will hold hearings on December 11 and 12 to consider changes to §§ 20.20 (b) and (c) and 20.21 (b), (c) and (d) of 28 CFR Part 20 based upon comments received.

Hearings will be held beginning at 10:00 a.m. each day in the Federal Trade Commission Building, 7th and Pennsylvania Avenue, N.W., Washington, D.C., Room 552. Interested persons who wish to testify should notify Thomas J. Madden, General Counsel, Law Enforcement Assistance Administration, 633 Indiana Avenue, N.W., Washington, D.C. 20531, no later than December 8, 1975.

Written views should be submitted to the LEAA Office of General Counsel no later than December 15, 1975.

RICHARD W. VELDE,
Administrator.

[FR Doc.75-30558 Filed 11-12-75;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 456-1]

PART 435—OFFSHORE SEGMENT OF THE OIL AND GAS EXTRACTION POINT SOURCE CATEGORY

Extension of Comment Period

This notice extends the period for comments to the notice, published September 15, 1975, promulgating Interim Final Rules for the Offshore Segment of the Oil and Gas Extraction Point Source Category (40 FR 42543).

Requests for an extension of time were submitted by several persons having an interest in commenting. They argue that additional time is needed to review the notice in sufficient detail to provide meaningful comments.

In view of the requests, the Environmental Protection Agency has determined it is in the public interest that the period for comment on interim final regulation be extended until December 15, 1975.

Dated: November 4, 1975.

ANDREW W. BREIDENBACH,
Acting Assistant Administrator for Water and Hazardous Materials.

[FR Doc.75-30534 Filed 11-12-75;8:45 am]

[FRL 455-8]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Arizona; Approval of Compliance Schedule; Correction

On January 27, 1975 there was published in the FEDERAL REGISTER (FR Doc. 75-2265, 40 FR 3994), a compliance schedule for the Flintkote Company, Nelson, Arizona. The notice published stated that § 52.134 of Title 40 was being amended by adding the schedule to the table in subparagraph (c) of that section. However, no subparagraph (c), and no table within that subparagraph, had previously been promulgated under § 52.134. Therefore, the promulgation under § 52.134(c) which occurred on January 27, 1975 was incorrect and is hereby revoked.

Because this revocation constitutes a correction of an incorrect promulgation, and since the compliance schedule for Flintkote Company has now expired and the Company is required to be in compliance with applicable air pollution control regulations, EPA finds that good cause exists for making this revocation effective immediately.

[42 U.S.C. 1857c-5]

Dated: November 8, 1975.

STANLEY W. LEGRO,
Assistant Administrator for Enforcement.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

§ 52.134 [Amended]

Section 52.134(c) is removed and reserved.

[FR Doc.75-30669 Filed 11-12-75;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 114—DEPARTMENT OF THE INTERIOR

[IPMR #75-10]

PART 114-40—TRANSPORTATION AND TRAFFIC MANAGEMENT

PART 114-41—AUDIT OF TRANSPORTATION PAYMENTS

Pursuant to the authority of the Secretary of the Interior contained in 5 U.S.C. 301 and Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c), Part 114-40 of Chapter 114, Title 41 of the Code of Federal Regulations, is deleted in its entirety and new Part 114-41 is added as set forth below.

This revision relates only to matters of internal Department practice. It is, therefore, determined that the public rulemaking procedure is unnecessary and this revision shall become effective November 13, 1975.

RICHARD R. HITE,
Deputy Assistant Secretary of the Interior.

NOVEMBER 5, 1975.

1. The material in Part 114-40 became obsolete when FPMR Temporary Regulation G-23 was published. Therefore, 41 CFR 114-40 is deleted from the Code of Federal Regulations.

2. New Part 114-41 is added to read as follows:

Subpart 114-41.3—Freight Transportation Services Furnished for the Account of the United States

Sec.
114-41.304 Exception to the use of U.S. Government bills of lading.
114-304-2 Limited authority to use commercial forms and procedures.

AUTHORITY: 5 U.S.C. 301, Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

Subpart 114-41.3—Freight Transportation Services Furnished for the Account of the United States

§ 114-41.304 Exception to the use of U.S. Government bills of lading.

§ 114-41.304-2 Limited authority to use commercial forms and procedures.

(a) In accordance with the authority delegated in 205 DM 9, the head of each bureau and office is authorized to exercise the discretionary authority to use commercial forms and procedures in accordance with the procedures set forth in 101-41.304-2 of FPMR Temporary Regulation G-23 and subject to the limitations established therein.

[FR Doc.75-30557 Filed 11-12-75;8:45 am]

Title 43—Public Lands; Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT

PART 3300—OUTER CONTINENTAL SHELF LEASING; GENERAL

Qualified Joint Bidders

In the FEDERAL REGISTER publication of October 1, 1975, a notice was published (40 FR 45171; FR Doc. 75-26212) amending 43 CFR Part 3300 concerning the restriction of joint bidding for Outer Continental Shelf oil and gas leases.

§ 3302.3-2 [Amended]

Notice is hereby given that in § 3302.3-2(a), the regulation is amended as follows:

1. Strike the words "October 20, 1975"

2. Substitute therefor the words "the close of business December 8, 1975"

Prospective bidders are alerted to the requirements of the regulation that Statements of Production referred to therein must be under oath and refer to the production period of January 1, 1975, through June 30, 1975.

CURT BERKLUND,
Director, Bureau of Land Management.

Approved: November 7, 1975.

ROYSTON C. HUGHES,
Assistant Secretary of the Interior.

[FR Doc.75-30536 Filed 11-12-75;8:45 am]

Title 45—Public Welfare

CHAPTER XVI—LEGAL SERVICES CORPORATION

PART 1602—PROCEDURES FOR DISCLOSURE OR PRODUCTION OF INFORMATION UNDER THE FREEDOM OF INFORMATION ACT

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act, 42 U.S.C. 2996-2996*l* ("the Act"). Section 1005(g) of the Act, 42 U.S.C. § 2996d(g), provides that the Corporation shall be subject to the provisions of the Freedom of Information Act, 5 U.S.C. § 552.

V 40 N 220 NOV 13 75 XUM

On page 42374 of the FEDERAL REGISTER of September 12, 1975, there were published proposed regulations for Procedures for Disclosure or Production of Information by the Corporation under the Freedom of Information Act. Interested persons were given until October 11, 1975 in which to submit comments, suggestions, or objections regarding the proposed regulations. All comments submitted with respect to the proposed regulations were given due consideration. The proposed regulations were adopted by the Board of Directors of the Corporation with the following minor changes:

1. The third and fourth sentences of § 1602.3, pertaining to policy, were deleted. The third sentence was eliminated as a redundancy. The fourth sentence was eliminated out of concern that it might create a mechanistic test which would deprive the Corporation of the best legal advice. It is the intention of the Board of Directors that exemption decisions be made in a two step process. The first step involves the determination of whether an exemption applies as a matter of law. The second step, which obtains only if an exemption is available under the law, involves the discretionary determination of whether and in what form the requested information should be released. This discretion is to be guided by the policy set forth in the remainder of § 1602.3 and in § 1602.9. Among the considerations which prompted the deletion of the fourth sentence was the fear that a mandatory restrictive interpretation of several of the exemptions might result in undesirable invasions of personal privacy.

2. The Corporation's address and telephone number were inserted in the first sentence of § 1602.5(a). The addresses and telephone numbers of regional records offices were inserted in a new §1602.-6(b).

3. The third sentence in § 1602.8(b)(5) was revised to read, "Fees may be required to be paid in advance in accordance with Section 1602.13." This change clarifies an inconsistency in the earlier draft.

4. A new § 1602.8(e) was inserted in order to give expression to the policy that the Corporation will provide a substantive response to requests for information in a diligent fashion, once a determination is made that a request will be granted.

5. Section 1602.10, pertaining to officials authorized to grant or deny requests for records, was revised to provide that a denial may be made only by the General Counsel or his delegate. This revision is intended to assure that a decision to withhold information is made at a high level in the Corporation by a legal expert who does not otherwise have line responsibility for the records which are likely to be requested.

6. Several additional minor changes of a perfecting nature, not having substantive implications, were made throughout the text.

Accordingly, with these changes and additions, the proposed regulations are adopted as set forth below, to become effective December 15, 1975, pursuant to section 1008(e) of the Act.

Subpart A—General

Sec.
1602.1 Purpose.
1602.2 Definitions.
1602.3 Policy.

Subpart B—Maintenance of Records

1602.4 Index of records.
1602.5 Central records room.
1602.6 Regional records rooms.

Subpart C—Procedure

1602.7 Use of records rooms.
1602.8 Availability of records on request.
1602.9 Invoking exemption to withhold a requested record.
1602.10 Officials authorized to grant or deny request for records.
1602.11 Denials.
1602.12 Appeals of denials.
1602.13 Fees.

AUTHORITY: Sec. 1005(g), 88 Stat. 361 (42 U.S.C. § 2996d(g)).

Subpart A—General

§ 1602.1 Purpose.

These regulations provide information concerning the procedures by which records of the Legal Services Corporation may be made available pursuant to section 1005(g) of the Legal Services Corporation Act, 42 U.S.C. 2996d(g), and the Freedom of Information Act, as amended in 1974, 5 U.S.C. 552.

§ 1602.2 Definitions.

As used in this Part,—

(a) "Act" means the Legal Services Corporation Act, 42 U.S.C. 2996–2996l;

(b) "Corporation" means the Legal Services Corporation;

(c) "FOIA" means the Freedom of Information Act, as amended in 1974, 5 U.S.C. 552;

(d) "President" means the President of the Legal Services Corporation;

(e) "Records" means books, papers, maps, photographs, or other documentary materials, regardless of physical form or characteristics, made or received by the Corporation in connection with the transaction of the Corporation's business and preserved or appropriate for preservation by the Corporation as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Corporation or because of the informational value of data in them. The term does not include books, magazines, or other materials acquired solely for library purposes and available through any officially designated library of the Corporation.

§ 1602.3 Policy.

It is and will be the policy of the Corporation to maximize the extent to which records concerning its operations, activities, and business will be available to the public. Records will be withheld from the public only in accordance with the FOIA and these implementing regulations. Records which may be exempted from disclosure will generally be made available as a matter of discretion when disclosure is not prohibited by law and it does not appear adverse to legitimate public or personal interests.

The Corporation will attempt to provide the fullest possible assistance to requesting parties, including information as to how and where the request may be submitted. The Corporation will provide the most timely possible action on requests for records.

Subpart B—Maintenance of Records

§ 1602.4 Index of records.

The Corporation will maintain a current index identifying any matter within the scope of § 1602.5(b)(1)–(3) which has been issued, adopted, or promulgated by the Corporation, and other information published or made publicly available. The index will be maintained and made available for public inspection and copying at the Corporation's headquarters in Washington, D.C., and at each regional office. The Corporation will publish the index or a supplement thereto at least once each quarter and will distribute copies on request, at a cost not to exceed the direct cost of duplication.

§ 1602.5 Central records room.

(a) The Corporation will maintain a central records room at its headquarters at 733 15th Street, NW., Suite 700, Washington, D.C. 20005, (202) 376–5100. This room will be supervised by a Records Officer, and will be open during regular business hours of the Corporation for the convenience of members of the public in inspecting and copying records made available pursuant to this Part. Certain records, as described in paragraph (b) of this section, will be regularly maintained in or in close proximity to the records room, to facilitate access thereto by any member of the public.

(b) Subject to the limitation stated in paragraph (c) of this subsection, there will be available in the central records room the following:

(1) All final opinions, including concurring and dissenting opinions, and orders made in the adjudication of cases;

(2) Statements of policy and interpretations adopted by the Corporation;

(3) Administrative staff manuals and instructions to the staff which affect the public;

(4) To the extent feasible, guidelines, forms, published regulations, notices, program descriptions, and other records considered to be of general interest to members of the public in understanding activities of the Corporation or in dealing with the Corporation in connection with those activities;

(5) The current index required by § 1602.4

(c) Certain types of staff manuals or instructions, such as instructions to auditors or inspection staff, or instructions covering certain phases of contract negotiation, which deal with the performance of functions that would automatically be rendered ineffective by general awareness of the Corporation's techniques or procedures, may be exempt from mandatory disclosure even though they affect or may affect the public. These records

will not be maintained in the central records room.

(d) Certain records maintained in the records room or otherwise made available pursuant to this Part may be "edited" by the deletion of identifying details concerning individuals, to prevent a clearly unwarranted invasion of personal privacy. In such cases, the record shall have attached to it a full explanation of the deletion.

§ 1602.6 Regional records rooms.

(a) Each regional office shall have either a specially designated records room similar to the central records room described in § 1602.5 or, if that is not feasible, a designated area within the office, a principal function of which is to serve the public in accordance with this Part. The Corporation will endeavor to maintain and have readily available in its regional offices the records described in § 1602.5(b), and will designate a Records Officer in each regional office to receive and process requests submitted pursuant to this Part.

(b) The regional records rooms are located at the following addresses:

Boston Regional Office, John F. Kennedy Federal Building, Boston, Massachusetts 02203 (617) 223–4093.
New York Regional Office, 26 Federal Plaza, 32nd Floor, New York, New York 10007 (212) 264–1940.
Philadelphia Regional Office, Gateway Building, 3535 Market Street, Philadelphia, Pennsylvania 19104 (215) 597–6105.
Atlanta Regional Office, 730 Peachtree Street, N.E., Atlanta, Georgia 30308 (404) 526–3049.
Chicago Regional Office, 300 South Wacker Drive, 26th Floor, Chicago, Illinois 60606 (312) 353–1155.
Dallas Regional Office, 1100 Commerce Street, Dallas, Texas 75202 (214) 749–1357.
Kansas City Regional Office, 911 Walnut Street, Kansas City, Missouri 64106 (816) 374–5118.
Denver Regional Office, 1961 Stout Street, Denver, Colorado 80202 (303) 837–4026.
San Francisco Regional Office, 690 Market Street, Room 700, San Francisco, California 94104 (415) 556–8484.
Seattle Regional Office, Arcade Plaza Building, 1321 Second Avenue, Seattle, Washington 98101 (206) 442–0593.

Subpart C—Procedure

§ 1602.7 Use of records rooms.

(a) Any member of the public who wishes to inspect or copy records regularly maintained in the central or a regional records room may secure access to these records by presenting himself or herself at the records room during business hours. No advance notice or appointment is required, although persons wishing to make extended use of regional office facilities should take account of the possible limitations in these facilities.

(b) Each records room will also be available to any member of the public to inspect and copy records which are not regularly maintained in such room. To obtain such records a person should present his or her request identifying the records to the Records Officer. Because it will sometimes be impossible to produce these records or copies of them on short notice, a person who wishes to use records room facilities to inspect or copy such records is advised to arrange a time in advance, by telephone or letter request made to the Records Officer of the facility which he or she desires to use. Persons submitting requests by telephone will be advised by the Records Officer or another designated employee whether a written request would be advisable to aid in the identification and expeditious processing of the records sought. Persons submitting written requests should identify the records sought in the manner provided in § 1602.8(b) and should indicate whether they wish to use the records room facilities on a specific date. The Records Officer will endeavor to advise the requesting party as promptly as possible if, for any reason, it may not be possible to make the records sought available on the date requested.

§ 1602.8 Availability of records on request.

(a) In addition to the records made available through the records rooms, the Corporation will make such records available to any person in accordance with paragraphs (b) and (c) of this section, unless it is determined that such records should be withheld and are exempt from mandatory disclosure under the FOIA and § 1602.9 of these regulations.

(b) Requests. (1) A request will be acceptable if it identifies a record with sufficient particularity to enable officials of the Corporation to locate the record with a reasonable amount of effort. Requests seeking records within a reasonable specific category will be deemed to conform to the statutory requirement of a request which "reasonably describes" such records if professional employees of the Corporation who are familiar with the subject area of the request would be able, with a reasonable amount of effort, to determine which particular records are encompassed within the scope of the request, and to search for, locate, and collect the records without unduly burdening or materially interfering with operations because of the staff time consumed or the resulting disruption of files. If it is determined that a request does not reasonably describe the records sought as specified in this paragraph, the response denying the request on that ground shall specify the reasons why the request failed to meet the requirements of this paragraph and shall extend to the requesting party an opportunity to confer with Corporation personnel in order to attempt to reformulate the request in a manner which will meet the needs of the requesting party and the requirements of this paragraph.

(2) To facilitate the location of records by the Corporation, a requesting party should try to provide the following kinds of information, if known: (i) the specific event or action to which the record refers; (ii) the unit or program of the Corporation which may be responsible for or may have produced the record; (iii) the date of the record or the date or period to which it refers or relates; (iv) the type of record, such as an application, a grant, a contract, or a report; (v) personnel of the Corporation who may have prepared or have knowledge of the record; (vi) citations to newspapers or publications which have referred to the record.

(3) The Corporation is not required to create a record to satisfy a request for information. When the information requested exists in the form of several records at several locations, the requesting party should be referred to those sources only if gathering the information would unduly burden or materially interfere with operations of the Corporation.

(4) All requests for records under this section shall be made in writing, with the envelope and the letter clearly marked: "Freedom of Information Request." All such requests shall be addressed to the Records Officer at the headquarters of the Corporation or at any regional records office. Any request not marked and addressed as specified in this subparagraph will be so marked by Corporation personnel as soon as it is properly identified, and forwarded immediately to the Records Officer. A request improperly addressed will not be deemed to have been received for purposes of the time period set forth in paragraph (c) of this section until forwarding to the appropriate office has been effected, or until such forwarding would have been effected with the exercise of due diligency by Corporation personnel. On receipt of an improperly addressed request, the Records Officer shall notify the requesting party of the date on which the time period commenced to run.

(5) A person desiring to secure copies of records by mail should write to the Records Officer at the headquarters in Washington, D.C. The request should identify the records of which copies are sought and should indicate the number of copies desired. Fees may be required to be paid in advance in accordance with § 1602.13. The requesting party will be advised of the estimated fee, if any, as promptly as possible. If a waiver of fees is requested, the grounds for such request should be included in the letter.

(c) The Records Officer, upon request for any records made in accordance with this Part, shall make an initial determination of whether to comply with or deny such request and dispatch such determination to the requesting party within ten days (excepting Saturdays, Sundays, and legal public holidays) after receipt of such request, except for unusual circumstances in which case the time limit may be extended for not more than ten working days by written notice to the requesting party setting forth the reasons for such extension and the date on which a determination is expected to be dispatched. In determining whether to issue a notice of extension of time for a response to a request beyond the ten-day period, Corporation officials shall consult with the Office of the General Counsel. As used herein, "unusual circumstances" are limited to the following, but only to the extent reasonably neces-

V 40 N 220 NOV 13 75 XUM

sary to the proper processing of the particular request:

(1) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(2) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(3) The need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request or among two or more components of the Corporation having substantial subject matter interest therein.

(d) If no determination has been dispatched at the end of the ten-day period, or the last extension thereof, the requesting party may deem his request denied, and exercise a right of appeal in accordance with § 1602.12. When no determination can be dispatched within the applicable time limit, the Records Officer shall nevertheless continue to process the request. On expiration of the time limit, he shall inform the requesting party of the reason for the delay, of the date on which a determination may be expected to be dispatched, and of his right to treat the delay as a denial and to appeal to the President in accordance with § 1602.12; and he may ask the requesting party to forego appeal until a determination is made.

(e) After it has been determined that a request will be granted, the Corporation will act with diligence in providing a substantive response.

§ 1602.9 Invoking exemptions to withhold a requested record.

(a) A requested record of the Corporation may be withheld from public disclosure only if one or more of the following categories exempted by the FOIA apply:

(1) Matter which is (i) specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and (ii) is in fact properly classified pursuant to such Executive Order;

(2) Matter which is related solely to the internal personnel rules and practices of the Corporation;

(3) Matter which is specifically exempted from disclosure by statute;

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the Corporation;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) Investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would (i) interfere with enforcement proceedings, (ii) deprive a person of a right of a fair trial or an impartial adjudication, (iii) constitute an unwarranted invasion of personal privacy, (iv) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (v) disclose investigative techniques and procedures, or (vi) endanger the life or physical safety of law enforcement personnel;

(8) Matter which is contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;

(9) Geological and geophysical information and data, including maps, concerning wells.

(b) In the event that one or more of the above exemptions applies, any reasonably segregable portion of a record shall be provided to the requesting party after deletion of the portions which are exempt. In appropriate circumstances, subject to the discretion of Corporation officials, it may be possible to provide a requesting party with: (1) a summary of information in the exempt portion of a record or (2) an oral description of the exempt portion of a record. In determining whether any of the foregoing techniques should be employed in accordance with this paragraph or whether an exemption should be waived in accordance with paragraph (c) of this section, Corporation officials shall consult with the Office of General Counsel. No requesting party shall have a right to insist that any or all of the foregoing techniques should be employed in order to satisfy a request.

(c) Records which may be exempted from disclosure pursuant to paragraph (a) of this section cay be made available as a matter of discretion when disclosure is not prohibited by law, if it does not appear adverse to legitimate public or personal interests.

§ 1602.10 Officials authorized to grant or deny requests for records.

The General Counsel shall furnish necessary advice to Corporation officials and staff as to their obligations under this Part and shall take such other actions as may be necessary or appropriate to assure a consistent and equitable application of the provisions of this Part by and within the Corporation. Officials of the Corporation shall consult with the General Counsel before denying requests under this Part, or before granting requests for waiver or modified application of an exemption or for categories of documents which the General Counsel determines may present special or unusual problems. Only the General Counsel or his delegate, is authorized to deny requests under this Part. The General Counsel, and subject to consultation with him when required, the Records Officer, each Regional Director, and each Regional Records Officer, are authorized to grant requests under this Part.

§ 1602.11 Denials.

(a) A denial of a written request for a record issued by an official of the Corporation shall be in writing and shall include the following:

(1) A reference to the applicable exemption or exemptions in § 1602.9(a) upon which the denial is based;

(2) An explanation of how the exemption applies to the requested records;

(3) A statement explaining why it is deemed unreasonable to provide segregable portions of the record after deleting the exempt portions;

(4) The name and title of the person or persons responsible for denying the requests; and

(5) An explanation of the right to appeal the denial and of the procedures for submitting an appeal, including the address of the official to whom appeals should be submitted.

(b) Whenever the Corporation makes a record available subject to the deletion of a portion of the record, such action shall be deemed a denial of a record for purposes of paragraph (a) of this section.

(c) All denials shall be treated as opinions and shall be maintained and indexed accordingly, subject only to the necessity of deleting identifying details the release of which would constitute a clearly unwarranted invasion of personal privacy for a member of the public.

§ 1602.12 Appeals of denials.

(a) Any person whose written request has been denied is entitled to appeal the denial within ninety days by writing to the President of the Corporation at the headquarters in Washington, D.C. The envelope and letter should be clearly marked: "Freedom of Information Appeal." An appeal need not be in any particular form, but should adequately identify the denial, if possible, by describing the requested record, identifying the official who issued the denial, and providing the date on which the denial was issued.

(b) No personal appearance, oral argument, or hearing will ordinarily be permitted on appeal of a denial. Upon request and a showing of special circumstances, however, this limitation may be waived and an informal conference may be arranged with the President, or the President's specifically designated representative, for this purpose.

(c) The decision of the President on an appeal shall be in writing and, in the event the denial is in whole or in part upheld, shall contain an explanation responsive to the arguments advanced by the requesting party, the matters described in § 1602.11(a)(1)–(4), and the provisions for judicial review of such decision under Section 552(a)(4) of the FOIA. The decision shall be dispatched to the requesting party within twenty working days after receipt of the appeal, unless an additional period is justified pursuant to Section 1602.8(c) and such

period taken together with any earlier extension does not exceed ten days. The President's decision shall constitute the final action of the Corporation. All such decisions shall be treated as final opinions under § 1602.5(b).

§ 1602.13 Fees.

(a) Information provided routinely in the normal course of doing business will be provided at no charge.

(b) The Records Officer may waive or reduce fees where special circumstances, including but not limited to the benefit of the general public, warrant. A Records Officer shall waive fees where the requesting party is indigent unless the fees would exceed $25 and may waive or reduce fees for the request of an indigent where the fees would exceed $25. These provisions will be subject to appeal in the same manner as appeals from denial under § 1602.12.

(c) There shall be no fee charged for services rendered by the Corporation pursuant to this Part, unless the charges, as calculated in paragraph (e) of this Section, exceed $6.50. Where the charges are calculated to exceed $6.50, the fee shall be the difference between $6.50 and the calculated charges.

(d) Ordinarily, no fee shall be levied where the records requested are not provided or made available. However, if the time expended in processing the request is substantial, and if the requesting party has been notified of the estimated cost pursuant to paragraph (f) of this section, and has been specifically advised that it cannot be determined in advance whether any records will be made available, fees may be charged.

(e) The schedule of charges for services regarding the production or disclosure of the Corporation's records is as follows:

(1) Search for records: $1.50 per one-quarter hour.
(2) Computer Time:
Central Processing Unit, $10.80 per minute.
Card Reader, .60 per 1000 cards.
Printer, .60 per 333 cards.
Tape or Disk, .60 per 100 lines; .75 per 1000 number of reads or lines.
Minimum charge, $1.50.
(3) Reproduction, duplication, or copying of records: $0.10 per page.
(4) Reproduction, duplication, or copying of microfilm:
Microfilm, $0.75 per frame.
Microfiche, $1.45 per jacket.
(5) Certification of true copies: $1.00 each.

(f) Where it is anticipated that the fee chargeable under this Part will amount to more than $25, and the requesting party has not indicated in advance his willingness to pay so high a fee, the requesting party shall be notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. In such cases, a request will not be deemed to have been received until the requesting party is notified of the anticipated cost and agrees to bear it. Such a notification shall be transmitted as soon as possible, but in any event within five working days, giving the best estimate then available. The notification shall offer the requesting party the opportunity to confer with appropriate representatives of the Corporation for the purpose of reformulating the request so as to meet his needs at a reduced cost.

(g) Where the anticipated fee chargeable under this Part exceeds $25, an advance deposit of 25 percent of the anticipated fee may be required. Where a requesting party has previously failed to pay a required fee, an advance deposit of the full amount of the anticipated fee together with the fee then due and payable may be required.

(h) The Corporation reserves the right to limit the number of copies that will be provided of any document to any one requesting party, or to require that special arrangements for duplication be made in the case of bound volumes or other records representing unusual problems of handling or reproduction.

Effective date: December 15, 1975.

DAVID S. TATEL,
Counsel to the Corporation.

Title 49—Transportation

CHAPTER III—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. MC-56; Notice 75-23]

PART 393—PROHIBITION AGAINST OPERATING WITH OVERLOADED OR UNDERINFLATED TIRES

Spot Amendment to FMCSR

● Purpose. This order clarifies the intent of the amendment to § 393.75 of the Federal Motor Carrier Safety Regulations (FMCSR), pertaining to tires published in the Federal Register on September 29, 1975 (40 FR 44555). ●

Section 393.75(f)(2) of the FMCSR (49 CFR 393.75(f)(2)) is being amended to delete the phrase, "and marked on the tire's sidewall." The cited words would require all tires on other than front-wheels to have the load capacity marked on them after October 1, 1976.

It was intended that § 393.75 specify load requirements for tires and for front-wheel tires to meet all the requirements of FMVSS No. 119 after April 1, 1976. It was not the intent to preclude the use of tires, new and used, after October 1, 1976, if they were not marked with a load capacity rating, provided the load on the tire did not exceed that specified in FMVSS No. 119 for the size tire in question.

A miscalculation has been made on the turnover time of tires now in service without a load rating marked on the sidewall. Tires presently in service, new and used, made before FMVSS No. 119 went into effect on March 1, 1975, may or may not have a load rating mark on the tire sidewall. A decision has been made to amend § 393.75(f)(2) to allow the use of tires presently in service on and after October 1, 1976, even though they do not have a load rating marked on the tire if the load capacity for the tire is not exceeded.

In consideration of the foregoing, § 393.75 is amended by revising paragraph (f)(2) to read as follows:

§ 393.75 Tires.

. . . . . .

(f) . . .

(2) *Other than front-wheels.* On and after October 1, 1976, no motor vehicle shall be operated with tires on wheels other than the front-wheels which carry a greater weight than that specified for the tire in any of the publications of the standardizing bodies listed in FMVSS No. 119 (49 CFR 571.119) except for those vehicles being operated at reduced speed under the terms of a special permit issued by one of the several States and specifying reduced speeds.

. . . . . .

(Section 204, Interstate Commerce Act, 49 U.S.C. 304, section 6, Department of Transportation Act, 49 U.S.C. 1655, and the delegations of authority by the Secretary of Transportation and the Federal Highway Administrator at 49 CFR 1.48 and 49 CFR 389.4, respectively)

Effective date: November 4, 1975.

Since this amendment is nonsubstantive in character and does not impose additional burden on any person, notice and public procedures thereon are unnecessary and it is effective on date of issuance as set forth below, except as provided in the rule.

Issued on November 4, 1975.

ROBERT A. KAYE,
Director,
Bureau of Motor Carrier Safety.

[FR Doc.75-30561 Filed 11-12-75;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Certain National Wildlife Refuges in Nevada

The following special regulations are issued and are effective on January 1, 1976.

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

General conditions: Fishing shall be in accordance with applicable State and Federal regulations. Portions of refuges which are open to fishing are designated by signs and/or delineated on maps. The maps are available at the respective refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 3737, Portland, OR 97208.

Charles Sheldon Antelope Range. (Headquarters: P.O. Box 111, Lakeview, OR 97630.)

Ruby Lake National Wildlife Refuge, Ruby Valley, NV 89833.

Stillwater National Wildlife Refuge, P.O. Box 592, Fallon, NV 89406.

Special Condition: Refuge closed to fishing during the migratory waterfowl hunting season.

V 40 N 220
NOV 13 75
XUM

The provisions of these special regulations supplement the regulations which govern fishing on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1976.

WILLIAM H. MEYER,
Acting Regional Director,
U.S. Fish and Wildlife Service.

[FR Doc.75-30550 Filed 11-12-75;8:45 am]

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Kenai National Moose Range, Alaska

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER:

§ 28.28 **Special regulations, public access, use, and recreation; for individual wildlife refuge areas.**

ALASKA

KENAI NATIONAL MOOSE RANGE

The operation of off-road vehicles commonly referred to as all-terrain vehicles (ATV's) is prohibited on the Kenai National Moose Range except the use of lightweight, motorized vehicles commonly identified by the general term "snowmobile" is authorized on certain designated areas of the Kenai National Moose Range subject to the following special conditions:

1. Only "snowmobiles" with an overall width of 40 inches or less will be permitted.

2. The use of "snowmobiles" will be authorized during the period of December 1, 1975 through April 30, 1976 and only when snow depth is sufficient to protect underlying vegetation and terrain along the route of travel and when determined and announced by the refuge manager.

3. The use of "snowmobiles" on maintained roads within the Moose Range is prohibited, except that, a "snowmobile" may cross a maintained road only after stopping and when traffic on the roadway allows crossing safely.

4. The use of "snowmobiles" for racing purposes is prohibited.

5. That area above timberline located between Skilak Lake and Tustumena Lake is not authorized for "snowmobile" use.

6. The area within T. 4 N., R. 10 W., Section 5 and those portions of Sections 6 and 7 east of the Sterling Highway right-of-way, including the Soldotna Ski Hill, the cross-country ski trails, Headquarters Lake and Nordic Lake, is not a designated "snowmobile" area.

7. The Swanson River canoe route lakes and portages are closed to "snowmobile" use.

8. An area including the Swan Lake canoe route and several public recreational lakes is not a designated "snowmobile" area. That area closed to such use is bounded on the west by the Swanson River Road, bounded on the north by the Swan Lake Road, bounded on the east by the section line immediately west of Arrow Lake (which is located at the eastern terminus of Swan Lake Road open to the public) and proceeds south 5.8 miles to its intersection with the headwaters of Moose River (one-half mile southeast of the easternmost shore of Swan Lake), thence down-stream along the west bank of Moose River, and bounded on the south by the Moose Range boundary.

9. The use of "snowmobiles" is prohibited in those game management units of the Kenai National Moose Range during any established moose hunting season. In addition, the use of "snowmobiles" as an aid in big game hunting or for transporting big game is not authorized except on the Mystery Creek access road and that portion of the Anchorage Natural Gas Pipeline right-of-way extending north from its junction with the Mystery Creek access road and all refuge lands east thereof, only during that period when "snowmobile" use is authorized on the refuge and as a means of access or transportation in conjunction with legal caribou hunting in State Game Management Unit 7.

The provisions of this special regulation supplement, the regulations which govern public access, use, and recreation on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through November 30, 1976.

JAMES B. MONNIE,
Refuge Manager, Kenai National Moose Range, Kenai, Alaska.

OCTOBER 30, 1975.

[FR Doc.75-30549 Filed 11-12-75;8:45 am]

PART 20—MIGRATORY BIRD HUNTING

Emergency System for Closure or Suspension

These regulations provide an emergency system for the closure or temporary suspension of a migratory bird hunting season in those cases where the continuation of the season would pose an imminent threat to an endangered or threatened species of wildlife. These regulations carry out the intent of section 7 of the Endangered Species Act of 1973, which provides that all of the authorities of the United States Fish and Wildlife Service are to be used in a manner consistent with the conservation of endangered and threatened species. From time to time, the unexpected presence of an endangered or threatened species in an area where migratory birds may be hunted may lead to an emergency situation. In order to avoid harm, or fatal injury to endangered or threatened wildlife, it may be necessary to close or temporarily suspend the hunting season for migratory birds in a given area.

For example, on November 7, 1975, the U.S. Fish and Wildlife Service and the North Dakota Game and Fish Department determined that a number of whooping cranes were present in North Dakota northwest of an 8-county sandhill crane hunting area. The hunting season for sandhill cranes in North Dakota, is routinely delayed until after the usual departure date for whooping cranes from that State. As a result of unexpectedly warm weather in the region, however, whooping cranes migrated into North Dakota later than usual, and were still present on the opening day of the sandhill crane season, November 8, 1975.

Intensive field surveillance by State and Federal personnel indicated that no whooping cranes were present in the sandhill crane hunting area. However, because the migration pattern for the whooping cranes could take them through parts of the 8 counties in North Dakota where sandhill crane hunting is permitted, the Fish and Wildlife Service has concluded that its responsibilities under the Endangered Species Act necessitate the promulgation of an amendment to 50 CFR Part 20 which would authorize the Director to expeditiously close or temporarily suspend part of the migratory bird hunting season, should an imminent threat to the safety of whooping cranes actually develop. Accordingly, subpart C is amended by the addition of a new § 20.26 which provides for prompt suspension or closure authority should the need occur in the future.

Because of the potential need to exercise this authority in the immediate future, the Fish and Wildlife Service finds that it is impractical and contrary to the public interest to issue this amendment as a proposed rulemaking, subject to comment. Because of the same time constraints, the Fish and Wildlife Service also finds that "good cause" exists within the meaning of Section 553 of the Administrative Procedure Act to have this regulation become effective November 13, 1975.

Accordingly, Part 20 of Chapter I Title 50, Code of Federal Regulations, is amended as set forth below:

Amend Subpart C by adding a new section 20.26, reading as follows:

§ 20.26 **Emergency Closures.**

(a) The Director may close or temporarily suspend any season established under Subpart K of these regulations:

(1) Upon a finding that a continuation of such season would constitute an imminent threat to the safety of any endangered or threatened species;

(2) Upon issuance of local public notice by such means as publication in local newspapers of general circulation, posting of the areas affected, notifying the State wildlife conservation agency and announcement on local radio and television.

(b) Any such closure or temporary suspension shall be announced by publication of a notice to that effect in the FEDERAL REGISTER simultaneous with the local public notice referred to in paragraph (a)(2) of this section. However, in the event that it is impractical to publish a FEDERAL REGISTER notice simultaneously, due to the restrictions in time available and the nature of the particular emergency situation, such notice shall follow the steps outlined in paragraph (a) of this section as soon as possible.

(c) Any closure or temporary suspension under this section shall be effective on the date of publication of the FEDERAL REGISTER notice, or if such notice is not published simultaneously, then on the date and at the time specified in the local notification to the public. Every notice of closure shall include the date and time of closing of the season and the area or areas affected. In the case of a temporary suspension the date and time when the season may be resumed shall be provided by a subsequent local notification to the public.

AUTHORITY: Section 3 of the Migratory Bird Treaty Act (16 U.S.C. 704); and section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1538).

Effective: November 13, 1975.

F. V. SCHMIDT,
Acting Director,
U.S. Fish and Wildlife Service.

NOVEMBER 11, 1975.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1094]

[Docket No. AO–103–A38]

MILK IN THE NEW ORLEANS, LOUISIANA MARKETING AREA

Notice of Extension of Time

Notice is hereby given that the time for filing exceptions to the recommended decision with respect to the proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the New Orleans, Louisiana, marketing area which was issued October 22, 1975 (40 FR 50051) is hereby extended to December 1, 1975.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Signed at Washington, D.C., on: November 7, 1975.

DONALD E. WILKINSON,
Administrator.

Farmers Home Administration

[7 CFR Part 1803]

TREASURY LOAN DISBURSEMENT SYSTEM

Supplemental Notice of Proposed Rulemaking

In the October 23, 1975, issue of the FEDERAL REGISTER (40 FR 49577), the Farmers Home Administration (FmHA) published a notice of proposed rulemaking regarding 7 CFR 1803, "Supervised Bank Accounts," to implement a new method of disbursing loan and grant funds called the Treasury Loan Disbursement System (TLDS). TLDS for Sections 502 and 504 Rural Housing loans for construction and repair work, using a multiple advance feature, will be field tested in three States (Kentucky, New York, and Oregon) before its nationwide implementation.

This document supplements the notice by notifying the public that in addition to sections 502 and 504 Rural Housing the use of the multiple advance feature will be expanded to include the following loan types:

Farm Ownership, Individual Soil and Water, Recreation Loans, and Emergency Loans, pursuant to sections 302, 303, 304, and 321 of the Consolidated Farm and Rural Development Act.

Date November 10, 1975.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

[FR Doc.75–30671 Filed 11–12–75;8:45 a.m.]

Animal and Plant Health Inspection Service

[9 CFR Part 314]

PARASITIC LIVER HANDLING

Notice of Proposed Rulemaking

Notice is hereby given in accordance with the administrative procedure provision in 5 U.S.C. 553, that the Animal and Plant Health Inspection Service is considering amending § 314.10 of the federal meat inspection regulations (9 CFR 314.10), pursuant to the Federal Meat Inspection Act, as amended (21 U.S.C. 601 *et seq.*), to eliminate certain special handling requirements for livestock livers condemned because of fluke or fringed tapeworm infestations, and to provide that livers condemned because of hydatid disease be destroyed.

Statement of considerations: The current federal meat inspection regulations require the cooking or freezing of livestock livers infested with flukes, and cooking of livers infested with fringed tapeworms (*Thysanosoma actinioides*) or hydated cysts before the livers can be shipped from federally inspected establishments. Livers so treated may presently be used in manufacturing animal foods, but cannot be used for human food. These requirements were initiated many years ago in an effort to break the parasites' life cycle, thereby reducing the incidence of infestation. However, there is no information or evidence that these requirements have contributed to a reduction in the incidence of these parasitisms. These requirements have caused additional expense to the slaughterers and required additional inspection supervision apparently without significant beneficial results.

Based on information currently available to the Department, it appears that cooking and freezing such livers has not had significant impact in reducing the incidence of such parasitic infestation of livestock, and that the proposed change with respect to livers infested with flukes or fringed tapeworms poses no threat to human health. However, since canines consuming livers infected with hydatid cysts may become infected with the adult form of the tapeworm (*Echinoccus granulosa*) and, in turn, could infect humans through their ingestion of eggs from this parasite, it appears that livers infected with hydatid cysts should be destroyed.

The list of denaturing agents for certain livers shipped from an official establishment would be changed to coincide with the list of denaturing agents presently permitted for use on livers outside of official establishments. It appears that any of these agents would adequately denature such livers so as to deter them from being used for human food.

Also, the certificate requirements in connection with the shipment of certain condemned livers would be deleted, in that it appears that denaturing and labeling clearly identify materials as inedible and the certificates are not needed by the Program. Certificates are submitted to the Program for statistical purposes only, and it appears that such statistics are no longer needed.

Therefore, § 314.10 of the federal meat inspection regulations would be revised to read as follows:

§ 314.10 Livers condemned because of parasitic infestation and for other causes; conditions for disposal for purposes other than human food.

(a) Livers condemned on account of hydatid cysts shall be disposed of by tanking pursuant to the provisions of § 314.1 of this subchapter if condemned at official establishments having facilities for tanking; otherwise they shall be destroyed pursuant to the provisions of § 314.3 of this subchapter.

(b) Livers condemned because of parasites other than hydatid cysts; and livers condemned because of telangiectasis, angioma, "sawdust" condition, cirrhosis, carotenosis, or other nonmalignant change, benign abscesses, or contamination, when these conditions are not associated with infectious diseases in the carcasses, may be shipped from an official establishment only for purposes other than human food, and only if all tissue affected with abscesses is removed and destroyed within the establishment, and all livers are processed and denatured, with any agent prescribed in § 325.13(a) (1) or (2) or (5), and in accordance with § 325.13(a) (6) of this subchapter. This provision for movement from an official establishment is made solely under the Federal Meat Inspection Act and is not intended to relieve or modify any other applicable requirements under any other law regarding the movement of such articles, for purposes other than use as human food.

(c) Livers condemned because of conditions described in paragraph (b) of this section shall be in containers plainly marked "inedible".

Any person wishing to submit written data, views, or arguments concerning the proposed amendment may do so by filing them, in duplicate, with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, or if the material is deemed to be confidential, with the Inspection Standards and Regulations Staff, Scientific and Technical Services, Meat and Poultry Inspection Program, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250, by January 12, 1976.

Any person desiring opportunity for oral presentation of views should address such request to the Staff identified in the preceding paragraph, so that arrangements may be made for such views to be presented prior to the date specified in the preceding paragraph. A record will be made of all views orally presented.

All written submissions and records of oral views made pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business, unless the person makes the submission to the Staff identified in the preceding paragraph and requests that it be held confidential. A determination will be made whether a proper showing in support of the request has been made on grounds that its disclosure could adversely affect any person by disclosing information in the nature of trade secrets or commercial or financial information obtained from any person and privileged or confidential. If it is determined that a proper showing has been made in support of the request, the material will be held confidential; otherwise, notice will be given of denial of such request and an opportunity afforded for withdrawal of the submission. Requests for confidential treatment will be held confidential (7 CFR 1.27(c)).

Comments on the proposal should bear a reference to the date and page number of this issue of the FEDERAL REGISTER.

Done at Washington, D.C., on: November 6, 1975.

F. J. MULHERN,
Administrator, Animal and
Plant Health Inspection Service.

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

[49 CFR Part 192]

[Docket No. OPSO–36, Notice No. 75–6]

TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE

Caulked Bell and Spigot Joints

The Office of Pipeline Safety Operations (OPSO) is considering a revision of § 192.753(a) to permit cast iron caulked bell and spigot joints subject to pressures of 25 psig or more to be sealed by any means which maintains flexibility in the joint, bonds chemically or mechanically with cast iron, and satisfies the general requirements of §§ 192.53 and 192.143 applicable to the materials and the design of pipeline components.

Currently, § 192.753(a) requires that cast iron caulked bell and spigot joints subject to pressures of 25 psig or more must be sealed with mechanical leak clamps. This requirement is based on the recommended safety practice contained in the United States of America Standards Institute B31.8 Code, 1968 edition, which was widely used by the pipeline industry before Part 192 was adopted (35 FR 13248, August 19, 1970).

The need for the additional seal by mechanical leak clamps is indicated by both the gas pressure and the drying effect of natural gas on caulked bell and spigot joints. When most of the cast iron bell and spigot joints being used in the transportation of natural gas in the U.S. were installed, they were caulked with a jute packing material to prevent the escape of gas. The jute caulking, which must be kept moist with oil or water to remain gas tight, provided a satisfactory seal for the manufactured gases that were transported when the joints were installed. However, when joints caulked with jute are used in the transportation of natural gas, which is not as moist as manufactured gas, the jute caulking soon dries out, causing gas leaks. In addition, until recently, mechanical leak clamps were the only reliable means of sealing a cast iron caulked bell and spigot joint subject to pressures of 25 psig or more to prevent it from leaking.

Since Part 192 was adopted, the pipeline industry has developed new methods and materials for sealing cast iron bell and spigot joints. OPSO believes that at least one recently developed method can be used to seal a caulked joint subject to pressures of 25 psig or more as well as or better than a mechanical leak clamp. Other new methods may also provide a satisfactory alternative to mechanical leak clamps, and their use should not be precluded by Part 192.

The new method which results in the chemical bonding of a rubber compound to the surfaces of a bell and spigot joint, permanently sealing the joint to prevent the escape of gas, was developed by a British chemical firm, Avon Lippiatt Hobbs, Ltd., in consultation with the British Gas Council and the Dutch Gas Institute. This new method is popularly known as the Avonseal method. In Great Britain the method has been used to seal over 300,000 joints, many of which are operated at pressures well in excess of 25 psig. The first 100,000 of the seals installed in Great Britain were recorded and checked by the British Gas Council. Only 17 leaks occurred on the 100,000 joints, and upon investigation, each of these leaks was found to be due to human error with no failure in material. In view of this development, by letter dated July 8, 1974, the Miller Pipeline Corporation petitioned OPSO to amend § 192.753 (a) to permit the use of this new method as an alternative to mechanical leak clamps.

The Ohio Public Utilities Commission (PUC) also believes that § 192.753 (a) should not restrict the use of new methods as safe as mechanical leak clamps. On June 5, 1975, acting under Section 3(e) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1674(a)), the PUC granted a waiver from the requirements of § 192.753(a) to three Ohio gas companies permitting them to use the Avonseal method on cast iron caulked bell and spigot mains operating below 50 psig. The record of this State waiver and the OPSO action entering no objection to it are contained in OPSO Docket No. OH–75–1.

OPSO has reviewed the tests and data supporting the safety of the Avonseal method submitted by the Ohio PUC and the Miller Pipeline Corporation along with information relevant to the use of other sealing methods. On the basis of that review, OPSO has developed criteria which it believes any sealing method subject to pressures of 25 psig or more should meet if the method is to provide a safe alternative to mechanical leak clamps. These criteria are (1) maintenance of flexibility in the joint to minimize stresses at the joint that could cause pipe breakage, (2) a chemical or mechanical bond between the sealing material and the metal surfaces of both the pipe bell and spigot to provide a permanent seal, and (3) the sealing material and the bond must have a strength sufficient to withstand anticipated forces, be resistant to adverse environmental conditions, and be chemically compatible with materials to which the joint may be exposed. (The criteria in clause (3) are based on requirements now applicable to pipeline materials and components under §§ 192.53 (a), (b) and 192.143.) OPSO believes that revising § 192.753(a) to permit the use of sealing methods which meet these criteria would have the benefit of removing the existing restriction against the use of technological advances, while maintaining the level of safety now provided.

In consideration of the foregoing, § 192.753(a) would be revised to read as follows:

§ 192.753 Caulked bell and spigot joints.

(a) Each cast iron caulked bell and spigot joint that is subject to pressures of 25 psig or more must be sealed with—

(1) Mechanical leak clamps; or

(2) A means which—

(i) Does not reduce the flexibility of the joint;

(ii) Permanently bonds, either chemically or mechanically, or both, a sealing material with the bell and spigot metal surfaces; and

(iii) Utilizes a sealing material and bond that meet the strength, environmental, and chemical compatibility requirements of §§ 192.53(a) and (b) and 192.143.

* * * * *

Interested persons are invited to participate in this rule making action by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory

V 40 NO 220 NOV 13 75 XUM

docket and notice numbers and be submitted in duplicate to the Director, Office of Pipeline Safety Operations, Department of Transportation, Washington, D.C. 20590. All communications received by December 29, 1975, will be considered by the Director before taking final action on the notice. Late filed comments will be considered to the extent practicable. All comments will be available for examination by interested persons at the Office of Pipeline Safety Operations, Room 6226, 2100 Second Street, S.W., Washington, D.C., before and after the closing date for comments. The proposal contained in this notice may be changed in the light comments received.

This notice is issued under the authority of section 3 of the Natural Gas Pipeline Safety Act of 1968 (49 USC 1672), § 1.64 of the regulations of the Office of the Secretary of Transportation (49 CFR 1.64), and the redelegation of authority to the Director, Office of Pipeline Safety Operations, set forth in Appendix A to Part 102 of the regulations of the Office of the Director, Materials Transportation Bureau (49 CFR Part 102).

Issued in Washington, D.C., on November 7, 1975.

CESAR DELEON,
Acting Director, Office of Pipeline Safety Operations.

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 75-16: Notice 03]

BUS AIR BRAKE SYSTEMS

Amendment of Standard No. 121

This notice proposes an amendment of Standard No. 121, *Air Brake Systems*, 49 CFR 571.121, to suspend until January 1, 1977, the service brake stopping distance requirements as they apply to buses. This modification of the standard is responsive to information developed at a public meeting held in Washington, D.C., on October 29, 30, and 31, 1975, as well as other information collected by the NHTSA on field experience since the standard's implementation. A separate response will address the issues raised with regard to the standard's implementation in trucks and trailers.

The NHTSA called the public meeting (40 FR 43049, September 18, 1975) to collect all existing information as soon as possible on the operation of the new brake systems built to conform to the standard (a transcript of the meeting is available in the NHTSA public docket). But performance was reviewed by manufacturers and users of transit and intercity buses, and by Rockwell International Corporation, the manufacturer of virtually all axles and antilock components installed in these vehicles. The California Highway Patrol also submitted reports on antilock performance in California transit operations. Submitted information confirmed a pattern of erratic behavior of bus antilock equipment that had begun to appear in other data received by the NHTSA.

The American Public Transit Association (APTA) submitted a report that summarizes the experience of 30 transit systems, including those that addressed the public meeting. The report revealed symptomatic defects in the installed antilock systems which have resulted in erratic braking performance of the new buses. The Maryland Mass Transit Administration, summarizing the views of other transit operators, called for a temporary cancellation of the standard. Additionally, the speakers asked for reevaluation of the standard as it applies to transit buses.

Intercity bus operators were represented by the National Association of Motor Bus Owners, Greyhound Corporation, and the manufacturers of a majority of intercity buses, Motor Coach Industries (MCI) and General Motors Corporation, MCI called for a 1-year suspension of the "no-lockup" requirement for buses, to be followed by the introduction of new requirements for buses different from those specified for trucks.

The NHTSA has studied the materials and arguments submitted by each speaker, along with the other material collected on experience with the 121 systems in buses. The agency has arrived at the following tentative findings:

(1) Manufacturers of both transit and intercity buses do not appear prepared at this time to utilize antilock systems other than those manufactured by Rockwell International Corporation.

(2) The Rockwell antilock system currently available for bus application is characterized by malfunction that warrants its deactivation on all vehicles on which it is installed while a correction is fully developed.

(3) Information furnished by Rockwell does not provide a basis to conclude that a demonstrably satisfactory correction to its antilock system defects is at hand.

(4) A situation wherein purchasers of new buses are required to pay for antilock systems which are to remain deactivated for an indefinite period is inappropriate.

In view of these findings, the NHTSA tentatively concludes that a 1-year suspension of parts of the standard for buses is in order. Accordingly, it is proposed that the section that requires vehicles to stop within a specific distance without wheel lockup (S5.3.1) be suspended for buses until January 1, 1977.

The efficacy of a 1-year suspension depends on the success of the fleet testing undertaken by Rockwell and any other manufacturers, such as the AC Division of General Motors, that are entering the bus antilock field. Additionally, the cooperation of bus users, both intercity and transit operators, will be required for successful evaluation of revised systems. Based on comments at the meeting, all parties intend to participate actively and the NHTSA solicits comment on manufacturer and user plans to use the 1-year suspension of S5.3.1 to achieve maximum field evaluation. If justified, a public meeting on implementation of Standard No. 121 in buses could be called in the latter part of 1976 to evaluate data generated.

§ 571.121 [Amended]

In consideration of the foregoing, it is proposed that S5.3.1 of Standard No. 121 (49 CFR 571.121) be amended by the addition of the words: "Except for a bus manufactured before January 1, 1977, and" at the beginning of the first sentence.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: December 15, 1975.

Proposed effective date: Date of publication of the final rule in the FEDERAL REGISTER.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.51 and 49 CFR 501.8.)

Issued on November 11, 1975.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs.

SWIMMING POOL SLIDES

Proposed Safety Standard; Correction

In FR Doc. 75-29501, published October 31, 1975 (40 FR 50728), the following correction is necessary:

The top line of Table 3 should read as follows:

h feet	*A* feet ±0.5 ft	*B* feet ±0.5 ft	*C* feet ±0.5 ft

As printed, *A* and *B* incorrectly read "+0.5 ft," and *C* incorrectly reads "+.05 ft."

Dated: November 7, 1975.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 435]

[FRL 456-2]

OFFSHORE SEGMENT OF THE OIL AND GAS EXTRACTION POINT SOURCE CATEGORY

Extension of Comment Period

This notice extends the period for comments to the notice, published September 15, 1975, proposing Effluent Limitations for Existing Sources, Standards of Performance and Pretreatment Standards for the Offshore Segment of the Oil and Gas Extraction Point Source Category (40 FR 42572).

Requests for an extension of time were submitted by several persons having an interest in commenting. They argue that additional time is needed to review the notice in sufficient detail to provide meaningful comments.

In view of the requests, the Environmental Protection Agency has determined it is in the public interest that the period for comments on the proposed regulation be extended until December 15, 1975.

Dated: November 4, 1975.

ANDREW W. BREIDENBACH,
Acting Assistant Administrator for Water and Hazardous Materials.

Federal Guaranties on Loans

Correction

In FR Doc. 75-28868 appearing at page 50100 in the issue for Tuesday, October 28, 1975, the text for § 790.6 was inadvertently omitted. The material should have appeared as set forth below.

790.6 Loan guaranty criteria.

In addition to meeting the requirements for eligibility and priority set forth in § 790.4 of this Part, guaranties shall be made only if the following conditions are met as determined by the Administrator:

(a) The application is signed by an authorized official of the lender and is accompanied by a statement signed by the borrower evidencing knowledge of the application and intent to comply with this regulation;

(b) The loan is to be made to a qualified borrower;

(c) Except as provided in § 790.43 of this Part, the loan amount to be guaranteed does not exceed 75 percent of the estimated aggregate cost of the project, however; there is no prohibition against the guaranty being equal to 100% of the loan to be made by the lender;

(d) The lender affirms either that the loan would otherwise not be made to the borrower or that the prevailing prime rate of interest charged to preferred customers would not be made available without a Federal loan guaranty;

(e) There is satisfactory evidence demonstrating that the lender has a management organization competent to administer the terms and conditions of a loan guaranteed under this regulation;

(f) When the maximum permissible guaranty is requested as provided in paragraph (c) of this section, the lender must affirm that its confidence in geothermal technology and utilization as related to the project is insufficient, and therefore until the lender gains experience with new geothermal technology and resources, the lender is unwilling to approve a loan at less than the maximum permissible guaranty;

(g) The loan bears interest at a rate not to exceed an annual percent on the principal obligation outstanding as the Administrator determines, in consultation with the Secretary of the Treasury, to be reasonable, taking into account the range of interest rates and lending practices prevailing in the private sector for similar loans and risks by the United States. However, it is expected that the borrower and lender will negotiate a mutually acceptable interest rate that recognizes the benefits to the lender from a Federal guaranty;

(h) The terms of such loans require full repayment over a period of up to thirty years, or the expected useful life of any physical asset to be financed by such loan, whichever is less;

(i) The amount of the loan together with other funds available to the borrower will be sufficient to carry out the project;

(j) There is reasonable assurance of payment of interest and repayment of the guaranteed portion of the loan by the qualified borrower, such as, evidence that there exists or will exist a market for the project's product or results;

(k) The amount of the guaranty for a project does not exceed $25,000,000;

(l) The total dollar amount of guaranties made under this regulation for any combination of outstanding loans to any single qualified borrower does not exceed $50,000,000;

(m) The project is to be performed in the United States, its territories or possessions, or for the benefit of facilities owned or leased by the United States from foreign governments;

(n) The project is technically feasible and uses environmentally acceptable processes;

(o) The project is to be initiated and completed in a timely and efficient manner;

(p) When necessary to carry out the project, there is a sufficiency of encouraging geophysical, geological, hydrological and geochemical data;

(q) The borrower agrees to make available on a timely basis any technical and economic information as specified in the guaranty agreement, and subject to provisions in §§ 790.33 and 790.44(b) of this Part, further agrees to its use for public dissemination purposes;

(r) There is satisfactory evidence of the borrower's interest in geothermal resources;

(s) There is satisfactory evidence that the borrower is capable of completing the project in an acceptable manner;

(t) An environmental statement or negative declaration has been prepared and issued by the appropriate Federal agency, in compliance with the National Environmental Policy Act of 1969;

(u) The project, whether conducted on public or private land, will be carried out with full regard to the use of environmentally acceptable processes in such a manner as to mitigate adverse environmental impact to the maximum extent practicable;

(v) The environmental risks of the project have been evaluated in accordance with § 790.23 of this part;

(w) The borrower and lender agree that the terms and conditions set forth in the loan agreement shall be acceptable to the Administrator and be part of the guaranty agreement;

(x) The borrower and non-guaranteed lender agree that the terms and conditions set forth in that loan agreement, including the provision that a loan guaranteed under this regulation shall not be subordinated to any other long term financing, shall not be affective until approved by the Administrator; and

(y) The borrower and lender agree to such other terms and conditions as the Administrator deems necessary and appropriate.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 89, 91, 93]

[Docket No. 20665; RM-2324; FCC 75-1215]

TRANSMITTER POWER

Specifications

In the matter of Amendment of Parts 89, 91 and 93 of the Commission's Rules and Regulations to eliminate the required annual measurement of transmitter power, frequency and modulation, and to specify transmitter power in terms of output power; Docket No. 20665; RM-2324; FCC 75-1215.

Adopted: October 29, 1975.

Released: November 7, 1975.

By the Commission: Commissioner Reid absent.

1. HT&B Electronics (HTB) has filed a petition requesting elimination of the required annual transmitter power

V 40 N 220 NOV 13 75 XUM

measurement and amendment of Parts 91 and 93 of the Rules to specify the use of radio frequency output power as the preferred method of measurement.

2. Regarding deletion of the presently required annual transmitter power measurement, HTB argues that:

> Design of equipment is normally such that power output deteriorates with time rather than increasing. For this reason, measurement of output power on an annual basis is unnecessary for the limitation of interference. The inclusion of the annual requirement precludes a service company from making all required transmitter measurements at a distance saving considerable expenditure of time, fuel and funds compared to the presently required visit to the station for local measurements.

Continuing in a similar vein, HTB points out that the goal of minimization of interference would be furthered by allowing measurement from a distance since measurements could be made more frequently per unit of cost, and because remote monitoring techniques would, in many cases, give indications of other types of transmitter spectrum deficiencies.

3. We believe the arguments presented by HTB have merit. On-the-air measurement of pertinent transmitter technical parameters is a most reliable technique and has long been in use at the Commission's monitoring stations. We feel that expanded use of on-the-air measurement techniques should be encouraged since the efficiency with which such measurements can be made results in increased benefit to the subscribing licensee and furthers the national goal of optimizing the use of available energy resources. For these reasons we believe similar deletion of annual measurement of frequency and modulation is appropriate.

4. The Rules have and will continue to require that transmitters be operated in accordance with applicable technical standards. In requiring the annual measurement of transmitter power, frequency and modulation, the Commission merely sought to implement a frequency of measurement suitable for a typical land mobile transmitter. We recognize that while semiannual or quarterly measurement of older model transmitters may be necessary, measurement at other time intervals may suffice for present state-of-the-art models. Therefore, since the annual measurement requirements appear to have become irrelevant, restrictive, and in some cases burdensome, in keeping with our policy of eliminating non-essential station operating requirements we propose to amend the Rules to eliminate these requirements, thereby providing for increased flexibility in transmitter maintenance policy and procedure. It should be emphasized that this proposal does not relieve licensees of their responsibility to take appropriate measures to insure that their radio equipment is at all times operated in accordance with the applicable technical standards.

5. HTB as also requested that the Commission update its Rules to specify output power as the preferred method of transmitter power measurement. HTB states, and we agree, that there is ". . . a need to recognize modern equipment construction (use of transistors in lieu of tubes) and modern measurement techniques." Other arguments advanced by HTB are that (1) individual equipment designs have varying efficiencies of the final output stage and therefore, specifying "plate input power" does not indicate the desired interference parameter as accurately as does "output power". (2) The term "plate input power" refers to tube construction and is not a valid technical term for use with transistors, while output power is applicable to all radio frequency generating devices. (3) Widely available test equipment enables the serviceman to measure output power more easily and, in some cases more accurately than direct current input power to the final radio frequency stage. (4) The use of wattmeters having the capability of measuring both forward and reflected transmitter output power are widespread. Such wattmeters provide a measure of the performance of the associated antenna system, thereby assuring optimum system performance. Numerous informal letters and comments from representatives of the communications industry received over the last decade confirm the validity of the afore-stated arguments. Accordingly, we propose to amend the Rules to specify output power instead of input power to final frequency stage (input power). While the petitioner requested amendment of Parts 91 and 93 only, we believe it is in the best public interest to extend this proposal to include Part 89 since operations under the three parts are essentially similar.

6. The output powers stated in the Appendix were derived using a transmitter final stage efficiency factor of .75 for frequencies below 25 MHz and .60 for frequencies above 25 MHz.[1] These are the standards used by the Commission when converting input power to output power. We recognize, however, that there are devices (such as varactor diodes) with somewhat greater efficiencies. For this reason we also propose to amend the Rules to change the range over which the permissible power may vary to 20 percent of the output power listed on the authorization.

7. The proposed amendment of Parts 89, 91 and 93 of the Rules, as set forth below, are issued pursuant to the authority contained in Sections 4(i) and 303 (c), (h) and (r) of the Communications Act of 1934, as amended.

8. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's Rules, interested persons may file comments on or before January 15, 1976, and reply comments on or before February 14, 1976. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission will also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

9. In accordance with the provisions of Section 1.419 of the Commission Rules, an original and 11 copies of all statements, briefs, or comments filed shall be furnished to the Commission. Responses will be available for public inspection during business hours in the Commission's Public Reference Room in its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION.
[SEAL] VINCENT J. MULLINS,
Secretary.

Parts 89, 91, and 93 of the Commission's Rules and Regulations are amended as follows:

PART 89—PUBLIC SAFETY RADIO SERVICES

1. Section 89.3(b) is amended by adding the following in alphabetical order as follows:

§ 89.3 Definitions.

• • • • • •

(b) Definitions of stations: • • •

Output Power. The radio frequency output power of a transmitter's final radio frequency stage at the output terminals.

• • • • • •

2. Section 89.15(a)(2) is revised as follows:

§ 89.15 Frequency coordination procedures.

(a) • • •

(1) • • •

(2) Requests to change existing facilities by increasing the authorization output, or raising the authorized height of the antenna or moving the authorized station location (including the antenna), or by adding a base station within the licensee's existing area of operation.

• • • • • •

3. Section 89.61(c)(10) is revised as follows:

§ 89.61 Request for special temporary authority.

• • • • • •

(c) • • •

(10) Output power of the transmitter

• • • • • •

4. Section 89.101 (d)(1) and (p) are revised as follows:

§ 89.101 Frequencies.

• • • • • •

(d) • • •

(1) Notwithstanding the rule provisions relating to permissible communications, points of communication and emissions in the applicable subpart of this part, the frequencies 27.235, 27.245, 27.255, 27.265, and 27.275 MHz may be used to accomplish any radio communication requirement which is necessary to the licensee's activity: Provided, That all operations are otherwise in accordance with the rules in this chapter; that the bandwidth of emission does not exceed 8 kHz; and that output power is limited to no more than 20 watts.

• • • • • •

(p) The following frequencies may be assigned to fixed stations in the Public Safety Radio Service on a secondary, non-interference basis to land mobile operations in the Industrial (except Business) and Land Transportation Radio Services. All such use of these frequencies for fixed systems is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All such fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15dB. For two-frequency systems the separation between transmit-receive frequencies is 5 MHz. The centers of urbanized areas of 200,000 or more population are determined from the Appendix, page 226, of the U.S. Commerce Publication "Air Line Distance Between Cities in the United States." Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, Vol. 1, Table 23, page 1–50.

• • • • • •

5. The table in § 89.103(a) and paragraph (b) are revised as follows:

§ 89.103 Frequency stability.

(a) • • •

[In percentage]

Frequency range (megahertz)	All fixed and base stations	All mobile stations	
		Over 2 W	2 W or less
Below 25	0.01	0.01	0.02
25 to 50	.002	.002	.005
50 to 450	[1] .0005	.0005	.005
450 to 470	[2] .00025	.0005	.0005
470 to 512	.00025	.0005	.0005
806 to 821	[3] .00015	.00025	.00025
851 to 866	.00015	.00025	.00025
1427 to 1235	[4] .03	.03	.03
Above 1435	[5] [6]	[5] [6]	[5] [6]

[1] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 73-74.6 MHz may operate with a frequency tolerance of 0.005 pct.

[2] Operational fixed stations controlling mobile relay stations, through use of the associated mobile frequency, may operate with a frequency tolerance of 0.0005 pct.

[3] For control stations, the frequency stability is 0.00025 pct.

[4] For fixed stations with power output above 120 W, the frequency tolerance is 0.01 pct if this necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power of 120 W or less and using time division multiplex, the frequency tolerance may be increased to 0.05 pct.

[5] Radiolocation equipment using pulse modulation shall meet the following frequency tolerance. The frequency at which maximum emission occurs shall be within the authorized frequency band and shall not be closer than $1.5/T$ MHz to the upper and lower limits of the authorized frequency band where T is the pulse duration in microseconds. For other radiolocation equipment, tolerances will be specified in the station authorization. See also sec. 89.121.

[6] The frequency tolerance for base and mobile stations will be specified in the station authorization.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this section, the power of a transmitter shall be the maximum rated output power as specified by the manufacturer.

• • • • • •

6. Section 89.109(c) is revised as follows:

§ 89.109 Modulation requirements.

(a) • • •

(b) • • •

(c) Each transmitter shall be equipped with a device which automatically prevents modulation in excess of that specified in this subpart which may be caused by greater than normal audio level: Provided, however, That this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

• • • • • •

7. The table in § 89.111(b) and paragraph (c) are revised to read as follows:

§ 89.111 Power and antenna height.

• • • • • •

(b) Except where the maximum power that may be used on a particular frequency is specifically designated in connection with the use of such frequency, the maximum power that will be authorized is shown in the following tabulation:

[In percentage]

Frequency range (megahertz)	Maximum output power (watts)	Maximum effective radiated power (watts)
1.3 to 3	1,500	
3 to 25	750	
25 to 100	300	
100 to 470	350	
470 to 512		1,000
806 to 821	[1]	[1]
851 to 866	[2]	[1]
2450 to 2500	[3] 5	
2500 to 10,550	[1]	
10,550 to 10,680	3	
Above 10,680	[4]	

[1] For power limitations see sec. 89.651.

[2] The output power of a transmitter on any authorized frequency in this service shall not exceed 2,000 W (33 dBW).

[3] To be specified in the station authorization.

(c) The output power shall not exceed by more than 20 percent the output power shown in the Radio Equipment List for transmitters included in this list, or the output power for the particular transmitter specifically listed on the station authorization.

• • • • • •

8. Section 89.115 is amended by referencing output power instead of input power and deleting paragraphs (a)(3), (a)(4), (b)(3), and (c)(3).

§ 89.115 Transmitter measurement.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of 2 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) • • •

(2) • • •

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorization stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

(1) • • •

(2) When any change is made in the transmitter which may affect the transmitter power output.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter authorized to operate with an output power in excess of 2 watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

(1) • • •

(2) • • •

(d) • • •

(e) • • •

• • • • • •

9. Section 89.126(h) is revised as follows:

§ 89.126 Secondary alarm and signalling operations.

• • • • • •

(h) The output power shall not exceed 30 watts (at the remote site).

• • • • • •

10. Section 89.259(g)(6) is revised as follows:

§ 89.259 Frequencies available to the Local Government Radio Service.

• • • • • •

(6) Available for assignment: Provided That the output power of any transmitter authorized to operate on this frequency shall not exceed 2 watts.

11. Section 89.309(h) (9), (13), (14), (15), (17) is amended as follows:

§ 89.309 Frequencies available to the Police Radio Service.

• • • • • •

(h) • • •

(9) This frequency is available for assignment to zone and interzone stations in the Police Radio Service for use with A1 emission only and an output power of 750 watts.

• • • • • •

(13) Subject to the restrictions contained in Section 89.111(a), base stations operating on this frequency and render-

[1] For the sake of simplicity, with the exception of the output power specified in Section 91.555, all low-value (3 watts or less) output powers were rounded up to the nearest watt after conversion.

V 40 N 220 NOV 13 75 XUM

ing service to state police mobile units may be authorized to use a maximum output power in excess of the maximum indicated in Section 89.111(b) but not in excess of 7500 watts: Provided, That such operation will cause no harmful interference to the service of other stations.

(14) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communications, using type A3 emission and an output power of 750 watts.

(15) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communications, using type A3 emission with output power of 750 watts, subject to the condition that no harmful interference is caused to the service of any police station employing type A1 emission on this frequency including any operations conducted in accordance with outstanding regional agreements and further subject to the condition that no harmful interference is caused to the service of any station, which in the discretion of the Commission may have priority on the frequency with which interference results.

• • • • • •

(17) The maximum output power of any transmitter authorized to operate on this frequency, after June 1, 1956, shall not exceed 2 watts. Licensees holding a valid authorization as of June 1, 1956, for base or mobile station operations on this frequency, with a power in excess of 2 watts, may continue to be authorized for such operation without regard to this power limitation.

• • • • • •

13. Section 89.359(g)(6) is revised as follows:

§ 89.359 Frequencies available to the Fire Radio Service.

• • • • • •

(6) The output power of any transmitter authorized to operate on this frequency shall not exceed 2 watts.

• • • • • •

PART 91—INDUSTRIAL RADIO SERVICES

14. Section 91.3 is amended by adding the following in alphabetical order:

§ 91.3 Definitions.

• • • • • •

Output Power. The radio frequency output power of a transmitter's final radio frequency stage at the output terminals.

• • • • • •

15. Section 91.7 is ameded by revising (b)(7) and (e)(4) as follows:

§ 91.7 Relay and control stations.

(a) • • •

(b) • • •

(7) A mobile station associated with one or more mobile relay stations may be authorized to operate only on a mobile service frequency above 25 MHz which is available for assignment to mobile stations. In the Business Radio Service any low-power frequency below 450 MHz may be authorized for that purpose when such stations are limited to a maxmium output power of 1 watt or less.

• • • • • •

(e) • • •

(4) Notwithstanding paragraph (e)(1) and (3) of this Section, in the Business and Special Industrial Radio Services in the frequency bands below 450 MHz only low power frequencies (2 watts or less output power) may be assigned for the purposes described in paragraph (e)(1) and (2) of this Section.

• • • • • •

16. Section 91.8(a) is revised as follows:

§ 91.8 Policy governing the assignment of frequencies.

(a) The frequencies which normally may be assigned to stations in any one of the several Industrial Radio Services are listed in the applicable subpart of this part. All licensees of stations in these services shall cooperate in the use of the frequencies assigned in order to minimize interference, and thereby obtain the most effective use of the authorized facilities. Each frequency or band of frequencies listed in this part is available on a shared basis only and will not be assigned for the exclusive use of any one licensee. The use of any frequency may be restricted as to specified geographical areas, maximum power, or such other operating conditions contained in this part or in the station authorization. Except for applications listed in subparagraph (1) of this paragraph, each application for assignment of a new frequency or to change existing facilities by increasing the authorized output power, or raising the height of the antenna, or moving the authorized station location (including the location of the antenna), or by adding a base station within the licensee's existing area of operation shall be accompanied by evidence of frequency coordination in the form set forth either in paragraph (2) or (3) of this paragraph:

Frequency range (megahertz)	Transmitter output power (percent)			
	Fixed and base stations		Mobile stations	
	Over 200 W	200 W or less	Over 2 W	2 W or less
Below 25 [1]	0.005	0.01	0.01	0.02
25 to 50	.002	.002	.002	.005
50 to 450	[2] .0005	.0005	.0005	.005
450 to 470	[2] .00025	[2] .00025	.0006	[3] .0005
470 to 512	.00025	.00025	.0005	.0005
806 to 821	[4] .00015	[4] .00015	.00025	.00025
851 to 866	.00015	.00015	.00025	.00025
1427 to 1435	[5] .03	[5] .03	.03	.03
Above 1435	(6)(7)	(6)(7)	(6)(7)	(6)(7)

[1] Industrial radiolocation service stations operating in the frequency bands 70–90 kHz and 110–130 kHz will be required to maintain the carrier frequency of each authorized transmitter within 0.01 pct of the assigned frequency. Industrial radiolocation service stations operating in frequency bands above 130 kHz must comply with the tolerance requirements indicated in the column for fixed and base stations in this table.

[2] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 73–74.6 MHz may operate with a frequency tolerance of 0.005 pct.

[3] Operational fixed stations controlling mobile relay stations, through use of the associated mobile frequency, may operate with a frequency tolerance of 0.0005 pct.

[4] The frequency tolerance for base and mobile stations authorized to operate in these bands will be specified in the station authorizations.

[5] For control stations, the frequency stability is 0.00025 pct.

[6] For fixed stations with an output power above 120 W, the frequency tolerance is 0.01 pct if the necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power of 120 W or less and using time division multiplex, the frequency tolerance may be increased to 0.05 pct.

[7] Radar stations in the industrial radiolocation service using pulse modulation shall meet the following frequency tolerance. The frequency at which maximum emission occurs shall be within the authorized frequency band and shall not be closer than 1.5/T MHz to the upper and lower limits of the authorized frequency band where T is the pulse duration in microseconds. For other equipment, tolerances will be specified in the station authorization.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this Section, the power of a transmitter shall be the maximum rated output power as specified by the manufacturer.

• • • • • •

19. Section 91.105(c) is revised as follows:

§ 91.105 Modulation requirements.

• • • • • •

(c) Each transmitter first authorized or installed after July 1, 1950, shall be provided with a device which automatically will prevent modulation in excess of that specified in this subpart which may be caused by greater than normal audio level: Provided, however, that this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

• • • • • •

20. Section 91.106 is amended by revising the table in (b) and revising (c) as follows:

§ 91.106 Power and antenna height.

(a) • • •

(b) • • •

Frequency range (megahertz)	Output power (watts)	Maximum effective radiated power (watts)
1.6 to 8	1,500	[1]
25 to 100	300	[1]
100 to 216	350	[1]
216 to 220	[1]	[2]
220 to 470	350	[1]
470 to 512		1,000
806 to 821	[1]	[2]
851 to 866	[1]	[2]
2450 to 2500	5	[1]
2500 to 10,550	[1]	[1]
10,550 to 10,680	3	[1]
Above 10,680	[1]	[1]

[1] To be specified in the station authorization.

[2] For power limitations, see sec. 89.551.

[3] The output power of a transmitter on any authorized frequency in this service shall not exceed 2,000 W (33 dbW).

(c) The output power shall not exceed by more than 20 percent the output power shown in the Radio Equipment List for transmitters included in this list, or the output power for the particular transmitter specifically listed on the station authorization.

• • • • • •

21. Section 91.108 is amended by referencing output power instead of input power and deleting paragraphs (a)(3), (a)(4), (b)(3), and (c)(3).

§ 91.108 Transmitter measurements.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of 2 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) • • •

(2) • • •

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorization stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

(1) • • •

(2) When any change is made in the transmitter which may affect the transmitter output power.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter authorized to operate with an output power in excess of 2 watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

(1) • • •

(2) • • •

(d) • • •

(e) • • •

• • • • • •

22. Section 91.253(c)(2) is revised as follows:

§ 91.253 Station limitations.

(2) The output power shall not exceed 30 watts.

• • • • • •

23. Section 91.254(b) is revised as follows:

§ 91.254 Frequencies available.

• • • • • •

(8) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(26) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, vol. 1, table 23, page 1–50. The centers of urbanized areas are determined from the appendix, Page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

24. Section 91.303(b)(2) is revised as follows:

§ 91.303 Station limitations.

• • • • • •

(2) The output power shall not exceed 30 watts.

• • • • • •

25. Section 91.304(b)(6) and (29) are revised as follows:

§ 91.304 Frequencies available.

• • • • • •

(b) • • •

(6) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed in an occupied bandwidth of 8 kHz, for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(29) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of population, 1960, vol. 1, table 23, page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • • •

26. Section 91.354(b)(6), (10) and (29) are revised as follows:

§ 91.354 Frequencies available.

• • • • • •

(6) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(10) Authorizations to operate on this frequency will be issued for A2 or F2 emission for tone signalling or for a combination of such emission with A3 or F3 emission with a maximum bandwidth of 20 kHz. The output power shall not exceed 2 watts. The maximum distance between any transmitter and the center of the radiating portion of its antenna shall not exceed 25 feet. Operation on this frequency is subject to the condition that no harmful interference is caused to stations operating in the Business Radio Service.

• • • • • •

(29) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population except that the dis-

V 40 N 220 NOV 13 75 XUM

ing service to state police mobile units may be authorized to use a maximum output power in excess of the maximum indicated in Section 89.111(b) but not in excess of 7500 watts: Provided, That such operation will cause no harmful interference to the service of other stations.

(14) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communications, using type A3 emission and an output power of 750 watts.

(15) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communications, using type A3 emission with output power of 750 watts, subject to the condition that no harmful interference is caused to the service of any police station employing type A1 emission on this frequency including any operations conducted in accordance with outstanding regional agreements and further subject to the condition that no harmful interference is caused to the service of any station, which in the discretion of the Commission may have priority on the frequency with which interference results.

• • • • • •

(17) The maximum output power of any transmitter authorized to operate on this frequency, after June 1, 1956, shall not exceed 2 watts. Licensees holding a valid authorization as of June 1, 1956, for base or mobile station operations on this frequency, with a power in excess of 2 watts, may continue to be authorized for such operation without regard to this power limitation.

• • • • • •

13. Section 89.359(g)(6) is revised as follows:

§ 89.359 Frequencies available to the Fire Radio Service.

• • • • • •

(6) The output power of any transmitter authorized to operate on this frequency shall not exceed 2 watts.

• • • • • •

PART 91—INDUSTRIAL RADIO SERVICES

14. Section 91.3 is amended by adding the following in alphabetical order:

§ 91.3 Definitions.

• • • • • •

Output Power. The radio frequency output power of a transmitter's final radio frequency stage at the output terminals.

• • • • • •

15. Section 91.7 is ameded by revising (b)(7) and (e)(4) as follows:

§ 91.7 Relay and control stations.

(a) • • •
(b) • • •
(7) A mobile station associated with one or more mobile relay stations may be authorized to operate only on a mobile service frequency above 25 MHz which is available for assignment to mobile stations. In the Business Radio Service any low-power frequency below 450 MHz may be authorized for that purpose when such stations are limited to a maximum output power of 1 watt or less.

• • • • • •

(e) • • •

(4) Notwithstanding paragraph (e)(1) and (3) of this Section, in the Business and Special Industrial Radio Services in the frequency bands below 450 MHz only low power frequencies (2 watts or less output power) may be assigned for the purposes described in paragraph (e)(1) and (2) of this Section.

• • • • • •

16. Section 91.8(a) is revised as follows:

§ 91.8 Policy governing the assignment of frequencies.

(a) The frequencies which normally may be assigned to stations in any one of the several Industrial Radio Services are listed in the applicable subpart of this part. All licensees of stations in these services shall cooperate in the use of the frequencies assigned in order to minimize interference, and thereby obtain the most effective use of the authorized facilities. Each frequency or band of frequencies listed in this part is available on a shared basis only and will not be assigned for the exclusive use of any one licensee. The use of any frequency may be restricted as to specified geographical areas, maximum power, or such other operating conditions contained in this part or in the station authorization. Except for applications listed in subparagraph (1) of this paragraph, each application for assignment of a new frequency or to change existing facilities by increasing the authorized output power, or raising the height of the antenna, or moving the authorized station location (including the location of the antenna), or by adding a base station within the licensee's existing area of operation shall be accompanied by evidence of frequency coordination in the form set forth either in paragraph (2) or (3) of this paragraph:

• • • • • •

17. Section 91.53(c)(10) is revised as follows:

§ 91.53 Procedure for obtaining special temporary authority.

• • • • • •

(c) • • •
(10) Output power of the transmitter.

• • • • • •

18. Section 91.102 is amended by revising the table in (a) and revising (b) as follows:

§ 91.102 Frequency stability.

(a) • • •

Frequency range (megahertz)	Transmitter output power (percent)			
	Fixed and base stations		Mobile stations	
	Over 200 W	200 W or less	Over 2 W	2 W or less
Below 25 [1]	0.005	0.01	0.01	0.02
25 to 50	.002	.002	.002	.005
50 to 450	[2] .0005	.0005	.0005	.005
450 to 470	[3] .00025	[3] .00025	.0005	[4] .0005
470 to 512	.00025	.00025	.0005	.0005
806 to 821	[5] .00015	[5] .00015	.00025	.00025
851 to 866	.00015	.00015	.00025	.00025
1427 to 1435	[6] .03	[6] .03	.03	.03
Above 1435	(7) (7)	(7) (7)	(7) (7)	(7) (7)

[1] Industrial radiolocation service stations operating in the frequency bands 70-90 kHz and 110-130 kHz will be required to maintain the carrier frequency of each authorized transmitter within 0.01 pct of the assigned frequency. Industrial radiolocation service stations operating in frequency bands above 130 kHz must comply with the tolerance requirements indicated in the column for fixed and base stations in this table.

[2] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 73-74.6 MHz may operate with a frequency tolerance of 0.005 pct.

[3] Operational fixed stations controlling mobile relay stations, through use of the associated mobile frequency, may operate with a frequency tolerance of 0.0005 pct.

[4] The frequency tolerance for base and mobile stations authorized to operate in these bands will be specified in the station authorizations.

[5] For control stations, the frequency stability is 0.00025 pct.

[6] For fixed stations with an output power above 120 W, the frequency tolerance is 0.01 pct if the necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power of 120 W or less and using time division multiplex, the frequency tolerance may be increased to 0.05 pct.

[7] Radar stations in the industrial radiolocation service using pulse modulation shall meet the following frequency tolerance. The frequency at which maximum emission occurs shall be within the authorized frequency band and shall not be closer than 1.5/T MHz to the upper and lower limits of the authorized frequency band where T is the pulse duration in microseconds. For other equipment, tolerances will be specified in the station authorization.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this Section, the power of a transmitter shall be the maximum rated output power as specified by the manufacturer.

• • • • • •

19. Section 91.105(c) is revised as follows:

§ 91.105 Modulation requirements.

• • • • • •

(c) Each transmitter first authorized or installed after July 1, 1950, shall be provided with a device which automatically will prevent modulation in excess of that specified in this subpart which may be caused by greater than normal audio level: Provided, however, that this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

• • • • • •

20. Section 91.106 is amended by revising the table in (b) and revising (c) as follows:

§ 91.106 Power and antenna height.

(a) • • •
(b) • • •

Frequency range (megahertz)	Output power (watts)	Maximum effective radiated power (watts)
1.6 to 6	1,500	
25 to 100	300	
100 to 216	350	
216 to 220	(1)	(1)
220 to 470	350	
470 to 512		1,000
806 to 821	(2)	(2)
851 to 866	(2)	(2)
2450 to 2500	5	
2500 to 10,550	(1)	
10,550 to 10,680	3	
Above 10,680	(1)	

[1] To be specified in the station authorization.
[2] For power limitations, see sec. 89.551.
[3] The output power of a transmitter on any authorized frequency in this service shall not exceed 2,000 W (33 dbW).

(c) The output power shall not exceed by more than 20 percent the output power shown in the Radio Equipment List for transmitters included in this list, or the output power for the particular transmitter specifically listed on the station authorization.

• • • • • •

21. Section 91.108 is amended by referencing output power instead of input power and deleting paragraphs (a)(3), (a)(4), (b)(3), and (c)(3).

§ 91.108 Transmitter measurements.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of 2 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) • • •
(2) • • •

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorization stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

(1) • • •

(2) When any change is made in the transmitter which may affect the transmitter output power.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter authorized to operate with an output power in excess of 2 watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

(1) • • •
(2) • • •
(d) • • •
(e) • • •

• • • • • •

22. Section 91.253(c)(2) is revised as follows:

§ 91.253 Station limitations.

(2) The output power shall not exceed 30 watts.

• • • • • •

23. Section 91.254(b) is revised as follows:

§ 91.254 Frequencies available.

• • • • • •

(8) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(26) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, vol. 1, table 23, page 1–50. The centers of urbanized areas are determined from the appendix, Page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

24. Section 91.303(b)(2) is revised as follows:

§ 91.303 Station limitations.

• • • • • •

(2) The output power shall not exceed 30 watts.

• • • • • •

25. Section 91.304(b)(6) and (29) are revised as follows:

§ 91.304 Frequencies available.

• • • • • •

(b) • • •

(6) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed in an occupied bandwidth of 8 kHz, for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(29) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of population, 1960, vol. 1, table 23, page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

• • • • • •

26. Section 91.354(b)(6), (10) and (29) are revised as follows:

§ 91.354 Frequencies available.

• • • • • •

(6) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmissions; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

• • • • • •

(10) Authorizations to operate on this frequency will be issued for A2 or F2 emission for tone signalling or for a combination of such emission with A3 or F3 emission with a maximum bandwidth of 20 kHz. The output power shall not exceed 2 watts. The maximum distance between any transmitter and the center of the radiating portion of its antenna shall not exceed 25 feet. Operation on this frequency is subject to the condition that no harmful interference is caused to stations operating in the Business Radio Service.

• • • • • •

(29) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population except that the dis-

V 40 N 220 NOV 13 75 XUM

tance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, Vol. 1, Table 23, page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

. . . . . .

27. Section 91.404(b)(5) is revised as follows:

§ 91.404 Frequencies available.

. . . . . .

(b) . . .

(5) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

. . . . . .

28. Section 91.454(b)(2) is revised as follows:

§ 91.454 Frequencies available.

. . . . . .

(b) . . .

(2) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

. . . . . .

29. Section 91.504(b) (8), (14), (26), and (33) are revised as follows:

§ 91.504 Frequencies available.

. . . . . .

(b) . . .

(8) Other rule provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

. . . . . .

(14) This frequency is limited to a maximum output power of 2 watts; and each station authorized hereon will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station, provided no harmful interference is caused to mobile service operations and provided further, that the separation between the control point and the center of the radiating portion of the antenna of any units so used shall not exceed 25 feet.

(26) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in U.S. Census of Population, 1960, Vol. 1, table 23, page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

. . . . . .

(33) The maximum transmitter output power that will be authorized is 1 watt; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station. The antennas of transmitters operating on this frequency must be directly mounted or installed upon the transmitting unit: Provided, however, that when permanently installed aboard a vehicle, antenna and transmitter may be separated as required for convenience in mounting. Horizontal polarization will not be allowed; and the gain of antennas employed shall not exceed that of a half wave dipole. The maximum bandwidth that will be authorized is 20 kHz. This frequency is available for voice or tone control transmission, and subject to the condition that interference will not be caused to the reception of television channels 4 or 5. No protection from television interference will be afforded licensees operating on this frequency.

. . . . . .

30. Section 91.553(a) is revised as follows:

§ 91.553 Station limitations.

(a) Mobile relay stations will not be authorized in the Business Radio Service within the continental limits of the United States, except when (1) such stations and all associated control and mobile stations are to be operated exclusively on frequencies above 450 MHz, or (2) when such stations are to be operated on frequencies designated for low power operation and are limited to a maximum output power of 1 watt with the mobile relay antenna system no more than 40 feet above the ground.

. . . . . .

31. Section 91.554(b) (8), (10), (13), (17), (20), (26), (27), (37), (38), (39), (47), and (c) are revised as follows:

§ 91.554 Frequencies available.

. . . . . .

(8) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

. . . . . .

(10) Operation on this frequency is limited to a maximum output power of 110 watts.

. . . . . .

(13) This frequency is limited to a maximum output power of 2 watts and each station authorized hereon will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station, provided no harmful interference is caused to mobile service operations and further provided, that the separation between the control point and the center of the radiating portion of the antenna of any units so used shall not exceed 25 feet.

. . . . . .

(17) Operation on this frequency is limited to a maximum output power of 35 watts.

. . . . . .

(20) This frequency is limited to a maximum output power of 1 watt and each station authorized hereon will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station, provided no harmful interference is caused to mobile service operations and further provided, that the separation between the control point and the center of the radiating portion of the antenna of any units so used shall not exceed 25 feet.

. . . . . .

(26) Operation on this frequency is limited to an output power of 75 watts.

. . . . . .

(27) Operation on this frequency is limited to an output power of 20 watts.

. . . . . .

(37) This frequency is available for assignment to stations in the Business Radio Service for use at locations removed by 75 or more miles from the boundaries of airports in urbanized areas of 200,000 or more population, U.S. Census of Population, 1960, Vol. 1, Table 23, page 1–50. Maximum permissible output power is 110 watts.

(38) This frequency may be assigned to fixed stations in the Business Radio Service. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in the U.S. Census of Population, 1960, Vol. 1 Table 23, page 1–50. The centers of urbanized areas are determined from the Appendix page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

(39) This frequency will be assigned only to stations operated with local control. Maximum output power may not exceed 110 watts. Overall height of antenna above ground may not exceed 100 feet. Control point location to be within one-half air mile of the transmitter location.

. . . . . .

(47) This frequency will be assigned only for the specific purpose of one-way tone or voice paging. The output power shall not exceed 20 watts.

. . . . . .

(c) Except for frequencies separated by 12.5 KHz from regularly assigned frequencies in the bands 460.650–460.875 MHz and 465.650–465.875 MHz, low power mobile stations of 2 watts or less output power may be assigned any frequency separated by 12.5 KHz from any mobile frequency in the band 450–470 MHz listed in paragraph (a) of this section. Such station may be used to provide any function of a base, mobile relay, or mobile station: Provided, That all operation is limited to the confines of an industrial complex. When used as a base station or mobile relay, the height of the antenna shall not exceed 20 ft. above ground. All operation is subject to the condition that harmful interference is not caused to adjacent mobile operations.

. . . . . .

32. Section 91.555 is amended as follows:

§ 91.555 Exemption from technical standards.

Transmitters licensed in this Service which have an output power not exceeding 120 milliwatts are exempt from the technical requirements set out in Subpart C of this part: Provided, however, that the sum of the bandwidth occupied by the emitted signal plus the bandwidth required for frequency tolerance shall be so adjusted that any emission appearing on a frequency 40 kHz or more removed from the assigned frequency is attenuated at least 30 dB below the unmodulated carrier. Such transmitters may operate in the continuous carrier transmit mode.

. . . . . .

33. Section 91.604(b)(9) is revised as follows:

§ 91.604 Frequencies available.

. . . . . .

(9) Station assignments on frequencies in this band will be made subject to the conditions that the maximum output power shall not exceed 375 watts and the maximum authorized bandwidth shall not exceed 2 kHz.

. . . . . .

34. Section 91.730(b)(1), (3), (8), and (14) are revised as follows:

§ 91.730 Frequencies available.

. . . . . .

(b) . . .

(1) This frequency is shared with the Forest Products and Petroleum Radio Services. The output power of all transmitters operating on this frequency shall not exceed 110 watts.

. . . . . .

(3) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further; authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

. . . . . .

(8) The maximum transmitter output power that will be authorized is 1 watt; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station. The antennas of transmitters operating on this frequency must be directly mounted or installed upon the transmitting unit: Provided, however, That when permanently installed aboard a vehicle, antenna and transmitter may be separated as required for convenience in mounting. Horizontal polarization will not be allowed; and the gain of antennas employed shall not exceed that of a half wave dipole. The maximum bandwidth that will be authorized is 20 kHz. This frequency is available for voice or tone control transmissions, and subject to the condition that interference will not be caused to the reception of television channels 4 or 5. No protection from television interference will be afforded licensees operating on this frequency.

. . . . . .

(14) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in U.S. Census of Population, 1960, Vol. 1 Table 23 page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

. . . . . .

35. Section 91.754(b)(3) and (10) are revised as follows:

§ 91.754 Frequencies available.

. . . . . .

(3) Other provisions of this part notwithstanding, this frequency may be authorized for use with any type of emission which does not exceed an occupied bandwidth of 8 kHz, for intermittent transmission; further, authorizations may be issued to permit operation on this frequency by self-actuating or other electrical or mechanical means not under the direct control of any individual. All operations on this frequency are limited to a maximum output power of 20 watts.

. . . . . .

(10) This frequency may be assigned to fixed stations on a secondary non-interference basis to land mobile stations in the Public Safety and Land Transportation Radio Services. All use of these frequencies by fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population, except that the distance may be 75 miles if the output power does not exceed 20 watts. All fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two frequency systems separation between transmit-receive frequencies is 5 MHz. Urbanized areas of 200,000 or more population are defined in U.S. Census of Population, 1960, Vol. 1, Table 23 page 1–50. The centers of urbanized areas are determined from the appendix, page 226, of the U.S. Commerce publication "Air Line Distance Between Cities in the United States."

. . . . . .

PART 93—LAND TRANSPORTATION RADIO SERVICES

36. Section 93.7 is amended by adding the following in alphabetical order:

§ 93.7 Definitions.

. . . . . .

Output Power: The radio frequency output power of a transmitter's final radio frequency stage at the output terminals.

. . . . . .

V 40 N 220 NOV 13 75 XUM

Section 93.9(a) is revised as follows:

§ 93.9 Frequency coordination.

(a) Except for applications listed in subparagraph (1) of this paragraph, each application for assignment of a new frequency, or to change existing facilities by increasing the authorized output power or raising the height of the station antenna, or moving the authorized station location (including the location of the antenna), or by adding a base station within the licensee's existing area of operation shall be accompanied by evidence that the applicant is aware of and has complied with the requirement that he cooperate with other licensees in the selection of a frequency. Evidence of frequency coordination may be submitted in the form set forth either in subparagraph (2) or (3) of this paragraph. In no instance will an application be granted where the proposed station is located less than 7 miles from an adjacent-channel station 15 kHz removed.

• • • • • •

37. Section 93.53(c)(10) is amended as follows:

§ 93.53 Special Temporary Authority.

• • • • • •

(c) • • •

(10) Output power of the transmitter

• • • • • •

38. Section 93.101(b) is revised as follows:

• • • • • •

§ 93.101 Frequencies.

• • • • • •

(b) The following frequencies may be assigned to fixed stations in the Land Transportation Radio Service on a secondary non-interference basis to Land Mobile Stations in the Public Safety and Industrial Radio Services. All such use of these frequencies for fixed stations is limited to locations 100 or more miles from the center of any urbanized area of 200,000 or more population except that the distance may be 75 miles if the output power does not exceed 20 watts. All such fixed systems are limited to a maximum of two frequencies and must employ directional antennas with a front-to-back ratio of at least 15 dB. For two-frequency operation the separation between transmit and receive frequencies is 5 MHz. The center of urbanized areas of 200,000 or more population are determined from the Appendix, page 226 of the U.S. Commerce publication, "Air Line distance Between Cities in the United States."

• • • • • •

39. Section 93.102 is amended by revising the table in (a) and by revising (b) as follows:

§ 93.102 Frequency stability.

• • • • •

[In percentage]

Frequency range (megahertz)	All fixed and base stations	All mobile stations	
		Over 2 W	2 W or less
Below 25	0.01	0.01	0.02
25 to 50	.002	.002	.005
50 to 450	[1].0005	.0005	.005
450 to 470	[2][3].00025	.0005	[3].0005
470 to 512	.00025	.0005	.0005
806 to 821	[4].00015	.00025	.00025
851 to 866	.00015	.00025	.00025
1427 to 1435	[5].03	.03	.03
Above 1435	[6] [7]	[6] [7]	[6] [7]

[1] Stations authorized for operation on or before Dec. 1, 1961, in the frequency band 73–74.6 MHz may operate with a frequency tolerance of 0.005 pct.

[2] A frequency tolerance of 0.0005 pct is permitted in the railroad radio service for base stations operating on the frequencies 452.925, 452.950, 457.925, and 457.950 MHz, used for remote control purposes in railroad yard and terminal areas.

[3] Operational fixed stations controlling mobile relay stations, through use of the associated mobile frequency, may operate with a frequency tolerance of 0.0005 pct.

[4] For control stations, the frequency stability is 0.00025 pct.

[5] For fixed stations with an output power above 120 W, the frequency tolerance is 0.01 pct if the necessary bandwidth of the emission does not exceed 3 kHz. For fixed station transmitters with a power of 120 W or less and using time division multiplex the frequency tolerance may be increased to 0.05 pct.

[6] Radiolocation equipment using pulse modulation shall meet the following frequency tolerance: The frequency at which maximum emission occurs shall not be closer than $1.5/T$ MHz to the upper and lower limits of the authorized frequency band where T is the pulse duration in microseconds. For other radiolocation equipment tolerances will be specified in the station authorization. See also sec. 95.111.

[7] The frequency tolerance for base and mobile stations will be specified in the station authorization.

(b) For the purpose of determining the frequency tolerance applicable to a particular transmitter in accordance with the foregoing provisions of this section, the power of a transmitter shall be the maximum rated output power, as specified by the manufacturer.

• • • • • •

40. Section 93.105(c) is revised as follows:

§ 93.105 Modulation requirement.

• • • • • •

(c) Each transmitter first authorized or installed after July 1, 1950, shall be provided with a device which automatically will prevent modulation in excess of that specified in this subpart which may be caused by greater than normal audio level: Provided, however, That this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum output power of 2 watts or less.

• • • • • •

41. Section 93.106 is amended by revising the table in (b) and by revising (c) as follows:

§ 93.106 Power and antenna height.

• • • • • •

(b) • • •

Frequency range (megahertz)	Maximum output power (watts)	Maximum effective radiated power (watts)
30 to 100	300	
100 to 470	[1] 75	
470 to 512		1,000
806 to 821		[8]
851 to 866	[8]	[8]
2450 to 2500	5	
2500 to 10,550	[8]	
10,550 to 10,680	3	
Above 10,680	[8]	

[1] In the frequency band 450–470 MHz maximum output power in excess of 75 W but not in excess of 360 W may be authorized in accordance with the provision of subpt. E of this part, upon submission of the required showings.

[2] For power limitations see sec. 89.651.

[3] The output power of a transmitter on any authorized frequency in this service shall not exceed 2,000 W (33 dBW).

[4] To be specified in the station authorization.

[5] [Reserved].

(c) The output power shall not exceed by more than 20 percent the output power shown in the Radio Equipment List for transmitters included in this list, or the output power for the particular transmitter specifically listed on the station authorization.

• • • • • •

42. Section 93.108 is amended by referencing output power instead of input power and deleting paragraphs (a)(3), (a)(4), (b)(3) and (c)(3).

§ 93.108 Transmitter measurements.

(a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter authorized to operate with an output power in excess of 2 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) • • •

(2) • • •

(b) The licensee of each station shall employ a suitable procedure to determine that the transmitter output power of each transmitter authorized to operate with an output power in excess of two watts does not exceed the maximum figure specified on the current station authorization. On authorization stating only the input power to the final radio frequency stage, the maximum permissible output power is 75 percent for frequencies below 25 MHz and 60 percent of the input power for frequencies above 25 MHz. If a non-DC final radio frequency stage is utilized, then the output power shall not exceed 75 percent of the input power. This determination shall be made, and the results thereof entered into the station records, in accordance with the following:

(1) • • •

(2) When any change is made in the transmitter which may affect the transmitter output power.

(c) The licensee of each station shall employ a suitable procedure to determine that the modulation of each transmitter authorized to operate with an output power in excess of 2 watts, does not exceed the limits specified in this part.

This determination shall be made and the results thereof entered in the station records, in accordance with the following:

(1) • • •

(2) • • •

(d) • • •

(e) • • •

• • • • • •

43. Section 93.254(a) is revised as follows:

§ 93.254 Frequencies below 952 MHz available for base, mobile and operational fixed stations.

(a) The following frequencies are available for assignment to base, mobile, or operational fixed stations in the Motor Carrier Radio Service, on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power.

Frequencies (MHz)

27.235	27.255	27.275
27.245	27.265	

• • • • • •

44. Section 93.352(b)(4) is revised as follows:

§ 93.352 Frequencies below 952 MHz available for base and mobile stations.

• • • • • •

(4) The maximum transmitter power that will be authorized is 1 watt; and each station authorized will be classified and licensed as a mobile station. Any units of such a station, however, may be used to provide the operational functions of a base or fixed station. The antennas of transmitters operating on this frequency must be directly mounted or installed upon the transmitting unit: Provided, however, That when permanently installed aboard a vehicle antenna and transmitter may be separated as required for convenience in mounting. Horizontal polarization will not be allowed; and the gain of antennas employed shall not exceed that of a half wave dipole. The maximum bandwidth that will be authorized is 20 kHz. This frequency is available for voice or tone control transmissions and subject to the condition that interference will not be caused to the reception of television channels 4 or 5. No protection from television interference will be afforded licensees operating on this frequency.

• • • • • •

45. Section 93.355(c)(2) and (3) are revised as follows:

§ 93.355 Relay and repeater stations.

• • • • • •

(c) • • •

(1) • • •

(2) A mobile repeater station may be used only for the purpose of extending the transmitting and receiving range of pack-carried or hand-carried units of mobile stations. Such pack-carried or hand-carried units shall be operated only on a frequency or frequencies above 150 MHz and the output power shall not exceed 6 watts. The frequency and maximum power of the pack-carried or hand-carried transmitters which may be associated with a mobile repeater station shall be specified in the station authorization.

(3) The output power of a mobile repeater station, when transmitting as a repeater station on the frequency used for communication with its associated pack-carried or hand-carried units, shall not exceed 6 watts except when the same frequency is also used by the same station for direct communication with vehicular mobile units or with one or more base stations.

46. Section 93.356(a) is revised as follows:

§ 93.356 Frequencies below 952 MHz available for base mobile, and operational fixed stations.

(a) The following frequencies are available for assignment to base, mobile, or operational fixed stations in the Railroad Radio Service, on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power:

Frequencies (MHz)

27.235	27.255	27.275
27.245	27.265	

• • • • • •

47. Section 93.357(c)(3)(i) is revised as follows:

§ 93.357 Scope of Service.

• • • • • •

(i) The output power shall not exceed 30 watts.

• • • • • •

48. Section 93.404(a) is revised as follows:

§ 93.404 Frequencies below 952 MHz available for base mobile, and operational fixed stations.

(a) The following frequencies are available for assignment to base, mobile, or operational fixed stations in the Taxicab Radio Service, on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power:

Frequencies (MHz)

27.235	27.255	27.275
27.245	27.265	

• • • • • •

49. Section 93.504(a) is revised as follows:

§ 93.504 Frequencies below 952 MHz available for base, mobile, and operational fixed stations.

(a) The following frequencies available for assignment to base, mobile, or operational fixed stations in the Automobile Emergency Radio Service on a shared basis with stations in the same service and other services, subject to no protection from interference due to the operation of industrial, scientific, or medical devices on the frequency 27.12 MHz, and limited to the use of transmitters having not more than 20 watts output power.

Frequencies (MHz)

27.235	27.255	27.275
27.245	27.265	

• • • • • •

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

CHIEF COUNSEL'S ADVISORY COMMITTEE ON RULES OF PROFESSIONAL CONDUCT

Open Meeting

Notice is hereby given that pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92–463, a meeting of the Chief Counsel's Advisory Committee on Rules of Professional Conduct will be held on December 5 and 6, 1975, beginning at 9 a.m. in Room 3302, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, D.C. 20224. The December 6 session will be in Room 3313, Internal Revenue Building. The agenda will include topics concerning the rules of professional conduct governing tax practice with particular emphasis on problems generated by representation of taxpayers by former Internal Revenue Service employees. The Committee will meet with a view towards finalizing specific proposals drafted at prior meetings for consideration by the Chief Counsel.

The meeting will be open to the public. It is to be held in a room accommodating, in addition to members of the Committee, 15 people. Time permitting, after discussion of agenda subjects by Committee Members, interested persons may make statements germane to these subjects. Persons wishing to make oral statements should advise the Committee Manager in writing prior to the meeting to aid in scheduling the time available and should submit the wirtten text, or, at a minimum, an outline of comments they propose to make orally. Such comments will be restricted to ten minutes in length. Any interested persons may file a written statement for consideration by the Committee by sending it to the Committee Manager, Chief Counsel's Advisory Committee, Room 3034, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, D.C. 20224.

MEADE WHITAKER,
Chief Counsel.

ART ADVISORY PANEL OF THE COMMISSIONER OF INTERNAL REVENUE

Availability of Report on Closed Meetings

NOVEMBER 10, 1975.

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Pub. L. 92–463), and OMB Circular A–63 of March 27, 1974, a report on the closed meetings of the Art Advisory Panel of the Commissioner of Internal Revenue has been filed with the Secretary and furnished to the Library of Congress. Copies of the report are available for public inspection at the following locations:

The Library of Congress, Rare Book Division, Room 256, Main Building, 10 First Street, SE, Washington, D.C.

Internal Revenue Service, Freedom of Information Reading Room, Room 1565, 1111 Constitution Avenue, N.W., Washington, D.C.

DONALD C. ALEXANDER,
Commissioner.

DEPARTMENT OF DEFENSE

Department of the Army

SAM RAYBURN DAM AND RESERVOIR, TEXAS

Joint Order Interchanging Administrative Jurisdiction of Department of the Army Lands and National Forest Lands

By virtue of the authority vested in the Secretary of Agriculture and the Secretary of the Army by the Act of July 26, 1956 (70 Stat. 656; 16 U.S.C. 505a, 505b) it is ordered as follows:

1. Department of Agriculture lands transferred.

(a) The lands under the jurisdiction of the Secretary of Agriculture, being National Forest lands, described or depicted in Exhibit A attached hereto and made a part hereof, which lands are a part of the Angelina and Sabine National Forests, Texas, are hereby transferred from the jurisdiction of the Secretary of Agriculture to the jurisdiction of the Secretary of the Army, subject to interests outstanding in third parties and to continued access thereover by the Forest Service as may be necessary for National Forest purposes.

(b) Flowage rights transferred from the Secretary of Agriculture to the Secretary of the Army. The Secretary of Agriculture transfers to the Secretary of the Army the perpetual right, power and privilege to overflow, flood and submerge National Forest lands within the Sam Raburn Dam and Reservoir Project, which lands are: (1) situated below the dam and appurtenant works and lying in the Angelina River bottom from the river bed to a sufficient elevation to pass water during periods of power generation and/or regulated flood water releases, and flood waters over the spillway extending from the dam downstream to about river mile 18; (2) required for the reservoir area upstream of the dam and lying between the top of the power pool, elevation 164 feet, mean sea level, and the upper guide contour of the project, elevation 179 feet, mean sea level, or the envelope of backwater effects, whichever is higher.

2. Department of the Army lands transferred. The lands under the jurisdiction of the Secretary of the Army as described in Exhibit B attached hereto and made a part hereof, and which lands are within the exterior boundaries of Sam Rayburn Dam and Reservoir, Texas, are hereby transferred from the jurisdiction of the Secretary of the Army to the jurisdiction of the Secretary of Agriculture, subject to outstanding mineral rights or other outstanding rights not yet acquired but which will be hereafter acquired by the Corps of Engineers and will upon acquisition be under the jurisdiction of the Secretary of Agriculture; subject to easements outstanding for public roads and highways, public utilities, railroads and pipelines; and further subject to such continued use by the Corps of Engineers as is necessary for the protection, operation, maintenance and administration of the Reservoir including, but not limited to intermittent flooding of that portion of the land lying below elevation 179 feet, mean sea level, or the envelope of backwater effects, whichever is higher, to use of the land for electric power generation, for flood control facilities and functions of the Sam Rayburn Dam and Reservoir, and providing further that prior approval of the Corps of Engineers will be obtained for any structure placed on said land located in the above stated area subject to intermittent flooding.

Pursuant to Section 2 of the aforesaid Act of July 26, 1956, the Department of Agriculture lands transferred to the Secretary of the Army by this order are hereafter subject only to laws applicable to the Department of the Army lands comprising the Sam Rayburn Dam and Reservoir Project. The Department of the Army lands transferred to the Secretary of Agriculture by this order are hereafter subject to the laws applicable to the lands acquired under the Act of March 1, 1911 (36 Stat. 961), as amended.

Effective Date: This order will be effective on November 13, 1975.

Dated: August 18, 1975.

MARTIN R. HOFFMAN,
Secretary of the Army.

Dated: September 19, 1975.

EARL L. BUTZ,
Secretary of Agriculture.

U.S. ARMY COASTAL ENGINEERING RESEARCH BOARD

Meeting

Pursuant to Section 10(a) of the Federal Advisory Committee Act (Public Law 92–463), notice is hereby given of a meeting of the U.S. Army Coastal Engineering Research Board on 2 December through 4 December 1975.

The meeting will be held at the TraveLodge at Harbor Island, 1960 Harbor Island Drive, San Diego, California, from 0830 hours to 1100 hours on 2 December 1975 for a pre-field trip orientation and from 0840 hours to 1230 hours on 4 December 1975.

The 2 December morning session will be devoted to an orientation of field trips by air and ground transportation of the coastal zone from Imperial Beach upcoast to Los Angeles-Long Beach Harbor and return to San Diego. The remainder of 2 December and all of 3 December will be devoted to field trips. Members of the public may attend the field trips but must provide their own transportation.

The 4 December morning session will be devoted to presentations on South Pacific Division Research Needs and Coastal Problems; on Los Angeles-Long Beach technology and data analysis and Imperial Beach model technology; and on the Wave Information Program of the Great Lakes.

Participation by the public at the 4 December meeting is scheduled for 1115 hours.

The meeting will be open to the public subject to the following:

1. Since seating capacity of the TraveLodge Inn meeting room limits public participation to not more than 25 people, advance notice of intent to attend, although not required, is requested in order to assure adequate arrangements for those wishing to attend.

2. Oral participation by public attendees is encouraged during those times

V 40 N 220 NOV 13 75 XUM

scheduled on the agenda; written statements may be submitted prior to or up to 30 days after the meeting.

Inquiries and notice of intent to attend the meeting may be addressed to Colonel James L. Trayers, Executive Secretary, Coastal Engineering Research Board, Kingman Building, Fort Belvoir, Virginia 22060, Telephone (202) 325–7000.

Dated: November 7, 1975.

By authority of the Secretary of the Army.

ROBERT G. FLOWERS, Jr.,
Lt. Colonel, U.S. Army,
Chief, Plans Office, TAGO.

ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group B (Mainly Low Power Devices) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at 2511 Jefferson Davis Highway, Arlington, Virginia 20360 on 4 December 1975.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group B meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The low power devices area includes such programs as integrated circuits, charge coupled devices and memories. The review will include classified program details and will result in advice or recommendations to government research and development agencies preliminary to decisions or actions, the preliminary disclosure of which would interfere with the orderly conduct of government.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerned matters listed in Section 552(b) of Title 5 of the United States Code, specifically subparagraphs (1) and (5) thereof, and that accordingly this meeting will be closed to the public.

NOVEMBER 10, 1975.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

IMPORTATION OF CONTROLLED SUBSTANCES

Notice of Application

Pursuant to Section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(h)), the Attorney General shall, prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in schedule I or II, and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registration for the bulk manufacturer of the substance an opportunity for a hearing.

Therefore in accordance with 1311.42 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on July 1, 1975, Byron Chemical Company, Inc., 40–11 23rd St., Long Island City, New York 11101, made application to the Drug Enforcement Administration to be registered as an imported of methaqualone, a basic class controlled substance in schedule II.

As to the basic class of controlled substance listed above for which application for registration has been made, any other applicant therefor, and any existing bulk manufacturer registered therefor, may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections, and requests for a hearing may be filed no later than December 17, 1975.

Comments and objections may be addressed to the Hearing Clerk, Office of Administrative Law Judge, Drug Enforcement Administration, Room 1130, 1405 Eye Street, N.W., Washington, D.C. 20537.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1301.42 (b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745–46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Acting Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823 (a), and 21 CFR 1311.42 (a), (b), (c), (d), (e) and (f) are satisfied.

Dated: November 4, 1975.

HENRY S. DOGIN,
Acting Administrator,
Drug Enforcement Administration.

PEOPLES NATURAL GAS

Notice of Pipeline Application

NOVEMBER 6, 1975.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Peoples Natural Gas, 2223 Dodge Street, Omaha, Nebraska 68102, has applied for a right of way for a natural gas pipeline across the following lands:

T. 37 N., R. 15 W., N.M.P.M. Section 7

The purpose of this project is to enable the applicant to supply natural gas to customers in portions of Colorado.

The purposes of this notice are: to inform the public that the Bureau of Land Management will be proceeding with the preparation of Environmental and other analyses necessary for determining whether the application should be approved, and if so, under what terms and conditions; to allow interested parties to comment on the application; and to allow any persons asserting a claim to the lands or having bona fide objections to the proposed pipeline right of way to file their objections in this office. Any person asserting a claim to the lands or filing an objection must include evidence that a copy thereof has been served on the applicant. Any comment, claim, or objections must be filed with the Chief, Branch of Land Operations, Bureau of Land Management, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado, 80202, within 30 days from the date of this notice.

EVERETT K. WEEDIN,
Chief,
Branch of Land Operations.

SAFFORD DISTRICT MULTIPLE USE ADVISORY BOARD

Public Meeting

NOVEMBER 7, 1975.

Notice is hereby given that the Bureau of Land Management, Safford District Multiple Use Advisory Board, will meet in the District Office, 1707 Thatcher Boulevard, Safford, Arizona, December 19, 1975, at 9:30 a.m. The meeting will be devoted principally to organization of the board, orientation and consideration of multiple use management of the resources on national resource lands in the Safford District.

The agenda will include: organization of the board, presentation by district personnel of Bureau program, problems and historical background.

The meeting will be open to the public and opportunity will be afforded for a limited number of brief oral statements from members of the public. Written statements also may be submitted. Written comments or inquiries should be addressed to the Bureau of Land Management District Manager at 1707 Thatcher Boulevard, Safford, Arizona 85546. Oral requests for information will be received at the same office at (602–428–1100).

WILLIAM S. EARP,
District Manager.

YUMA DISTRICT MULTIPLE USE ADVISORY BOARD

Meeting

Notice is hereby given that the Yuma District Multiple Use Advisory Board will meet on December 17, 1975, commencing at 10 a.m. at the Ramada Inn, Banquet Room, 3181 S. Fourth Avenue, Yuma, Arizona.

The agenda for the meeting includes background information on the purpose of the new Yuma District Multiple Use Advisory Board; election of officers; brief report on recent State and National Advisory Board meetings; orientation on management programs for the public lands within thhe district; land use planning procedures, progress and projections; recreation management; wildlife management and other public uses related to management of these public lands (which include both national resource lands and Reclamation Withdrawn lands along the lower Colorado River).

The meeting will be open to the public with seating provided for approximately 50 persons. Time will be available for a limited number of brief statements by members of the public. Those wishing to make an oral statement should so inform the Bureau of Land Management, Yuma District Office, prior to the meeting of the Board. Any interested person may also file a written statement with the Board for its consideration. Written statements may be submitted at the meeting or mailed to: Chairman, Yuma District Advisory Board, 2450 Fourth Avenue, Yuma, Arizona 85364.

Further information concerning the meeting may be obtained from H. Max Bruce, District Manager, at the above address. Telephone number: (602) 726–2612.

Minutes of the meeting will be available for public inspection thirty days after the meeting. Those interested should contact the District Manager, Yuma District Office.

H. MAX BRUCE,
District Manager.

ALASKA

Segregation of Lands

NOVEMBER 6, 1975.

Notice is hereby given that pursuant to the Act of May 24, 1928 (49 U.S.C. 211–214) the State of Alaska, Division of Aviation, has applied for an airport lease for land located in:

Unsurveyed T. 3 N., R. 77 W., Seward Meridian Metes and bounds description lying within SE¼NW¼, N½NE¼SW¼ of section 21.

The purpose of this notice is to inform the public that the filing of this application segregates the described land from all other forms of use or disposal under the public land laws.

Interested persons desiring to express their views should promptly send their name and address to State Director, Alaska State Office, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501.

RICHARD L. THOMPSON,
Acting State Director.

Notice of Application

NOVEMBER 6, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), K. B. Kennedy Engineering Company has applied for thirteen 3 inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 13 S., R. 30 E.
Sec. 13, E½NW¼;
Sec. 23, N½NW¼;
Sec. 34, NW¼SW¼ and S½SW¼.
T. 14 S., R. 30 E.
Sec. 16, NW¼SW¼;
Sec. 28, NW¼SW¼;
Sec. 32, NE¼NE¼;
Sec. 33, NW¼NW¼ and SW¼SW¼.
T. 12 S., R. 31 E.
Sec. 17, SW¼NE¼ and S½SW¼;
Sec. 20, S½NW¼;
Sec. 30, lot 3.
T. 13 S., R. 31 E.
Sec. 4, SW¼NE¼ and SE¼NW¼;
Sec. 9, N½NW¼.

These pipelines will convey natural gas across 2.290 miles of national resource lands in Chaves County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, PO Box 1397, Roswell, NM 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Notice of Applications

NOVEMBER 6, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for one 4½ inch natural gas pipeline right-of-way and an underground cable right-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 20 N., R. 10 W.,
Sec. 7, Lots 2, 3 and E½SW¼.
T. 26 N., R. 11 W.,
Sec. 12, SE¼NE¼.
T. 28 N., R. 12 W.,
Sec. 22, SW¼NW¼.

The underground cable and the pipeline will cross .888 miles of national resource lands in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, 3550 Pan American Freeway, NE, Albuquerque, NM 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Mineral Operations.

Fish and Wildlife Service

ENDANGERED SPECIES PERMIT

Notice of Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (P.L. 93-205).

Applicant: Patuxent Wildlife Research Center, U.S. Fish and Wildlife Service, Laurel, Maryland 20811; Lucille F. Stickel, Director.

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

OMB NO. 42-R1170

1. APPLICATION FOR (Indicate only one)
[X] IMPORT OR EXPORT LICENSE [ ] PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
Shipment to Canada of one adult whooping crane carcass and three shells of unhatched whooping crane eggs (see attached correspondence).

3. APPLICANT. (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested)
Patuxent Wildlife Research Center
U. S. Fish and Wildlife Service
Laurel, Maryland 20811

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:
[ ] MR. [ ] MRS. [ ] MISS [ ] MS.
DATE OF BIRTH | HEIGHT | WEIGHT | COLOR HAIR | COLOR EYES
PHONE NUMBER WHERE EMPLOYED | SOCIAL SECURITY NUMBER
OCCUPATION
ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
Wildlife research to enhance the status of endangered and threatened species; also to determine the effects of environmental pollutants on wildlife and their habitat.
NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.
Lucille F. Stickel, Director 301-776-4880
IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED
N/A

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
Shipment from Baltimore, Maryland or Washington, D. C. to Ottawa, Ontario, Canada

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? [X] YES [ ] NO
(If yes, list license or permit numbers) PRT 6-85-C, PRT 8-169-C, 5-SC-590. Also, interim authority for endangered species, per Mr. Davis's letter of 3/27/75.

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? [X] YES [ ] NO
(If yes, list jurisdictions and type of documents)
Copy of Canadian import permit is attached (for carcass)

9. CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF
$ N/A

10. DESIRED EFFECTIVE DATE: ASAP

11. DURATION NEEDED: 30 days

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(b)) MUST BE ATTACHED, IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.
17.22

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (In ink) Lucille F. Stickel
DATE October 14 1975

3-200
10-74

ATTACHMENT

Additional information, per Part 17.22:

1. a. Common and scientific names of the species sought to be covered: Whooping crane (*Grus americana*).

b. Number, age, and sex: one, seven-year-old female and three shells of unhatched eggs.

c. Activity sought to be authorized: Export to Canada (see attached correspondence).

2. The adult bird hatched from an egg that was collected in Wood Buffalo National Park and transported to the Patuxent Center in 1968. This bird had remained at the Patuxent Center until its death on August 24, 1975. The shells are from eggs that were taken from Wood Buffalo National Park to Grays Lake, Idaho in the experiment to establish a whooping crane population by substituting whooping crane eggs for those of the sandhill cranes that nest there. Although most of the eggs hatched, these three failed and were subsequently sent to the Patuxent Center for chemical analysis of the egg contents for various environmental pollutants.

3. N/A.

4. See 2, above.

5. Specimens are to be sent to the Canadian Wildlife Service, Ottawa, Ontario in accordance with instructions in the attached correspondence. They will be used for display and other educational purposes.

6. N/A.

7. See attached correspondence.

8. The U.S. Fish and Wildlife Service and the Canadian Wildlife Service are continuing cooperative efforts to enhance the status of the whooping crane. The agreement includes behavioral, nutritional, and physiological research as well as captive propagation at the Patuxent Center. More recently, other studies have been undertaken to establish another whooping crane population at Grays Lake, Idaho. This study is supported in part by U.S. Fish and Wildlife Service Contract No. 14-16-0008-1178 with the University of Idaho, Moscow, Idaho.

To: Director, U.S. Fish and Wildlife Service (LE).

From: Director, Patuxent Wildlife Research Center.

Subject: Export Permit.

OCTOBER 14, 1975.

The attached permit application constitutes our request to return one adult whooping crane (carcass) and three shells of unhatched eggs to the Canadian Wildlife Service. Correspondence from the Canadian Wildlife Service expressing their desire to have these specimens is attached.

Although the permit application includes the export of the carcass as well as the eggshells, it appears that under the provisions of Part 17.4 an export license may not be required for the carcass. This bird was held in captivity prior to December 28, 1973, for purposes that were not contrary to the purposes of the Act. Consequently, if an export license to ship this bird's carcass to the Canadian Wildlife Service can be issued prior to expiration of their import license (October 31, 1975), we would appreciate prompt issuance.

LUCILLE F. STICKEL.

CANADIAN WILDLIFE SERVICE,
OTTAWA, ONT., K1A OH3,
September 10, 1975.

Mr. F. V. SCHMIDT,
Acting Director, Fish and Wildlife Service, Bureau of Sport Fisheries and Wildlife, Department of the Interior, Washington, D.C. 20240, U.S.A.

DEAR MR. SCHMIDT: Thank you for your letter of September 5, 1975, informing us of the death of an adult Whooping Crane. We must expect whooping crane deaths from natural causes as an unfortunate part of life.

We most certainly would appreciate receiving the bird, which will be prepared for display purposes. It would be appreciated if you would arrange to have the bird deep frozen and sent to this office via Ottawa International Airport. If you would inform us of the date and flight number, we will arrange for collection. Would it be possible for someone on your staff to phone our Mrs. Duval (819) 997-1270 with the details?

A Convention Import Permit is attached. Presumably you will take care of an appropriate export permit from the United States. Canadian Customs require that both an export permit and an import permit accompany all shipments of Convention Appendix I species.

Your co-operation in this matter is very much appreciated.

Yours sincerely,

A. G. LOUGHREY,
Director General.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before December 15, 1975.

Dated: November 10, 1975.

LOREN K. PARCHER,
Acting Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

[FR Doc.75-30598 Filed 11-12-75;8:45 am]

AMENDMENTS TO MARINE MAMMAL AND ENDANGERED SPECIES PERMIT

Receipt of Application

A permit authorizing capture, tagging, holding, transport and release of no more than twelve West Indian Manatees (*Trichechus manatus*) was issued to the National Fish and Wildlife Laboratory, Gainesville Field Station, Florida, on September 25, 1975, pursuant to the Marine Mammal Protection Act of 1972 and the Endangered Species Act of 1973. A

V 40 N 220 NOV 13 75 XUM

notice containing the application for the permit was published in the FEDERAL REGISTER on August 1, 1975 (40 FR 32366–67), soliciting public comments for a period of 30 days. A notice of the issuance of the permit was published on October 8, 1975 (40 FR 47161).

Dr. Howard W. Campbell, Chief, Gainesville Field Station, National Fish and Wildlife Laboratory, Gainesville, Florida, has submitted a request for significant amendments to the permit. Published herewith is a copy of the terms of the permit, and the request for amendments. This request is being considered pursuant to section 13.23, Title 50 Code of Federal Regulations (see 39 F.R. 1162).

August 26, 1975.

Mr. C. R. Bavin,
Chief, Division of Law Enforcement,
U.S. Fish and Wildlife Service,
Department of the Interior,
Washington, D.C. 20240.

Dear Mr. BAVIN: The purpose of this letter is to request that several amendments be made to our permit application to tag West Indian Manatee, *Trichechus manatus*. Official notice of our application first appeared in the FEDERAL REGISTER on August 1, 1975.

We wish to amend our application in the following ways: (a) Attachment page two; Project Goals; Phase I, add:

(3) As feasible, selected manatees will be utilized for physiological monitoring after they have been captured for the tagging process. Not more than 50 CC of blood will be extracted and analyzed for osmolality as well as for common blood values. Kidney clearance studies will be conducted utilizing Para-aminohippuric acid (PAH), a harmless chemical which after injection into the blood stream is completely absorbed by the kidney. Urine will be collected by catherization. Blood and urine collection will be supervised by a licensed veternarian with extensive experience with manatees and other marine mammals.

(b) Attachment page four; Tag Methods section; add:

(4) Paint tagging: A new type of aerosol paint tagging technique has recently been developed by Mr. William Schevill and William Watkins of Woods Hole Oceanographic Institute. The technique allows underwater application of the spray paint and has been successfully used on dolphins. (Manuscript has been submitted to the Journal of Mammalogy.) We request permission to test application techniques and observe the results in conjunction with other tagging techniques which are being tested.

It is our intent that the above amendments should apply to Phase I, the tag development phase of the application.

This information will be of great value to our studies of manatee biology. The renal clearance studies should expand our understanding of manatee osmoregulation and the freshwater requirements of these animals. Such data will have direct application to conservation and management decisions.

In re-reading our application, I find that it might be construed to imply that we will conduct all of the tag testing at the Titusville site specifically mentioned in the application. This is not our intent. The Titusville site will be utilized to develop techniques for capture and handling manatees as well as for tag testing and is an ideal location for such work. However, further testing in fresh and brackish water manatee habitats will be necessary to determine effects of these different environments on acoustic tag range, freeze brand visibility and permanence etc. No given area has been located to do this testing, but the upper reaches of the St. Johns River, and Crystal River Spring area in Florida are probable general sites for fresh water testing.

If you have any further questions, please contact me.

Sincerely yours,

HOWARD W. CAMPBELL,
Chief Gainesville Field Station, NFWL.

OCTOBER 1, 1975.

National Fish and Wildlife Laboratory, Gainesville Field Station, 2820 East University Avenue, Gainesville, Florida 32601.

(*Attention* Dr. Howard W. Campbell)
Re-PRT 9–25–C
Amendment No. 1

Dear Dr. CAMPBELL: Review of the Federal Fish and Wildlife Permit No. PRT 9–25–C, issued to the National Fish and Wildlife Laboratory on September 25, 1975, has established that reference to the Endangered Species Act of 1973 was inadvertently omitted from the permit.

Since the West Indian manatee (*Trichechus manatus*) is protected by the authority of the Endangered Species Act of 1973 in addition to the Marine Mammal Act, it is appropriate that the permit be amended, in accordance with 50 CFR 13.41, to reflect the additional authority.

Accordingly, this letter will serve as Amendment No. 1 to Federal Fish and Wildlife Permit No. PRT 9–25–C, authorizing the following changes therein:

Block 2. Authority—Statutes.

Delete—as written.
Amend—to read: 16 USC 1371(a)(1), 16 USC 1539(a), 50 CFR 18.31, 50 CFR 17.22.

Block 9. Type of Permit

Delete—as written.
Amend—to read: Marine Mammal/Scientific Endangered Species/Scientific.

Please attach this amendment to your original permit.

All other terms and conditions of said permit remain in effect.

Sincerely yours,

C. R. BAVIN,
Chief, Division of Law Enforcement.

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE PERMIT

1. PERMITTEE

National Fish and Wildlife Laboratory
Gainesville Field Station
2020 East University Avenue
Gainesville, Florida 32601

2. AUTHORITY - STATUTES: 16 USC 1371(a)(1)
REGULATIONS (Attached): 50 CFR 18.31

3. NUMBER: PRT 9-25-C

4. RENEWABLE: [X] YES [ ] NO

5. MAY COPY: [X] YES [ ] NO

6. EFFECTIVE: SEP 25 1975

7. EXPIRES: 6/30/80

8. NAME AND TITLE OF PRINCIPAL OFFICER (If #1 is a business): Howard W. Campbell, Chief

9. TYPE OF PERMIT: Marine Mamal

10. LOCATION WHERE AUTHORIZED ACTIVITY MAY BE CONDUCTED
In the United States as permitted by State Law

11. CONDITIONS AND AUTHORIZATIONS

A. GENERAL CONDITIONS SET OUT IN SUBPART D OF 50 CFR 18, AND SPECIFIC CONDITIONS CONTAINED IN FEDERAL REGULATIONS CITED IN BLOCK #2 ABOVE, ARE HEREBY MADE A PART OF THIS PERMIT. ALL ACTIVITIES AUTHORIZED HEREIN MUST BE CARRIED OUT IN ACCORD WITH AND FOR THE PURPOSES DESCRIBED IN THE APPLICATION SUBMITTED. CONTINUED VALIDITY, OR RENEWAL, OF THIS PERMIT IS SUBJECT TO COMPLETE AND TIMELY COMPLIANCE WITH ALL APPLICABLE CONDITIONS, INCLUDING THE FILING OF ALL REQUIRED INFORMATION AND REPORTS.

B. THE VALIDITY OF THIS PERMIT IS ALSO CONDITIONED UPON STRICT OBSERVANCE OF ALL APPLICABLE FOREIGN, STATE, LOCAL OR OTHER FEDERAL LAW.

C. VALID FOR USE BY PERMITTEE NAMED ABOVE and any person designated in writing by the permittee.

D. Authorized to capture, tag, hold, transport and release no more than 12 West Indian manatees (*trichechus manatus*) to develop and implement tagging techniques.

E. The manatees, after study or permitted activity, must be released at or near the capture site.

F. The loss, death or destruction of the manatees shall be reported within 24 hours to the Gainesville USFWS office (904-377-4222) and in writing to the Director (FWS/LE), Box 19183, Washington, D. C. 20036, within 10 days.

G: May salvage and care for any manatees found injured or dead and any injured or killed as a result of the permitted activity. Dead specimens shall be preserved for scientific research.

[X] ADDITIONAL CONDITIONS AND AUTHORIZATIONS ON REVERSE ALSO APPLY

12. REPORTING REQUIREMENTS: A report of the activities conducted under authority of this permit, must be furnished to the Director (FWS/LE), Box 19183, Washington, D. C. 20036, by June 30th of each year.

ISSUED BY: (SGD) Loren K. Parcher for Chief, Division of Law Enforcement — DATE: SEP 25 1975

DISTRIBUTION

☆ U.S. Government Printing Office: 1974 - 626-848

H. When a manatee is salvaged it must be reported within 48 hours to the Gainesville Fish & Wildlife office (904–377–4222).

I. The Gainesville FWS office will provide instructions for the disposition of any specimens salvaged.

J. Any permittee must have a copy of this permit in his possession while conducting the activities authorized.

K. A duplicate of this permit must be attached to the container in which the manatee is placed for storage, supervision or care.

In keeping with the spirit of the Marine Mammal Protection Act of 1972 and the Endangered Species Act of 1973, this Notice is being published to allow public comment on the request for amendments. Interested persons may comment on these amendments by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before December 15, 1975.

Dated: November 10, 1975.

LOREN K. PARCHER,
Acting Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

Office of Hearings and Appeals

[Docket No. M 76–13]

FOUR LEAF COMPANY, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Four Leaf Coal Company, Inc., has filed a petition to modify the application of 30 CFR 77.1605(k) to its Mine No. 2, Claiborne County, Tennessee.

30 CFR 77.1605(k) provides:

Berms or guards shall be provided on the outer bank of elevated roadways. Petitioner's proposed alternate method is as follows:

1. A daily inspection of all coal-hauling vehicles shall be made and any defects detected shall be corrected before the vehicle is put into service. A record of the inspection and repair on each vehicle shall be kept and maintained by a supervisory employee.

2. All rules of the road (traffic system) shall be posted on the bulletin boards throughout the mine area, and such rules of the road shall be made part of the training and retraining programs.

3. Roadway surfaces shall be kept free of debris, excessive water, and snow and ice, and maintained as free as practicable of small ditches.

4. A traffic system shall be put into effect for these roads requiring that the loaded trucks have the right-of-way in all no-passing or one-lane traffic areas.

5. Warning signs shall be posted designating curves, steep grades where trucks should shift to a lower gear, and where roadways are reduced to one-lane traffic. Stop signs shall be posted where one road intersects another, giving main haulage road traffic the right-of-way. Signs shall also be posted designating passing points.

6. All equipment operators shall be trained in the use of haulage equipment and the safety of vehicles on haulage roads.

7. All haulage vehicles shall have:

(a) Original manufacturer's brakes.

(b) Engine or Jacob's brakes, except on gasoline powered trucks which do not have Jacobs brakes but the engine of which serve as effective brakes.

(c) Original manufacturer's parking brakes.

8. Adequate supplies of crushed stone or other suitable materials shall be stored at strategic locations along the haulage roads for use when the road surface becomes slippery.

9. A minimum width of 24 feet shall be provided and maintained along two-lane roads, and where widths of less than 24 feet are provided and maintained, the roads shall be designated as single-lane roads.

10. On roads that afford only one traffic lane, a minimum width of 16 feet, except where roads are shot out of solid rock, in which case they shall be 12 feet, shall be maintained, with passing points provided at intervals of not more than 1,000 feet.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before December 15, 1975. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

NOVEMBER 6, 1975.

[FR Doc.75–30551 Filed 11–12–75;8:45 am]

[Docket No. M 76–19]

NATIONAL MINES CORP.

Petition for Modification of Application of Manadatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), National Mines Corporation has filed a petition to modify the application of 30 CFR 75.1105 to its National Pocahontas Mines, Pineville, Wyoming County, West Virginia.

30 CFR 75.1105 provides:

Underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps shall be housed in fireproof structures or areas. Air currents used to ventilate structures or areas enclosing electrical installations shall be coursed directly into the return. Other underground structures installed in a coal mine as the Secretary may prescribe shall be of fireproof construction.

Petitioner requests a modification of § 75.1105 as it applies to two transformer-rectifier stations and one dewatering pump location. In support of its petition, Petitioner states:

1. The dewatering pumps are installed at the bottom of the main intake shaft for the purpose of removing water that would otherwise accumulate and restrict ventilation. To course the air from the pump to the return air course would require the installation of approximately 1,200 ft. of ventilation ducts through areas of heavy roof caving.

2. The pumps are in compliance with the law, in that they meet all electrical specifications and they are provided with all necessary protective devices.

3. One transformer-rectifier installation at the bottom of the main intake slope would require installation of approximately 900 ft. of ventilation ducts through areas of partial roof caving. Also, the subject electrical installation is located in the isolated belt haulage entry; therefore, the air current used to ventilate the said location is not used to ventilate the active working sections.

4. The second transformer-rectifier installation is located near East Mains belt drive. It would require approximately 550 ft. of ventilation ducts to course air from the said installation to the return.

5. The subject transformer-rectifier installations are in compliance with the law, in that they meet all electrical specifications and they are provided with all necessary protective devices.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before December 15, 1975. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

[FR Doc.75–30552 Filed 11–12–75;8:45 am]

[Docket No. M 76–25]

NORTH AMERICAN COAL CO.

Petition for Modification of Application of Manadatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), The North American Coal Company has filed a petition to modify the application of 30 CFR 75.802(a) to its Aulds Run No. 2 Mine, Indiana County, Pennsylvania.

30 CFR 75.802(a) provides in pertinent part:

(a) Except as provided in paragraph (b) of this section, high-voltage circuits extending underground and supplying portable, mobile, or stationary high-voltage equipment shall contain either a direct or derived neutral which shall be grounded through a suitable resistor at the source transformers • • •.

In support of its petition, Petitioner states:

1. Mining operation at the Aulds Run #2 Mine was started in August 1970. The mine has received power since it began operations from the utility at a point approximately 8 feet from the mine's electrical safety equipment such as the underground breaker, outside breaker, zig-zag transformer and neutral grounding resistor.

2. The utility provides power in the form of three electrified wires each being 7,200 volts with respect to each other.

3. The utility's transformer does not furnish a neutral.

V 40 N 220 NOV 13 75 XUM

4. In order to comply with safety requirements, and ensure safe conditions, Petitioner provided and installed a separate neutral source transformer and a grounding resistor. These items were located along with all other safety devices at a point as close as possible to the point where the power is received and readily accessible to mining operations.

5. The voltage being supplied and the location and integrity of the safety protective devices controlling the underground power system have remained constant since the Aulds Run No. 2 Mine was placed in operation by Petitioner.

6. The above-mentioned safety devices were installed in their present location and have been in service since August 1970. From the time of installation, these safety devices controlling the underground high-voltage circuits have been inspected, tested, and faithfully maintained. They have been considered in full compliance with appropriate safety standards by Petitioner, by the State agencies, and until May 1975 by MESA. Prior to May 1975, MESA had repeatedly inspected the Aulds Run No. 2 Mine and found its electrical safety devices in accord with the requirements of § 75.802(a).

7. On May 21, 1975, at 9:00 a.m., MESA Inspector William E. Lawson, Sr., issued a Notice of Violation at Aulds Run No. 2 based on § 75.802(a) in that the "3 phase 7.2 KV open delta connected source transformers were located approximately 170 feet from the zig-zag transformer and the neutral ground resistor."

8. Section 75.802(a) requires either a direct neutral or a derived neutral to be used as a source with which to originate a grounding system for high-voltage circuits entering the underground portion of the mine. The power transformer furnished by the utility does not have a direct neutral point with which to originate a grounding system so Petitioner installed a neutral source deriving transformer—a derived neutral—for its grounding system.

9. Section 75.802(a) requires that the electrical system "be grounded through a suitable resistor *at the source* transformer." (Emphasis added.) For purposes of § 75.802(a) at the Aulds Run No. 2 Mine, the "source" must be considered as the point where the customer (Petitioner) first has control over the power. Accordingly, Petitioner is in full compliance with § 75.802(a), if that standard is properly applied.

10. On June 9, 1975, Petitioner filed an Application for Review of the subject Notice of Violation which denies that the conditions existing at Aulds Run No. 2 Mine at the time and place cited constituted a violation of § 75.802(a) [see Docket No. PITT 75-44].[1]

11. If MESA's application of § 75.802(a) to the Aulds Run No. 2 Mine is deemed to comport with the regulations and American's Application for Review is denied, North American proposes, pursuant to section 301 (c) of the Act, its present system as an alternate system to meet the intent of § 75.802(a).

PETITIONER'S PLANS FOR ALTERNATE SYSTEM

Petitioner believes its alternate system will at all times guarantee no less than the same measure of protection afforded by the present MESA requirement as applied to the Aulds Run #2 Mine:

1. The Aulds Run #2 Mine will receive power from the utility through a Delta connected transformer and fed to a fusable disconnect 8 feet from the mine's grounding system and breakers.

2. A neutral source transformer for the derived neutral will be located in close proximity and easily accessible to the mine entrance with all other safety protective devices for the high-voltage circuits entering the underground portion of the Aulds Run #2 Mine.

3. The neutral source transformer will be wired to the power transformer.

4. The derived neutral will be grounded through a suitable resistor at the neutral source transformer.

5. All safety devices controlling underground high-voltage circuits will be inspected, tested, and faithfully maintained.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before December 15, 1975. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

NOVEMBER 6, 1975.

[FR Doc.75-30553 Filed 11-12-75;8:45 am]

[Docket No. M 76-16]

PEABODY COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Peabody Coal Company has filed a petition to modify the application of 30 CFR 77.1301(c) (1) to its Sinclair Underground No. 2 Mine, Muhlenberg County, Kentucky.

30 CFR 77.1301(c) (1) provides:

(c) Magazines other than box types shall be:

(1) located in accordance with the current American Table of Distances for storage of explosives.

Petitioner asks that a modification of the standard as applied to its mine cited above on the following grounds:

1. Petitioner plans to build a powder magazine and a cap magazine at the above-cited mine. The powder magazine will be designed to hold a maximum of 60,000–65,000 pounds of high explosives. The cap magazine will hold caps of an amount no more than 100 pounds of high explosives as rated by the American Table of Distances for Storage of Explosives.

2. Under the American Table of Distances for Storage of Explosives, the amount of explosives contained in these magazines should be stored a distance of 1,565 feet from an inhabited building when storage is barricaded.

3. Petitioner has determined that these are two suitable sites for construction of the magazines at the above mine. One of these sites (Site #1) would place the magazines a distance in excess of 1,565 feet from any inhabited building. The other of these sites (Site #2) would place the magazines a distance of approximately 1,200 feet from the nearest inhabited building. Construction of the magazines at Site #1 would require Petitioner to haul explosives once a day to the mine site on a county road used by private vehicles and coal haulage trucks and other mine traffic. Construction of the magazines at Site #1 would place the explosives in an open area that is widely used by hunters, particularly deer hunters, particularly deer hunters using high powered rifles. Access to Site #1 is easily obtained from the county road or back roads.

PETITIONER'S ALTERNATIVE

Petitioner proopses to meet the safety standard enumerated in the aforesaid Section 30 CFR 77.1301(c) (1) with respect to these magazines as follows:

1. Petitioner will construct the magazines at Site #2, a nearby deserted area of the mining boundary, accessible only through mine property by an access road at the rear of the mine site.

2. The magazines will be constructed at an approximate elevation of 425.00 in excavations in the side of a hill. The hill will serve as a barricade between the magazines and the nearest inhabited building which is 1,200 feet away on the opposite side of the hill.

3. The barricade will be between and on the sides of the magazines. The fronts of the magazines will face a deserted valley containing no building, railways or highways to be affected.

4. Terrain and water conditions of the area will restrict access to the magazines from any direction other than from the private access road at the rear of the mine site.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before December 15, 1975. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

NOVEMBER 6, 1975.

[FR Doc.75-30554 Filed 11-12-75;8:45 am]

[Docket No. M 76-17]

ROYAL COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Royal Coal Company has filed a petition to modify the application of 30 CFR 75.1105 to its Royal No. 3 Mine, Mt. Hope, West Virginia.

30 CFR 75.1105 provides:

Underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps shall be housed in fireproof structures or areas. Air currents used to ventilate structures or areas enclosing electrical installations shall be coursed directly into the return. Other underground structures installed in a coal mine as the Secretary may prescribe shall be of fireproof construction.

In support of its petition, Petitioner states:

(1) The fact that the entries in the area in question are from 25 to over 50 years old and are ventilated with intake air prevents Petitioner from complying with § 75.1105. Due to the age of this area, only one entry is open through this part of the mine and is used for track haulage and intake air. The parallel entries are totally blocked by falls. The adjacent workings are sealed and/or are incapable of passing return air due to falls and standing water.

(2) To provide no less than the same measure of safety as required by § 75.1105, the following alternate method is proposed for each installation:

(a) The installation will become enclosed in a fireproof structure.

(b) An automatic fire suppression device will be installed and will be activated by heat sensors.

(c) Openings for ventilation will be provided which will close from the same device that activates the fire suppression system.

(d) Any doors to the installation will be self-closing and well sealed.

(e) No combustible materials will be stored within the fireproof structure.

(f) All electrical inspections and circuits will comply with the requirements of the Code of Federal Regulations and the Coal Mine Health and Safety Act of 1969.

The petition is supplemented by schematic diagrams detailing the alternate method.

Persons interested in this petition may request a hearing on the petition or furnish comments on or before December 15, 1975. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

National Park Service

GOLDEN GATE NATIONAL RECREATION AREA ADVISORY COMMISSION

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Area Advisory Commission will be held at 9:30 a.m. on Saturday, December 6, 1975, at West Marin School, Point Reyes Station, CA.

The purpose of the Golden Gate National Recreation Area Advisory Commission is to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the National Park Service system in Marin and San Francisco counties.

Members of the Advisory Commission are as follows:

Mr. Frank Boerger, Chairman, Ms. Amy Meyer, Secretary, Mr. Ernest Ayala, Mr. Richard Bartke, Mr. Fred Blumberg, Mr. Lambert Lee Choy, Ms. Daphne Greene, Mr. Peter Haas, Sr., Mr. Joseph Mendoza, Mr. John Mitchell, Mr. Merritt Robinson, Mr. William Thomas, and Dr. Edgar Wayburn.

The major items on the agenda are the Point Reyes Resource Management Plan, review of GGNRA/Point Reyes general planning, and election of 1976 officers.

The meeting will be open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting or who wish to submit written statements may contact William J. Whalen, General Manager, Bay Area National Parks, Fort Mason, San Francisco, CA 94123, telephone 415–556–2920.

Minutes of the meeting will be available for public inspection by January 10, 1976 in the Office of the General Manager, Bay Area National Parks, Fort Mason, San Francisco, CA.

Dated: November 6, 1975.

JOHN H. DAVIS,
Acting Regional Director, Western Region.

[FR Doc.75-30603 Filed 11-12-75;8:45 am]

ROGER WILLIAMS NATIONAL MEMORIAL

Meeting

On Tuesday, December 2nd at 7:30 PM National Park Service will solicit public reaction to a number of alternative development schemes for Roger Williams National Memorial located in Providence, Rhode Island. The public will be asked to comment upon and suggest additions to these possible ways for developing the Memorial.

The meeting will be held at Brown University in the Barus-Holley building located on Hope at the corner of Hope and George Streets (entrance on George Street). Specific questions in regard to the meeting can be answered through the superintendent of Roger Williams National Memorial whose number is 401–831–7440.

Dated: October 22, 1975.

JERRY D. WAGERS,
Regional Director North Atlantic Region.

Office of the Secretary

[S.O. 2980]

ALASKA NATIVE CLAIMS SETTLEMENT ACT

Establishment of Region

This Notice is issued in accordance with the provisions of 5 U.S.C. 552(a) (1). The Acting Secretary of the Interior has issued Order Number 2980 dated October 7, 1975, establishing a Thirteenth Region for nonresident Alaska Natives as provided in Section 7(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (Public Law 92–203). The Order is published in its entirety below.

Further information concerning the Order may be obtained from Mr. Charles M. Soller, Office of the Solicitor, U.S. Department of the Interior, Washington, D.C., 20240, telephone 202–343–5134.

RICHARD R. HITE,
Deputy Assistant Secretary of the Interior.

Dated: November 5, 1975.

OCTOBER 7, 1975.

ORDER NO. 2980

Subject: Establishment of a Thirteenth Region for Nonresident Alaska Natives

Sec. 1 *Purpose.* Pursuant to an order entered on December 30, 1974, in the consolidated cases entitled *Alaska Native Association of Oregon, et al.* v. *Morton, et al.* and *Alaska Federation of Natives International, et al.* v. *Morton, et al.*, Civil Nos. 2133–73 and 2141–73, in the United States District Court for the District of Columbia, and as provided by Section 7(c) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688, 692, 43 U.S.C. § 1606(c) (Supp. III, 1973), there is hereby established a thirteenth region for the benefit of Alaska Natives who are not permanent residents of Alaska and who elected to be enrolled therein.

Sec. 2 *Effective date.* This Order shall be effective October 1, 1975. Its provision shall remain in effect until superseded by incorporation into Title 25 of the Code of Federal Regulations.

KENT FRIZZELL,
Acting Secretary of the Interior.

DEPARTMENT OF AGRICULTURE

Forest Service

MIDDLE FORK BOISE RIVER PLANNING UNIT

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Middle Fork Boise River Planning Unit, Boise National Forest, Idaho. The Forest Service report number is USDA–FS–FES (Adm) R4–75–25.

The environmental statement identifies an devaluates the probable effects of the land use plan for the Middle Fork Boise River Planning Unit on the Boise

[1] Petitioner's Application for Review filed on June 9, 1975, is available for inspection at the address contained in the last paragraph of the notice.

V 40 N 220 NOV 13 1975 XUM

National Forest, Idaho. The purpose of the plan is to allocate 329,100 acres of National Forest lands within the unit to specific resource uses and activities; establish management objectives; document management direction, management decisions, and necessary coordination between resource uses and activities; and provide for the protection, use, and development of the various resources within the planning unit. The plan provides for minimization of adverse effects and maximization of desirable effects.

This final environmental statement was transmitted to CEQ on November 6, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., S.W., Washington, D.C. 20250.
Regional Planning Office, USDA, Forest Service, Federal Building, Room 4403, 324–25th Street, Ogden, Utah 84401.
Forest Supervisor, Boise National Forest, 1075 Park Boulevard, Boise, Idaho 83706.
District Forest Ranger, Boise Ranger District, 7803 Warm Springs Ave., Boise, Idaho 83707.

A limited number of single copies are available upon request from Forest Supervisor Edward C. Maw, Boise National Forest, 1075 Park Boulevard, Boise, Idaho 83706.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Dated: November 6, 1975.

P. M. REES,
Director, Regional Planning and Budget.

Packers and Stockyards Administration

[P. & S. Docket No. 5192]

GILES LOWERY STOCKYARDS, INC.

Notice of Complaint, Order of Suspension and Hearing Regarding Respondent's Schedule of Rates and Charges

Notice is hereby given that on October 20, 1975, the respondent filed a proposed schedule of rates and charges, under Title III of the Packers and Stockyards Act, 1921, as amended, 42 Stat. 159, as amended (7 U.S.C. 181 *et seq.*), to become effective November 3, 1975. The charge classification of the proposed tariff reads as follows:

SECTION I. COMMISSION

A. Cattle:
(1) Ordinary

	Per head
(a) Up to and including—$199.99	$4.50
(b) $200.00 through—$249.99	5.00
(c) $250.00 through—299.99	6.00
(d) $300.00 through—349.99	7.00
(e) $350.00 and over	7.50

(2) Bulls

(a) Up to and including—149.99	4.50
(b) $150.00 through—249.99	5.50
(c) $250.00 up	7.00

(3) Cows and Calves

	Per unit
(a) Up to and including—149.99	5.00
(b) $150.00 through—349.99	5.50
(c) $350.00 through—349.99	6.00
(d) $350.00 up	7.50

B. Hogs:
(1) Ordinary

	Per head
(a) Up to and including—$4.49	$0.50
(b) $4.50 through—8.89	.75
(c) $9.00 through—19.99	1.00
(d) $20.00 through—29.99	1.25
(e) $30.00 through—39.99	1.50
(f) $40.00 through—49.99	1.75
(g) $50.00 and over	2.00

(2) Sows and pigs

	Per unit
(a) Up to and including—$19.99	1.25
(b) $20.00 through—29.99	2.00
(c) $30.00 through—39.99	2.50
(d) $40.00 and over	3.00

C. Horses and Mules:

(a) Up to and including—19.99	1.50
(b) $20.00 through—29.99	2.00
(c) $30.00 through—39.99	2.50
(d) $40.00 through—49.99	3.00
(e) $50.00 and over	3.50

SECTION II—YARDAGE CHARGE

A. All cattle 20¢ per head
B. All hogs 15¢ per head
C. All horses 50¢ per head

SECTION III—

The schedule of charges on all necessary veterinarian services performed by an accredited veterinarian will be at posted uniform per head rate, pursuant to company agreement with the veterinarian performing services and does not contain any charges retained by the market.

Notice is given hereby also that on October 31, 1975, the Packers and Stockyards Administration, United States Department of Agriculture, filed a "Complaint, Order of Suspension, and Notice of Hearing" with respect to the respondent's rates and charges. The contents of such document are as follows:

This proceeding is instituted pursuant to the provisions of Title III of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), hereinafter referred to as the Act.

I. The respondent is now, and at all times mentioned herein was, registered with the Secretary of Agriculture as a market agency to sell livestock on commission at the Giles Lowery Stockyards, Inc., d/b/a Lufkin Livestock Exchange, Lufkin, Texas, which is now, and at all times mentioned herein was, a posted stockyard subject to the provisions of the Act.

II. In accordance with the requirements of the Act, the respondent has heretofore filed and presently has in effect a schedule of rates and charges for its services at the aforementioned stockyard.

III. On October 20, 1975, the respondent filed a tariff effective November 3, 1975, containing certain increases in the current schedule of rates and charges.

IV. Upon an analysis of the information available to the Packers and Stockyards Administration, United States Department of Agriculture, there is reason to believe that the charges are unjust, unreasonable, or discriminatory.

V. It is concluded, therefore, that a proceeding under Title III of the Act should be instituted for the purpose of determining the reasonableness and lawfulness of the rates and charges set forth in the respondent's schedule of rates and charges as modified by the tariff filed on October 20, 1975, and that pending a hearing and decision in this proceeding, the operation of the modifications of the current schedule of rates and charges should be suspended and the use of such modified rates and charges deferred.

VI. It is further concluded that a hearing should be had for the purpose of determining the lawfulness of all rates and charges of the respondent and of any rule, regulation, or practice affecting said rates and charges.

It is therefore ordered, That the operation and use by the respondent of the modifications of the current schedule of rates and charges filed on October 20, 1975, to become effective November 3, 1975, are hereby suspended and deferred until the expiration of thirty days beyond the time when such modified rates would otherwise go into effect.

It is further ordered, That notice to the respondent shall be, and is hereby, given that a hearing concerning the matters set forth herein will be held before an Administrative Law Judge of the Department at a time and place to be specified at a later date, of which the respondent will receive adequate notice. At such hearing the respondent and all other interested persons will have a right to appear and present such evidence with respect to the matters and things set forth herein as may be relevant and material.

It is further ordered, That a copy hereof be served upon the respondent.

Done at Washington, D.C., November 7, 1975.

MARVIN L. MCLAIN,
Administrator, Packers and Stockyards Administration.

[FR Doc.75-30579 Filed 11-12-75;8:45 am]

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

DOORSKINS

Study of the Producing Firms

SUMMARY

The U.S. Department of Commerce has conducted its first study as required by Section 264 of the Trade Act of 1974. It has determined the number of firms producing doorskins which have been or are likely to be certified as eligible for adjustment assistance and the extent to which the orderly adjustment of the firms may be facilitated through the use of existing programs. Such a study by the Department is required whenever the U.S. International Trade Commission makes an "escape clause" investigation under Section 201 of the Trade Act.

The Commission reported to the President on October 20, 1975, the results of its investigation to determine whether increased imports of birch plywood doorskins represent a substantial cause (or threat) of injury to the domestic industry producing like or directly competitive products. The Commission made a negative determination chiefly on the basis that conditions in the housing market, rather than imports, are the most important cause of the injury being suffered by domestic producers of birch doorskins.

The Department has determined that of the total of approximately 15 manufacturers of all types of doorskins, including birch, other species of hardwood plywood, and hardboard, only two firms have produced birch doorskins during the past year. Although there is no well-defined or separately classified industry producing plywood doorskins, as many as ten hardwood plywood producers have manufactured different species of plywood doorskins intermittently during the past few years depending on market conditions for flush doors in the construction industry, especially home building, and the availability of adequate supplies of face veneers suitable for doorskins. Output of birch doorskins was reported by seven of these producers at some time during the past five years. In addition, there are one or two U.S. producers of hardboard which manufacture doorskins on equipment customarily used for the manufacture of a variety of hardboard panel products.

To be certified eligible to apply for adjustment assistance, a firm must demonstrate that increased imports of like or directly competitive articles contributed importantly to declines in sales or production, or both, and separation, or threat of separation, of the firm's workers. Although there has been no substantial evidence of an absolute increase in U.S. imports of either birch or other types of doorskins since the beginning of 1974, imports in the first half of 1975 did increase relative to domestic production. Recent increases in the ratio of imports to domestic output, however, apparently resulted more from a drop-off in domestic shipments rather than from any substantial upsurge in import volumes.

As of November 4, 1975, none of the doorskin manufacturing firms have petitioned the Department of Commerce for certification of eligibility to apply for adjustment assistance. A petitioning firm in the doorskin industry would be required to demonstrate that the recent relative increase in doorskin imports had impacted the sales or production and employment of the entire corporate entity and not merely the doorskin operations. Therefore, it is considered unlikely that either a large, diversified company in the forest products industry, or even a relatively small firm with only a small share of its output in doorskins, or a firm that produces doorskins only intermittently, would be able to meet the criteria essential for certification. Thus, it is likely that only one or two firms producing doorskins might be able to qualify for certification of eligibility to apply for adjustment assistance. And even if the prospective petitioners had experienced recent declines in sales or production and employment, they might find it difficult to present convincing evidence that U.S. imports of doorskins were an important cause of the decreases, especially with the severe decline which has occurred in construction activity during the past two years.

Under the program of adjustment assistance for firms authorized by the Trade Act, financial assistance to certified firms may take the form of direct loans and loan guarantees, and technical assistance, to enable a firm to establish a competitive position in the same or a different industry. Financial assistance may be used for the acquisition, construction, installation, modernization, expansion or conversion of fixed assets, or for working capital necessary for a firm to implement its adjustment plan. Technical assistance may be used for management and operational assistance, feasibility studies and related research to aid in developing and implementing a firm's recovery plan.

Firms may also benefit indirectly from financial assistance available to trade impacted communities under provisions of the Trade Act in a manner similar to the public works, business development and Title IX programs administered by the Department's Economic Development Administration ("EDA") pursuant to the Public Works and Economic Development Act of 1965. These other programs of EDA provide business development loans to assist firms in certain designated areas identified on the basis of adverse employment factors; loans and grants to states, local governments and nonprofit organizations for acquiring, developing and improving public works and public service facilities; and grants to states and local areas for a comprehensive program of adjustment to an actual or threatened economic dislocation or adjustment problem.

Other Federal programs which might be of interest to firms in the doorskin industry include the program administered by the Farmers Home Administration, Department of Agriculture, of direct and guaranteed loans to firms located in areas having cities no larger than 50,000 in population, and the financial and technical assistance available to small business firms in the program administered by the Small Business Administration.

Additional information about the adjustment assistance program, and copies of the report, *Prospects for Adjustment Assistance for Firms in the Doorskin Industry*, are available from the Office of Trade Adjustment Assistance, Room 3011, U.S. Department of Commerce, Washington, D.C. 20230 (telephone 202/967-3211).

National Bureau of Standards

FEDERAL INFORMATION PROCESSING STANDARDS TASK GROUP 13 WORKLOAD DEFINITION AND BENCHMARKING

Notice of Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that the Federal Information Processing Standards Task Group 13 (FIPS TG-13), "Workload Definition and Benchmarking," will hold a meeting from 10:00 a.m. to 4:00 p.m. on Wednesday, January 14, 1976, in Room B-255, Building 225, of the National Bureau of Standards at Gaithersburg, Maryland.

The purpose of this meeting is to review the progress of two workgroups which are addressing the areas of Problem Definition and Benchmark Program Transferability.

The public will be permitted to attend, to file written statements, and, to the extent that time permits, to present oral statements. Persons planning to attend should notify the Acting Executive Secretary, Mr. Arthur F. Chantker, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C., 20234 (Phone—301-921-3485).

Dated: November 10, 1975.

ERNEST AMBLER,
Acting Director.

National Oceanic and Atmospheric Administration

MARINE PETROLEUM AND MINERALS ADVISORY COMMITTEE DEEP OCEAN MINING ENVIRONMENTAL STUDY ADVISORY PANEL

Open Meeting

The Marine Petroleum and Minerals Advisory Committee's Deep Ocean Mining Environmental Study Advisory Panel (the "Advisory Panel") will meet from 9:00 a.m. until approximately 5:00 p.m. on December 16, 1975 in the Condon Room of the University Tower Hotel, 4507 Brooklyn Avenue, N.E., Seattle, Washington. The meeting will be open for public observation.

The Advisory Panel was established as a subcommitee of the Marine Petroleum and Minerals Advisory Committee (the "Commitee") for the purpose of advising Department of Commerce officials on the planning for and conduct of the National Oceanic and Atmospheric Administration's Deep Ocean Mining Environmental Study (DOMES) Program and to develop, when necessary, recommendations to the Secretary regarding the DOMES Program. The Panel members represent environmental, industrial, and academic sectors concerned with determining the possible environmental effects of deep ocean mining.

Included in matters for consideration, and the approximate times for their consideration are as follows:

V 40 N 220 NOV 13 75 XUM

9:00—Welcoming Remarks and Presentation on the Objectives of the DOMES Program.

10:15—Discussion among Panel, DOMES Management, and DOMES Principal Investigators.

12:00—Recess for Lunch.

1:15—Discussion of the Relevancy, Timing, and Uses of DOMES Activities and the Allocation of Resources.

4:00—Consideration of Additional Activities, if any, Which Should be Included in DOMES Plans.

4:30—Development and Adoption of Recommendations, if any, on the DOMES Program.

5:00—Adjourn.

Because of the nature of the work being performed by the Advisory Panel it may be necessary for it to meet again between December 16 and the next Committee meeting planned for February 24–25, 1976. This could result in there being inadequate time between meetings for the publication of notices in the FEDERAL REGISTER as prescribed by Office of Management and Budget Circular No. A–63 and the Order of the U.S. District Court for the District of Columbia in Civil Action No. 1838–73. To provide the public with as much notice as possible, the date, location, and tentative agenda of any such meeting will be announced on December 16 and notices will be published as soon as possible thereafter. Information on any such meetings will also be available by telephoning or writing to the Advisory Panel Secretariat at the telephone number or address given below.

Approximately 25 seats will be available for the public on a first-come, first-served basis. Written statements from interested persons will be accepted before or after the meeting or by mail. Inquiries or statements should be addressed to: Charles Gunnerson (or alternatively Edward Altouney), DOMES Advisory Panel Secretariat, NOAA Environmental Research Laboratories (Rx5), Boulder, Colorado 80302. Telephone: (803) 499–6551.

Dated: November 7, 1975.

T. P. GLEITER,
Assistant Administrator for Administration, National Oceanic and Atmospheric Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

NATIONAL ADVISORY MENTAL HEALTH COUNCIL

Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of December 1975:

National Advisory Mental Health Council
December 1–3; 9:30 a.m.
Conference Room 14–105, Parklawn Building, Rockville, Maryland
OPEN—December 1
CLOSED—Otherwise
Contact Mrs. Zella Diggs, Parklawn Building, Room 17C–26, 5600 Fishers Lane, Rockville, Maryland 20852, 301–443–4333.

Purpose: The National Advisory Mental Health Council advises the Secretary, Department of Health, Education, and Welfare, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health, regarding the policies and programs of the Department in the field of mental health. The Council reviews applications for grants-in-aid relating to research, training, and services in the field of mental health and makes recommendations to the Secretary with respect to approval of applications for, and the amount of, these grants.

Agenda: December 1 will be devoted to discussion of NIMH policy issues. These will include current administrative, legislative, and program developments. On December 2–3, the Council will conduct a final review of grant applications for Federal assistance and this session will not be open to the public, in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552(b)(5) and 552(b)(6), Title 5, U.S. Code, and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact person listed above.

The NIMH Information Officer who will furnish summaries of the meeting and a roster of Council members is Mr. Edwin Long, Deputy Director, Division of Scientific and Technical Information, National Institute of Mental Health, Room 15–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, telephone 301–443–3600.

DATED: November 10, 1975.

CAROLYN T. EVANS,
Committee Management Officer Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[Docket No. 75G–0311]

PROCTER & GAMBLE CO.

Amendment to Notice of Filing of Petition for Affirmation of Gras Status

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784–1786 (21 U.S.C. 321(s), 348, 371(a)) and the regulations for affirmation of GRAS status (21 CFR 121.40), published in the FEDERAL REGISTER of December 2, 1972 (37 FR 25705), notice was given by publication in the FEDERAL REGISTER of February 14, 1974 (39 FR 5647) that a petition (GRASP 4G0036) had been filed by Procter & Gamble Co., Center Hill Rd., Cincinnati, OH 45224, and placed on public display at the office of the Hearing Clerk, Food and Drug Administration (address noted below), proposing affirmation that fully hydrogenated rapeseed oil is generally recognized as safe (GRAS).

The petition now proposes that such affirmation of GRAS status also include the use of superglycerinated fully hydrogenated rapeseed oil in foods, which was inadvertently omitted from the original filing notice.

Any petition which meets the format requirements outlined in 21 CFR 121.40 is filed by the Food and Drug Administration. There is no profiling review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for affirmation.

Interested persons may, on or before January 12, 1976, review the petition and/or file comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852. Comments should include any available information that would be helpful in determining whether the substance is or is not generally recognized as safe. A copy of the petition and received comments may be seen in the office of the Hearing Clerk, address given above, during working hours, Monday through Friday.

Dated, November 5, 1975.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

[FR Doc.75 30572 Filed 11–12–75;8:45 am]

[Docket No. 75F–0315]

PROCTER & GAMBLE CO.

Notice of Filing of Petition for Food Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6A3154) has been filed by Procter & Gamble Co., 6071 Center Hill Rd., Cincinnati, OH 45224, proposing that § 121.1002 *Amino acids* (21 CFR 121.1002) be amended to provide for safe use of N-acetyl-L-methionine as a supplement for protein-containing foods to improve the nutritional value.

The environmental impact analysis report and other relevant material have been reviewed, and it has been determined that the proposed use of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Assistant Commissioner for Public Affairs, Rm. 15B–42 or the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD

20852, during working hours, Monday through Friday.

Dated: November 5, 1975.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

National Institutes of Health

COMPREHENSIVE SICKLE CELL CENTERS AD HOC REVIEW COMMITTEE

Notice of Establishment

The National Institutes of Health announces the establishment on October 20, 1975, of the public advisory committee, Comprehensive Sickle Cell Centers (CSCC) *ad hoc* Review Committee, under the authority of section 222 of the Public Health Service Act (42 U.S.C. 217a). This advisory committee shall be governed by the provisions of the Federal Advisory Committee Act (Public Law 92–463) setting forth standards governing the establishment and use of advisory committees.

This committee shall advise the Secretary, the Assistant Secretary for Health, and the Director, National Institutes of Health, concerning scientific merit review of competing grant applications and provide technical advice to the National Heart and Lung Advisory Council and to the Director, National Heart and Lung Institute.

Authority for this committee will expire August 31, 1977, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Office of Education

EXEMPLARY PROJECTS IN VOCATIONAL EDUCATION

Notice of Closing Date for Receipt of Applications for Fiscal Year 1976

Notice is hereby given that pursuant to the authority contained in Section 142(c) of Part D of the Vocational Education Act of 1963, as amended, 20 U.S.C. 1302(c), applications are being accepted from applicants in the States of Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, Wyoming, American Samoa, and Guam for grants for exemplary projects in vocational education.

Applications for planning grants of $5,000 or less must be received by the U.S. Office of Education Application Control Center on or before December 19, 1975. Applications for implementation and demonstration projects must be received by the U.S. Office of Education Application Control Center on or before June 18, 1976.

A. APPLICATIONS SENT BY MAIL

An application sent by mail should be addressed as follows: U.S. Office of Education, Grants and Procurement Management Division, Application Control Center, 400 Maryland Avenue SW., Washington, D.C. 20202, Attention: 13:502. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than December 15, 1975 for the planning grants and June 14, 1976 for the implementation and demonstration projects, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail room in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. HAND DELIVERED APPLICATIONS

An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, S.W., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. PROGRAM APPLICATION INFORMATION

(1) Applications must be prepared and submitted in accordance with instructions and forms which may be obtained from the appropriate Department of Health, Education, and Welfare/U.S. Office of Education Regional Offices listed below. Descriptive materials on the resources available to potential applicants will also be made available through the Regional Offices as a part of the application package.

Interested applicants from *Region I* serving Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont should contact Mr. Nicholas Hondrogen, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, J. F. Kennedy Federal Building, Boston, Massachusetts 02203.

Interested applicants from *Region II* serving New York, New Jersey, Puerto Rico, and the Virgin Islands should contact Mr. Charles A. O'Connor, Jr., Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 26 Federal Plaza, New York, New York 10007.

Interested applicants from *Region III* serving Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia should contact Mr. Robert Smallwood, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, P.O. Box 13716, Philadelphia, Pennsylvania 19101.

Interested applicants from *Region IV* serving Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee should contact Mr. Donald Snodgrass, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 50 Seventh Street, N.E., Room 550, Atlanta, Georgia 30323.

Interested applicants from *Region V* serving Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin should contact Mr. William L. Lewis, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 300 South Wacker Drive, Chicago, Illinois 60606.

Interested applicants from *Region VI* serving Arkansas, Louisiana, New Mexico, Oklahoma, and Texas should contact Dr. Arthur Lee Hardwick, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 1114 Commerce Street, Dallas, Texas 75202.

Interested applicants from *Region VII* serving Iowa, Kansas, Missouri, and Nebraska should contact Mr. Thaine D. McCormick, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 601 East 12th Street, Kansas City, Missouri 64106.

Interested applicants from *Region VIII* serving Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming should contact Mr. LeRoy Swenson, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 1961 Stout Street, Room 9017, Denver, Colorado 80202.

Interested applicants from *Region IX* serving Arizona, California, Hawaii, Nevada, Guam, American Samoa, and the Trust Territories should contact Mr. C. Kent Bennion, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 50 Fulton Street, San Francisco, California 94102.

Interested applicants from *Region X* serving Alaska, Idaho, Oregon, and Washington should contact Mr. Sam Kerr, Assistant Regional Commissioner for Occupational and Adult Education, U.S. Office of Education, 1321 Second Avenue, Seattle, Washington 98101. (20 U.S.C. 1302(c)).

Simultaneously with the submission of an application to the U.S. Office of Education, the applicant must submit a copy of the application to the applicable

V 40 NO 220 NOV 13 75 XUM

State board for vocational education. The State board for vocational education will review each application and may, within a period of sixty days, disapprove any application.

Direct grants or contracts are awarded in each State up to the limit of funding available for the U.S. Commissioner of Education to use in that State as allotted under Section 142(c) of Part D of the Act. Approximately $15,000 from each State allocation will be obligated to applicants within that State for planning projects and the balance will be reserved for funding of the first year of operation of the implementation and demonstration project. Approximate funds to be available in fiscal year 1976 are:

Alabama $147,013; Alaska $104,805; Arizona $127,143; Arkansas $125,324, Colorado $133,117; Connecticut $137,533; Delaware $107,532; District of Columbia $108,571; Georgia $162,598; Hawaii $111,299; Idaho $110,799; Illinois $238,571; Indiana $168,702; Iowa $136,494; Kansas $129,611; Kentucky $142,857; Louisiana $151,428; Maine $113,247; Maryland $152,338; Michigan $111,818; Mississippi $132,208; Missouri $159,741; Montana $110,000; Nebraska $119,740; Nevada $106,624; New Mexico $115,844; North Dakota $108,961; Ohio $239,611; Oklahoma $133,636; Oregon $128,182; Pennsylvania $245,455; Rhode Island $149,264; South Carolina $137,792; South Dakota $109,610; Tennessee $151,298; Texas $254,545; Utah $116,883; Virginia $163,766; Washington $144,156; West Virginia $122,338; Wisconsin $159,740; Wyoming $104,805; American Samoa $2,332; and Guam $6,080. In all other States and Territories, the fiscal year 1976 funds are being used to meet the continuation costs of ongoing three-year projects.

(Catalog of Federal Domestic Assistance Program Number 13.502; Exemplary Projects in Vocational Education.)

Dated: September 19, 1975.

DUANE J. MATTHEIS,
Acting U.S. Commissioner of Education.

NATIONAL ADVISORY COUNCIL ON VOCATIONAL EDUCATION

Public Meeting

Notice is hereby given, pursuant to PL-92-463, that the next meeting of the National Advisory Council on Vocational Education will be held on December 7, 1975 from 2:00 P.M. to 6:00 P.M., local time, at the Quality Inn, Orangewood, Room #3, Anaheim, California, and on December 8, 1975 from 10:30 A.M. to 12:30 P.M., local time, at the Disneyland Hotel, Pacific Room, Anaheim, California.

The National Advisory Council on Vocational Education is established under section 104 of the Vocational Education Amendments of 1968 (20 U.S.C. 1244). The Council is directed to advise the Commissioner of Education concerning the Administration of preparation of general regulations for, and operation of, vocational education programs, supported with assistance under the act; review the administration and operation of vocational education programs under the act; including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations to the secretary of HEW for transmittal to the Congress, and conduct independent evaluation of programs carried out under the act and publish and distribute the results thereof.

The meeting of the Council shall be open to the public. The proposed agenda includes:

December 7, 1975: Report on Bicentennial Conference Committee Reports.
December 8, 1975: Discussion of the Role of State Advisory Councils on Vocational Education.

Records shall be kept of all Council proceedings and shall be available for public inspection at the office of the Council's Executive Director, located in Suite 412, 425-13th Street NW., Washington, D.C. 20004.

Signed at Washington, D.C., on November 5, 1975.

REGINALD PETTY,
Executive Director.

[FR Doc.75-30540 Filed 11-12-75;8:45 am]

COMMUNITY EDUCATION ADVISORY COUNCIL

Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92-463, that a meeting of the Community Education Advisory Council will be held December 2 and 3 at the Continental Room, Netherlands Hilton Hotel, Cincinnati, Ohio. The Tuesday meeting will begin at 9:00 A.M. and end at 6:00 P.M. The Wednesday meeting will begin at 8:00 A.M. and end at 12:00 P.M.

The Community Education Advisory Council is authorized under Pub. L. 93-380. The Council is established to advise the Commissioner of Education on policy matters relating to the interest of community schools.

In addition, the Council shall create a system for evaluation of the programs. The Council shall present to Congress a complete and thorough evaluation of the programs and operating of the Community Schools Act for each fiscal year ending after June 30, 1975.

The meeting of the Council will be open to the public. The proposed agenda includes:

1. Needs assessment.
2. Evaluation and reporting system.
3. Evaluation report for FY 76.
4. Final Regulations (contingent on final approval).
5. Review of the grant application process.
6. Future functions of the council and administrative business.

Records shall be kept of all council proceedings and shall be available for public inspection in Room 5622, Regional Office Building No. 3, 7th and D Streets SW., Washington, D.C. 20202.

Signed at Washington, D.C. on November 3, 1975.

JULIE ENGLUND,
Director, Community Education Program.

COUNCIL ON WAGE AND PRICE STABILITY

DIRECTOR

Delegation of Authority

Delegation of authority by the Council on Wage and Price Stability to its Director to exercise, subject to general Council guidance, the Council's authority to intervene and otherwise participate in rulemaking, ratemaking, licensing and other federal agency proceedings, in order to express the Council's views as to the inflationary effect of the possible results of those proceedings.

Pursuant to the authority vested in the Council by the Council on Wage and Price Stability Act, Public Law 93-387 as amended by Public Law 94-78, it is hereby ordered as follows:

1. The Director of the Council is hereby directed and authorized to exercise all of the authorities vested in the Council by section 3(a)(8) of the Council on Wage and Price Stability Act.

2. Significant actions under section 3 (a) (8) shall be made under the general guidance and pursuant to any general policies which have been or might be developed by the Council.

3. The Director is authorized to redelegate to such subordinate officials of the Council as he may designate any or all of the authorities vested in him by this Order except the authority to make the initial decision whether to intervene or otherwise participate in the proceedings described in Section 3(a)(8).

4. This Order shall be effective immediately.

WILLIAM E. SIMON,
Chairman, Council on Wage and Price Stability.

NOVEMBER 7, 1975.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

[ERDA-1541]

LIGHT WATER BREEDER REACTOR PROGRAM

Procedures To Govern Public Hearing Concerning Draft Environmental Impact Statement

The Energy Research and Development Administration (ERDA) issued for review and comment a draft environmental statement "Light Water Breeder Reactor Program" (ERDA-1541), on August 8, 1975. A FEDERAL REGISTER notice of August 15, 1975, (40 FR 34453) announced the availability of the document, requested the comments of interested persons, organizations and agencies, and reiterated ERDA's intention to conduct a public hearing. The period within which written comments would be received was extended by a subsequent notice (40 FR 42394, September 12, 1975) to November 14, 1975.

Copies of ERDA-1541, and of the written comments as received are available for public inspection at the locations indicated in 40 FR 34453, except that, as of October 16, 1975, the ERDA Public Document Room has been moved to 20 Massachusetts Avenue, NW., Washington, D.C., from the 1717 H Street location. Comments should be sent to W. H. Pennington, Office of the Assistant Administrator for Environment and Safety, Mail Station E-201, Energy Research and Development Administration, Washington, D.C. 20545, (301) 973-4241, and should conform to the instructions set forth in 40 FR 34453.

The purpose of this notice is to provide additional information concerning the public hearing and the procedures which will govern its conduct. The public hearing will be held on December 4, 1975, at the United States Post Office and Court House, Seventh Avenue and Grant Street, Pittsburgh, Pennsylvania, commencing at 9:00 a.m. The hearing will be open to any person or organization wishing to present their views concerning the subject matter of the environmental statement. These views will be considered in a final environmental statement which will assist the agency in making determinations relating to the LWBR Program.

(1) The hearing will be legislative rather than adjudicatory in nature. Formal discovery, subpoena of witnesses, cross-examination of participants, testimony under oath, and similar formalities appropriate to a trial will not be provided.

(2) The hearing will be conducted by a three-member Presiding Board composed of nongovernmental experts in aspects of technology assessment who have had no previous connection with the LWBR Program.

(3) In order to sharpen and focus the major issues for discussion and examination at the hearing, ERDA staff involved in the preparation of ERDA-1541 will make available, several days before the hearing, a statement summarizing and addressing those points raised in the written comments which they believe to be of major importance. The statement will be obtainable at the hearing or, prior thereto, from W. H. Pennington (address and phone number given above).

(4) Persons, organizations or governmental agencies wishing to appear and make a presentation are encouraged to notify Mr. Pennington (address given above) in writing at least one week in advance of the hearing. Such notice should specify: (a) the name and address of the participant; (b) the organizational affiliation (if any); (c) the issues to be addressed or the questions to be raised by the participant; and (d) the amount of time desired to complete the presentation. This information will assist the agency in scheduling and preparing for the hearing. The Presiding Board will endeavor to schedule the full amount of time requested, subject to the imposition of such reasonable limits as will assure other participants a meaningful opportunity to appear.

(5) Those wishing to participate but who do not file a timely notice as specified herein, may notify Mr. Pennington before the hearing, or the Chairman of the Presiding Board during the hearing, of their desire to make a presentation. Such parties shall be heard at such times as the Presiding Board shall permit for a period of not more than fifteen (15) minutes each, unless the Presiding Board, in its discretion, allows additional time.

(6) Questions may be posed to participants (including ERDA staff members), during the course of the hearing by other participants (including ERDA staff members) and the Presiding Board, either orally or in writing, provided that: (a) all questioning shall be subject to the control and discretion of the Presiding Board, (b) questions shall be permitted from participants who have not provided advance notice of their participation under paragraph (4) hereof only to the extent that they are relevant to the issues identified in the staff statement (described in paragraph (3)) and; (c) any participant (including ERDA staff members) may elect to answer any such questions either orally at the hearing or subsequently in writing submitted to the Presiding Board before the close of the hearing record, which shall be determined by the Board.

(7) Participants may, but need not, be represented by counsel. Participants and their counsel will reference and produce, on request of the Presiding Board, the documents on which they rely.

(8) Consistent with the full and true disclosure of the facts, duplicative, redundant, irrelevant, or otherwise unproductive testimony or questioning will not be permitted and the Presiding Board will impose suitable restrictions to that end. The Presiding Board is authorized to take appropriate action to control the course of the hearing including authority to maintain order; rule on offers of, and receive, evidence; dispose of procedural requests or similar matters; allocate among patricipants the time available for presentation; provide for consolidation of presentations, as appropriate; examine participants or witnesses; and hold conferences before or during the hearing for the purpose of delineating contested issues or for other purposes within the authority of the Presiding Board.

(9) In addition to controlling the course of the hearings, the Presiding Board may examine participants in order to elicit fuller information, probe sensitive issues, and discover the bases and sources of views, so as to produce a satisfactory record upon which the agency may evaluate the concerns of the interested public.

(10) A transcript of the hearing will be made. The record of the hearing shall consist of the transcript, all documents received into the record by the Presiding Board, and a Report of the Presiding Board as provided below.

(11) After the close of the hearing record the Presiding Board shall render its Report and forward it, together with the record to the Administrator. These documents will be considered in the preparation of the final environmental statement and in making determinations concerning the LWBR Program. The Report shall be based upon the Presiding Board's review of the draft environmental statement and the hearing record and shall (a) identify those unresolved issues raised at the hearing which the Presiding Board deems to be critical to future decisions concerning the Program, and (b) present the recommendations of the Presiding Board concerning the treatment of these issues in the final environmental statement in a manner which will promote informed decisionmaking. In discharging its function, however, the Presiding Board shall not undertake to resolve issues or render judgment concerning the course of the Program.

Dated at Washington, D.C., this 11th day of November, 1975.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator for Environment and Safety.

FEDERAL COMMUNICATIONS COMMISSION

TV AND FM TRANSLATOR APPLICATIONS

Ready and Available for Processing

Notice is hereby given pursuant to §§ 1.572(c) and 1.573(d) of the Commission's rules, that on December 16, 1975, the TV and FM translator applications listed below will be considered as ready and available for processing. Pursuant to §§ 1.227(b)(1) and 1.591(b) of the Commission's rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on December 15, 1975, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and submitted for filing at the offices of the Commission in Washington, D.C., by the close of business on December 15, 1975.

The attention of any party in interest desiring to file pleadings concerning any pending TV and FM translator application, pursuant to section 309(d)(1) of the Communications Act of 1934, as amended, is directed to § 1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

Adopted: November 4, 1975.

Released: November 7, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

FEDERAL POWER COMMISSION

[Docket Nos. RP71-131, RP72-61]

ALGONQUIN GAS TRANSMISSION CO.

Proposed Changes in FPC Gas Tariff

NOVEMBER 5, 1975.

Take notice that on October 14, 1975, Algonquin Gas Transmission Company (Algonquin), tendered for filing proposed changes in its FPC Gas Tariff, First Revised Volume No. 1. The proposed changes make revisions to Section 14 of the General Terms and Conditions of Algonquin's FPC Gas Tariff which contains curtailment procedures to be used in apportioning gas supplies from Texas Eastern Transmission Corporation.

Algonquin states that it is submitting these changes to comply with the Commission's order issued August 20, 1975 in Docket Nos. RP71-131 and RP72-61, which required Algonquin to provide an exemption from peak day (but not annual) curtailment for small distributor customers specifically limited to end-use priority category 1 loads.

Algonquin states that copies of the filing were served upon the company's customers and interested state regulatory commissions.

Any person desiring to be heard or to make protest with reference to said application should on or before November 14, 1975, file with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, petitions to intervene or protests in accordance with §§ 1.8 or 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions and protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30564 Filed 11-12-75;8:45 am]

[Docket No. ER76-197]

DUKE POWER CO.

Supplement

NOVEMBER 5, 1975.

Take notice that Duke Power Company (Duke) on October 28, 1975, tendered for filing a supplement to Duke's Electric Power Contract with the Town of Drexel (Town), designated Duke Power Company Rate Schedule FPC No. 257. The supplement, entitled Document No. 1, is dated June 17, 1975, and is to become effective on December 19, 1975.

Document No. 1 provides for an increase in contract demand from 2,000 KW to 2,700 KW, made at the Town's request. Duke states that, to provide service under this agreement, its delivery voltage will be converted from 2,300 volts delta to 4,160/2,400 cvolts wye, and its substation capacity will be increased by replacing the transformers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 17, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30566 Filed 11-12-75;8:45 am]

[Docket No. ER76-184]

KANSAS CITY POWER & LIGHT CO.

Increased Schedules of Rates and Charges

NOVEMBER 5, 1975.

Take notice that on October 20, 1975, Kansas City Power & Light Company (KCPL) filed with the Commission new increased Schedules of Rates and Charges for Wholesale Firm Power Service to supersede and replace the following Schedules of Rates and Charges for Wholesale Firm Power Service:

1. Missouri Power & Light Company (MP LC) FPC No. 73.
2. Missouri Public Service Company (MP SC) FPC No. 74.
3. City of Armstrong, Missouri (Armstrong) FPC No. 62.
4. City of Gardner, Kansas (Gardner) FPC No. 68.
5. City of Higginsville, Missouri (Higginsville) FPC No. 72.
6. City of Pomona, Kansas (Pomona) FPC No. 71.
7. City of Prescott, Kansas (Prescott) FPC No. 30.
8. City of Salisbury, Missouri (Salisbury) FPC No. 61.
9. City of Slater, Missouri (Slater) FPC No. 64.
10. Coffey County Rural Electric Cooperative Association, Inc. (Coffey County) FPC No. 69.
11. United Electric Cooperative, Inc. (formerly Sugar Valley Electric Cooperative Association, Inc.) (United Electric) FPC No. 68.

KCPL states that the proposed effective date for each new increased Schedule of Rates and Charges is November 30, 1975, and that the new Schedules of Rates and Charges reflect an increase of $996,746 in annual revenues to KCPL based on its cost of service and sales to the wholesale firm power customers during the 12-month test period ended June 30, 1975. Additionally, KCPL states that the changes embodied in the new Schedules of Rates and Charges include (1) increased rates for Demand and Energy Charges, and (2) a new Fuel Adjustment Clause with a related pricing of the base "fuel cost" at 0.434¢ per kilowatt-hour to reflect the appropriate average fuel cost to KCPL in the year ended June 30, 1975, in compliance with the Commission's Order No. 517 issued November 13, 1974, in Docket No. R-479.

KCPL further states that the new Schedules of Rates and Charges have been designed to limit KCPL's increase in annual revenues from such wholesale firm power customers to less than $1 million to avoid the necessity of filing Period II projected data under the Commission's Regulations so as to expedite the filing of the new Schedules, which KCPL asserts would provide it with the opportunity to earn a rate of return of 8.03% on its wholesale firm power service to each class of customers based on its June 30, 1975, costs of service and sales to them.

Any person desiring to be heard or to protest such filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 17, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30567 Filed 11-12-75;8:45 am]

[Docket Nos. RP71-125, and RP75-108, PGA 76-3]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Purchased Gas Cost Adjustment to Rates and Charges

NOVEMBER 5, 1975.

Take notice that Natural Gas Pipeline Company of America (Natural) on October 16, 1975, tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, to become effective December 1, 1975:

Substitute Twenty-fifth Revised Sheet No. 5.
Substitute Original Sheet No. 5A.

As explained below alternate tariff sheets were also filed.

The purpose of the filing is to adjust Natural's rates, pursuant to the provision of its Purchased Gas Cost Adjustment Clause, to reflect changes in the cost of gas purchased from producers suppliers and to recover deferred purchased gas costs accumulated during the six months ended August 31, 1975.

Natural filed concurrently under separate cover a "Motion to Make Suspended Tariff Sheets Effective" in the proceedings at Docket No. RP75-108. For the reasons as set out in that motion alternate Base Rates were filed to be effective December 1, 1975. Therefore, alternate tariff sheets to reflect the two different Base Rate levels as submitted with Natural's motion were also submitted with this PGA unit adjustment filing. Both sets of tariff sheets submitted reflect the same PGA unit adjustment levels.

Natural states that copies of the filing have been mailed to each of the company's jurisdictional customers, interested state commissions and interested parties in Docket No. RP75-108.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 N. Capitol Street, N.E., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 14, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30565 Filed 11-12-75;8:45 am]

[Docket No. ER76-194]

ORANGE AND ROCKLAND UTILITIES, INC.

Initial Rate Filing

NOVEMBER 5, 1975.

Take notice that Orange and Rockland Utilities, Inc. (O&R), on October 28, 1975, tendered for filing as an initial rate schedule an Electric Generating Capability Exchange Agreement between O&R and Consolidated Edison Company of New York, Inc. (Con Ed). The Agreement, dated October 23, 1975, provides for the exchange of 200 MW of electric generating capability between O&R and Con Ed during the period October 26, 1975, through April 24, 1976.

Included with the filing is the Certificate of Concurrence of Con Ed.

O&R requests that the Commission waive the notice requirements of Section 35.3 of its Regulations to permit the Agreement to become effective as an initial rate schedule as of October 26, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 19, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30568 Filed 11-12-75;8:45 am]

[Docket No. RP75-50]

PENNSYLVANIA GAS AND WATER COMPANY, ET AL.

Proposed Settlement

NOVEMBER 6, 1975.

Take notice that on October 3, 1975, as supplemented on October 20, 1975, the Administrative Law Judge in Docket No. RP75-50 certified a proposed settlement to the Commission for action. The instant proceeding was instituted by Commission Order of February 14, 1975, which was issued in response to a number of complaints filed against Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) by several of its customers.[1]

The proposed settlement as it is stated resolves all issues remaining in the instant docket.

In view of the somewhat convoluted procedural history of this proceeding, a brief review of same is in order. In response to the aforementioned complaints, the Commission by order of February 14, 1975 in Docket No. RP74-24, *et al., inter alia*, consolidated the complaints of Con Ed, O&R, Knoxville, and PG&W for hearing and decision; construed filings by Alabama-Tennessee Natural Gas Company (filed in Docket No. RP75-45) and General Motors Corporation (filed in Docket No. RP 74-24) as complaints under Section 5(a) of the Natural Gas Act, and consolidated them with the aforementioned complaints. By order of March 14, 1975, the Commission dismissed Knoxville's complaint without prejudice, consolidated with the remainder of the proceeding a complaint filed by Berkshire against Tennessee, and redesignated the instant proceeding Docket Nos. RP75-35, *et al.* By order of April 28, 1975, the Commission allowed Berkshire

[1] Complaints were filed against Tennessee by Consolidated Edison Company of New York, Inc. (Con Ed); Orange and Rockland Utilities, Inc. (O&R); Knoxville Utilities Board, *et al.* (Knoxville); Pennsylvania Gas and Water Company (PG&W); and the Berkshire Gas Company (Berkshire).

V 40 N 220
NOV 13 75
XUM

to withdraw its complaint, and further severed Docket No. RP74–24 from the instant proceeding. On July 7, 1975, the Commission granted the joint motion of Con Ed and O&R to sever their complaints (Docket Nos. RP75–35 and RP75–36, respectively) from the remainder of the proceeding "since the balance of the proceeding relates to issues of law and fact different from that raised by Con Ed and O&R." (Order of July 7, 1975, p. 3). Then on September 9, 1975, the Commission designated the balance of the proceeding, *i.e.*, PG&W's complaint, and Alabama-Tennessee's and GM's filings, Docket No. RP75–50. It is the issues contained in the latter docket which are the subject of the proposed settlement. The proposed settlement does not, according to the Presiding Judge, affect the issues in the Con Ed and O&R proceedings (Certification of Proposed Settlement Agreement, October 3, 1975).

THE SETTLEMENT

The proposed settlement in this proceeding consists of: (a) Exhibits 25 and 26, both documents entitled, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) Docket No. RP75–50, Settlement End Use Data; and, (b) a nine page document entitled Settlement Agreement (September 18, 1975) with appendices A and B attached thereto:

The settlement agreement provides, *inter alia*:

a. That effective November 1, 1975, Tennessee shall use in the implementation of its presently effective curtailment plan the end use data reflected in Exhibit Nos. 25 and 26 (Settlement End Use Data) unless modified below.

b. That no motions, petitions, complaints, or other pleadings are to be filed with the Commission or the Courts directly or indirectly requesting a change in all or any part of the Settlement End Use Data, to be effective prior to November 1, 1980, except as hereinafter provided.

c. On or after November 1, 1976, pleadings may be filed with the Commission requesting revision of the Settlement End Use Data, solely in regard to the effect of applying "a different method of allocation of the storage injection volumes reflected in each customer's total system and use profile underlying the Settlement End Use Data with no other changes in such total system end use profile."

d. If upon review of the Initial Decision in Docket No. RP 74–24, the Commission revises the priority-of-service in Tennessee's presently effective curtailment plan, the Settlement End Use Data shall be revised upon a customer's request to the Commission solely to reflect the changes deemed appropriate by the Commission in its final decision. Any changes made by Tennessee pursuant to this section shall be made prospectively only and pursuant to Commission order.

e. That if the Commission modifies the Annual Volumetric Limitation (AVL) of any of Tennessee's customers, the end use data for such customer, as reflected in the Settlement End Use Data, may be changed prospectively by Tennessee or the Commission, upon the request of such customer or any party to this proceeding, solely to reflect the modification ordered by the Commission.

f. That the proposed settlement does not proscribe or prohibit the filing of petitions for extraordinary relief or requests for emergency relief under Article XXIV, Section 4 of Tennessee's curtailment plan; however, the proposed settlement states that no petition for extraordinary relief will lie which is based on or requires a change in the customers end use profile as shown in the Settlement End Use Data.

g. That Section 8 of the proposed settlement be construed as *ad hoc* petitions for relief from the provisions of Opinion No. 712. That those customers listed in Appendix A, attached to the Proposed Settlement, be allowed to group delivery points, and that the AVL of those customers listed in Appendix B be increased as reflected therein, starting with the annual period October 31, 1976.

h. That the Data Committee, which was established in this proceeding, will be, upon Commission approval of the proposed settlement dissolved. Tennessee will establish a Study Group "to evaluate various methods of allocating storage injection volumes to priorities-of-service categories in any customer's total system end use profile."

FILING OF COMMENTS

Any person, including the parties to this proceeding desiring to file comments either in support of or in opposition to the proposed settlement should file such comments on or before November 19, 1975. Replies to the initial comments may be filed and will be accepted on or before December 5, 1975.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 75-30571 Filed 11-12-75; 8:45 am]

[Docket No. ER76–54]

PUGET SOUND POWER AND LIGHT CO.

Filing of Exchange Agreement Concurrence

NOVEMBER 5, 1975.

Take notice that on October 28, 1975, Utah Power and Light Company (Utah) tendered for filing a Certificate of Concurrence to the Exchange Agreement tendered for filing by Puget Sound Power and Light Company (Puget Sound) in the above-referenced docket on August 4, 1976. The Exchange Agreement filed by Puget Sound provides for the exchange of capacity and energy between it and Utah, which Puget Sound states will be of equal quantity and value. Puget Sound's initial filing of this Agreement was deficient for lack of a concurrence by Utah. This filing purports to cure this deficiency. Puget Sound has requested waiver of the notice requirement and requests an effective date for service under the Agreement to be made retroactive to June 1, 1975, the date service commenced under the Agreement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 18, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30569 Filed 11-12-75; 8:45 a.m.]

[Docket No. ER76–87]

SIERRA PACIFIC POWER CO.

Proposed Changes in Rates and Charges

NOVEMBER 5, 1975.

Take notice that on October 29, 1975, Sierra Pacific Power Company (Sierra Pacific) tendered for filing a notice of change in rates and charges in its Rate Schedule FPC No. 11 and a notice of change in rates and charges in Rate Schedule R; Fuel Adjustment; Terms and Conditions; and associated changes in its FPC Electric Tariff, Volume No. 1. Based upon the test period of twelve months ending June 1976, Sierra Pacific estimates that the total effect of the changes in rates and charges would increase annual revenues from jurisdictional sales and services by approximately $716,132 or 14.7%.

Sierra Pacific requested a waiver of the thirty (30) day rule pursuant to § 35.11 of the Commission's Rules and Regulations under the Federal Power Act to cancel Supplement No. 2 to Rate Schedule FPC No. 11 to transfer Mt. Wheeler Power, Inc. (Mt. Wheeler) to the existing Rate Schedule R of its FPC Electric Tariff (Supplement No. 3) as the type of service rendered Mt. Wheeler was changed with completion of the Sierra Pacific-Utah Power and Light Company interconnection on August 8, 1975. Sierra Pacific estimates that this change would increase jurisdictional revenues during the test period by $595,172.

Sierra Pacific proposed that the effective date of the changes in rates and charges of its FPC Electric Tariff be September 21, 1975, and stated that these changes would effect an increase in test period jurisdictional revenues of $121,679.

In addition, Sierra Pacific requested permission to initiate deferred fuel and purchased power cost accounting on its books and records, and interest charges on delayed payment of service billings.

Copies of the filing were served upon Sierra Pacific's jurisdictional customers, the California Public Utilities Commission, and the Public Service Commission of Nevada.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (19 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 17, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-30570 Filed 11-12-75; 8:45 am]

FEDERAL RESERVE SYSTEM

DUBOIS BANKSHARES, INC.

Formation of Bank Holding Company

Dubois BankShares, Inc., Sauk Centre, Minnesota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 93 per cent of the voting shares of First State Bank of Sauk Centre, Sauk Centre, Minnesota. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Dubois BankShares, Inc. has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire 100 per cent interest in First State Agency, Sauk Centre, Minnesota. Notice of the application was published on October 23, 1975 in the Herald, a newspaper circulated in Sauk Centre, Minnesota.

Applicant states that, through First State Agency, it would engage in general insurance agency activities, including the sale of ordinary life, casualty, fire, liability, motor vehicle, surety, and farm property and liability insurance. Such activities will be conducted from the premises of First State Bank of Sauk Centre in a community having a population of less than 5,000 persons. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). In addition, Applicant states that upon consummation of the proposal, the credit life and credit accident and health insurance activity presently conducted by First State Agency will be transferred to First State Bank of Sauk Centre.

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than December 3, 1975.

Board of Governors of the Federal Reserve System, November 6, 1975.

[SEAL] ROBERT SMITH, III,
Assistant Secretary of the Board.

[FR Doc.75-30606 Filed 11-12-75; 8:45 am]

FIRST FREEPORT CORP.

Acquisition of Bank

First Freeport Corporation, Freeport, Texas, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of Chemical National Bank, Clute, Texas, a proposed new bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than December 3, 1975.

Board of Governors of the Federal Reserve System, November 6, 1975.

[SEAL] ROBERT SMITH, III,
Assistant Secretary of the Board.

INTERNATIONAL TRADE COMMISSION

[337-TA-21]

DRY WALL SCREWS

Notice of Investigation

A complaint was filed with the United States International Trade Commission on August 20, 1975, and a supplement and an amendment were filed with the Commission on October 10, 1975, on behalf of Superior Dry Wall Screw Mfg., Co., Inc., 8504 Ardmore-Ardwick Road, Landover, Maryland 20785, alleging that the unlicensed importation of certain dry wall screws into the United States, and their sale, are unfair methods of competition and unfair acts within the meaning of section 337 of the Tariff Act of 1930, as amended (88 Stat. 2053), by reason of the coverage of such dry wall screws by claims 1, 2, 3, 7, 13, 14, and 15 of U.S. Letters Patent 3,861,269. The complainant further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States. Complainant has requested that the imports in question be temporarily and permanently excluded from entry into the United States, and, that any cease and desist orders be issued by the Commission as it may, in its judgment, deem appropriate.

Having considered the above complaint, as supplemented and amended, the United States International Trade Commission, on November 6, 1975, ordered:

1. That pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended (88 Stat. 2053), an investigation be instituted to determine whether there is any violation of this section in the unlicensed importation of dry wall screws, allegedly covered by the claims of U.S. Letters Patent 3,861,269, into the United States, or in their sale, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated in the United States.

2. That for the purpose of the investigation so instituted:

(a) John Wagner Associates, Inc.
1176 Boulevard Way
Walnut Creek, California 94595

which is alleged to be importing and/or selling the subject product, is hereby named as the respondent upon which the complaint, as supplemented and amended, is to be served; and

(b) Steven D. Moskowitz, of the United States International Trade Commision, 701 E Street, N.W., Washington, D.C. 20436, is hereby named as the Commission investigative attorney.

3. That all interested persons will be afforded the opportunity to respond to the complaint in accordance with the following procedures:

(a) The respondent named herein shall serve a response to this notice and the complaint upon complainant and the Commisison investigative attorney no later than thirty (30) days after service of this notice and the complaint has been effected;

(b) any further submission or reply of complainant shall be served by him upon the respondent and the Commission investigative attorney no later than ten

V 40 N 220 NOV 13 75 XUM

(10) days after receipt of the response; and

(c) a signed original and nineteen (19) true copies of each response, further submission, or reply shall be filed with the Secretary, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436, within the respective time periods specified in subparagraphs (a) and (b) above.

4. That extensions of time for filing responses or submissions will not be granted unless a good and sufficient cause is shown therefor.

5. That failure of respondent to file a response to each of the allegations which are the subject of this investigation as set forth in this notice, taking into consideration the applicable detailed allegations in the complaint, within the time provided, may be deemed to constitute a waiver of its right to appear and contest such allegations and shall authorize the Commission, without further notice to that respondent, to find the facts to be as alleged and to enter an order containing such findings.

The complaint, as supplemented and amended, is available for inspection by interested persons at the Office of the Secretary, United States International Trade Commission Building, 701 E Street, N.W., Washington, D.C. 20436, and in the New York City office of the Commission, 6 World Trade Center, New York, New York 10048.

By Order of the Commission.

Issued: November 10, 1975.

KENNETH R. MASON,
Secretary.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 75-94]

DAH YU CHENG

Intent To Grant Exclusive Patent License

Notice is hereby given of intent to grant to Dah Yu Cheng, Palo Alto, California, a revocable, exclusive license to practice the invention described in U.S. Patent No. 3,883,095 for "Reversed Cowl Flap Inlet Thrust Augmentor", issued on May 13, 1975, to the Administrator of the National Aeronautics and Space Administration on behalf of the United States of America. The proposed exclusive license will be for a limited number of years and will contain appropriate terms and conditions to be negotiated in accordance with the NASA Patent Licensing Regulations, 14 CFR § 1245.2, as revised April 1, 1972. NASA will grant the exclusive license unless, on or before January 12, 1976, the Chairman, Inventions and Contributions Board, NASA, Washington, D.C. 20546, receives in writing any of the following, together with supporting documentation: (i) a statement from any person setting forth reasons why it would not be in the best interest of the United States to grant the proposed exclusive license; or (ii) an application for a nonexclusive license under such invention, in accordance with § 1245.206(b) in which applicant states that he has already brought or is likely to bring the invention to practical application within a reasonable period. The Board will review all written responses to the Notice and then recommend to the Administrator whether to grant the exclusive license.

Dated: November 6, 1975.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-317]

BALTIMORE GAS AND ELECTRIC CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 10 to Facility Operating License No. DPR-53, issued to Baltimore Gas and Electric Company (the licensee), which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant Unit 1 (the facility) located in Calvert County, Maryland. The amendment becomes effective 30 days after its date of issuance.

The amendment revises the reporting requirements of the Technical Specifications for the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated November 27, 1974, (2) Amendment No. 10 to License No. DPR-53, with Change No. 9, and (3) the Commission's related Safety Evaluation.

All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Calvert County Library, Prince Frederick, Maryland 20678. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 4th day of November, 1975.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief Operating Reactors Branch #2 Division of Reactor Licensing.

[FR Doc.75-30588 Filed 11-12-75;8:45 am]

[Docket No. 50-293]

BOSTON EDISON CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 13 to Facility Operating License No. DPR-35 issued to the Boston Edison Company (the licensee) which revised Technical Specifications for operation of the Pilgrim Nuclear Power Station (the facility) located in Plymouth County, Massachusetts. The amendment is effective 30 days after the date of its issuance.

The amendment revises the administrative controls section of the Pilgrim Nuclear Power Station Technical Specifications to provide uniform staffing qualifications, management procedures and reporting requirement.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated February 14, 1975, and the supplements thereto dated June 2, 1975 and July 29, 1975, (2) Amendment No. 13 to License No. DPR-35, with Change No. 15, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 4th day of November, 1975.

[Docket Nos. 50-254 and 50-265]

COMMONWEALTH EDISON COMPANY AND IOWA-ILLINOIS GAS AND ELECTRIC CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 20 and 16 to Facility Operating License Nos. DPR-29 and DPR-30 issued to the Commonwealth Edison Company (acting for itself and on behalf of the Iowa-Illinois Gas and Electric Company) which revised Technical Specifications for operation of the Quad Cities Units 1 and 2 located in Rock Island County, Illinois. These amendments are effective 30 days after the date of issuance.

These amendments revise the reporting requirements of the Technical Specifications for Quad Cities Units 1 and 2.

The application for these amendments dated December 18, 1974, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments is not required since these amendments do not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for these amendments dated December 18, 1974, (2) Amendment Nos. 20 and 16 to License Nos. DPR-29 and DPR-30, with Change No. 30 and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Moline Public Library, at 504—17th Street in Moline, Illinois 60265.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 4th day of November, 1975.

For the Nuclear Regulatory Commission.

[FR Doc.75-30590 Filed 11-12-75;8:45 am]

[Docket Nos. 50-10, 50-237 and 50-249]

COMMONWEALTH EDISON CO.

Issuance of Amendments to Facility Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 12, 12 and 10 to Facility Operating License Nos. DPR-2, DPR-19 and DPR-25 (respectively) to the Commonwealth Edison Company which revised Technical Specifications for operation of the Dresden Nuclear Power Station Units 1, 2 and 3 located in Grundy County, Illinois. These amendments are effective 30 days after their date of issuance.

These amendments revise the reporting requirements of the Technical Specifications for Dresden Units 1, 2 and 3.

The application for the amendments dated December 19, 1974, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments is not required since the amendments do not involve a significant hazards consideration.

For further details with respect to these actions, see (1) the application for amendments dated December 19, 1974, (2) Amendment Nos. 12, 12 and 10 to License Nos. DPR-2, DPR-19 and DPR-25, with Changes 31, 37 and 26 (respectively) and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and for Dresden Units 2 and 3 at the Morris Public Library at 604 Liberty Street in Morris, Illinois 60451.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 4th day of November, 1975.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch #2, Division of Reactor Licensing.

[Docket No. 50-336]

CONNECTICUT LIGHT AND POWER CO., ET AL.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has issued Amendment No. 6 to Facility Operating License No. DPR-65

V 40 N 220 NOV 13 75 XUM

issued to The Connecticut Light and Power Company, the Hartford Electric Light Company, Western Massachusetts Electric Company, and Northeast Nuclear Energy Company (licensees). This amendment is effective as of the date of issuance.

The amendment (1) revises the specifications governing access to the air lock and containment as necessary to effect repair of the inner air lock door gasket, and, (2) corrects certain proofreading errors.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazard consideration.

For further details with respect to this action, see (1) the application for amendment dated October 10, 1975, (2) Amendment No. 6 to License No. DPR–65, with any attachments, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Waterford Public Library, Rope Ferry Road, Waterford, Connecticut. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 7th day of November 1975.

For the Nuclear Regulatory Commission.

OLAN D. PARR,
Chief, Light Water Reactors Project Branch 1–3, Division of Reactor Licensing.

[Docket No. 50–298]

NEBRASKA PUBLIC POWER DISTRICT

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 13 to Facility Operating License No. DPR–46, issued to Nebraska Public Power District, which revised Technical Specifications for operation of the Cooper Nuclear Station located in Nehema County, Nebraska. The amendment becomes effective 30 days after the date of issuance.

This amendment revises the reporting requirements of the Technical Specifications for the Cooper Nuclear Station.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazard consideration.

For further details with respect to this action, see (1) the application for amendment dated December 2, 1974, (2) Amendment No. 13 to License No. DPR–46, with Change No. 16, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Auburn Public Library, 1118 15th Street, Auburn, Nebraska 68305.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 4th day of November, 1975.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch #2, Division of Reactor Licensing.

[Docket No. STN 50–484]

NORTHERN STATES POWER COMPANY OF MINNESOTA AND NORTHERN STATES POWER COMPANY OF WISCONSIN

Availability of Safety Evaluation Report for Tyrone Energy Park, Unit No. 1

Notice is hereby given that the Office of Nuclear Reactor Regulation has published its Safety Evaluation Report on the proposed construction of the Tyrone Energy Park, Unit No. 1 to be located in Dunn County, Wisconsin. Notice of receipt of the application filed by Northern States Power Company of Minnesota and Northern States Power Company of Wisconsin (hereafter referred to as Northern States Power Company) to construct and operate the Tyrone Energy Park, Unit No. 1 was published in the FEDERAL REGISTER on August 30, 1974 (39 FR 31693).

The Northern States Power Company, together with a group of four other utilities, consisting of the Union Electric Company, the Rochester Gas and Electric Corporation, the Kansas Gas and Electric Company and the Kansas City Power & Light Company (the SNUPPS utilities), under the acronym SNUPPS (Standardized Nuclear Unit Power Plant System) submitted a standard plant design for review under the Nuclear Regulatory Commission's standardization policy statement of March 5, 1973. The five SNUPPS utilities have filed four separate applications with the Commission for licenses to construct and operate four proposed standardized plants or SNUPPS plants (consisting of a total of five units) under the duplicate plant option of the Commission's policy. This policy allows, under one of the options, for a simultaneous review of the safety-related parameters of a limited number of duplicate plants which are to be constructed within a limited time span.

The report is being referred to the Advisory Committee on Reactor Safeguards and is being made available at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Stout Library, University of Wisconsin, Menomonie, Wisconsin for inspection and copying. The report (Document No. NUREG 75/102) can also be purchased, at current rates, from the National Technical Information Service, Springfield, Virginia 22151.

Separate safety evaluation reports have been issued by the Office of Nuclear Reactor Regulation for each application as follows: (1) Union Electric Company's Callaway Plant, dated August 7, 1975 (Document No. NUREG 75/076), available from the National Technical Information Service (NTIS) at $7.25 per paper copy and $2.25 for microfiche); (2) Kansas Gas and Electric Company and Kansas City Power & Light Company's Wolf Creek Nuclear Generating Station, Unit No. 1, dated September 3, 1975 (Document No. NUREG 75/080), available from NTIS at $7.00 per paper copy and $2.25 for microfiche); and (3) Rochester Gas and Electric Corporation's Sterling Power Project Nuclear Unit No. 1, dated September 5, 1975 (Document No. 75/082), available from NTIS at $7.00 per paper copy and 2.25 for microfiche.

Dated at Bethesda, Maryland this 7th day of November, 1975.

For the Nuclear Regulatory Commission.

D. B. VASSALLO,
Chief, Light Water Reactors Project Branch 1–1, Division of Reactor Licensing.

[FR Doc.75–30594 Filed 11–12–75;8:45 am]

[Docket No. 50–271]

VERMONT YANKEE NUCLEAR POWER CORP.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 17 to Facility Operating License No. DPR–28 issued to Vermont Yankee Nuclear Power Corporation which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station, located near Vernon, Vermont. The amendment becomes effective 30 days after the date of issuance.

This amendment revises the reporting requirements of the Technical Specifications for the Vermont Yankee Nuclear Power Station.

The application for the amendment dated December 16, 1974, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated December 16, 1974, (2) Amendment No. 17 to License No. DPR–28, with Change No. 28, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Brooks Memorial Library at 224 Main Street, Brattleboro, Vermont 05301.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 5th day of November 1975.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Reactor Licensing.

[FR Doc.75–30595 Filed 11–12–75;8:45 am]

[Docket No. P–560–A]

CENTRAL MAINE POWER CO.

Notice of Receipt of Partial Application for Construction Permit and Facility License: Time for Submission of Views on Antitrust Matters

Central Maine Power Company (the applicant), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, has filed one part of an application, which was docketed on August 20, 1975, in connection with their plans to construct and operate a reactor in Searsport, Maine. The portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

The remaining portions of the application consisting of an Environmental Report and a Preliminary Safety Analysis Report pursuant to § 2.101 of Part 2, are expected to be filed in April and June 1976, respectively. Upon receipt of the remaining portions of the application dealing with radiological health and safety and environmental matters, separate notices of receipt will be published by the Commission including an appropriate notice of hearing.

The applicant has solicited from other New England utilities non-binding indications of potential interest in the unit. As utilities indicate their interest, additional antitrust information will be submitted for them.

A copy of the partial application is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Local Public Document Room, Office of Town Manager, Union Hall, Reservoir Street, Searsport, Maine 04974. Docket No. P–560–A has been assigned to the application and should be referenced in any correspondence relating to it.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation, on or before December 30, 1975.

Dated at Bethesda, Md., this 23rd day of October 1975.

For the Nuclear Regulatory Commission.

KARL KNIEL,
Chief, Light Water Reactors Branch 2–2, Division of Reactor Licensing.

[FR Doc.75–29240 Filed 10–29–75;8:45 am]

NATIONAL TRANSPORTATION SAFETY BOARD

[N–AR 75–32]

SAFETY RECOMMENDATIONS AND RESPONSES

Notice of Availability and Receipt

The National Transportation Safety Board has issued recommendations A–75–80 through 83 to the Federal Aviation Administration. Investigation of three general aviation approach accidents (a Piper PA–28, at Delavan, Wisconsin, November 28, 1973; a Cessna 310G, at Manteo, North Carolina, January 16, 1974; and a Piper PA–28R–180, at Jeffersonville, Indiana, June 27, 1975) prompted the Safety Board on November 6 to recommend that the FAA seek statutory authority to require that each public-use airport runway have an approach surface which meets the specifications of 14 CFR 77. As an interim measure, the Board recommends that the FAA: Require the airport operator to issue a NOTAM concerning obstructions which violate the guidelines of 14 CFR 77; identify, in the Airman's Information Manual, any public-use airport runway which does not have the approach surface required by 14 CFR 77; and require that this Manual list trees as obstructions to the approach surface of a runway.

During the past week, the Safety Board has received letters from the Federal Aviation Administration, the Federal Highway Administration, and the U.S. Coast Guard responsive to the following recommendations:

(From the Federal Aviation Administration)

A–75–63 (40 FR 36628), letter dated October 22. FAA will issue an airworthiness directive within 60 days to require "an electrical test procedure which will verify the electrical integrity of the gear motor controller P/N MC–815–AS–1."

A–75–72 and 73 (40 FR 42247), letter of October 20. Regarding A–75–72, issuance of airworthiness directives, as recommended, is not considered justified by FAA, since FAA has found no evidence that the absence of engine-out warning was a factor in two helicopter accidents reference in the Board's recommendation letter of September 2, 1975. Concerning A–75–73, FAA comments, "We have been applying special conditions for the last four years on all new turbine-powered helicopters requiring visual and aural low rotor speed warning systems. This is considered more desirable than an engine-out warning because it will warn of low rotor speed for any reason, including engine failure, and continue to do so during power-off descent. This is required to actuate to enable the pilot to avoid dangerously low rotor speeds." FAA now requires engine-out warning only on multiengine helicopters in which the remaining engine automatically increases its output to maintain the rotor speed. FAA states that the low rotor speed specal condition has been included in the Biennial Airworthiness Review as an amendment to FAR Parts 27 and 29, and that a proposal to require engine failure warning will be submitted in the next Review.

A–75–79 (40 FR 48553), letter dated October 10. This recommendation pertains to a left-wing trailing edge inboard forelap separation on an American Airlines B–747 on September 8 during an approach to the San Juan International Airport, Puerto Rico. FAA states, "The Airworthiness Directive (AD) 75–20–05, originally published as a Notice of Proposed Rule Making, was signed on September 10 with an effective date of October 24. The AD requires that the forelap be inspected within the next 100 flights after the effective date of the AD. Since the compliance times were established prior to the September 8 American Airlines' incident, a full review was made; and it was concluded that the compliance times are acceptable and reasonable."

(From the Federal Highway Administration)

H–75–17 through 21 (40 FR 49615), letter of November 4. Concerning H–75–17, FHA notes that the Bureau of Motor Carrier Safety is now developing an information bulletin dealing with the proper method of adjusting brakes on vehicles equipped with air-mechanical brake systems. The bulletin is in preliminary draft stage, to be issued soon. Re H–75–18, FHA states that the critical need for roadway information related to the length and steepness of grades is obviously to serve the unfamiliar operator of heavy vehicles. The Bureau of Motor Carrier Safety will research driver information needs, and will review pertinent literature to determine whether research is needed or whether

V 40 N 220 NOV 13 75 XUM

existing technology simply needs to be implemented. With reference to H–75–19, FHA will survey selected States' practices for implementing the Manual on Uniform Traffic Control Devices signing requirements on long and/or steep grades, based on the drivers' needs identified under recommendation H–75–18 and on a human factors evaluation of typical driver information requirements. Re H–75–20, FHA states that if the results of the survey and evaluation conducted as above indicate that changes are needed in the Manual, the National Advisory Committee will be alerted for appropriate action. FHA states, concerning H–75–21, that a standardized design policy for escape routes for trucks will likely be discussed by the American Association of State Highway and Transportation Officials, Standing Committee on Engineering and Operations, when it meets this month.

H–75–23 and 24 (40 FR 51692 letter of October 29. Responsive to urgent recommendation H–75–23, FHA indicates that the Bureau of Motor Carrier Safety will look into the placement of warning devices for stopped vehicles, and will study the matter in conjunction with accident reports involving stopped and parked vehicles. FHA states, "If the data indicates a problem exists, consideration will then be given to the issuance of a Notice of Proposed Rulemaking to clarify the placement of emergency warning devices in relation to the travelled portion of the highway." With reference to H–75–24, FHA states, "The recommendation that future designs of the Motorist Aid Facilities comply with the requirement for 30 feet of clear roadside recovery area is not appropriate in the present instance. The only "facility" involved in the accident in question was a water drum, which was appropriately located 29 feet 8 inches from the edge of the roadway."

(From the U.S. Coast Guard)

71–M–17, letter of October 30. The Safety Board's recommendation—that the U.S. Coast Guard study the feasibility of developing a method of traffic separation for inbound and outbound traffic in the Golden Gate Channel—was made as a result of the investigation into the collision involving the SS ARIZONA STANDARD and the SS OREGON STANDARD at the entrance of San Francisco Bay on January 1, 1971. The Coast Guard notes that proposed regulations for mandatory participation in the Voluntary Traffic Separation Scheme in the San Francisco Bay area are now being reviewed by the Commandant's staff, and that publication is expected in the very near future.

M–74–11, letter of October 31. The recommendation that the Coast Guard seek authority to require adequate thermal and buoyant protection to provide for survival of seamen on all commercial vessels was issued after investigation into the foundering of the M/V MARYLAND in Albemarle Sound, North Carolina, on December 18, 1971 (USCG/NTSB–MAR–74–3). The Coast Guard has completed a study of thermal protective devices and has determined that none of the devices now available for use meets the minimum acceptable safety factor. Subsequent studies are being conducted to develop a more comfortable thermally protective garment for seamen working in cold weather environments, according to the Coast Guard.

M–75–1 through 4, letter of October 28. These recommendations were made after investigation into the grounding of the SS HILLYER BROWN at Cold Bay, Alaska, March 7, 1973. Responding to M–75–1, the Coast Guard cites recent rulemaking actions aimed to meet the need for improved navigational operation of all vessels, including tankships. Further response to this recommendation is anticipated prior to March 1, 1976. M–75–2 asked the Coast Guard to implement measures to improve the dissemination of safety information to the navigators of vessels, including continued broadcasting of the safety information until the hazard is eliminated. The Coast Guard states that it will issue, prior to next March, a Commandant Notice which will serve as guidance to District Commanders for dissemination of safety information to mariners. M–73–3 recommended adoption of the Coast Guard's proposed rulemaking to improve operating practices aboard all major vessels on navigable waters. The Coast Guard comments, "The Marine Traffic Requirements published in the Federal Register Volume 39, No. 126, 28 June 1974 as an advance Notice of Proposed Rulemaking are intended to fulfill the requirements of this recommendation." The material is now being evaluated, and appropriate regulations may be expected soon. Recommendation M–75–4 (40 FR 17202) has been complied with, according to the Coast Guard. The letter states, "A correction to the description of Kaslokan Point Light was published in CCGD17 Local Notice to Mariners (LMN) No. 13 dated 1 April 1975. The Defense Mapping Agency Hydrographic Center published this information in its Notice to Mariners (NTM) No. 18 dated 5 May 1975. Paste-on chartlets correcting National Ocean Survey Charts were issued with LMN No. 19 dated 13 May 1975 and NTM No. 21 dated 24 May 1975."

The recommendation letter is available to the general public; single copies may be obtained wtihout charge. A $4.00 user-service charge will be made for a copy of each recommendation response letter, in addition to a charge of 10¢ per page for reproduction. All requests must be in writing, identified by recommendation number and date of publication of this notice in the FEDERAL REGISTER. Address inquiries to: Publications Unit, National Transportation Safety Board, Washington, D.C. 20594.

(Sec. 307 of the Independent Safety Board Act of 1974 (Pub. L. 93–633, 88 Stat. 2172 (49 U.S.C. 1906)))

MARGARET L. FISHER,
Federal Register Liaison Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on November 6, 1975 (44 USC 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, (202–395–4529), or from the reviewer listed.

NEW FORMS

TENNESSEE VALLEY AUTHORITY

Forest Industry Survey—1975, TVA 5591, single-time timber processing plants, Lowry, R. L., 395–3772.

UNITED STATES INTERNATIONAL TRADE COMMISSION

Mushroom Canners' Questionnaire, single-time, canners, Evinger, S. K., 395–3710.
Mushroom Importers' Questionnaire, single-time, importers, Evinger, S. K., 395–3710.
Mushroom Growers' Questionnaire, single-time, growers, Evinger, S. K., 395–3710.
Shrimp Producer's Questionnaire, single-time, shrimp processing firms, Evinger, S. K., 395–3710.
Shrimp Producer's Questionnaire, single-time, firms which import shrimp, Evinger, S. K., 395–3710.
Shrimp Producer's Questionnaire, single-time, shrimp fishermen, Evinger, S. K., 395–3710.

ENVIRONMENTAL PROTECTION AGENCY

Interview Guide for Economic Impact Study of Hazardous Waste Regulations on Selected Industries, single-time, selected firms producing petroleum refining and inorganic chemical natural resources division, Lowry, R. L., 395–6827.

NATIONAL SCIENCE FOUNDATION

Study and Analysis of the Official Readership of Mosaic Magazine, single-time, recipients of Mosaic Magazine, Lowry, R. L., 395–3772.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service: Declaration to Accompany Technical Animal Fats Between Certified Technical Animal Fat Plants, MP 85, on occasion, livestock fat renders, Harry B. Sheftel.
Application for Voluntary Reimbursable Technical Animal Fat Certification for Export, MP 86, on occasion, livestock fat renderers, Harry B. Sheftel.
Economic Research Service, 1974/75 Cotton Marketing Costs, annually, cotton shippers, Lowry, R. L., 395–3772.
Animal and Plant Health Inspection Service, Certification of Technical Animal Fats for Export, 9CFR–351, other (See SF–83), livestock fat renders, Harry B. Sheftel.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Resources Administration, Demonstration Project Related to the Education and Utilization of Child Health Associates, HRABHM0919, other (See SF–83), Physicians, child health associates, RNS, health workers, Reese, B. F., 395–3211.
Social and Rehabilitation Service, Assessment of Early and Periodic Screening and Treatment Practices and Costs, single-time, selected local providers of EPSDT, Human Resources Division, Raynsford, R., 395–3532.
Health Resources Administration:
Interview and Self-Administered Questionnaire for Principal Investigators, (Protection of Human Subjects), OSPHS 1028, single-time, researchers doing biomedical and behavioral research, Human Resources Division, Raynsford, R., 395–3532.
Evaluation of Migrant Hospitalization Demonstration Program, HSAOPE 1023, single-time, DHEW and other participants in MHDP, Human Resources Division, Raynsford, R., 395–3532.
Food and Drug Administration:
SCOR Aerosol Questionnaire, FDABF 0924, single-time, individuals, Dick Eisinger, 395–6140.
Blood Establishment Resources Summary, FD 2831, annually, blood and blood product establishments, Harry B. Sheftel.
Center for Disease Control, Intestinal Parasite Diagnoses in State Health Department Laboratories, quarterly, State and territorial laboratories, Dick Eisinger, 395–6140.

DEPARTMENT OF THE INTERIOR

Bureau of Sport Fisheries and Wildlife, End-of-The-Year Banding Report, 3–540, annually, all holders of Federal bird marketing and salvage permits, Lowry, R. L., 395–3772.

REVISIONS

VETERANS ADMINISTRATION

Income Statement for Parent Claiming Dependency and Indemnity Compensation, 21–4179C, on occasion, veteran's parent, Caywood, D. P., 395–3443.

DEPARTMENT OF AGRICULTURE

Economic Research Service, Survey of Attitudes and Values Toward Predator Control, single-time, telephone households in U.S., Maria Gonzales, Lowry, R. L., 395–6132.

EXTENSIONS

FEDERAL RESERVE SYSTEM

Oil Company Report, F.R. 580, monthly, 20 retail oil companies, Marsha Traynham, 395–4529.

VETERANS ADMINISTRATION

Request for Confidential Credit Information, 26–250, on occasion, creditors, Caywood, D.P., 395–3443.

DEPARTMENT OF DEFENSE

Department of the Navy, College Rank in Class (Registrars of Colleges and Universities at Which Applicants for Candidate Programs Have Attended), NVPER 1100, on occasion, colleges, Lowry, R.L., 395–3772.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Institutes of Health, Breast Cancer and Reserpine Preliminary Case Control Study, OS–NIH–CA–23, single-time, breast cancer patients, matched controls and their physician, Dick Eisinger, 395–6140.

PHILLIP D. LARSEN,
Budget and Management Officer.

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on November 10, 1975 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202–395–4529), or from the reviewer listed.

NEW FORMS

TENNESSEE VALLEY AUTHORITY

U.S. RAILROAD RETIREMENT BOARD

ACTUARIAL ADVISORY COMMITTEE

Public Meeting Regarding Railroad Retirement Accounts

Notice is hereby given in accordance with Public Law 92–463 that the Actuarial Advisory Committee will hold a meeting on December 15, 1975, at the offices of the Chief Actuary of the U.S. Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois, on the conduct of the 13th Actuarial Valuation of the Railroad Retirement Account. The agenda for this meeting will include the results of the recently completed studies concerning rates of retirement and withdrawal, mortality for employees in active service, and the proportion of disability retirements eligible for a disability freeze, together with the recommendation of the Chief Actuary as to retirement, withdrawal, mortality and economic assumptions to be used for the 13th Valuation.

The meeting will be open to the public. Persons wishing to submit written statements or make oral presentations should address their communications or notices to the RRB Actuarial Advisory Committee, c/o Chief Actuary, U.S. Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611.

By Authority of the Board.

Dated: November 7, 1975.

R. F. BUTLER,
Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–11813; File No. SR–Amex–75–4]

AMERICAN STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on October 28, 1975 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT BY THE AMERICAN STOCK EXCHANGE, INC. OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

The American Stock Exchange, Inc. ("Amex") proposes to add new paragraph .01 to the Commentary to Rule 958 reading as follows:

Rule 958, Commentary:

.01 A Registered Trader electing to engage in Exchange options transactions is designated as a Specialist on the Exchange for all purposes under the Securities Exchange Act of 1934 and the rules and regulations thereunder with respect to options transactions initiated and effected by him on the floor in his capacity as a Registered Trader.

The present paragraphs in the Commentary to Rule 958 are renumbered accordingly.

STATEMENT BY AMEX OF BASIS AND PURPOSE

The purpose of the proposed new Commentary to Rule 958 is to permit Registered Traders to obtain the same treatment under Regulations T and U of the Federal Reserve Board presently afforded to specialists in financing their options positions. Specialists are granted an exemption from Regulations T and U in recognition of their obligations to make fair and orderly markets in their specialty securities. The rules of the Amex also impose such obligations on Registered Traders to assist in maintenance of fair and orderly markets. In view of the similarity of responsibilities, the Exchange believes that Registered Traders in options should be treated as specialists for margin purposes under Regulations T and U.

The proposed new Commentary to Rule 958 is authorized by Section 6(b)(5) of the Act. Although Section 6 of the Act as recently amended by the Securities Acts Amendments of 1975 does not become effective until December 1, 1975, the proposed rule change, if it becomes effective before the date, will be consistent with that section when such amendments to the Act become effective. The Amex believes that it is consistent with the protection of investors and the public interest to designate Registered Traders as specialists with respect to their options transactions on the Exchange. As a result of such designation, the Exchange believes that the Amex options market will become deeper and more liquid to the direct benefit of all investors.

Comments were received orally from the Exchange membership prior to the adoption of this proposed new Commentary by the Exchange. The consensus of the comments received was that such treatment of Registered Traders is important to the Amex options market because options, unlike equities securities, are multidimensional, with numerous series for each class, and the ability to hedge within an options class and/or in the underlying stock by Registered Traders adds to the liquidity of the market. In addition, the Options Committee of the Exchange, which is composed of members or representatives of member organizations expert in the field of option trading, favors this proposal.

The Exchange has determined that the proposed new Commentary to Rule 958 does not impose any burden on competition.

On or before December 18, 1975, or within such longer period (i), as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) by order approve such proposed rule change, or

(b) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 3, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

NOVEMBER 7, 1975.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75–30676 Filed 11–12–75;8:45 am]

[Rel. No. 9021; (801–9087)]

FIRST NATIONAL CITY BANK AND CITICORP INVESTMENT MANAGEMENT, INC.

Filing of Application for Exemption and Order of Temporary Exemption Pending Determination of the Application

NOVEMBER 7, 1975.

NOTICE IS HEREBY GIVEN THAT FIRST NATIONAL CITY BANK, 399 Park Avenue, New York, New York, 801–9087, ("FNCB") has filed an application pursuant to Section 9(c) of the Investment Company Act of 1940 ("the Act") for an order exempting FNCB and its affiliates from the provisions of Section 9(a) of the Act, and for an order of temporary exemption from Section 9(a) pending the Commission's determination of the application. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein which are summarized below.

FNCB states that it is a national banking association organized under the laws of the United States, and also acts as the investment adviser to Advance Investors Corporation ("ADVANCE"), a closed-end, diversified management company, and White Weld Money Market Fund Incorporation ("WWMM Fund"), an open-end, diversified management investment company for institutions. Their Notification of Registration Form N–8A file numbers at the Commission are 811–2293 and 811–2540, respectively. Citicorp Investment Management, Inc. ("Citicorp") a registered investment adviser (File No. 801–9087) is a subsidiary of First National City Corporation, which in turn is an affiliate of FNCB.

On November 11, 1971, the Commission commenced an action in the United States District Court for the Southern District of New York entitled *Securities and Exchange Commission* v. *Everest Management Corporation et al.*, (71 Civ. 4932; D.N.E.) (the "Everest action"). This action was brought against 44 defendants, including First National City Trust Company (Bahamas) Limited ("FNCT"), a subsidiary of FNCB, to enjoin alleged violations of Section 17(a) of the Securities Act of 1933 [15 U.S.C. 77q(a)], Section 10(b) of the Securities Exchange Act of 1934 [15 U.S.C. 78j(b)] and Rule 10b–5 promulgated thereunder and Section 206 (1) and (2) of the Investment Advisers Act of 1940 [15 U.S.C. 80b–6 (1) and (2)]. With respect to FNCT, the Complaint alleged that FNCT participated in the dissemination of false and misleading information in connection with the sales of shares of Armstrong Investors S.A., ("the fund") an "offshore" mutual fund, and false and misleading periodic reports to the shareholders of the fund and that it failed to supervise the activities of the fund's investment manager, Everest Management Corp. ("Everest") a New York based entity. On October 9, 1975 a Stipulation of Settlement was entered into between the plaintiff Commission and FNCT, and thereafter a final Judgment of Permanent Injunction by consent was entered in the action which permanently enjoined FNCT and its officers, agents, servants and employees from engaging in the violative activities alleged in the Everest action. FNCT has also represented to the Court that it has adopted certain policies and procedures with respect to the acceptance of business of "off-shore" mutual funds not registered with the Commission.

Since FNCB and Citicorp may be considered to be affiliates of FNCT within the meaning of Section 9(a) of the Act, any judgment entered against FNCT would cause FNCB and Citicorp to be ineligible to act as investment advisers. Section 9(a)(2) of the Act, as here pertinent, makes it unlawful for any person who, by reason of any misconduct, is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security to serve or act in the capacity of employee, officer, director, member of advisory board, investment adviser or depository of any registered investment company or principal underwriter for any registered open-end company, registered unit investment trust, or registered face amount certificate company. Section 9(a)(3) makes it unlawful for a company, any affiliated person of which is ineligible by reason of Section 9(a)(2), to serve or act in the enumerated capacities.

Section 9(c) provides that upon application, the Commission by order shall grant an exemption from the provisions of Section 9(a) either unconditionally or on an appropriate temporary or other conditional basis, if it is established that the prohibitions of Section 9(a), as applied to FNCB and Citicorp are unduly or disproportionately severe or that the conduct of such person has been such as not to make it against the public interest or protection of investors to grant such application.

FNCB submits pursuant to Section 9(c) that the prohibitions of Section 9(a) of the Act, to the extent applicable by virtue of the entry of the Consent Judgment of Permanent Injunction against FNCT, would be unduly and disproportionately severe as applied to FNCB, Citicorp and its affiliates and that the conduct of FNCT has been such as not to make it against the public interest or the protection of investors for the Commission to grant a permanent exemption from the provisions of Section 9(a) of the Act. In support thereof FNCB states:

(1) FNCT is a trust company organized under the laws of the Bahamas and located in Nassau. The Promoters of Everest requested FNCT to be the registrar, transfer agent and corporate domiciliary of the Fund. FNCT agreed to do so because it had prior satisfactory business relations with one of the Promoters and because reports on the other Promoters were favorable.

(2) As part of its function as corporate domiciliary, FNCT was requested by the Promoters to cause and subsequently did permit some of its officers and employees to act as officers and directors of both corporations constituting the Fund. It is and has been the long established practice in the Bahamas for trust companies and others to act as corporate domiciliary agent for other entities and to cause or permit their officers and employees to act as directors, officers and employees of such other entities for which they act as agents.

(3) With respect to the Fund, FNCT performed the services of a registrar, transfer agent and corporate domiciliary, and in connection therewith FNCT's contacts were primarily with the fund's foreign investors. It did not sell securities for the Fund's portfolio which were handled exclusively by the promoters and Everest.

(4) If, as it is alleged in the Commission's Complaint, the Promoters of Everest perpetrated a fraud upon the Fund, it was done without the knowledge of, assistance or participation by FNCT.

(5) Since discovery of the alleged wrongdoing in respect of the Fund and prior to the commencement of the Commission's injunctive action, FNCT has adopted rules expressly precluding in any circumstances services by its officers and employees as directors or officers of any "off-shore" fund unless the fund's investments are also managed by FNCT or an affiliate so that they are able to super-

V 40 N 220 NOV 13 1975 XUM

vise both the fund and its investments, and precluding acceptance of business of any kind with respect to an "off-shore" fund unless it follows certain policies and procedures adopted by FNCT.

(6) FNCB has never before been required to apply for an exemption from the provisions of Section 9(a) of the Act.

(7) The prohibition of Section 9(a) would deprive ADVANCE and WWMM and their approximately 13,000 shareholders of the services of their respective investment advisers.

The Commission has considered the matter and finds that:

(1) the prohibitions of Section 9(a) might be unduly or disproportionately severe as applied to FNCB and its affiliates in that the conduct of FNCT has been such as not to make it against the public interest or protection of investors to grant the application for a temporary exemption from Section 9(a) pending determination of the application, and

(2) in order to maintain the uninterrupted management of investment companies under the management of affiliates of FNCT, it is necessary and appropriate in the public interest and consistent with protection of investors and the purposes fairly intended by the policy and provisions of the Act that the temporary order be issued forthwith.

Accordingly, IT IS ORDERED, pursuant to Section 9(c) of the Act that FNCB and its affiliates be and they are hereby temporarily exempted from the provisions of Section 9(a) of the Act, operative as a result of the entry of the injunction against FNCT in *Securities and Exchange Commission* v. *Everest Management Corp.*, et al., pending determination by the Commission of FNCB's application for an order unconditionally exempting FNCB and any companies of which they presently are affiliated persons from the provisions of Section 9(a) operative as a result of the entry of such injunction.

NOTICE IS FURTHER GIVEN that any interested person may, not later than December 8, 1975, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon FNCB, care of Werner L. Polak, Esquire, 53 Wall Street, New York, New York 10005. Proof of such service (by affidavit or in the case of an attorney at law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided in Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the Application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further development in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75–30625 Filed 11–12–75;8:45 am]

[Release No. 34–11809; File No. SR–MSRB–75–2]

MUNICIPAL SECURITIES RULEMAKING BOARD

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on November 3, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Rule 5. *Initial Fee for Municipal Securities Brokers and Municipal Securities Dealers.*

Every municipal securities broker and municipal securities dealer presently or hereafter registered with the Commission shall, not later than (1) December 15, 1975 or (2) the date which is ten days from the date of registration of such municipal securities broker or municipal securities dealer with the Commission, whichever shall last occur, pay to the Board an initial fee of $100, accompanied by a written statement setting forth the name, address and Commission registration number of the municipal securities broker or municipal securities dealer on whose behalf such fee is paid. The Commission registration number shall also be set forth on the face of the remittance. Such fee shall be payable at the offices of the Board in Washington, D.C. In the event any person subject to this rule shall fail to pay the required fee, the Board may recommend to the Commission that the registration of such person with the Commission be suspended or revoked.

BOARD'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

1. *Purpose of Proposed Rule Change.* The purpose of the proposed rule change is to provide for an initial assessment against municipal securities brokers and municipal securities dealers to defray the costs and expenses of operating and administering the Board. The proposed rule change is intended to apply to all municipal securities brokers and municipal securities dealers, as defined in the Securities Exchange Act of 1934, as amended (the "Act"), including those engaged in additional lines of business not related to municipal securities. The funds to be provided by the proposed rule change will cover only a portion of the costs and expenses of the Board's operation and administration and the Board therefore intends to propose, at a future date, additional rules providing for periodic or other assessments.

2. *Basis Under the Act for Proposed Rule Change.* The Board has adopted the proposed rule change pursuant to section 15B(b)(2)(J) of the Act, which authorizes the Board to levy such reasonable fees and charges as may be necessary or appropriate to defray the costs and expenses of operating and administering the Board. The Board finds that the assessment provided for in the proposed rule change is both necessary and appropriate to defray the Board's expenses.

3. *Comments Received from Members, Participants or Others on Proposed Rule Change.* Comments have not been received on the proposed rule change.

4. *Burden on Competition.* The Board has determined that the proposed rule change does not impose any burden on competition.

On or before December 18, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submission should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 15, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 7, 1975.

[FR Doc.75–30580 Filed 11–12–75;8:45 am]

[Release No. 34–11807; File No. SR–NYSE–75–9]

NEW YORK STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is

hereby given that on November 3, 1975 the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement of the Terms and Substance of the Proposed Rule Change—

1. *Text of Proposed Amendment to Rule 345*

Employees—Registration, Approval, Records, Discipline

(a) No member or member organization shall

(3) employ any person not otherwise required to be registered with and approved by the Exchange, except a person whose functions are solely of a clerical or ministerial nature, prior to obtaining the approval of the Exchange if such member or member organization knows, or in the exercise of reasonable care should know, that such person is subject to one or more statutory disqualifications referred to in the Securities Exchange Act of 1934, as amended.

2. *Purpose of Proposed Amendment.* The recent amendments to the Securities Exchange Act of 1934 (1934 Act) require the Exchange, effective December 1, 1975, to enforce compliance with the 1934 Act and its own rules with respect to all employees of the member organization unless specifically relieved of such responsibility. Heretofore, the Exchange has approved and registered members, allied members, and registered representatives.

In addition to the broad general responsibility which the Exchange will have with respect to all employees of member organizations after December 1, 1975, the 1934 Act now specifically requires the Exchange to file notice with the Commission not less than thirty days prior to permitting any person to become associated with a member, if the Exchange knows, or in the exercise of reasonable care should know, that such person is subject to a statutory disqualification as defined in the 1934 Act. In effect, the Exchange may, if the SEC does not object, waive statutory disqualifications in individual instances.

The Exchange considered the possibility of requiring every employee of a member organization to register with the Exchange regardless of whether or not subject to a statutory disqualification. However, in view of the number of employees that would be involved, the Exchange found that the costs involved would make such a program financially prohibitive. Accordingly, the Exchange has developed the following alternative:

1. Continue the present requirement that all members, allied members, and registered representatives file an application for approval with the Exchange, but modify the current application to provide for information relating to statutory disqualifications;

2. Amend Exchange Rule 345 to require that members and member organizations, prior to employing any person not now required to be approved by the Exchange (other than persons functioning solely in a clerical or ministerial capacity), notify the Exchange and await its approval if the member or member organization knows, or has reason to believe the prospective employee may be subject to a statutory disqualification. Since members and member organizations currently check into the background of all new employees, the approach outlined above should present little, if any, additional burden to them, while enabling the Exchange to comply with its responsibilities under the Securities Acts Amendments at relatively little additonal expense.

The Exchange intends to incorporate spot check procedures in its existing examination program in order to determine whether members and member organizations are complying with their new responsibilities under Rule 345.

3. *Basis Under the Act for the Amendment to Rule 345.* The proposed amendment to Rule 345 is based on the recent amendments to Sections 6(b)(2) and 19(g)(1)(A) of the 1934 Act which require exchanges, effective December 1, 1975, to enforce compliance with the 1934 Act and their own rules with respect to persons associated with a member. Section 3(a)(21) of the 1934 Act defines this new category to include, among others, all employees of the member organization. Section 19(g)(1)(A) provides that absent "reasonable justification or excuse", exchanges are responsible for enforcing compliance by these persons with their own rules and the 1934 Act unless specifically relieved of such responsibility pursuant to Section 19(g)(2).

(i) The proposed rule amendment relates to the Exchange's capacity to carry out the purposes of the 1934 Act and to comply, and to enforce compliance by its members and persons associated with its members with the 1934 Act and the rules and regulations thereunder by (1) requiring member and member organizations to notify the Exchange and await its approval prior to employing persons (other than those who would function solely in a clerical or ministerial capacity) if they know, or in the exercise of reasonable care should know, that the prospective employee is subject to a statutory disqualification, and (2) establishing the basis under which the Exchange may disapprove an employee of a member organization who is subject to disqualification pursuant to the 1934 Act.

(ii) The proposed rule amendment relates to the ability of any prospective employee (not now required to be approved by the Exchange) to become associated with a member by enabling the Exchange to disapprove employment for cause as specified in the 1934 Act.

(iii) Inapplicable.
(iv) Inapplicable.
(v) Inapplicable.
(vi) Inapplicable.

4. *Comments Received.* No comments were solicited or received in connection with the subject Rule amendment.

5. *Burden on Competition.* Inapplicable.

On or before December 18, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above mentioned self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 "L" Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 15, 1975.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

OPTIONS CLEARING CORPORATION

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on October 28, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed amendment to Rule 913(a) would permit delivery advices issued by OCC to exercising and assigned Clearing Members to omit the name of the other party to the exercise in cases where settlement is to be made through a correspondent clearing corporation. In addition, the proposed amendment would eliminate the requirement that copies of delivery advices be issued to correspondent clearing corporations.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed amendment to Rule 913(a) is to permit delivery advices issued by OCC to exercising and assigned Clearing Members to omit the

V 40 N 220 NOV 13 75 XUM

name of the other party to the exercise in cases where settlement is to be made through a correspondent clearing corporation. In addition, the proposed amendment would eliminate the requirement that copies of delivery advices be issued to correspondent clearing corporations.

The proposed amendment to Rule 913 (a) would enhance OCC's capacity to facilitate prompt and accurate settlement in respect of exercised option contracts by eliminating unnecessary procedures.

The requirement that delivery advices identify both the exercising and the assigned Clearing Member is unnecessary where an exercise is to be settled through a correspondent clearing corporation because the interposition of the correspondent clearing corporation eliminates direct dealings between the exercising and the assigned Clearing Member. Each deals only with the correspondent, clearing corporation. If it were to become necessary for OCC to identify the assigned Clearing Member for a particular exercise, that information could be obtained from OCC's records.

The requirement that copies of delivery advices be issued to correspondent clearing corporations is superfluous because the information required by correspondent clearing corporations is now communicated by magnetic tape.

Comments were neither solicited nor received with respect to the proposed amend to Rule 913(a).

OCC does not believe that the proposed amendment to Rule 913(a) would impose any burden on competition.

On or before December 18, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 4, 1975.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 7, 1975.

TEXT OF PROPOSED RULE CHANGE

SETTLEMENT THROUGH CORRESPONDENT CLEARING CORPORATION

RULE 913. (a) Notwithstanding anything to the contrary in Rules 901 through 912, the Corporation may specify in any Delivery Advice issued pursuant to Rule 903 that settlement in respect of the exercised option contract or contracts designated therein shall be made through the facilities of a designated correspondent clearing corporation. In such event, the Corporation will communicate the names of the exercising and Assigned Clearing Members, the quantity and description of the underlying securities to be delivered, the exercise settlement date and the exercise settlement amount to such correspondent clearing corporation, which, as of the opening of business on the exercise settlement date (or, if the correspondent clearing corporation is not open for business on the exercise settlement date (or, if the correspondent clearing corporation is not open for business on that date, as of the opening of business on its next business day), shall credit the exercise settlement account of the Assigned Clearing Member with the amount of underlying securities specified in the Delivery Advice. If settlement is to be made through a correspondent clearing corporation, the Delivery Advice issued to the exercising Clearing Member need not specify the name of the Assigned Clearing Member, and the Delivery Advice issued to the Assigned Clearing Member need not specify the name or address of the exercising Clearing Member.

(b) [No change]
(c) [No change]
(d) [No change]

[Release No. 34-11811; File No. SR-OCC-1975-2]

OPTIONS CLEARING CORPORATION

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 28, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed amendment to Rule 803 would eliminate the requirement that assignments of exercise notices be made at or before a specific time on the business day following the filing of the exercise notice. In addition, the proposed amendment would eliminate the requirement that exercising Clearing Members be notified of the identity of assigned Clearing Members in cases in which such notice is not required under Rule 913(a), as proposed to be amended.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The primary purpose of the proposed amendment to Rule 803 is to eliminate the requirement that assignments of exercise notices be made at or before 7:00 A.M. Chicago Time (8:00 A.M. Eastern Time) on the business day following the filing of the exercise notice. OCC would expect, under ordinary circumstances, to be able to continue to meet that schedule, but the amount of data processing work required to be performed each night by OCC, and occasional data processing problems, may at times make it impossible for OCC to meet an absolute deadline. The Rule, as proposed to be amended, would continue to require, subject to the *force majeure* provisions of the By-Laws, that exercise notices be assigned on the following business day.

In addition the proposed amendment would eliminate the requirement that the exercising Clearing Member be notified of the identity of the Assigned Clearing Member in cases where such notice is not required under Rule 913(a), as proposed to be amended in OCC's Proposed Rule Change on Form 19b-4a, File No. SR-OCC-1975-1, which is being filed concurrently with this filing.

The proposed amendment to Rule 803 relates to OCC's capacity to facilitate prompt and accurate settlement in respect of exercised option contracts.

Comments were neither solicited nor received with respect to the proposed amendment to Rule 803.

OCC does not believe that the proposed amendment to Rule 803 would impose any burden on competition.

On or before December 18, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or
(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 4, 1975.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 7, 1975.

TEXT OF PROPOSED RULE CHANGE

ASSIGNMENT OF EXERCISE NOTICES TO CLEARING MEMBERS

RULE 803. Exercise notices accepted by the Corporation shall be assigned in accordance with the Corporation's procedures of random selection to Clearing Members with open short positions in the series of options involved, provided that the Corporation may:

(a) use its best efforts to assign an exercise notice of block size to a Clearing Member with an open short position of block size and to assign an exercise notice of less than block size to a Clearing Member with an open short position of less than block size;

(b) classify each short position into separate sub-groups based on the form of margin (i.e., escrow deposits, specific deposits or other); and

(c) assign a notice to a Clearing Member in respect of an opening writing transaction made by such Clearing Member on the day of such assignment.

As used herein an exercise notice in respect of 25 or more option contracts of the same series shall be deemed to be of block size and that portion of an open short position that resulted from one Exchange transaction in respect of 25 or more option contracts of the same series shall be deemed to be of block size.

Subject to the provisions of the By-Laws, exercise notices accepted by the Corporation shall be assigned on the following business day. Assignments shall be dated and effective as of such following business day. A Clearing Member to which an exercise notice is assigned shall be notified thereof, and the Clearing Member submitting such exercise notice shall (subject to the provisions of Rule 913) be notified of the identity of the Assigned Clearing Member, through deposit of Delivery Advices in their respective locked boxes as soon as practicable after such notice is assigned by the Corporation.

[FR Doc.75-30678 Filed 11-12-75;8:45 am]

[Release No. 34-11812; File No. SR-OCC-1975-3]

OPTIONS CLEARING CORPORATION

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on October 28, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed amendments to Article I, Section 1 and Article V, Section 1 and 2 of the By-Laws of OCC, and to Rules 1102, 1110 and 1202 would change OCC's procedures with respect to the admission, suspension and discipline of Clearing Members so as to conform them to requirements imposed by Sections 17A(b)(4) and (5) of the Securities Exchange Act of 1934, as amended. The proposed amendments to Article VII, Sections 1 and 5 of the By-Laws of OCC and to Rule 211 would eliminate references to former Rule 9b-1 under the Securities Exchange Act of 1934, as amended.

STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed amendments to Article I, Section 1 and Article V, Section 1 and 2 of the By-Laws of OCC, and to Rules 1102, 1110 and 1202 is to bring those provisions into compliance with Sections 17A(b) (4) and (5) of the Securities Exchange Act of 1934, as amended, relating to the admission, suspension and discipline of clearing agency participants. The purpose of the proposed amendments to Article VII, Sections 1 and 5 of the By-Laws and to Rule 211 is to eliminate references to Rule 9b-1 (which has been repealed) without changing the substance of those provisions.

The proposed amendments included in this filing are intended to enable OCC to comply with the provisions of the Securities Exchange Act of 1934, as amended, and rules and regulations which may be adopted thereunder.

Comments were neither solicited nor received with respect to the proposed amendments to Article I, Section 1; Article V, Section 1; Article V, Section 2; Article VII, Section 1; Article VII, Section 5 of the By-Laws; Rule 211; Rule 1102; Rule 1110 and Rule 1202.

OCC does not believe that the proposed amendments to Article I, Section 1; Article V, Section 1; Article V, Section 2; Article VII, Section 1; Article VII, Section 5 of the By-Laws, Rule 211; Rule 1102; Rule 1110; and Rule 1202 would impose any burden on competition.

On or before December 18, 1975, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule changes, or

(B) institute proceeding to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 4, 1975. For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 7, 1975.

TEXT OF PROPOSED RULE CHANGE

DEFINITIONS

SECTION 1. Unless the context requires otherwise, the terms defined herein shall, for all purposes of these By-Laws and the Rules of the Corporation, have the meanings herein specified.

(a) through (jjj) [No change]

STATUTORY RULES

(lll) The term "statutory rules" in respect of the Corporation means the Certificate of Incorporation, the By-Laws, the Rules, and such of the stated policies, practices and interpretations of the Corporation as are deemed to be rules and have become effective under the Securities Exchange Act of 1934, as amended, and the rules and regulations of the Securities and Exchange Commission thereunder.

APPROPRIATE REGULATORY AGENCY

(kkk) The term "appropriate regulatory agency" shall have the meaning given to it in Section 3(a) of the Securities Exchange Act of 1934, as amended.

STATUTORY DISQUALIFICATION

(mmm) The term "statutory disqualification" shall have the meaning given to it in Section 3(a) of the Securities Exchange Act of 1934, as amended.

ARTICLE V—CLEARING MEMBERS QUALIFICATIONS

SECTION 1. Only Exchange members shall be eligible to become Clearing Members. Each applicant to become a Clearing Member must (a) meet the initial Clearing Member capital requirements then in effect, (b) propose to engage upon acceptance in the clearance of option contracts for the applicant's firm account or for the accounts of customers, and (c) maintain facilities and personnel adequate for the expeditious and orderly transaction of business with the Corporation and other Clearing Members. Every applicant must meet such additional standards of financial responsibility, operational capability, experience and competence as may from time to time be prescribed in the statutory rules of the Corporation; provided, however, that no such standard shall be discriminatory as against the members of any Exchange. The Corporation may, and in cases in which the Securities and Exchange Commission, by order, directs as appropriate in the public interest, shall disapprove the application for clearing membership of any person subject to a statutory disqualification.

ARTICLE V—CLEARING MEMBERS ADMISSIONS PROCEDURES

SECTION 2. Applications for clearing membership shall be in such form and contain such information as the Board of Directors shall from time to time prescribe. The Membership Committee shall review applications for clearing membership and shall recommend approval or disapproval to the Board of Directors. The Membership Committee or the Board of Directors, or their designated delegates or agents, may examine the books and papers of any applicant, take such evidence as they may deem necessary or employ such other means as they may deem desirable or appropriate to ascertain relevant facts bearing upon the applicant's qualifications. If the Membership Committee proposes to recommend to the Board of Directors that an application for clearing membership be disapproved, it shall first furnish the applicant with a written statement of its proposed recommendation and the specific grounds therefor, and afford the applicant an opportunity to be heard and to present evidence on its own behalf. If the applicant fails to request a hearing within such reasonable time as the Membership Committee may prescribe; or if, after a hearing, the Membership Committee still proposes to recommend disapproval, the Membership Com-

V 40 N 220 NOV 13 75 XUM

mittee shall make its recommendation to the Board of Directors in writing, accompanied by a statement of the specific grounds therefor, and a copy thereof shall be furnished to the applicant on request. The Board of Directors shall independently review any recommendation by the Membership Committee, and may, in its discretion, if the applicant so requests, afford the applicant a further opportunity to be heard and to present evidence. If the Board of Directors disapproves the application, written notice of its decision, accompanied by a statement of the specific grounds therefor, shall be mailed or delivered to the applicant. An applicant shall have the right to present such evidence as it may deem relevant to its application. A verbatim record shall be kept of any hearing held pursuant hereto.

ARTICLE VII—EXCHANGES QUALIFICATIONS

SECTION 1. Any securities exchange registered under the Securities Exchange Act of 1934, as amended, which (i) has effective rules for the trading of option contracts in accordance with the provisions of said Act and the rules and regulations of the Securities and Exchange Commission thereunder, (ii) has purchased such number of shares of the Common Stock of the Corporation as shall be required pursuant to Section 2 of this Article VII, (iii) has executed a Stockholders Agreement as described in Section 3 of this Article VII, and (iv) has furnished the Corporation with such information as the Corporation may reasonably request concerning the operations, the management, the rules and the membership of such exchange and such other information as the Corporation may require to amend or make current any registration statement of the Corporation filed with the Securities and Exchange Commission or other regulatory authority, shall be qualified for participation in the Corporation as an "Exchange".

ARTICLE VII—EXCHANGES DISQUALIFICATION

SECTION 5. An Exchange shall cease to participate in the Corporation if it (i) shall no longer be a registered national securities exchange having effective rules for the trading of option contracts in accordance with the provisions of the Securities Exchange Act of 1934, as amended, and the rules and regulations of the Securities and Exchange Commission thereunder, (ii) shall terminate the trading of all option contracts; (iii) shall fail or refuse to file with the Corporation the agreement required by the last sentence of Section 3 of this Article VII; (iv) shall in violation, in any material respect, of any provision of the Stockholders Agreement required by Section 3 of this Article VII; or (v) the Participant Exchange Agreement required by Section 4 of this Article VII shall have been terminated as to such Exchange.

CHAPTER II—MISCELLANEOUS REQUIREMENTS

NOTICES OF PROPOSED BY-LAWS AND RULE AMENDMENTS

RULE 211. The Corporation shall give written notice to all Clearing Members when it shall have filed a proposed rules change with the Securities and Exchange Commission (the "SEC") pursuant to the provisions of SEC Rule 19b–4. Such notice shall be given as soon as practicable after the Corporation shall have filed the proposed rules change with the SEC. The requirements of this Rule 211 shall be deemed to have been satisfied if Clearing Members are notified that a proposed rules change has been filed and that copies thereof are available at all designated offices of the Corporation for inspection by interested Clearing Members. This Rule 211 shall not require the Corporation to give notice of any modication that is made in a proposed rules change after the Corporation has given notice of such proposed rules change, although to the maximum extent practicable, the Corporation shall also give notice of such modifications. The failure of the Corporation to comply with this Rule in any respect shall not affect the validity force or effect of any rules change or of any action taken by the Corporation pursuant thereto.

CHAPTER XI—SUSPENSION OF A CLEARING MEMBER SUSPENSION

RULE 1102. The Board of Directors or the President of the Corporation shall summarily suspend any Clearing Member which (a) has been and is expelled or suspended from membership in each Exchange of which it is an Exchange member or by its examining authority (as defined in Rule 306), or (b) is in such financial or operating difficulty that the Board of Directors or the President of the Corporation determines and so notifies the appropriate regulatory agency for such Clearing Member that such suspension is necessary for the protection of the Corporation, other Clearing Members, creditors, or investors. In addition, the Board of Directors or the President of the Corporation may summarily suspend any Clearing Member which (i) has been and is suspended or expelled from any self-regulatory organization (as defined in Section 3(a) of the Securities Exchange Act of 1934, as amended, for the purposes of Section 17A thereof), or (ii) is in default of any delivery of funds or securities to the Corporation or any correspondent clearing corporation. In the event that any Clearing Member is suspended, the Corporation shall cease to act for it except as hereinafter specified.

CHAPTER XI—SUSPENSION OF A CLEARING MEMBER RIGHT OF APPEAL

RULE 1110. A Clearing Member suspended pursuant to this Chapter shall be entitled, upon request, to a written statement of the grounds for its suspension and shall have the right to appeal its suspension in accordance with the following procedure:

(a) through (d) [No change]

(e) *Record.* A verbatim record shall be kept of any hearing held pursuant hereto. The cost of the transcript may, in the discretion of the body holding the hearing, be charged in whole or in part to the suspended Clearing Member in the event that the suspension is finally affirmed.

CHAPTER XII—DISCIPLINARY PROCEEDINGS PROCEDURES

RULE 1202. (a) The President of the Corporation shall have the power to fix and impose fines not in excess of $5,000. All other sanctions shall be imposed by the Board of Directors. Before any sanction is imposed by the President of the Board of Directors, the Corporation shall furnish the person against whom the sanction is sought to be imposed ("Respondent") with a concise written statement of the charges against the Respondent. The Respondent shall have fifteen days after the service of such statement to file a written answer thereto. The answer shall admit or deny each allegation contained in the statement of charges and may also contain any defense which the Respondent wishes to submit. Allegations contained in the statement of charges which are not denied in the answer shall be deemed to have been admitted. Any defense not raised in the answer shall be deemed to have been waived. After the answer has been filed, the President or the Board of Directors, as the case may be, shall (unless the Respondent and the Corporation shall have stipulated to the imposition of an agreed sanction), schedule an early hearing. The Respondent shall be given not less than three days advance notice of the place and time of such hearing. At the hearing, the Respondent shall be afforded the opportunity to be heard and to present evidence in his behalf and may be represented by counsel. A verbatim record of the hearing shall be prepared and the cost of the transcript may, in the discretion of the party holding the hearing be charged in whole or in part to the Respondent in the event any sanction is imposed on the Respondent. As soon as practicable after the conclusion of the hearing, the party holding the hearing shall furnish the Respondent with a written statement of its decision, which shall set forth (i) any act or practice in which the Respondent has been found to have engaged, or which the Respondent has been found to have omitted; (ii) the specific provisions of the statutory rules of the Corporation, or the Respondent's agreements with the Corporation, which any such act, practice or omission has been deemed to violate; and (iii) the sanction imposed and the reasons therefor.

(b) Any action required to be taken hereunder by the President may be delegated to any Vice President or Assistant Vice President of the Corporation. Any action required to be taken hereunder by the Board of Directors may be delegated to a Disciplinary Committee, which shall consist of not less than three directors. Clearing Members who are not directors may also be appointed as members of the Disciplinary Committee, provided that persons who are directors shall constitute a majority of the members of the Disciplinary Committee. In the event that a Vice President or an Assistant Vice President imposes a fine in excess of $2,500, such action shall be reviewed by the President upon written motion filed by any affected party within five business days after the fine is imposed. In the event that the Disciplinary Committee expels, suspends, or limits the activities, functions or operations of any Clearing Member, or imposes a fine in excess of $10,000, such action shall be reviewed by the Board of Directors upon written motion filed by any affected person within five business days after such action is taken. Such review shall be on the basis of the written record of the proceedings in which the sanction was imposed, but the reviewing authority may, in his or its discretion, afford the Respondent a further opportunity to be heard or to present evidence. A verbatim record shall be kept of any such further proceedings. The Respondent shall be notified in writing of the decision of the reviewing authority; and unless the decision shall have been to reverse the action under review, or to remand the matter for further proceedings by th party which took such action, the Respondent shall be given a written statement of the grounds therefor.

(c) Any time limit set forth in this Rule 1202 may be extended by the person or entity having jurisdiction over the matter in respect of which the time limit is imposed.

(d) Any action taken hereunder which is not subject to review shall be deemed to be final when the Respondent is furnished with the written statement provided for in the last sentence of parsgraph (a) hereof. Any action hereunder which is subject to review shall be deemed to be final upon expiration of the time provided for the filing of a motion for review, or any extension thereof granted pursuant to paragraph (c) hereof; or, if a motion for review is timely filed, when the Respondent is notified of the decision of the reviewing authority.

(e) The summary suspension of a Clearing Member pursuant to Chapter XI of the Rules shall not be deemed to be a "sanction" within the meaning of this Rule 1202, and the provisions of this Rule shall be inapplicable to any such summary suspension.

[File Nos. 3-4814, 2-5864 (22-444)]

CONSUMERS POWER COMPANY

Application and Opportunity for Hearing

NOVEMBER 7, 1975.

Notice is hereby given that Consumers Power Company ("the Company") has filed an application under clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 ("the Act") for a finding that the trusteeship of First National City Bank under an indenture heretofore qualified under the Act and one not to be so qualified, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify First National City Bank from acting as Trustee under the qualified indenture.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acqire any conflicting interest, it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such Section provides, in effect, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon that trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under the qualified indenture.

The company alleges that:

(1) First National City Bank is presently acting as trustee under an Indenture of Mortgage dated August 30, 1945 between First National City Bank as trustee and the company as amended by thirty supplemental indentures, pursuant to which $1,311,041,000 principal amount of its First Mortgage Bonds are issued and outstanding, as of September 30, 1975. It is presently contemplated that First National City Bank will also act as trustee under an indenture to be dated as of December 1, 1975 between it and the Charter Township of Hampton, a municipal body corporate and political subdivision of the State of Michigan, whereby the municipality will issue and sell approximately $20,000,000 of its Pollution Control Revenue Bonds (Consumers Power Company Project), Series B. This indenture will not be qualified pursuant to the terms of the Act.

(2) The municipality's revenue bonds are being issued to finance the cost of certain pollution control facilities to be sold to the company for its Karn-Weadock plants. The revenue bonds will be payable solely from the revenues derived from the sale of the project to the company. Payment will be made in installments over the life of the revenue bonds secured by pledge of the company's mortgage bonds to be issued under the thirty-first supplemental indenture to the August 30, 1945 indenture. This supplemental indenture will not be qualified under the Act.

(3) The company's mortgage bonds will be issued in an aggregate principal amount equal to, bear interest at rates corresponding to, and have the same maturities as the municipality's revenue bonds. The new mortgage bonds will rank pari passu with all mortgage bonds issued and outstanding under the August 30, 1945 indenture and all its supplements.

(4) The municipality will assign to First National City Bank all of its rights and interest in and to the mortgage bonds and to receive installment payments from from the company. The trustee may not transfer the mortgage bonds except to a successor trustee under the indenture. There is no lien on or other interest in the project and the obligation to make payments in respect to the revenue bonds will be secured by no collateral other than the mortgage bonds.

(5) The qualified indenture contains the provisions permitted by Section 310(b)(1) of the Act. Since neither the revenue bond indenture nor the supplemental mortgage bond indenture will be qualified under the Act, certain provisions required by that Act for qualified indentures will not be included.

(6) It is believed that since the revenue bonds are payable solely from revenue secured by the new mortgage bonds, the indenture between the municipality and First National City Bank is comparable to a "collateral trust indenture" with respect to which an exception to the provisions of Section 310(b) of the Act is provided by clauses (1)(A) and (1)(B) thereof. In the event that the company fails to make installment payments, the the new mortgage bonds are the only collateral.

The obligations of the company under the mortgage indenture are secured by a lien on substantially all the company's fixed property and franchises, subject only to excepted encumbrances permitted by the indenture.

The company has waived notice of hearing, hearing, and any and all rights to specify procedures under the Rules of Practice of the Securities and Exchange Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the Office of the Commission's Public Reference Section, at 1100 L Street, N.W., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than December 1, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. Any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75–30674 Filed 11–12–75;8:45 am]

[File Nos. 3-4815, 2-5864 (22-444)]

CONSUMERS POWER COMPANY

Application and Opportunity for Hearing

NOVEMBER 7, 1975.

Notice is hereby given that the Consumers Power Company ("the Company") has filed an application under clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 ("the Act") for a finding that the trusteeship of First National City Bank under an indenture heretofore qualified under the Act and one not to be so qualified, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify First National City Bank from acting as trustee under the qualified indenture.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest, it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such Section provides, in effect, with certain exceptions that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under such qualified indenture and such other indentre is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under the qualified indenture.

V 40 N 220 NOV 13 75
XUM

The Company alleges that:

(1) First National City Bank is presently acting as trustee under an Indenture of Mortgage dated August 30, 1945 between First National City Bank as trustee and the Company, as amended by thirty supplemental indentures, pursuant to which $1,311,041,000 principal amount of its First Mortgage Bonds are issued and outstanding, as of September 30, 1975. It is presently contemplated that First National City Bank will also act as trustee under an indenture to be dated as of December 1, 1975 between it and the Township of Port Sheldon, a municipal body corporate and political subdivision of the State of Michigan, whereby the municipality will issue and sell approximately $11,000,000 of its Pollution Control Revenue Bonds (Consumers Power Company Project), Series A. This indenture will not be qualified pursuant to the terms of the Act.

(2) The municipality's revenue bonds are being issued to finance the cost of certain pollution control facilities to be sold to the Company for its J. H. Campbell plant. The revenue bonds will be payable solely from the revenues derived from the sale of the project to the Company. Payment will be made in installments over the life of the revenue bonds secured by pledge of the Company's mortgage bonds to be issued under the thirty-second supplemental indenture to the August 30, 1945 indenture. This supplemental indenture will not be qualified under the Act.

(3) The Company's mortgage bonds will be issued in an aggregate principal amount equal to, bear interest at rates corresponding to, and have the same maturities as the municipality's revenue bonds. The new mortgage bonds will rank pari passu with all mortgage bonds issued and outstanding under the August 30, 1945 indenture and all thirty-two supplements.

(4) The municipality will assign to First National City Bank all of its rights and interest in and to the mortgage bonds and to receive installment payments from the Company. The trustee may not transfer the mortgage bonds except to a successor trustee under the indenture. There is no lien on or other interest in the project and the obligation to make payments in respect to the revenue bonds will be secured by no collateral other than the mortgage bonds.

(5) The qualified indenture contains the provisions permitted by Section 310 (b) (1) of the Act. Since neither the revenue bond indenture nor the supplemental mortgage bond indenture will be qualified under the Act, certain provisions required by that Act for qualified indentures will not be included.

(6) It is believed that since the revenue bonds are payable solely from revenues secured by the new mortgage bonds, the indenture between the municipality and First National City Bank is comparable to a "collateral trust indenture" with respect to which an exception to the provisions of Section 310(b) of the Act is provided by clauses (1)(A) and (1)(B) thereof. In the event that the Company fails to make installment payments, the new mortgage bonds are the only collateral.

The obligations of the Company under the mortgage indenture are secured by a lien on substantially all the Company's fixed property and franchises, subject only to excepted encumbrances permitted by the indenture.

The Company has waived notice of hearing, and any and all rights to specify procedures under the Rules of Practice of the Securities and Exchange Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the Office of the Commission's Public Reference Section at 1100 L Street, N.W., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than December 1, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request, should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS, *Secretary.*

DEPARTMENT OF LABOR

Office of the Secretary

ADVISORY COMMITTEE ON WOMEN TO THE SECRETARY

Re-establishment of Committee

Notice is hereby given of the re-establishment of the Advisory Committee on Women to the Secretary of Labor pursuant to a request by the Secretary of Labor with the approval of the Office of Management and Budget as required by section 9(a)(2) of the "Federal Advisory Committee Act."

The purpose of this Committee is to advise the Secretary of Labor on improving the status of working women in connection with the laws and programs administered by the Department of Labor, including those employed by the Department of Labor. The Committee will focus on those matters in which the Department of Labor is involved due to its official responsibilities. The Committee will report to the Chairperson of the Committee, the Secretary of Labor.

Signed at Washington, D.C., this 7th day of November 1975.

JOHN T. DUNLOP, *Secretary of Labor.*

FOURTH SECTION APPLICATION FOR RELIEF

NOVEMBER 10, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43073—*Brick or Tile Raw Materials Between Points in Southern Territory.* Filed by M. B. Hart, Jr., Agent, (No. A6342), for interested rail carriers. Rates on brick or tile raw materials, in carloads, as described in the application, between points in southern territory, including Ohio and Mississippi River crossings, Virginia cities and Washington, D.C.

Grounds for relief—Short-line distance formula and grouping.

Tariff—Supplement 28 to Southern Freight Association, Agent, tariff 763-F, I.C.C. No. S-1241. Rates are published to become effective on December 18, 1975.

By the Commission.

[SEAL] ROBERT L. OSWALD.

[Notice No. 128]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

NOVEMBER 7, 1975.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 C.F.R. § 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 23441 (Sub-No. 20 TA), filed October 31, 1975. Applicant: LAY TRUCKING COMPANY, INC., 1312 Lake St., LaPorte, Ind. 46350. Applicant's representative: Alki E. Scopelitis, 815 Merchants Bank Bldg., Indianapolis, Ind. 46204. MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

[Notice No. 127]

NOVEMBER 6, 1975.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 C.F.R. § 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 9325 (Sub-No. 71 TA), filed October 29, 1975. Applicant: K LINES, INC., P.O. Box 1348, Lake Oswego, Oreg. 97034. Applicant's representative: Eugene A. Feise (same address as applicant). Applicant's representative: Eldon M. Johnson, 650 California St., Suite 2808, San Francisco, Calif. 94108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Shingles, shakes, and ridge*, from points in Washington, to points in Arizona, California, and New Mexico, for 180 days. Supporting shippers: There are approximately 10 statements of support attached to the application, which may be examined at the Interstate Commerce Commission, in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Claud W. Reeves, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 450 Golden Gate Ave., Box 35004, San Francisco, Calif. 94102.

No. MC 141427 (Sub-No. 1TA), filed, October 29, 1975. Applicant: ROBERT L. HUDSON, JR., 4 North 6th St., Richmond, Ind. 47474. Applicant's representative: Robert W. Loser II, 1009 Chamber of Commerce Bldg., Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motion picture film and theatre supplies* between Indianapolis, Ind., on the one hand, and, on the other, points in Indiana (except Marion County, Ind., and Cumberland, Clairmont, and Greenwood, Ind.), and Jefferson County, Ky., for 180 days. Supporting shipper: Allied Theatre Owners of Indiana, Inc., d/b/a Theatre Owners of Indiana, 646 Illinois Bldg., Indianapolis, Ind. 46204. Send protests to: Frances Sterling, Interstate Commerce Commission, Federal Bldg. & U.S. Courthouse, 46 East Ohio St., Room 429, Indianapolis, Ind. 46204.

PASSENGER APPLICATION

No. MC 141321 (Sub-No. 1 TA), filed October 30, 1975. Applicant: J. MEREDITH BUS CO., 109 Brick Road, Cherry Hill, N.J. 08003. Applicant's representative: Raymond A. Thistle, Jr., Suite 1012, Four Penn Center Plaza, Philadelphia, Pa. 19103. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Passenger and their baggage*, between Haddonview Apartments, Haddon Township, N.J., on the one hand, and, on the other, Philadelphia, Pa., under a continuing contract or contracts with Haddonview Associates, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Haddonview Associates, 12 South Orange Ave., South Orange, N.J. 07079. Send protests to: Dieter H. Harper, District Supervisor, Interstate Commerce Commission, 428 East State St., Room 204, Trenton, N.J. 08608.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[NOTICE NO. 90]

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

NOVEMBER 7, 1975.

The following applications are governed by Special Rule 1100.247[1] of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) as amended, 49 FR 37215) published in the FEDERAL REGISTER issue of August 26, 1975, effective September 15, 1975, further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the FEDERAL REGISTER issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the Federal Register of a notice that the proceeding has been assigned for oral hearing.*

Evidence respecting how equipment is expected to be returned to an origin point, as well as other data relating to operational feasibility (including the need for dead-head operations), must be presented as part of an applicant's initial evidentiary presentation (either at oral hearing or in its opening verified statement under the modified procedure) with respect to all applications filed on or after December 1. 1973.

If an applicant states in its initial evidentiary presentation that empty or partially empty vehicle movements will result upon a grant of its application, applicant will be expected (1) to specify the extent of such empty operations, by mileages and the number of vehicles, that would be incurred, and (2) to designate where such empty vehicle operations will be conducted.

Each applicant (except as otherwise specifically noted) states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 2401 (Sub-No. 56), filed October 6, 1975. Applicant: MOTOR FREIGHT CORPORATION, 114 Fifth Avenue, New York, N.Y. 10011. Applicant's representative: G. G. Heller (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, dangerous explosives, commodities in bulk, and commodities requiring special equipment), serving the plantsite of Koller Craft Products, Inc. located at Fenton, Mo., as an off-route point in connection with applicant's regular route authority.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either St. Louis, Mo. or Washington, D.C.

No. MC 18535 (Sub-No. 65), filed October 14, 1975. Applicant: HICKLIN MOTOR LINE, INC., U.S. Highway 601, P.O. Box 377, Railroad Ave., St. Matthews, S.C. 19135. Applicant's representative: Lawrence M. Gressette, Jr., P.O. Box 346, 203 Railroad Ave. NW., St. Matthews, S.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry fertilizer and fertilizer materials*, in bulk, in dump vehicles, between Chatham County, Ga., and points in South Carolina.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Columbia, S.C.

No. MC 28599 (Sub-No. 8), filed October 10, 1975. Applicant: DEVINE & SON TRUCKING CO., P.O. Box 217, 2700 Rice Ave., West Sacramento, Calif. 95691. Applicant's representative: James J. Devine (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: (A) *General commodities* (except those of unusual value; household goods as defined by the Commission; Classes A and B explosives; commodities in bulk; motor vehicles; livestock and commodities requiring special equipment, excepting that carrier is authorized to transport those commodities in bulk in specialized equipment when such equipment is open-top "possum-bellied" vans of high cubic foot capacity with special structural construction capable of withstanding overhead loading and tilting to 55–60 degree angle by means of power equipment to accomplish end-unloading and commodities in bulk in collapsible rubber bulk commodity shipping containers), Between points in California, serving all intermediate points: (1) From San Francisco over Interstate Highway 80 to California-Nevada State line; (2) From Oakland over California Highway 24 to Walnut Creek; (3) From San Francisco over U.S. Highway 50 to California-Nevada State line; (4) From San Andreas over California Highway 12 to junction with California Highway 1 near Valley Ford; (5) From Stockton over California Highway 26 to Valley Springs; (6) From junction of California Highway 104 and U.S. Highway 50 at a point approximately 3 miles north of Galt over California Highway 104 to junction with California Highway 88 near Ione; (7) From Sacramento over California Highway 70 to Hallelujah Junction.

(8) From junction of California Highway 88 and U.S. Highway 50 at a point approximately 1 mile north of Stockton over California Highway 88 to California-Nevada State line; (9) From junction of California Highway 16 and California Highway 20 at a point approximately 18 miles west of Williams over California Highway 16 to junction with California Highway 49 near Drytown; (10) From junction of California Highway 1 and California Highway 12 at a point north of Valley Ford over California Highway 1 to Carmel; (11) From Monterey over California Highway 68 to Salinas; (12) From Santa Rosa over U.S. Highway 101 to Salinas; (13) From Vallejo over California State Highway 29 to Calistoga; (14) From junction of

Interstate Highway 680 and Interstate Highway 80 at a point east of Vallejo over Interstate Highway 680 to San Jose; (15) From Benicia over California Highway 21 to Cordelia; (16) From junction of California Highway 4 and Interstate Highway 80 at a point north of Pinole over California Highway 4 to junction with California Highway 89 at a point 5 miles south of Markleeville; (17) From junction of California Highway 89 with California Highway 4 at a point 5 miles south of Makleeville over California Highway 89 to Woodfords; (18) From junction of California Highway 36 and California Highway 3 at a point 4 miles southwest of Peanut over California Highway 36 to Johnstonville; (19) From junction of California Highway 32 and California Highway 36 at a point approximately 13 miles southwest of Chester over California Highway 32 to Orland; (20) From Hallelujah Junction over U.S. Highway 395 to California-Oregon State line; (21) From junction of California Highway 89 and California Highway 88 at a point approximately 6 miles west of Woodfords over California Highway 89 to junction with Interstate Highway 5 near Mt. Shasta.

(22) From Tahoe City over State Highway 28 to California-Nevada State line; (23) From Turlock over California Highway 99 to Red Bluff; (24) From Roseville over California Highway 65 to Olivehurst; (25) From junction of Interstate Highway 5 and Interstate Highway 580 over Interstate Highway 5 to California-Oregon State line; (26) From Hamilton City over California Highway 45 to Knights Landing; (27) From Willows over California Highway 261 to Elk Creek; (28) From Willows over California Highway 162 to Oroville; (29) From junction of California Highway 20 and Interstate Highway 80 near Emigrant Gap over California Highway 20 to Upper Lake; (30) From Upper Lake over California Highway 29 to Lower Lake; (31) From junction of California Highway 53 and California Highway 20 over California Highway 53 to Lower Lake; (32) From Coulterville over California Highway 49 to Sattley; (33) From Big Bar over California Highway 299 to Alturad; (34) From Weed over U.S. Highway 97 to California-Oregon State line; (35) From Redding over California Highway 44 to Manzanita Lake; (36) From Canby over California Highway 139 to California-Oregon State line; (37) From San Rafael over California Highway 17 to Santa Cruz; (38) From Los Gatos over California Highway 9 to Santa Cruz; (39) From San Francisco over California Highway 35 to Holy City; (40) From San Francisco over Interstate Highway 280 to San Jose; (41) From San Francisco over California Highway 82 to San Jose; (42) From Watsonville over California Highway 152 to junction with California Highway 156 approximately 8 miles north of Hollister; (43) From Half Moon Bay over California Highway 92 to Hayward; (44) From junction of California Highway 132 and Interstate Highway 580 over California Highway 132 to Coulterville; (45) From junction of Interstate Highway 580 and Interstate Highway 5 over Interstate Highway 580 to Oakland; (46) From junction of California Highway 120 and U.S. Highway 50 over California Highway 120 to junction with California Highway 49 near Jamestown; (47) From Rutherford over California Highway 128 to Davis.

(48) From junction of California Highway 121 and California Highway 128 approximately 20 miles east of Rutherford over California Highway 121 to Sears Point; (49) From junction of California Highway 37 and Interstate Highway 80 northeast of Vallejo over California Highway 37 to junction with U.S. Highway 101 north of Ignacio; (50) From junction of Interstate Highway 505 and Interstate Highway 5 near Dunnigan over Interstate Highway 505 to junction with Interstate Highway 80 near Vacaville; (51) From junction of California Highway 156 and California Highway 152 approximately 8 miles north of Hollister over California Highway 156 to Castroville; (52) From junction of California Highway 113 and California Highway 99 approximately 10 miles south of Yuba City over California Highway 113 to Davis; (53) From junction of California Highway 161 and U.S. Highway 97 near California-Oregon State line over California Highway 161 to junction with California Highway 139 approximately 4 miles north of Tulelake; (54) From San Gregorio over California Highway 84 to junction with U.S. Highway 50 near Livermore; (55) From Sonora over California Highway 108 to Confidence; (B) Service is authorized at all off-route points in the counties of Alameda, Alpine, Almador, Butte, Calaveras, Colusa, Contra Costa, El Dorado, Glenn, Lake, Lassen, Marin, Modoc, Napa, Nevada, Placer, Plumas, Sacramento, San Francisco, San Joaquin, San Mateo, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Stanislaus, Sutter, Tehama, Trinity, Yolo and Yuba; (C) Alternate Routes for operating convenience only, between points in California and Nevada, serving no intermediate points except as otherwise authorized, as follows: (1) From Hallelujah junction, California over U.S. Highway 395 to Reno, Nevada; (2) From Reno, Nevada over Interstate Highway 80 to California-Nevada State line; (D) Exceptions: No Local service shall be rendered between points and places in San Francisco-East Bay cartage zone as described in Paragraph E, on the one hand, and points and places in Marin, Sonoma and Napa Counties north of San Rafael, on the other hand; (E) Description of San Francisco-East Bay cartage zone, viz: San Francisco-East Bay cartage zone includes that area embraced by the following boundary: Beginning at the point where the San Francisco-San Mateo County Boundary line meets the Pacific Ocean; thence easterly along said boundary line to Lake Merced Boulevard.

Thence southerly along said Lake Merced Boulevard and Lynnewood Drive to South Mayfair Avenue; thence westerly along said South Mayfair Avenue to Crestwood Drive; thence southerly along Crestwood Drive to Southgate Avenue; thence westerly along Southgate Avenue to Maddux Drive; thence southerly and easterly along Maddux Drive to a point one mile west of Highway U.S. 101; thence south-easterly along an imaginary line of one mile west of and paralleling Highway U.S. 101 (El Camino Real) to its intersection with the southerly boundary line of the City of San Mateo; thence northeasterly, northwesterly, northerly and easterly along said southerly boundary to Bayshore Highway (U.S. 101 By-Pass); thence leaving said boundary line and continuing easterly along the projection of last said course to its intersection with Belmont (or Angelo) Creek; thence northeasterly along Belmont (or Angelo) Creek to Seal Creek; thence westerly and northerly to a point one mile south of Toll Bridge Road; thence easterly along an imaginary line one mile southerly and paralleling Toll Bridge Road and San Mateo Bridge and Mt. Eden Road to its intersection with State Sign Route 17; thence continuing easterly and northeasterly along an imaginary line one mile south and southeasterly of an paralleling Mt. Eden Road and Jackson Road to its intersection with an imaginary line one mile easterly of and paralleling State sign Route 9; thence northerly along said imaginary line one mile easterly of and paralleling State Sign Route 9 to its intersection with "B" Street, Hayward; thence easterly and northerly along "B" Street to Center Street; thence northerly along Center Street to Castro Valley Boulevard; thence westerly along Castro Valley Boulevard to Redwood Road.

Thence northerly along Redwood Road to William Street; thence westerly along William Street and 168th Avenue to Foothill Boulevard; northwesterly along Foothill Boulevard to the southerly boundary line of the city of Oakland; thence easterly and northerly along the Oakland boundary line to its intersection with the Alameda-Contra Costa County boundary line; thence northwesterly along last said line to its intersection with Arlington Avenue (Berkely); thence northwesterly along Arlington Avenue to a point one mile northeasterly of San Pablo Avenue (Highway U.S. 40); thence northwesterly along an imaginary line one mile easterly of and paralleling San Pablo Avenue (Highway 40) to its intersection with County Road No. 20 (Contra Costa County); thence westerly along County Road No. 20 to Broadway Avenue (also known as Balboa Road); thence northerly along Broadway Avenue (also known as Balboa Road) to Highway U.S. 40; thence northerly along Highway U.S. 40 to Rivers Street; thence westerly along Rivers Street to 11th Street; thence northerly along 11th Street to Johns Avenue; thence westerly along Johns Avenue to Collins Avenue; thence northerly along Collins Avenue to Morton Avenue; thence westerly along Morton Avenue to the Southern Pacific Company right of way and continuing westerly along the prolongation of Morton Avenue to the shoreline of San Pablo Bay; thence southerly and westerly along the shoreline and waterfront of San Pablo Bay to Point San Pablo; thence southerly along an imaginary line from Point San Pablo to the San Francisco waterfront at the foot of Market Street; thence westerly along said waterfront and shoreline to the Pacific Ocean; thence southerly along the shoreline of the Pacific Ocean to the point of beginning.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Sacramento or San Francisco, Calif.

No. MC 32838 (Sub-No. 16), filed August 13, 1975. Applicant: ST. LOUIS–KANSAS CITY EXPRESS, INC., 26 E. Mercury Blvd., P.O. Box 333, Chesterfield, Mo. 63017. Applicant's representative: Herman W. Huber, 101 East High Street, Jefferson City, Mo. 65101. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, commodities in bulk and household goods as defined by the Commission), (1) Between Jefferson City, Mo. and Reform, Mo.: From Jefferson City, Mo. over U.S. Highway 54 to junction Missouri Highway 94, thence over Missouri Highway 94 to junction Callaway County Route D, thence over Callaway County Route D to junction Callaway County Route O, thence over Callaway County Route O to junction Callaway County Route CC, thence over Callaway County Route CC to Reform, Mo., and return over the same route, serving the intermediate points of Wainwright, Tebbetts, Mokane and Portland, Mo. and the off-route point of the facilities of the Union Electric Company at or near Reform, Mo.; (2) Between junction Missouri Highway 94 and Callaway County Route CC and Reform, Mo.: From junction Missouri Highway 94 and Callaway County Route CC over Callaway County Route CC to Reform, Mo., and return over the same route, serving the intermediate point of Steedman, Mo. and the off-route points of the facilities of the Union Electric Company at or near Reform, Mo.; (3) Between junction U.S. Highway 54 and Callaway County Route O and junction Callaway County Route O and Callaway County Route CC: From junction U.S. Highway 54 and Callaway County Route O over Callaway County Route O to junction Callaway Route CC, and return over the same route, serving no intermediate points, and serving the termini for the purpose of joinder only; and (4) Between junction Interstate Highway 70 and Callaway County Route D and junction Callaway County Route D and Callaway County Route O: From junction Interstate Highway 70 and Callaway County Route D over Callaway County Route D to junction Callaway County Route O, and return over the same route, serving Readsville, Mo. as an intermediate point, and the termini for the purpose of joinder only.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Jefferson City or St. Louis, Mo.

No. MC 33919 (Sub-No. 13), filed October 22, 1975. Applicant: FAIRCHILD GENERAL FREIGHT, INC., P.O. Box 1649, Yakima, Wash. 98907. Applicant's representative: George H. Hart, 1100 IBM Building, Seattle, Wash. 98101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers*, from ports of entry on the International Boundary line between the United States and Canada, located at or near Osoyoos, Wash., to Anaheim, Calif.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Seattle, Wash.

No. MC 35628 (Sub-No. 379), filed October 23, 1975. Applicant: INTERSTATE MOTOR FREIGHT SYSTEM, 134 Grandville Avenue, SW., Grand Rapids, Mich. 49502. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment): Serving the plantsite and other facilities of Stormor, at or near Fremont, Nebr., as an off-route point in connection with applicant's otherwise authorized operations.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr., or Chicago, Ill.

No. MC 51146 (Sub-No. 449), filed October 20, 1975. Applicant: SCHNEIDER TRANSPORT, INC., 2661 South Broadway, Green Bay, Wis. 54304. Applicant's representative: Neil A. DuJardin, P.O. Box 2298, Green Bay, Wis. 54306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Chemicals* (except in bulk), from Blooming Prairie, Minn., to points in the United States (except Alaska and Hawaii); and (2) *materials and supplies*, used in the manufacture and distribution of chemicals and chemicals, from points in the United States (except Alaska and Hawaii), to Blooming Prairie, Minn.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 59098 (Sub-No. 10), filed June 3, 1975. Applicant: KNAPP'S EXPRESS, INC., 37 Emerson Street, Ridgefield Park, N.J. 07660. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Floor coverings and materials, equipment and supplies* used in the installation and sale of floor coverings, between points in New Jersey, on the one hand, and, on the other, Ridgefield Park (Bergen County), N.J., points in Orange, Rockland, Putnam, and Suffolk Counties, N.Y., and points in Fairfield County, Conn.; and (2) *textile products*, between Ridgefield Park (Bergen County), N.J., on the one hand, and, on the other, points in Suffolk County, N.Y.

NOTE.—Applicant states that the requested authority in (1) above will be tacked at Ridgefield, N.J. (a) with its existing authority in MC–59098 and Sub-No. 8, to provide service on the named commodities between points in New Jersey on the one hand, and, on the other, New York, N.Y., points in Nassau and Westchester Counties, N.Y., and those in Hudson, Bergen, Essex, Passaic, Union, Morris, Ocean, Sussex, Middlesex, Somerset, Monmouth, and Mercer Counties, N.J.; and (b) with Sub-No. 7 to provide service from points in New Jersey, to points in Suffolk County, N.Y. Applicant further states that the authority in (2) above will be tacked at Ridgefield, N.J. with its existing authority in MC–59098 and Sub-No. 5, to provide service on the named commodities between points in New Jersey, on the one hand, and, on the other, New York, N.Y., and points in Nassau and Westchester Counties, N.Y. Applicant states that no duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at either New York, N.Y. or Newark, N.J.

No. MC 59247 (Sub-No. 8), filed October 20, 1975. Applicant: LINDEN MOTOR FREIGHT CO., INC., 1300 Lower Road, Linden, N.J. 07036. Applicant's representative: William Biederman, 280 Broadway, New York, N.Y. 10007. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Antifreeze* (except in bulk, in tank trucks), from the plantsite and warehouse of Union Carbide Corp. at Freehold, N.J., to points in Connecticut, Delaware, Massachusetts, Rhode Island, and that part of Maryland east of a line beginning at the Pennsylvania-Maryland State Boundary line and extending along Interstate Highway 83 (formerly U.S. Highway 111) to Baltimore, Md., thence along Maryland Highway 2 to Annapolis, Md., including points in Maryland on the Del-Mar Peninsula, and that part of New York east and south of a line beginning at the junction of the New York-Vermont State Boundary line on New York Highway 7 and extending in a northwesterly direction to Saratoga Springs, N.Y., thence in a westerly direction to Gloversville, N.Y., thence in a southerly direction to New York Highway 7, and extending along New York Highway 7 in a southwesterly direction to the junction of New York Highway 7 and U.S. Highway 11, thence along U.S. Highway 11 in a southerly direction to the New York-Pennsylvania State Boundary line, including New York, N.Y. and points on Long Island, N.Y., that part of Pennsylvania east of a line beginning at the New York-Pennsylvania State Boundary line and extending along U.S. Highway 11 to Harrisburg, Pa., thence along Interstate Highway 83 (formerly portion of U.S. Highway 111) to York, Pa., thence along unnumbered highway (formerly portion of U.S. Highway 111) to the

V 40 N 220 NOV 13 75 XUM

Pennsylvania-Maryland State Boundary line, including points on the indicated portions of the highway specified.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either New York City or Washington, D.C.

No. MC 61592 (Sub-No. 374), filed October 6, 1975. Applicant: JENKINS TRUCK LINE, INC., P.O. Box 697, R.R. No. 3, Jeffersonville, Ind. 47130. Applicant's representative: E. A. DeVine, P.O. Box 737, 101 First Avenue, Moline, Ill. 61265. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Tractor and trailer parts*, from Denmark, S.C. and Holland, Mich. and the ports of entry on the International Boundary line between the United States and Canada located at Buffalo, N.Y., (on traffic from Welland, Ontario, Canada), to Los Angeles and Milpitas, Calif., Portland, Oreg. and Seattle, Wash.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at San Francisco, Calif.

No. MC 83539 (Sub-No. 420), filed October 14, 1975. Applicant: C & H TRANSPORTATION CO., INC., 1936–2010 West Commerce Street, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Thomas E. James (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron and steel articles*, from the plantsite and storage facilities of North Star Steel Company at or near Wilton, Iowa, to points in the United States, including Alaska but excluding Hawaii; and (2) *materials, equipment and supplies* used in the manufacture and distribution of iron and steel articles, from points in the states named in Part (1) above, to the plantsite and storage facilities of North Star Steel Company at or near Wilton, Iowa, restricted to traffic originating at and destined to the above-named points.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at St. Paul, Minn. or Washington, D.C.

No. MC 94430 (Sub-No. 37) (Amendment), filed October 16, 1975, published in the FEDERAL REGISTER issue of November 6, 1975, republished as amended this issue. Applicant: WEISS TRUCKING COMPANY, INC., Mongo, Ind. 46771. Applicant's representative: James R. Stiverson, 1396 West Fifth Avenue, P.O. Box 12241, Columbus, Ohio 43212. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, in bulk, from Owensboro, Ky., to points in Alabama, Arkansas, Georgia, Illinois, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Missouri, North Carolina, Ohio, South Carolina, Tennessee, Virginia, and West Virginia.

NOTE.—The purpose of this republication is to delete "in tank vehicles" from the commodity description. If a hearing is deemed necessary, applicant requests it be held at either Washington, D.C. or Louisville, Ky.

No. MC 95540 (Sub-No. 936), filed October 3, 1975. Applicant: WATKINS MOTOR LINES, INC., 1120 West Griffin Road, P.O. Box 1636, Lakeland, Fla. 33801. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Road sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Piece goods*, from points in Texas, to points in North Carolina and South Carolina.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Atlanta, Ga.; Fort Worth, Tex. or Washington, D.C.

No. MC 103993 (Sub-No. 859), filed October 22, 1975. Applicant: MORGAN DRIVE-AWAY, INC., 28651 U.S. Highway 20 west, Elkhart, Ind. 46514. Applicant's representative: Paul D. Borghesani and James B. Buda (same address as applicant). DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing Management

[Docket No. D-75-383]

REGIONAL ADMINISTRATORS ET AL.

Redelegation of Authority With Respect to Housing Management

The Department of Housing and Urban Development is amending §§ 236.72 and 425.22 of Title 24 of the Code of Federal Regulations in order to implement an amendment to Section 236 of the National Housing Act contained in Section 212(5) of the Housing and Community Development Act of 1974 respecting the establishment of admission income limits. These amendments are being published concurrently with publication of this redelegation (see Rules and Regulations section of this issue). The amendments to Sections 236 and 425 are the same, and permit the establishment of income limits for assisted admission to Section 236 projects on the basis of individual projects as well as on an area wide basis. Since the authority to establish income limits is presently excepted from the Redelegation of Authority With Respect to Housing Management from the Assistant Secretary for Housing Management to Regional Administrators and subordinate field officials, the redelegation is being amended to permit those officials to take necessary income establishing actions.

Accordingly, Sections A, C, and D of the Redelegations of Authority With Respect to Housing Management published at 35 FR 16105 on October 14, 1970, are hereby amended and new sections N and O are added.

1. Section A, Subsection 1, Paragraph a is amended to read as follows:

a. Establish income limits: *Provided*, That each Regional Administrator, Deputy Regional Administrator, Area Director and Deputy Area Director, for projects receiving interest reduction payments under Section 236 of the National Housing Act, is authorized to establish project-by-project income ceilings higher or lower than 80 per centum of the median for the area on the basis of his findings that such variations are necessary because of prevailing levels of construction costs, unusually high or low family incomes, or other factors.

2. Section C, Subsection 1, Paragraph a is amended to read as follows:

a. Establish income limits: *Provided*, That each Insuring Office Director and Insuring Office Deputy Director, for projects receiving interest reduction payments under Section 236 of the National Housing Act, is authorized to establish project-by-project income ceilings higher or lower than 80 per centum of the median for the area on the basis of his findings that such variations are necessary because of prevailing levels of construction costs, unusually high or low family incomes, or other factors.

3. Section D is amended by adding a new paragraph 3 as follows:

3. For projects receiving interest reduction payments under Section 236 of the National Housing Act, to exercise the power and authority of the Secretary redelegated under Section A to establish project-by-project income ceilings higher or lower than 80 per centum of the median for the area on the basis of his findings that such variations are necessary because of prevailing levels of construction costs, unusually high or low family incomes, or other factors.

4. A new section N is added to read:

Sec. N. *Additional authority redelegated to Directors of Housing Management, Insuring Offices.* Each Director, Housing Management Division, Insuring Office, for projects receiving interest reduction payments under Section 236 of the National Housing Act, is authorized to establish project-by-project income ceilings higher or lower than 80 per centum of the median for the area on the basis of his findings that such variations are necessary because of prevailing levels of construction costs, unusually high or low family incomes or other factors.

5. The present section N is redesignated section O and is amended to read:

Sec. O. *Exercise of delegated authority.* Redelegations of authority made under sections A through N shall not be construed to modify or otherwise affect the administrative and supervisory powers of the Regional Administrators, Area Director, or Insuring Office Director, or any of them, to whom a delegate is responsible.

(Secretary's delegation of authority published at 36 FR 5005, March 16, 1971)

Effective date. These amendments are effective November 13, 1975.

H. R. CRAWFORD, *Assistant Secretary for Housing Management.*

Federal Insurance Administration

[Docket No. N-75-376]

NATIONAL FLOOD INSURANCE PROGRAM

Notice of Flood-Prone Areas of Communities; Prohibition of Federal and Federally Related Assistance

The purpose of this notice is to provide a list of communities that contain areas of special flood hazard potentially subject to the provisions of Section 202 of the Flood Disaster Protection Act of 1973 (PL 93-234) on July 1, 1975, or an appropriate later date, and to provide a convenient reference for interested persons, communities, Federal agencies and instrumentalities, and others involved in assuring compliance with that section. This list supersedes and up-dates the list published in the Federal Register at 40 F.R. 47818-47825.

Section 202 provides that effective July 1, 1975, Federal agencies and federally supervised, approved, insured, or regulated lending institutions are prohibited from providing financial assistance or making loans for acquisition or construction purposes in areas which (a) have been designated by the Secretary of Housing and Urban Development as Special Flood Hazard Areas for at least one year; and (b) are in communities which are not participating in the National Flood Insurance Program (42 USC §§ 4001-4128).

The prohibition does not apply to any loan made by a federally-supervised, approved, insured, or regulated lending institution made prior to January 1, 1976, to finance the acquisition of a previously occupied residential dwelling.

Each of the communities listed below received notice of its designation as flood-prone prior to December 1, 1974, and legal notice was furnished of such designation by publication under Part 1915 of Title 24 of the Code of Federal Regulations in the FEDERAL REGISTER. These communities have failed to provide the Federal Insurance Administrator with sufficient technical or scientific data to rebut their designation as flood prone nor have they as yet qualified for participation in the National Flood Insurance Program. Thus, the sanctions of Section 202 apply as of July 1, 1975, or one year after a community's identification, whichever is later, *until the community participates in the program.*

In order to continue Federal or federally related assistance or lending in its Special Flood Hazard Area, a community must apply for and be made eligible for participation in the program in accordance with 24 CFR (Parts 1909 to 1920). Communities may receive assistance in applying for participation by contacting the Federal Insurance Administration, 451 Seventh St., S.W., Washington, D.C. 20410, (202) 755-5581, or its toll-free numbers 800-424-8872 or 800-424-8873.

Communities on this list may be made eligible to participate in the program after the date of publication of this list. Such eligibility will be published periodically in the FEDERAL REGISTER under 24 CFR § 1914.4 *List of eligible communities.* At that time the sanctions of Section 202 will no longer apply to the communities listed below.

Issued in Washington, D.C. on November 5, 1975.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[FR Doc.75-30287 Filed 11-13-75;8:45 am]

Office of the Secretary

[Docket No. D–75–384]

SECRETARY OF THE INTERIOR Delegation of Authority

Pursuant to the authority vested in me to exercise certain of the powers and authorities of the President with respect to Federal disaster assistance pursuant to Section 1 of the Executive Order entitled, "Delegating Disaster Relief Functions Pursuant to the Disaster Relief Act of 1974" (E.O. 11795, 39 FR 25939, dated July 11, 1974), I hereby delegate to the Secretary of the Interior, subject to the general policy guidance and coordination of the Administrator of the Federal Disaster Assistance Administration, certain of the authority, functions and powers granted by Section 202 of the Disaster Relief Act of 1974 (hereinafter, "the Act," 88 Stat. 143, 42 U.S.C. 5121 Note) with respect to disaster warnings for an earthquake, volcanic eruption, landslide, mudslide, or other geological catastrophe, and for those fires for which the Department of the Interior presently provides fire warning services in support of Federal and State agencies, to wit:

1. The authority contained in Section 202(b) of the Act (with the exception of the authority to direct appropriate Federal agencies to provide technical assistance) to provide technical assistance to State and local governments to ensure that timely and effective disaster warning is provided;

2. The authority contained in Section 202(c) of the Act to utilize or to arrange for the use, where practicable, by Federal, State, and local agencies the facilities of any Federal communications system (other than the civil defense communications system established and maintained pursuant to Section 201(c) of the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2281(c))) for the purpose of providing warning to governmental authorities and the civilian population in areas endangered by disasters;

3. The authority contained in Section 202(d) of the Act to enter into agreements with the officers or agents of any private or commercial communications systems who volunteer the use of their systems on a reimbursable (upon approval by the FDAA Administrator, where Disaster Relief Act funds are involved) or nonreimbursable basis for the purpose of providing warning to governmental authorities and the civilian population endangered by disasters; and

4. The authority to issue such rules and regulations as may be necessary and appropriate to effectuate this delegation.

(Disaster Relief Act of 1974, 42 U.S.C. 5121 Note; Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535 (d); Executive Order 11795, signed July 11, 1974, 39 FR 25939.)

Effective date: This delegation shall be effective November 13, 1975.

CARLA A. HILLS,
Secretary, U.S. Department of Housing and Urban Development.

I consent:

KENT FRIZZELL,
Acting Secretary, U.S. Department of the Interior.

■

EXEMPLARY PROJECTS IN VOCATIONAL EDUCATION

Criteria For Selection of Applicants for FY 1976

V 40 220 NOV 13 75 XUM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 103]

EXEMPLARY PROJECTS IN VOCATIONAL EDUCATION

Criteria for Selection of Applicants for Fiscal Year 1976

Pursuant to the authority contained in Section 142(c) of Part D of the Vocational Education Act of 1963, as amended (20 U.S.C. 1302(c)), notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to amend Part 103 of Title 45 of the Code of Federal Regulations by revising Appendix A to read as set forth below. The proposed revised Appendix will supersede all criteria previously published for the selection of applications under the program of support for Exemplary Projects in Vocational Education.

(a) *Program purpose.* (1) Section 142 (c) of Part D of the Vocational Education Act of 1963, as amended (20 U.S.C. 1302(c)), provides for federally administered grants and contracts for Exemplary Projects in Vocational Education. The purposes of these exemplary projects are to: (i) Create bridges between school and earning a living for young people who are still in school, who have left school either by graduation or by dropping out, or who are in postsecondary programs of vocational education; (ii) Promote cooperation between public education and manpower agencies; (iii) Broaden occupational aspirations and opportunities for youths, with special emphasis given to youths who have academic, socio-economic, or other handicaps; and (iv) Provide for the participation in the program of students enrolled in private nonprofit schools.

(2) *Other program information.* (i) These projects are conducted under grants or contracts awarded by the Commissioner of Education in accordance with the provisions of Part D of the Act and with the applicable Federal regulations (45 CFR Part 103); (ii) Eligible applicants may include local educational agencies, State boards for vocational education, and public and private agencies, institutions, or organizations; and (iii) These exemplary projects represent bridging efforts between research and development and actual operations in school settings.

(b) *Regulations and criteria.* Regulations relating to the administration of the exemplary projects program under Part D of the Vocational Education Act of 1963 are contained in 45 CFR Part 103. (See particularly 45 CFR 103.21–26.) Specific criteria in 45 CFR 103.25 for the review of applications submitted to the Commissioner of Education under the program are superseded by this notice for fiscal year 1976. General regulations relating to general fiscal and administrative provisions for all Office of Education programs are contained in 45 CFR Part 100 and 100a. These general regulations contain general criteria for the review of applications under Office of Education project type programs (45 CFR 100a.26), and are also applicable to the program under Part D of the Act.

(c) *Criteria.* Superseding the criteria for review of applications already published in the FEDERAL REGISTER, as described above, the criteria set forth in the proposed revised Appendix A to the regulations in 45 CFR Part 103 will be applicable in connection with the review of applications for new projects to be awarded in fiscal year 1976 under Part D.

(d) *Written comments.* Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed criteria to: Division of Research and Demonstration, U.S. Office of Education, 7th & D Streets, S.W., Room 5042, Regional Office Building Three, Washington, D.C. 20202. Comments received in response to this notice will be available for public inspection at the above office on Mondays through Fridays between 8:30 a.m. and 4:00 p.m. All relevant material to be considered must be received on or before December 15, 1975.

(Catalog of Federal Domestic Assistance Program Number 13.502; Vocational Education—Innovation) (Exemplary Projects in Vocational Education).

Dated: September 25, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Approved: November 3, 1975.

DAVID MATHEWS,
Secretary of Health, Education, and Welfare.

PART 103—RESEARCH AND TRAINING, EXEMPLARY AND CURRICULUM DEVELOPMENT PROGRAMS IN VOCATIONAL EDUCATION

Appendix A is revised as follows:

APPENDIX A

EXEMPLARY PROJECTS IN VOCATIONAL EDUCATION; CRITERIA FOR FISCAL YEAR 1976

(a) *Priority of awards.* In awarding grants from funds available for this program, the Commissioner will give priority to applications for planning grants and to applications for three-year demonstration projects which rank high on the basis of criteria published herein and which involve, in a single operational setting, one of the three program priority areas described below as well as the additional three program features which are required of all applicants. (A single operational setting may be defined as a school, a group of schools, a community and/or several communities in sufficiently close proximity to permit effective project management and supervision, and to insure that the activities being undertaken will achieve maximum impact and visibility within the defined geographic area.)

In awarding grants for Part D projects in fiscal year 1976, the U.S. Office of Education will utilize a two-step selection process. The first step will be the acceptance of applications for planning grants and the negotiation of grant awards of $5,000 or less to the successful applicants. The planning grant period will culminate with the second step which is the receipt of full proposals both from the recipients of the planning grants and from other interested agencies and institutions who feel that their stage of development is past that of planning. From those submitting full proposals, applicants will be selected who will receive three-year grant awards for program implementation and demonstration. Closing dates for the receipt of planning grant applications and for the receipt of full proposals will be announced in the FEDERAL REGISTER.

Those agencies and institutions which receive planning grant awards but ultimately elect not to submit a full proposal will submit a final report which documents the planning process undertaken and the conditions which either facilitated or impeded that process;

The U.S. Office of Education, where possible, will fund three planning projects of not more than three months duration in each of the eligible States. One planning project for each of the three priority areas will be selected per State, provided that the planning grant applications received are deemed adequate by the review panel and the U.S. Office of Education.

From the full implementation and demonstration proposals which are submitted, the U.S. Office of Education will fund at least one three-year project in each eligible State and Territory. The initial funds will be awarded only for the first year of project operation. Continuation funding for the second and third years will be based on evidence of satisfactory progress during the previous twelve months and will be subject to changes in legislation and appropriations by the Congress.

Program Priority Area 1. Demonstration of the National Institute of Education's (NIE's) Experience-Based Career Education Program. The National Institute of Education's Experience-Based Career Education Program is characterized by the following significant elements:

(1) It represents a comprehensive alternative to regular high school, offering courses which either fulfill or supplement all requirements for graduation;

(2) It is experientially oriented in that students are permitted to perform non-paid work tasks as well as to observe adults in their work environment. It entails the opportunity for exposure to more than one community site, and requires learning more than one type of work-related skill. The activities in the work place are organized to yield academic, career, and interpersonal skills as well as occupational skills; and

(3) It possesses an organizational structure made up of school and community representatives whose sole purpose is to render advisory, policy-making, or operational assistance to the program.

Experience-based programs designed for career exploration other than that developed by the National Institute of Education may be submitted for funding consideration under this priority area, provided that such programs are able to demonstrate equal evidence of effectiveness.

Program Priority Area 2. The further development and demonstration of the instructional strategies, methods, and techniques of the National Institute of Education's Experience-Based Career Education Program in conjunction with an in-school cluster structure designed for occupational exploration and initial job preparation. The cluster structure selected should be characterized by:

(1) Delivery of skills and knowledges which are common to many occupations;

(2) Provision of an obvious ladder of jobs from the skilled through the professional levels;

(3) Provision of appropriate linkages, such as linkages for determining instructional content and for arranging placement, between the instructional program and the related units of business, industry, the professions, and government; and

(4) Provision for each person leaving the cluster program to have an entry-level job skill, thereby permitting its participants to exercise the option of either getting a job or pursuing further education.

Aspects of the National Institute of Education's Experience-Based Career Education Program which appear particularly promising for implementation in conjunction with an in-school cluster structure are, among others, the learning site analysis techniques, the student learning packages with behaviorally-stated objectives, and the employer recruitment and orientation process. Descriptive materials on these methods and techniques may be obtained from the Department of Health, Education, and Welfare/U.S. Office of Education Regional Offices listed in the Notice of Closing Date for Receipt of Applications published in this issue of the FEDERAL REGISTER.

Applicants may propose the use of instructional strategies, methods, and techniques developed with other experience-based programs such as those developed under Parts B, C, D, and G of the Vocational Education Act when such programs can demonstrate equal evidence of effectiveness.

Program Priority Area 3. The further development and demonstration of the instructional strategies, methods, and techniques of the National Institute of Education's Experience-Based Career Education Program in expanded, improved, or newly developed cooperative vocational education and work experience programs, excluding Work Study Programs funded under Part H of the Vocational Education Act, Pub. L. 90-576.

Aspects of the Experience-Based Career Education Program which appear particularly promising for expanding and improving cooperative vocational education programs and work experience programs are, among others, the learning site analysis techniques, the student learning packages with behaviorally-stated objectives, and the employer recruitment and orientation process. Descriptive materials on these methods and techniques may be obtained from the Department of Health, Education, and Welfare/U.S. Office of Education Regional Offices listed in the Notice of Closing Date for Receipt of Applications published in this issue of the FEDERAL REGISTER.

Applicants may propose the use of instructional strategies, methods, and techniques developed within other experience-based programs such as those developed under Parts B, C, D, and G of the Vocational Education Act when such programs can demonstrate equal evidence of effectiveness.

(b) *Regional distribution.* While applicants under Part D, Section 142(c) will be asked to select from one of the above three priority areas, indicating on their application the priority to which the application has been addressed, the U.S. Office of Education will give priority to the funding of a minimum of one project in each of the ten Department of Health, Education, and Welfare/U.S. Office of Education Regions which is designed to demonstrate the National Institute of Education's Experience-Based Career Education Program (Program Priority Area 1).

(c) *Required program features.* In addition to selecting from the above three priority areas, applicants should include in the single operational setting defined for the project *all* of the following three program features:

(1) A systematic plan to eliminate existing sex bias and sex-role stereotyping and to avoid introducing these elements into the activities undertaken with respect to the demonstration project;

(2) A third-party, objective evaluation, the design of which should attempt to measure student outcomes against the stated objectives of the project as well as gather such process and treatment information as will show reason why the project was or was not successful in achieving the desired outcomes for the designated population of student participants; and

(3) A strong emphasis on sex-fair guidance, counseling, placement, and follow-up services.

(d) *Continuation awards.* In addition to the above emphasis for new grant awards in fiscal year 1976, continuation costs may be provided for the second or third years of demonstration projects started in fiscal year 1974 and fiscal year 1975 under this program (CFDA No. 13.502) when it is deemed that such projects are making satisfactory progress toward achieving their objectives.

(20 U.S.C. 1301–1305)

(e) *Financial sources for projects.* Since comprehensive exemplary projects will require substantial financial resources, consideration should be given in the project design to the possible coordination with relevant programs supported from other sources.

(20 U.S.C. 1301, 1303(a))

(f) *Application review criteria—program priority areas.* The criteria which will be utilized in reviewing applications in fiscal year 1976 will be the same for initial planning projects and for three-year implementation and demonstration projects.

With respect to planning projects, applicants should submit a completed application form, a letter of not more than ten single-spaced pages, and other documentary evidence which indicates a capability to plan and, if successful in the final selection process, to implement an Exemplary Project in Vocational Education which will demonstrate one of the three major program priority areas as well as the additional three features (elimination of sex bias and sex-role stereotyping; evaluation; and sex-fair guidance, counseling, placement, and follow-up services) which are required of all applicants.

Applicants for a three-year implementation and demonstration project should submit a completed application form and a full narrative proposal.

Segments or a segment of the letter or other evidence presented in an application for a planning project or, in the case of a three-year project, the narrative proposal must address each criterion area outlined below depending on the priority area to which the application is addressed *and* the general criteria which are outlined for all applications. Each criterion area is weighted and includes the maximum score that can be given to a segment of a letter, a narrative proposal, or other evidence in relation to the criteria. Applications which score below 30 percent of the total maximum score possible will not receive further funding consideration in fiscal year 1976. These criteria supersede the criteria set forth in 45 CFR 100a.26 and 103.25 as to this program for fiscal year 1976. The criteria for the three major priority areas and maximum weights for each criterion area are as follows:

Program Priority Area 1. Demonstration of the National Institute of Education's Experience-Based Career Education Program. Applications submitted for consideration under this priority area will be evaluated on the extent to which:

Maximum Score 40 (1) A capability is demonstrated to provide the following curriculum and instructional aspects. Applicants should assure the existence of a capability and willingness to:

(i) Award credit in academic subjects (e.g., English, science, mathematics, and social sciences) for successful completion of experience-based career education projects in the community, and assure that this credit will contribute to the satisfaction of requirements for the standard diploma, certificate, or degree;

(ii) Base the educational program on experiential learning where students are actively involved in work throughout the community and have access to adults in their normal working environment;

(iii) Insure that each student has an individualized learning plan into which the student has had a significant input; and

(iv) Insure that within the overall learning plan, the experience is designed to integrate career decision-making skills, basic academic skills, job-related skills, and skills needed in other life roles (e.g., family, community, political).

Maximum Score 20 (2) The applicant evidences the ability to organize and manage an experience-based career education program. Applicants should show evidence of the capability to:

(i) Establish a learning center (as defined in descriptive materials to be furnished potential applicants upon request) for the program and maintain a full-time program manager with overall responsibility; and

(ii) Facilitate student transportation to and from community learning sites. Indicate the availability of public and/or private means of transportation.

Maximum Score 30 (3) Conditions of student participation are established. Applicants should:

(i) Discuss the population from which students will be selected. While it is preferred that the program seek a representative cross-section by selecting from the entire "pool" of students (of appropriate grade level) within the operational site, proposals directed at special populations will also be considered; and

(ii) Provide assurance that student participants will satisfy the following requirements as a prerequisite to enrollment in the program. Students under 18 will obtain written parental permission to participate in the program and permit program officials to collect and utilize resulting evaluation data. Students 18 years of age or older will give written consent for program officials to collect and utilize evaluation data.

Maximum Score 20 (4) The applicant has assured access to employer/community resources as outlined below. Applicants should:

(i) Discuss the extent to which schools and communities are likely to accept/support the experience-based career education effort by indicating the nature and extent of support from key community groups representing labor, management, teachers, supervisors, parents, etc.; by providing statements of official school policy and/or examples of existing off-campus educational programs for which academic credit is awarded; and by describing other current or previous programs involving cooperation between business, labor, community, and schools; and

(ii) Indicate capability and intent to orient and train employer and community resource people to insure their understanding of their roles with respect to the program's educational objectives.

(5) The applicant submitting an experience-based program other than that developed by the National Institute of Education for consideration for funding under this priority area has submitted supporting documentation which permits its comparison with the documentation of effectiveness submitted by the National Institute of Education. (When the evidence of effectiveness so submitted is, in the judgment of the review panel, inferior to that for the Experience-Based Career Education Program, the proposal for a planning project or for an implementation and demonstration project will be automatically disqualified.)

Program Priority Area 2. The further development and demonstration of the instructional strategies, methods, and techniques of the National Institute of Education's Experience-Based Career Education Program in coordination with an in-school

V 40 NO 220 NOV 13 75 XUM

cluster structure designed for occupational exploration and initial job preparation. Proposals developed for consideration under this priority area will be evaluated on the extent to which:

Maximum Score 30 (1) The selected cluster programs will be implemented in such a way as to insure the use of such instructional strategies, methods, and techniques of the National Institute of Education's Experience-Based Career Education Program as the site analysis techniques, the employer orientation and recruitment techniques, and the individual student learning plans to insure a high level of involvement of educational, business, industrial, labor, and professional organizations and institutions both in the classroom and in the provision of career exploratory and career preparation opportunities in the community;

(2) The applicant proposing the use of instructional strategies, methods, and techniques other than those developed by the National Institute of Education in the Experience-Based Career Education Program has submitted supporting documentation which permits its comparison with the documentation of effectiveness submitted by the National Institute of Education. (When the evidence of effectiveness so submitted is, in the judgment of the review panel, inferior to that submitted by the National Institute of Education, the proposal for a planning project or for an implementation and demonstration project will be automatically disqualified.);

Maximum Score 10 (3) The applicant proposing the phasing-in of clusters over the life of the project has provided a projected schedule.

Maximum Score 40 (4) The applicant organization has selected a cluster structure for implementation which is characterized by:

(i) Delivery of skills and knowledges which are common to many occupations;

(ii) Provision of an obvious ladder of jobs from the skilled through the professional levels;

(iii) Provision of appropriate linkages, such as linkages for determining instructional content and for arranging placement, between the instructional program and the related units of business, industry, the professions, and government; and

(iv) Provision for each person leaving the cluster program to have an entry-level job skill, thereby permitting its participants to exercise the option of either getting a job or pursuing further education.

Maximum Score 10 (5) The applicant has described the ways in which the cluster program will be coordinated with the regular vocational offerings at the secondary and postsecondary levels.

Program Priority Area 3. The further development and demonstration of the instructional strategies, methods, and techniques of the National Institute of Education's Experienced-Based Career Education Program in expanded, improved, or newly developed cooperative vocational education and work experience programs, excluding Work Study Programs funded under Part H of the Vocational Education Act, P.L. 90–576. Proposals developed for consideration under this priority area will be evaluated on the extent to which:

Maximum Score 30 (1) The applicant has made a commitment to the use of such instructional strategies, methods, and techniques of the Experience-Based Career Education Program as the site analysis techniques, the employer orientation and recruitment techniques, and the individual student learning plan;

(2) The applicant proposing the use of instructional strategies, methods, and techniques other than those developed by the National Institute of Education in the Experience-Based Career Education Program has submitted supporting documentation which permits its comparison with the documentation of effectiveness submitted by the National Institute of Education. (When the evidence of effectiveness so submitted is, in the judgment of the review panel, inferior to that submitted by the National Institute of Education, the proposal for a planning project or for an implementation and demonstration project will be automatically disqualified.); and
